> If a producer's refund obligation has not been completely discharged by October 1, 1977, such producer will be obligated to refund in cash plus 7 percent interest effective from August 1, 1971, the outstanding refund obligation. (Emphasis supplied) (46 F.P.C. at 148)

Shell, Calco and GA argue that, since the interest rate was affirmatively fixed by the Commission on the face of its opinion, and since that opinion was affirmed by the United States Court of Appeals for the Fifth Circuit and by the United States Supreme Court, that the Commission cannot now provide for a different interest rate applicable to refunds ordered pursuant to that Opinion, but which have not yet been ordered to be disbursed because of the refund work-off period provided therein. Shell, Calco and GA therefore seek either a clarifying order stating that the 9% interest rate should not be applied to refunds ordered pursuant to the terms of Opinion No. 598 or, if the Commission intends that the 9% rate should apply in such a case, for rehearing of Order No. 513–A on that issue.

The Municipals in their petition for rehearing of Order No. 513–A filed on August 4, 1976, argue that it is unreasonable and discriminatory to determine whether 7% interest or 9% interest is to be paid on excess amounts collected after October 10, 1974 on the basis of whether a final, non-appealable order has been issued in a case. The Municipals cite *Austral Oil Co.* v. *FPC*, 428 F. 2d 407, 444–45 (5th Cir. 1970), clarified on rehearing, 444 F. 2d 125 (1971) for the proposition that the Commission has not only the authority but also the duty to stay, modify or rescind any part of a final, non-appealable order where changed circumstances have made such a change advisable in the public interest. They further contend that the Court of Appeals opinion in *American Public Gas Association, et al* v. *FPC*, No. 75–1104, (D.C. Cir., May 19, 1976) has removed the matter from Commission discretion and made it mandatory that the Commission apply Order No. 513–A retroactively to all excess amounts collected since October 10, 1974, irregardless of the finality of the Commission's orders. The Municipals argue additionally that even if the Commission had discretion as to whether or not it would re-open cases in which a final, non-appealable order had been issued, the Commission would abuse its discretion if it did not reopen such cases, since the issuance or non-issuance of a final, non-appealable order does not alter the illegality of the 7% interest rate as to excess charges collected after October 10, 1974. For the above reasons, the Municipals request rehearing of Order No. 513–A and that the Commission on rehearing order all pipelines to pay a 9% interest rate on all overcharges collected after October 10, 1974, regardless of whether or not final, non-appealable orders had previously issued in a given rate proceeding.

Because of the diversity and complexity of the issues raised by the above petitions, and in order to have before us all issues which may be raised in petitions for rehearing of Order No. 513–A, it is appropriate that the Commission have additional time in which to consider the issues involved. The above applications for rehearing shall therefore be granted for the limited purposes of further consideration and study of the Commission's Order No. 513–A.

The Commission finds: In order to afford the Commission additional time for the consideration of the issues discussed in the applications for rehearing of Shell, Calco, General American and the Municipal distributors named herein, and to allow for responsive pleadings on all issues, it is necessary and proper in the administration of the Natural Gas Act to grant rehearing of the Commission's Order No. 513–A issued in this proceeding on July 14, 1976, for the limited purpose of further consideration.

The Commission orders: Rehearing of the Commission's Order No. 513–A issued on July 14, 1976, in this proceeding is hereby granted for the limited purpose of further consideration.

By the Commission.

KENNETH F. PLUMB,
Secretary.

APPENDIX A.—LIST OF MEMBERS OF MUNICIPAL GROUPS BY PIPELINE SUPPLIER

1. Cities Service Gas Company (RP74–4).—Kansas: Abbyville, Altamont, Argonia, Auburn, Burlingame, Danville, Howard, Humboldt, Iola, Lancaster, Lebo, Neosho Rapids, Norwich, Hamilton, Olivet, Osage City, Sylvia, Chanute, McPherson, Effingham, Eskridge, Cassoday, Lancaster, Neodesha, McLouth, Uniontown, Stark, Sylvia, Viola, Partridge, Plevna, Reading, Sharon, Garnett.

2. Columbia Gas Transmission Corp. (RP 73–86, RP74–82).—Virginia: City of Charlottesville.

3. *Northern Natural Gas Company (RP74–80).*—Iowa: Brooklyn, Cascade, Emmetsburg, Des Moines, Gilmore City, Graettinger, Harlan, Hawarden, Manilla, Sioux Center, Manning, Osage, Preston, Remsen, Rolfe, Sac City, Sanborn, West Bend, Whittemore, Woodbine. Nebraska: Pender, Ponca. Minnesota: Mora, Buffalo, Hutchinson, New Prague, Circle Pines, Austin.

4. *Texas Eastern Transmission Corp. (RP 74–41).*—Illinois: Cairo. Pennsylvania: Chambersburg, Indiana: Huntingburg. Tennessee: Smyrna. Mississippi: Utica.

[Docket Nos. RP71–41, RP75–73 (PGA 76–5 DCA76–2)]

TEXAS EASTERN TRANSMISSION CORP.

Tender of Emergency Purchases Information

AUGUST 18, 1976.

Take notice that on July 12, 1976, Texas Eastern Transmission Corporation (Texas Eastern) tendered for filing information requested by the Commission's order issued June 30, 1976, in the above captioned dockets, ordering paragraph (G), with respect to the compliance with the criteria of 699–B of certain 60 day emergency purchases.

Any person wishing to do so may submit comments in writing concerning Texas Eastern's tender. All such comments should be submitted to the Federal Power Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, on or before October 29, 1976. Texas Eastern's information is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76–846]

TOLEDO EDISON CO.

Service Agreement

AUGUST 19, 1976.

Take notice that The Toledo Edison Company, on August 6, 1976, tendered for filing proposed changes in its FPC Electric Service Tariff, Original Volume Number 1 applicable to sales to Municipalities for Resale. The changes consist of filing a Service Agreement executed by the Village of Pioneer, Ohio, and Seventh Revised Sheet Number 3, List of Purchasers.

Toledo Edison states that the executed Service Agreement with the Village of Pioneer provides that the Village will be served under rate Municipal Resale Service Rate—Small and that the Service Agreement replaces a contract (Rate Schedules FPC Number 18) which will expire on September 22, 1976. An effective date of September 23, 1976 has been requested for the filed Service Agreement.

Toledo Edison states that copies of this filing were served upon the Village of Pioneer, Ohio, and the Public Utilities Commission of Ohio.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Section 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76–843]

UNION ELECTRIC CO.

Letter Agreement

AUGUST 18, 1976.

Take notice that on August 5, 1976, Union Electric Company (Union) ten-

[1] See Appendix A.

V41167 AUG 26 76 UMI

dered for filing a Letter Agreement revising the demand charge for Maintenance Energy transactions under the Interconnection Agreement dated November 1, 1969 between the Tennessee Valley Authority and Central Illinois Public Service Company, Illinois Power Company, and Union.

Union requests waiver of the filing requirements to allow an effective date of September 1, 1976, for the Letter Agreement.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washintgon, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 30, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24961 Filed 8-25-76;8:45 am]

[Docket No. ER76-852]

UNION ELECTRIC CO.

Revised Service Schedule

AUGUST 19, 1976.

Take notice that on August 9, 1976, Union Electric Company (Union) tendered for filing an Amendment and revised Appendix "C" to the Electric Service Agreement dated December 15, 1955, as amended, between Missouri Power & Light Company (MPL) and Union. Union states that said documents reflect added generating capability by MPL and the subsequent increase in the credit MPL receives in computing monthly billing demand. Union requests an effective date of June 1, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 31, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a peition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24963 Filed 8-25-76;8:45 am]

[Docket No. RP76-109]

UTAH GAS SERVICE CO.

Order Granting Intervention

AUGUST 19, 1976.

On June 4, 1976, Utah Gas Service Company (Utah Gas) tendered for filing proposed changes in its FPC Gas Tariff, Original Volume No. 1. The proposed changes would increase from $0.61715 per Mcf to $0.84275 per Mcf the cost of natural gas sold by Utah Gas to Northwest Pipeline Corporation. Notice of the filing was issued on June 15, 1976, with comments, protests, or petitions to intervene due on or before June 28, 1976.

On June 24, 1976, Northwest Pipeline Corporation filed a timely petition to intervene. Upon consideration thereof, the Commission finds that good cause exists to grant the petition.

The Commission finds. Participation by Northwest Pipeline Corporation may be in the public interest, and good cause exists to permit such intervention.

The Commission orders. (A) Northwest Pipeline Corporation is hereby permitted to intervene in this proceeding, subject to the rules and regulations of the Commission; *Provided, however*, that participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further*, that the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The Secretary shall cause prompt publication of this order to me made in the FEDERAL REGISTER.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[Docket No. E-9561]

UTAH POWER & LIGHT COMPANY, MAINE CORP. AND UTAH POWER & LIGHT COMPANY, UTAH CORP.

Order Authorizing Merger

AUGUST 19, 1976.

On June 8, 1976, Utah Power & Light Company, Maine Corporation and Utah Power & Light Company, Utah Corporation (collectively referred to as the "Applicants"), filed a joint application, pursuant to Section 203 of the Federal Power Act, requesting authorization to merge into a single corporation with the Utah Power & Light Company, Utah Corporation being the surviving corporation. The Maine Company is incorporated under the laws of the State of Maine with its principal business office at Salt Lake City, Utah, and has qualified to do business as a foreign corporation in the states of Utah, Colorado, Idaho, Wyoming and New Mexico. It owns and operates a system engaged in the generation, purchase, transmission and distribution of electric energy. The Utah Company was recently incorporated under the laws of the State of Utah for the stated purpose of furnishing a vehicle for transferring the corporate domicile of the Maine Company to the State of Utah.

The Utah Company is a wholly-owned subsidiary of the Maine Company organized solely for the purpose of accomplishing the proposed merger and changing the state of incorporation from Maine to Utah. The Utah Company is not presently engaged in business but upon consummation of the proposed merger said Company will conduct the electric utility business of the Maine Company in all respects as same was conducted prior to the merger.

The Applicants propose to merge, pursuant to a Plan of Merger which has been approved by the Board of Directors and stockholders of each company. The Articles of Incorporation and By-Laws of the Utah Corporation, taken together, are identical in all material respects with the Composite Certificate of Organization and By-Laws, taken together, of the Maine Corporation, except as to differences in form of the Articles of Incorporation which are required to comply with the provisions of the Utah Business Corporation Act. The Utah Corporation, prior to the merger, will not have any significant assets or liabilities. Following the merger, the Utah Corporation will succeed to all of the rights, assets and properties, and assume all of the obligations and liabilities of the Maine Corporation.

Upon the consummation of the proposed merger, each outstanding share of common stock and of preferred stock of each class and series of the Maine Company will automatically be converted into and become, respectively, a like share of the outstanding common or preferred stock of such class and series of the Utah Company. On the effective date of the proposed merger, the Utah Company will assume all of the funded debt and guarantees thereof the Maine Company and the one outstanding share of common stock of the Utah Company which is held by the Maine Company will be acquired by the Utah Company, cancelled and restored to the status of authorized but unissued common stock.

The proposed merger will transfer all of the operating facilities and all other property of every kind whatsoever from the Maine Company to the Utah Company. No change in the method of operation of the facilities of the Company will result from the proposed merger. Upon the consummation of the proposed merger, the Utah Company will succeed, by operation of law, to all of the rights, powers and privileges and all of the duties, obligations, and liabilities under all contracts of the Maine Company for the purchase, sale, or interchange of electric energy.

The facts relied upon by Applicants to show that the proposed merger will be consistent with the public interest are as follows:

(1) Incorporation in Utah will promote a better understanding by state and local government authorities, the Company's customers, and stockholders, and the public generally, of the Company's scope of operations, management and ownership. Although, the Company was incorporated under the laws of Maine in 1912, its principal service area, facilities and headquarters are located in the state of Utah. The Company does not conduct any business in Maine and has no property in that state.

(2) Following the merger, the Company will be relieved of compliance with the laws of the state of Maine and the taxes, fees, reports, and miscellaneous expense incident to compliance with its laws. No additional annual taxes will be payable to the state of Utah as a result of the change.

(3) The Corporate identity of the Company will be clarified in that the state of incorporation, the state appearing in the Company name, the state wherein the corporate headquarters are located, and the state in which the principal service area of the Company is located, will be one and the same state (Utah).

The Public Service Commission of Wyoming, by order issued June 2, 1976, authorized consummation of the transactions described herein.

Written notice of the application has been given to the Wyoming Public Service Commission, the Idaho Public Utilities Commission, the Utah Public Service Commission and to the Governor of each of those states. Notice has also been given by publication in the FEDERAL REGISTER, stating that any person desiring to be heard or to make any protest should on or before July 9, 1976, file petitions or protests with the Federal Power Commission, Washington, D.C. 20426. No petitions, protest or request to be heard in opposition to the granting of the application has been received.

The Commission finds. (1) Utah Power & Light Company, a Maine Corporation and Utah Power & Light Company, a Utah Corporation, are public utilities within the meaning of Section 203 of the Federal Power Act and subject to the jurisdiction of the Commission.

(2) By the proposed transaction, as described above, and as set forth in the application, the Utah Power & Light Company, a Maine Corporation, will merge or consolidate its facilities with those of Utah Power & Light Company, a Utah Corporation.

(3) The proposed acquisition and merger of the facilities of Utah Power & Light Company, Maine Corporation by Utah Power & Light Company, a Utah Corporation, upon the terms and conditions specified in the application and subject to the provisions of this order, will be consistent with the public interest as expressed in Section 203 of the Federal Power Act for the reasons set forth above.

(4) The period of public notice given in this matter is reasonable.

The Commission orders. (A) The proposed acquisition and merger or consolidation of the facilities of Utah Power & Light Company, a Maine Corporation by the Utah Power & Light Company, a Utah Corporation, all as described above, is hereby authorized and approved upon the terms and conditions set forth in the application and subject to the provisions of this order.

(B) Utah Power & Light Company, a Utah Corporation, shall record the merger transaction herein authorized and approved and the facilities and properties described above as provided in the Commission's Uniform System of Accounts Prescribed for Public Utilities and Licensees.

(C) This authorization shall expire unless the transaction herein authorized is consummated within 90 days from the date of issuance of this order.

(D) The foregoing authorization is without prejudice to the authority of this Commission or any other regulatory body with respect to rates, service, accounts, valuation, estimates or determinations of cost, or any matter whatsoever now pending or which may come before this Commission or any other regulatory body.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24968 Filed 8-25-76;8:45 am]

[Docket No. ER76-829]

WESTERN MASSACHUSETTS ELECTRIC CO.

Filing of Rate Schedule Amendments

AUGUST 19, 1976.

Take notice that Western Massachusetts Electric Company (WMECO) on July 30, 1976, tendered for filing proposed changes in Resale Service Rate CD-1 and in its FPC Electric Tariff, Original Volume No. 1 (FFC Rate Schedule No. RS-1). The Company states that the proposed changes in rates are estimated to result in an increase in billings to the Company's wholesale customers of approximately $1,650,000 as a result of the changes. In addition, WMECO proposes to amend its fuel adjustment clause to comply with Section 35.14 of the Commission's Regulations.

The increased rates are proposed by WMECO in order to recover its increased costs of service, including the capacity costs associated with its ownership interest in the nuclear generating unit known as Millstone Unit 2, which began commercial operation in December, 1975, and higher depreciation rates and to reflect the accounting procedures relating to interperiod allocations of income taxes promulgated by Commission Orders 50 and 530-B.

Copies of the filing were served upon WMECO's jurisdictional customers and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 10, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24984 Filed 8-25-76;8:45 am]

[Docket No. CP76-468 [1]]

CLEARFIELD, AND PRESCOTT, IOWA CITIES OF LENOX, BEDFORD,

Petition for Extraordinary Relief, or, in the Alternative, for an Order Pursuant to Section 7(a) of the Natural Gas Act

AUGUST 18, 1976.

Take notice that on July 14, 1976,[2] the Cities of Lenox, Bedford, Clearfield, and Prescott, Iowa (Cities or Petitioners), 201 Century Plaza Building, Wichita, Kansas 67202, filed in Docket No. CP76-468 a petition pursuant to Section 1.7(b) of the Commission's Rules of Practice and Procedure (18 CFR 1.7(b)) for extraordinary relief to obtain an increase of 798 Mcf in their combined maximum daily quantity entitlement from their sole supplier of gas, Natural Gas Pipeline Company of America (Natural), from the present authorized level of 2,055 Mcf per day to 2,853 Mcf per day in order to meet present peak day requirements and the peak day requirements of prior-committed, but as yet unattached, residential and small commercial consumers, or, in the alternative, for an order of the Commission pursuant to Section 7(a) of the Natural Gas Act directing Natural to provide such additional service, all as more fully set forth in the petition which is on file with the Commission and open to public inspection.

It is indicated that by order issued March 10, 1967, in Docket No. CP67-189 Natural was directed pursuant to Section 7(a) of the Natural Gas Act to sell and deliver the combined maximum daily entitlement of the Cities at the third year projected operating level of 2,055 Mcf for resale by each of the four municipally-owned systems. It is said that at the time of the filing of the Section 7(a) application, neither the Cities nor their citizens had any reason to believe that their respective gas distribution systems would not be permitted to experience normal growth in the future up to a level of service which provided gas to the bulk of the residents of these municipalities. Thus, it is stated, that when the four communities decided to issue revenue

[1] The subject petition was filed in Docket No. RP76-58-2; however, said petition has been assigned Docket No. CP76-468.

[2] The subject petition was tendered for filing July 14, 1976; however, the fee required by Section 159.1 of the Regulations under the Natural Gas Act (18 CFR 159.1) was not paid until August 9, 1976. Thus, filing was not completed until the latter date.

V 41 167 AUG 26 76 UMI

bonds to pay for their new gas systems, it was fully contemplated that the maximum daily entitlement of the Cities would be increased as required at least during the first 10 years of operation until the four systems had grown out of their infancy and matured to a level of service upon which their revenue bonds were premised and which their citizens were promised. However, Petitioners assert, because a supply deficiency did begin to occur on Natural's system in 1970, the Cities have remained frozen at their third year projected peak day operating level of 2,055 Mcf and have not been afforded the opportunity to achieve the growth of Natural's other distributor customers.

Cities state that they are seeking a most modest 798 Mcf increase in their peak day entitlement of 2,055 Mcf originally granted in 1967 and that, since all of their present customers would qualify as Priority 1 residential and small commercial users, none can be cut off to serve the additional residences and small businesses that have been promised natural gas since the beginning of their municipal systems. Further, it is stated that all of these additional consumers would also be properly classified as Priority 1 users and that, even if no new consumers are added by the Cities, an increase in the maximum daily gas entitlement is required to assure an adequate supply to existing consumers should a design peak day occur on the Cities' systems. Cities thus assert that even if no new consumers are attached, the peak day requirements of their present customers of 2,132 Mcf exceed their present maximum daily entitlement of 2,055 Mcf by 77 Mcf, and at the very least, an increase in Cities' maximum daily entitlement to 2,132 Mcf should be granted. Additionally, the Cities assert that they should be granted enough gas to serve the additional residential and small commercial consumers conservatively projected for the tenth year of operation and that this would require an increment of 721 Mcf to meet the design day needs of these new Priority 1 end users. It is stated that the requested 798 Mcf increase in the Cities' present maximum daily entitlement is necessary to put the Cities on a par with Natural's other distributor-customers which had the opportunity to mature fully before the gas supply deficiency began on Natural's system.

It is asserted that the request for an additional 798 Mcf on a peak day is truly *de minimis* when measured against the 967,145,000 Mcf which Natural projects it would have available for market during the 12-month period, April 1976 to March 1977, and the 3,356,200 Mcf the pipeline expects to be able to supply on the peak day. Further, it is asserted, that since the Cities' incremental peak day entitlement would be consumed exclusively by Priority 1 customers, while Natural is now serving many lower priority end users, the Cities' request is consistent with the Commission's end use policy of encouraging the delivery of natural gas to the highest priority consumers, and no harm would result to any existing high priority customers served by Natural.

Any person desiring to be heard or to make any protest with reference to said petition should on or before September 13, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10) and the regulations under the Natural Gas Act (18 CFR 156.9). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-24999 Filed 8-25-76;8:45 am]

[Docket No. RP72-142; PGA 76-7]

CITIES SERVICE GAS CO.

Proposed Changes in FPC Gas Tariff

AUGUST 19, 1976.

Take notice that Cities Service Gas Company (Cities Service) on August 6, 1976, tendered for filing proposed changes in its FPC Gas Tariff, Second Revised Volume No. 1. Cities Service states that the proposed changes are based solely on increased purchase gas costs which will result from filings by one of its pipeline suppliers, Transwestern Pipeline Company (Transwestern).

Cities Service states that it has filed its First Revised Sixteenth Revised Sheet PGA-1 to be effective September 23, 1976, to reflect the rates on Transwestern's Substitute Third Revised Sheet Nos. 5 and 6.

Transwestern has filed its Substitute Third Revised Sheet Nos. 5 and 6 to its FPC Gas Tariff, Second Revised Volume No. 1, to track producers' increases resulting from Opinion Nos. 749 and 749-A. Such rates will become effective August 1, 1976.

Cities Service states that copies of its filing were served on all jurisdictional customers, interested state commissions and all parties to the proceeding in Docket Nos. RP72-142 and RP76-13.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, Union Center Plaza Building 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 27, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25000 Filed 8-25-76;8:45 am]

[Docket No. ES76-62]

INTERSTATE POWER CO.

Application

AUGUST 19, 1976.

Take notice that on July 29, 1976, an application was filed with the Federal Power Commission pursuant to Section 204 of the Federal Power Act by Interstate Power Company (Applicant), seeking an order authorizing the issuance of $25,000 principal amount of First Mortgage Bonds, due 2001, and 400,000 shares of its authorized but unissued Preference Stock of the par value of $1 per share.

Applicant is incorporated under the laws of the State of Delaware, with its principal business office in Dubuque, Iowa, and is engaged principally in the electric utility business in northern and northeastern Iowa, in southern Minnesota and a few small communities in Illinois.

The Bonds proposed to be issued will be in the aggregate principal amount of $25,000,000 and will bear interest at a rate and shall be sold at a price to be determined by competitive bids which the Applicant proposes publicly to invite pursuant to the requirements of Section 34.1a(b) of the Commission's Regulations under the Federal Power Act. The Bonds will be dated as of October 1, 1976, and will be expressed to mature on October 1, 2001, and will be issued under a Fifteenth Supplemental Indenture to be dated as of October 1, 1976.

Applicant proposes to issue 400,000 shares of its authorized but unissued Preference Stock of the par value of $1 per share. The dividend rate is proposed to be determined pursuant to competitive bidding on or about September 28, 1976, and to be sold in accordance with the requirements of Section 34.1a(b) of the Commission's Regulations.

Applicant proposes to use the proceeds from the issuance of the securities to pay off a portion of short-term loans incurred and to be incurred prior to the sale of the Bonds and the Preference Stock to secure funds for construction purposes.

Any person desiring to be heard or to make any protest with reference to said application should, on or before August 31, 1976, filed with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file and available for public inspection.

KENNETH F. PLUMB,
Secretary.

IOWA POWER AND LIGHT CO.

Application

AUGUST 19, 1976.

Take Notice that on July 29, 1976, Iowa Power and Light Company (Applicant) of Des Moines, Iowa, filed an application, pursuant to Section 204 of the Federal Power Act, for authorization to negotiate privately with the City of Chillicothe, Iowa for the purpose of financing the Company's undivided interest in certain pollution control facilities at Ottumwa Generating Station Unit 1 through the issuance of the City's Pollution Control Revenue Bonds. A loan agreement between the City, Applicant and certain other companies possessing undivided interests in Unit 1 would commit the City to issue and sell to underwriters its Pollution Control Bonds in an aggregate principal amount equal to the cost of such facilities and to loan the proceeds from the sale of such Revenue Bonds to the companies in proportion to their respective ownership interests. The repayment obligation of the companies, including Applicant, would be evidenced by debt obligations bearing identical terms with, and pledged to support the payment of, such Revenue Bonds.

Applicant is incorporated under the laws of the State of Iowa with its principal office at Des Moines, Iowa, and is engaged in the electric and gas utility business within the State of Iowa.

Any person desiring to be heard or to make any protest with reference to the Application should on or before September 10, 1976, filed with the Federal Power Commission, Washington, D.C. 20426, petitions or protests in accordance with the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission wil be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceedings. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25002 Filed 8-25-76;8:45 am]

[Docket No. CP73-332]

NORTHWEST PIPELINE CORP.

Petition To Amend

AUGUST 19, 1976.

Take notice that on August 9, 1976, Northwest Pipeline Corporation (Petitioner), P.O. Box 1526, Salt Lake City, Utah 84110, filed in Docket No. CP73-332 a petition to amend further the order issued February 26, 1975, in said docket pursuant to Section 3 of the Natural Gas Act by authorizing the continued importation of up to 55,000 Mcf of natural gas per day at the increased border prices ordered by the National Energy Board of Canada (NEB), all as more fully set forth in the petition to amend which is on file with the Commission and open to public inspection.

It is indicated that the order of February 26, 1975, among other things, authorized Petitioner to import at a point on the international boundary near Sumas, Washington, natural gas purchased from Westcoast Transmission Company Limited (Westcoast) under a 1974 Temporary Agreement, dated August 14, 1974, as amended November 14 and December 7, 1974. Petitioner now requests authorization to continue to import said gas at the Canadian Government's newly established border prices of $1.80 per Mcf commencing September 10, 1976, and at $1.94 commencing January 1, 1977, and continuing through April 30, 1977, the expiration date of the temporary agreement.

Petitioner states that Westcoast purchases the gas it sells to Petitioner from Pan Alberta Gas Company Limited (Pan Alberta) and that the newly established border price for Westcoast's License GL-41 removed the previously provided exception for the Pan Alberta gas and that, therefore, Petitioner states the price for said gas under the 1974 Temporary Agreement would be $1.80 per Mcf effective September 10, 1976, and $1.94 per Mcf effective January 1, 1977.

Applicant asserts that the continued importation would provide approximately 11,660,000 Mcf of natural gas which may not otherwise be available should the requested authorization not be granted.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 14, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25003 Filed 8-25-76;8:45 am]

[Docket No. CP76-473]

PANHANDLE EASTERN PIPELINE CO.

Application

AUGUST 19, 1976.

Take notice that on August 9, 1976, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas, filed in Docket No. CP76-473 an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7 (b) of the Regulations thereunder (18 CFR 157.7(b)) for a certificate of public convenience and necessity authorizing the construction, during the 12-month period commencing the date of authorization, and operation of facilities to enable Applicant to take into its certificated main pipeline system natural gas which would be purchased from producers and other similar sellers thereof, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in connecting to its pipeline system supplies of natural gas which may become available from various producing areas generally co-extensive with its pipeline system or the systems of other pipeline companies which may be authorized to transport gas for the account of or exchange gas with Applicant.

Applicant states that the total cost of the proposed facilities would not exceed $10,000,000 and that no single onshore project would exceed a cost of $1,500,000. These costs would be financed with funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 15, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7

V 41 N 167 AUG 26 76 UMI

and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25004 Filed 8-25-76;8:45 am]

[Docket No. CP76-472]

PANHANDLE EASTERN PIPE LINE CO.

Application

AUGUST 19, 1976.

Take notice that on August 9, 1976, Panhandle Eastern Pipe Line Company (Applicant), P.O. Box 1642, Houston, Texas 77001, filed in Docket No. CP76-472 an application pursuant to Section 7 of the Natural Gas Act and Section 157.7(g) of the Regulations thereunder (18 CFR 157.7(g)) for a certificate of public convenience and necessity authorizing the construction and for permission for and approval of the abandonment, during the 12-month period commencing the date of authorization, and operation of field gas compression and related metering and appurtenant facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in the construction and abandonment of facilities which would not result in changing Applicant's system salable capacity or service from the authorized prior to the filing of the instant application.

Applicant states that the total cost of the proposed construction and abandonment would not exceed $2,000,000 and that the cost of any single project would not exceed $500,000. These costs would be financed with funds on hand.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 16, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25005 Filed 8-25-76;8:45 am]

[Docket Nos. RP73-35 and RP74-89; (PGA76-3 and AP76-3)]

TRUNKLINE GAS CO.

Order Granting Intervention

AUGUST 19, 1976.

Pipeline rates: Intervention. Before Commissioners: Richard L. Dunham, Chairman; Don S. Smith, John H. Holloman III, and James G. Watt.

On June 15, 1976, Trunkline Gas Company (Trunkline) tendered for filing a revised tariff sheet[1] that amounts to a rate increase of 11.48¢ per Mcf. Notice of Trunkline's filing was issued on June 22, 1976, with protests and petitions to intervene due on or before July 13, 1976. An untimely petition to intervene was filed by Consumers Power Company (Consumers) on July 15, 1976. Having reviewed the above petition to intervene, we believe that Consumers has sufficient interest in these proceedings to warrant intervention and that good cause exists for permitting the late filing.

The Commission finds: The participation of Consumers in these proceedings may be in the public interest and good cause exists for permitting the late filing.

The Commission orders: (A) The above-named petitioner is hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission; *Provided, however,* That participation of such intervenor shall be limited to matters affecting asserted rights and interests as specifically set forth in the petition to intervene; and *Provided, further,* That the admission of such intervenor shall not be construed as recognition by the Commission that it might be aggrieved because of any order or orders of the Commission entered in this proceeding.

(B) The intervention granted herein shall not be the basis for delaying or deferring any procedural schedules heretofore established for the orderly and expeditious determination of this proceeding.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25006 Filed 8-25-76;8:45 am]

[1] Sixteenth Revised Sheet No. 3-A to Original Volume No. 1.

[Docket No. ER76-808]

VIRGINIA ELECTRIC AND POWER CO.

Tendered Revised Contract Supplements

AUGUST 19, 1976.

Take notice that on July 23, 1976, Virginia Electric and Power Company (VEPCO), tendered for filing revised supplements to contracts between VEPCO and Shenandoah Valley Electric Cooperative. VEPCO states that the revised contract supplements correct certain items to reflect changes made in the past at various delivery points as set forth below:

Delivery point	Present FPC No.	Proposed FPC No.	Requested effective date	Item corrected
Brands	84-12	84-38	Apr. 20, 1976	4, 5(1), 5(2), 5(3), 6, 7, 11.
Crimora	84-10	84-39	Aug. 28, 1972	5(1), 5(2), 5(3), 11.
Dayton	84-30	84-40	Mar. 6, 1976	4, 5(3).
Sherando	84-7	84-41	Apr. 10, 1974	4, 5(2), 5(3).

VEPCO states that the revised contract supplements are intended to supersede the listed FPC Rate Schedules and requests that the revised supplements be allowed to become effective on the requested effective dates.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 30, 1976. Protests will

be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25007 Filed 8-25-76;8:45 am]

INTERNATIONAL TRADE COMMISSION

[TA-201-15]

PLANT HANGERS

Amendment of Scope of Investigation

Notice is hereby given that the United States International Trade Commission, on August 23, 1976, amended the scope of its investigation No. TA-201-15, Plant Hangers, being conducted under section 201(b) of the Trade Act of 1974, by adding to the scope of the investigation plant hangers, of beads, provided for in item 741.50 of the Tariff Schedules of the United States.

Notice of the Commission's institution of the investigation and hearings was published in the FEDERAL REGISTER of July 2, 1976 (41 F.R. 27449); notice of the times and places of hearings was published in the FEDERAL REGISTER of August 4, 1976 (41 F.R. 32670).

By order of the Commission:

Issued: August 23, 1976.

KENNETH R. MASON,
Secretary.

[FR Doc.76-25079 Filed 8-25-76;8:45 am]

NATIONAL TRANSPORTATION SAFETY BOARD

[N-AR 76-35]

SAFETY RECOMMENDATIONS AND RESPONSES

Notice of Availability and Receipt

Aviation Safety Recommendations.—The National Transportation Safety Board, by letter of August 20, has issued to the Federal Aviation Administration 11 recommendations concerning aerobatic maneuvers. The recommendations stemmed from the Board's special study, "General Aviation Accidents Involving Aerobatics, 1972-1974." This study, soon to be released to the public, was prompted by the continued occurrence in recent years of fatal aerobatic accidents—105 such accidents, resulting in 107 fatalities and 21 serious injuries, occurred from 1972 through 1974. In view of the growing interest in sport aerobatics and the continuing manufacture of airplanes certificated for aerobatic operation, the Safety Board believes that an effort should be made to reduce the number of such accidents.

The recommendation letter focuses upon several areas of need for corrective action in aerobatics: Training, operations/airworthiness, accidents at low altitude, spins, and load factor measurement. Accordingly, the Board recommends that FAA (1) expand the presentation of flight instructor stall/spin indoctrination clinics patterned after the one initially held in FAA's Central Region on August 15-17, 1975, to include all FAA Regions and various popular make and model airplanes (recommendation No. A-76-105); (2) require a commercial flight instructor to hold a "letter of competence" or its equivalent before providing aerobatic instruction other than that routinely required during the normal course of training for airmen certification tests (A-76-106); (3) require that pilots obtaining a logbook endorsement from an aerobatic flight instructor before performing aerobatic maneuvers other than those required in connection with airman certification tests (A-76-107); (4) issue an Advisory Circular explaining the operational considerations, airworthiness requirements, and safety aspects associated with the performance of aerobatics (A-76-108); (5) require that all airplanes subsequently certificated in the aerobatic category, including those previously certificated in another category under a regulatory Part other than 14 CFR 23, conform with the currently applicable structural criteria in subpart C of FAR 23, particularly the provisions relating to limit maneuvering load factors (A-76-109); (6) evaluate the feasibility of specifying stick force gradient requirements uniquely applicable to aerobatic airplanes in 14 CFR 23.155, "Elevator control force in maneuvers" (A-76-110); (7) amend 14 CFR 91.71, "Aerobatic flight" to include a schedule of minimum initial spin altitudes (A-76-111); (8) conduct an intensive accident prevention campaign to emphasize and enforce effectively the provisions of 14 CFR 91.71, "Acrobatic flight," and 14 CFR 91.9, "Careless or reckless operation" (A-76-112); (9) require the installation of accelerometers in all aerobatic airplanes (A-76-113); (10) amend 14 CFR 23.337, "Limit maneuvering load factors," to increase the minimum required, negative limit maneuvering load factor for aerobatic airplanes from −3.0 to −4.5 (A-76-114); and (11) amend 14 CFR 23.333, "Flight envelope," to require that the negative maneuvering load factor specified in 14 CFR 23.337 for the aerobatic category remain constant beween design cruising speed and design dive speed (A-76-115).

Recommendations A-76-105, A-76-108, A-76-109, A-76-111, and A-76-112 are designated Class II—priority followup; the remainder are Class III—longer-term followup.

Railroad Safety Recommendations.—Two more recommendations have been issued by the Safety Board as a result of its ongoing investigation of the July 13 collision of two ConRail commuter trains at New Canaan, Connecticut. (See 41 FR 32795), August 5, 1976.) The latest recommendations, Nos. R-76-48 and R-76-49, were issued by Safety Board letter of August 20 addressed jointly to the Connecticut Department of Transportation and to the Metropolitan Transportation Authority. The recommendations were prompted by testimony during the investigation that passengers had extreme difficulty after the collision in following the instructions for operating the emergency release mechanisms which opened the side doors of the cars. Upon completion of the investigation, the Board's report containing facts, analysis, and conclusions concerning this accident will be released to the public.

The problems of emergency evacuation of passengers from M-2 cars have been brought to the attention of Federal, State, and local officials before without correction, according to the Safety Board. Corrections of these problems are practical; hence, the Board now urges that these recommendations be implemented on an "urgent followup" basis: (1) change the emergency release mechanism for the side doors on the type of cars involved in this accident (M-1 and M-2) so that the doors can be opened easily by passengers under emergency conditions without opening the mechanism's compartment (R-76-48); and (2) provide means for emergency aid personnel to open the doors from the outside when electrical power is lost (R-76-49).

Letters in Response to Safety Board Recommendations.—Received by the Board during the past week were these responses from the following recommendation addressees:

Federal Highway Administration letter of August 13 responds to recommendation H-76-16 which resulted from investigation of five major accidents involving commercial vehicles in which semi-trailers had become separated from their tractors during rollover. (See 41 FR 21713, May 27, 1976.) FHA states that of the 25,358 accidents reported to the Bureau of Motor Carrier Safety (BMCS) for 1974, 56, or 0.2 percent, involved fifth wheel separation. Analysis indicated that 45 percent separated because of apparent improper coupling, and would not have been affected by the Board's recommendation; 30 percent indicated improper mounting or improper maintenance of the attachment of the fifth wheel to the tractor frame; 20 percent related to the upper half of the fifth wheel or the kingpin; and the remaining 5 percent were inconclusive because of lack of information.

As a result of study of the five Board-cited accidents, and the indication of substandard maintenance and extremely violent forces acting on the fifth wheel assembly, FHA concludes that there is no justification for revising 49 CFR 393.70, as recommended. According to FHA, BMCS will issue a memorandum and guidelines to all field offices to point out the need for detailed inspection of fifth wheel mountings when conducting vehicle compliance checks. A copy of the memorandum and guidelines is attached to FHA's letter.

U.S. Coast Guard letter of August 11 updates response to recommendations M-74-26, M-74-28, and M-74-31 which were issued as a result of investigation of the death of three ship's officers at

V 41 167 AUG 26 76 UMI

Guayanilla, Puerto Rico, on November 18, 1972, while serving on board the *SS William T. Steele*. (Marine casualty report No. USCG/NTSB–MAR–74–6.) Recommendation M–74–26 asked the Coast Guard to review and revise requirements for emergency equipment within cargo tanks and require a scheduled check procedure to insure that such equipment is maintained in working order. Referring to its letter of March 21, 1975, Coast Guard notes that a notice of proposed rulemaking is currently being drafted, publication expected by this year's end.

Re recommendation M–74–28, Coast Guard notes that the Merchant Marine Safety School at Yorktown, Virginia, has included in its curriculum the information contained in Commandant Notice 5941 of February 26, 1975, a copy of which was supplied to the Board with Coast Guard's response to April 2, 1975 (40 FR 19045, May 1, 1975). Emergency equipment is inspected at regularly scheduled inspections of vessels. Coast Guard considers that implementation of this recommendation is fulfilled. Re recommendation M–74–31, Coast Guard states that the notice of proposed rulemaking spoken to in its response of December 15, 1975 (41 FR 1547, January 8, 1976) has been drafted, and publication may be expected prior to the end of this year.

Port Authority Transit Corporation (PATCO) letter of August 11 and *Washington Metropolitan Area Transit Authority* (WMATA) letter of August 10 both respond to recommendations R–76–42 through R–76–44 concerning automatic train control (ATC). (See 41 FR 34125, August 12, 1976.) PATCO states concerning R–76–42 that the ATC and cab signal functions of the lead car of every train is cycled on a test section of track within yard limits before that train is allowed to enter the mainline tracks. Only trains with fully functioning ATC and cab signals are permitted to enter mainline tracks. Re recommendation R–76–43, PATCO details rules concerning its cars' ATC system which is designed on the "fail safe" principle and which will automatically bring a train to "stop" in the event of cab signal failure, whereupon the train operator must notify the system dispatcher immediately. In the event the dispatcher decides that these rules cannot be complied with, all passengers are discharged at the next station and the train removed from service. Concerning recommendation R–76–44, the letter states that all PATCO train operating cabs are equipped with two-way voice communication between trains and system dispatcher, located at the Center Tower, and between trains within the same communications zone. Also, PATCO cars are equipped with public address systems controlled from the active operators cab. PATCO concludes, "Thus it is clear that PATCO operations are in accord with the objectives of NTSB Safety Recommendations R–76–42 through R–76–44."

WMATA notes, with reference to R–76–42, its requirement to perform daily safety tests on all cars prior to being placed in revenue service each day; should any car fail to pass the test, it is not dispatched until deficiencies are corrected and it does pass the test. Re R–76–43, WMATA has procedures for evacuating passengers from defective trains. WMATA states that, when trains fail en route and it is necessary to operate with automatic train protection subsystem inoperative or with less than 75 percent braking, passengers are unloaded at the next station, manual blocks established, and the train is operated non-revenue at reduced speed to the yard and off the mainline. Re 9–76–44, WMATA indicates that each car is equipped with a radio and that radio checks are made prior to entering mainline operation each day. Also, radio communication between operations control center and each train is frequent throughout the operating day. WMATA further states that the radio communications subsystem is equipped with base stations failure detection equipment that immediately notifies the Operations Control Center of any failures of base stations.

Michigan Wisconsin Pipe Line Company letter of August 10 concerns recommendations P–76–27 through P–76–29, which were issued after investigation of the January 7, 1976, rupture of a 12-inch gas-gathering pipeline at Cedarville, Oklahoma. (See 41 FR 27136, July 1, 1976.) The company letter notes re P–76–27 that, following the accident, instructions were issued to field supervision again stressing the importance of Operation and Maintenance and Emergency Procedure review at the semi-annual training meetings each year. Also, since the accident, field locations have conducted numerous meetings on procedural matters, emphasizing the concern described in recommendation P–76–28. All personnel at each field location receive this type of training twice a year, and these training meetings are in addition to the monthly safety meetings conducted at each location.

Re R–76–28, Michigan Wisconsin has examined its Emergency Procedures and Operation and Maintenance Procedures for pipelines and compressor stations, and its procedure for isolation of facilities now provides operating personnel performing valving or piping changes with written instructions reviewed by at least two persons and approved by the supervisor. Re P–76–29, Michigan Wisconsin will prohibit valve or piping changes while construction is being conducted within the area, except for necessary maintenance of service and emergency conditions.

Safety Board Reply to Recommendation Response:—In reply to Coast Guard's letter of July 20 (41 FR 32796, August 5, 1976) regarding recommendation M–74–19, the Safety Board on August 13 indicated that Coast Guard's review process conducted on applications for bridge construction contains many of the elements of the safety impact study recommended by the Safety Board.

The Board further stated that, while safety impact studies would provide a formalized and definite methodology and format for the safety analysis and provide a clearer assessment of risks, the procedures described by Coast Guard appear able to accomplish the same results. The Board accepts this procedure as equivalent to recommendation M–74–19.

Safety recommendation letters are available to the general public; single copies may be obtained without charge. Copies of the letters responding to safety recommendations and Safety Board replies may be obtained at a cost of $1.00 for service and 10¢ per page for reproduction. All requests must be in writing, identified by recommendation number and date of publication of this FEDERAL REGISTER notice. Address inquiries to: Publications Unit, National Transportation Safety Board, Washington, D.C. 20594.

(Sec. 307 of the Independent Safety Board Act of 1974 (Pub. L. 93–633, 88 Stat. 2172 (49 U.S.C. 1906)).)

MARGARET L. FISHER,
Federal Register Liaison Officer.

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–295 and 50–304]

COMMONWEALTH EDISON CO.

Issuance of Amendments to Facility Operating Licenses

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 23 and 20 to Facility Operating Licenses Nos. DPR–39 and DPR–48 issued to Commonwealth Edison Company for operation of the Zion Station, Units 1 and 2, located in Zion, Illinois. The amendments are effective upon date of issuance.

These amendments authorize changes in the design of the Zion spent fuel pool from that reviewed and approved in the operating license review and as described in the Zion Station Final Safety Analysis Report. The changes will increase spent fuel storage capacity from 340 to 868 assemblies. These amendments also change the amount of U–235 the licensee is allowed to possess, per unit, from 4000 Kg to that amount limited to storage capacity and amounts required for reactor operation.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Notice of Proposed Issuance of Amendments to Facility Operating Licenses in connection with this action was published in the FEDERAL REGISTER on November 17, 1975 (40 FR 53323).

In connection with the issuance of the amendments, the Commission has issued a Negative Declaration and Environmental Impact Appraisal.

For further details with respect to this action, see (1) the application for amendments dated October 24, 1975, as supplemented December 12, 1975, February 13, March 23, June 1, and June 8, 1976, (2) Amendments Nos. 23 and 20 to Licenses Nos. DPR–39 and DPR–48, (3) the Commission's Negative Declaration published concurrently with this Notice, (4) the Commission's Environmental Impact Appraisal, and (5) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555 and at the Waukegan Public Library, 128 North County Street, Waukegan, Illinois 60685.

A copy of items (2), (4) and (5) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 9th day of August 1976.

For the Nuclear Regulatory Commission.

THOMAS V. WAMBACH,
Acting Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[FR Doc.76–24751 Filed 8–25–76;8:45 am]

[Docket Nos. 50–269, 50–270 and 50–287]

DUKE POWER CO.

Issuance of Amendments to Facility Operating Licenses

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments No. 29, 29, and 26 to Facility Operating Licenses No. DPR–38, DPR–47, and DPR–55, respectively, issued to Duke Power Company which revised Technical Specifications for operation of the Oconee Nuclear Station, Units 1, 2, and 3, located in Oconee County, South Carolina. The amendments are effective as of the date of issuance.

These amendments consist of revisions to the Limiting Conditions for Operation and Surveillance Requirements for safety related air filter systems.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to the action, see (1) the application for amendment dated March 10, 1976, (2) Amendments No. 29, 29, and 26 to Licenses No. DPR–38, DPR–47, and DPR–55, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Oconee County Library, 201 South Spring Street, Walhalla, South Carolina 29691.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 6th day of August 1976.

For the Nuclear Regulatory Commission.

THOMAS V. WAMBACH,
Acting Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[Docket No. 50–376]

PUERTO RICO WATER RESOURCES AUTHORITY

Availability of Draft Environmental Statement (English Version) for North Coast Nuclear Plant, Unit No. 1

Pursuant to the National Environmental Policy Act of 1969 and the United States Nuclear Regulatory Commission's regulations in 10 CFR Part 51, notice is hereby given that a Draft Environmental Statement (English version) has been prepared by the Commission's Office of Nuclear Reactor Regulation related to the suitability of the site proposed for construction of the North Coast Nuclear Plant, Unit No. 1. The proposed site is located on the north central coast of Puerto Rico (Islote). The Draft Environmental Statement is available for inspection by the public in the Commission's Public Document Room at 1717 H Street, N.W., Washington, D.C., the Arecibo City Hall Library, Post Office Box 1086, Arecibo, Puerto Rico 00612 and the Etien Totti Public Library, College of Engineers, Architects and Surveyors, Orb Roosevelt Development, Hato Rey, Puerto Rico 00918. The Draft Statement is also being made available at the Puerto Rico Planning Board, P.O. Box 41119, Minillas Station, Santurce, Puerto Rico 00940. Requests for copies of the Draft Environmental Statement should be addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.

A Spanish translation of this Draft Environmental Statement will be issued later, the availability of which will be published in the FEDERAL REGISTER.

The Applicant's Environmental Report, as supplemented, submitted by Puerto Rico Water Resources Authority, is also available for public inspection at the above designated locations. Notice of availability of the Applicant's Environmental Report was published in the FEDERAL REGISTER on February 14, 1975 (40 FR 6835).

Pursuant to 10 CFR Part 51, interested persons may submit comments on the Draft Environmental Statement for the Commission's consideration. Federal, Commonwealth, and specified local agencies are being provided with copies of the Applicant's Environmental Report and the Draft Environmental Statement. Other interested persons or local agencies may obtain these documents upon request. Comments will be due 45 days after the notice of availability of the Spanish version of the Draft Environmental Statement is published in the FEDERAL REGISTER by the Council on Environmental Quality. Comments by Federal, Commonwealth, and local officials, or other members of the public will be made available by the Commission for public inspection at the Commission's Public Document Room in Washington, D.C., the Arecibo City Hall Library, Arecibo, Puerto Rico 00612, and the Etien Totti Public Library, College of Engineers, Architects and Surveyors, Orb Roosevelt Development, Hato Rey, Puerto Rico 00918. Upon consideration of comments submitted with respect to the Draft Environmental Statement, the Commission's staff will prepare a Final Environmental Statement, the availability of which will be published in the FEDERAL REGISTER.

Comments on the Draft Environmental Statement from interested members of the public should be addressed to U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Site Safety and Environmental Analysis.

Dated at Rockville, Maryland, this 18th day of August 1976.

For the Nuclear Regulatory Commission.

FRED J. CLARK, Jr.,
Acting Chief, Environmental Projects Branch 1, Division of Site Safety and Environmental Analysis.

[FR Doc.76–24749 Filed 8–25–76;8:45 am]

REGULATORY GUIDE

Issuance and Availability

The Nuclear Regulatory Commission has issued two guides in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Regulatory Guide 1.84, Revision 7, "Code Case Acceptability—ASME Section III Design and Fabrication," and Regulatory Guide 1.85, Revision 7, "Code

V 41 167
AUG 26 76
UMI

Case Acceptability—ASME Section III Materials," list those Code Cases that are generally acceptable to the NRC staff for implementation in the licensing of light-water-cooled nuclear power plants. These two guides were revised to update the listings of acceptable Code Cases and to reflect public comment.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Comments should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Section.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of issued guides (which may be reproduced) or for placement on an automatic distribution list for single copies of future guides should be made in writing to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland this 17th day of August 1976.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director, Office of Standards Development.

[Dockets Nos. 50-295 and 50-304; Licensee Nos. DPR-39 and DPR-48]

ZION STATION UNITS 1 AND 2

Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) is considering the issuance of Amendments to Facility Operating Licenses No. DPR-39 and DPR-48 issued to Commonwealth Edison Company (the licensee) for operation of the Zion Station Units 1 and 2, located in Zion, Lake County, Illinois.

The amendments would authorize changes in the design of the Zion spent fuel storage pool from that reviewed and approved in the operating license review and as described in the Zion Station Final Safety Analysis Report. The changes would increase spent fuel storage capacity from 340 to 868 assemblies. These amendments would also change the amount of U-235 the licensee is allowed to possess, per unit, from 4,000 Kg to that amount limited to storage capacity and amounts required for reactor operation.

The Commission's Division of Operating Reactors has prepared an environmental impact appraisal for this proposed modification to the spent fuel pool. Within the context of this appraisal, the Staff applied, weighed, and balanced the five factors specified by the Commission in its issuance of FEDERAL REGISTER Notice (40 FR 42801) dated September 16, 1975, regarding handling and storage of spent fuel from light water power reactors. On the basis of this environmental impact appraisal, the Commission has concluded that an environmental impact statement for this particular action is not warranted because, pursuant to the Commission's and the Council of Environmental Quality's Guidelines, 40 CFR 1500.6, the Commission has determined that this proposed amendment will not significantly affect the quality of the human environment.

The enviornmental impact appraisal setting forth the basis for the Commission's determination is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the Waukegan Public Library, 128 North County Street, Waukegan, Illinois, 60685.

Dated at Bethesda, Maryland, this 9th day of August 1976.

For the Nuclear Regulatory Commission.

THOMAS V. WAMBACH,
Acting Chief, Operating Reactors Branch #1, Division of Operating Reactors.

SECURITIES AND EXCHANGE COMMISSION

NATIONAL MARKET ADVISORY BOARD

Meeting

This is to give notice pursuant to section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. I 10(a), that the National Market Advisory Board will conduct open meetings on September 20 and 21, 1976, in Room 776, 500 North Capitol Street, Washington, D.C., beginning at 9:30 a.m. on September 20, and at 8:30 a.m. on September 21. The Board will also conduct open meetings on October 6, 7, and 8, 1976, at the same location, beginning at 9:30 a.m. on October 6 and at 8:30 a.m. on October 7 and 8. The Board will also conduct open meetings on October 18 and 19, 1976, the location and summarized agenda for which will be published in the FEDERAL REGISTER at a later date. Initial notice of the September meeting was published in the FEDERAL REGISTER on July 2, 1976.

The summarized agenda for the September meeting is as follows:

1. Discussion of the Board's report to the Securities and Exchange Commission on in-house agency cross transactions in listed securities by exchange members;
2. Discussion of the Board's report to the Securities and Exchange Commission regarding the establishment of a consolidated limit order book; and
3. Discussion of such other matters as may properly be brought before the Board.

The summarized agenda for the October 6, 7 and 8 meeting is as follows:

1. Discussion of the Board's report to the Securities and Exchange Commission regarding the establishment of a consolidated limit order book; and
2. Discussion of such other matters as may properly be brought before the Board.

Further information may be obtained by writing Martin L. Budd, Executive Director, National Market Advisory Board Staff, Securities and Exchange Commission, Washington, D.C. 20549.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 20, 1976.

[FR Doc.76-24996 Filed 8-25-76;8:45 am]

[SR-Amex-76-17]

AMERICAN STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

On July 20, 1976, the American Stock Exchange, Inc. ("Amex"), 86 Trinity Place, New York, New York 10006, filed with the Commission, pursuant to section 19(b) of the Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Acts Amendments of 1975 (the "1975 Amendments"), and Rule 19b-4 thereunder, copies of a proposed rule change to delete from the Amex Constitution section 4(g) of Article V and section 2 of Article XI which prohibit dealings on the Amex floor in any security which is admitted to trading on any other exchange located in New York City.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 12656, (July 26, 1976)) and by publication in the FEDERAL REGISTER (41 F.R. 32478 (August 3, 1976)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to registered national securities exchanges, and in particular, the requirements of section 6 and the rules and regulations thereunder.

On August 10, 1976 the Amex filed an amendment to this rule proposal in which it was stated that the foregoing constitutional amendments were approved by the Amex membership at a special meeting held on August 5, 1976. Further, the Amex requested accelerated approval so as to permit the amendments to become effective on August 22, 1976. On August 23, 1976, the first issue in many years to be dually listed on the Amex and the New York Stock Exchange ("NYSE") is scheduled to commence trading on the NYSE. Hence, it is necessary for the Amex's proposal to take effect on or before August 23, 1976 to permit continued trading in the dually listed security on the Amex. Moreover, the Amex proposal will help to enhance fair competition among exchange markets, which is one of the objectives of the Act. The Commission therefore finds good cause for approving Amex filing 76-17 prior to the thirtieth day after the date of publication of notice of the filing.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on July 20, 1976, be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

[FR Doc.76-24998 Filed 8-24-76;8:45 am]

[SR-CBOE-76-6]

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Order Approving Proposed Rule Change

On March 2, 1976, the Chicago Board Options Exchange, Incorporated ("CBOE"), LaSalle at Jackson, Chicago, Illinois 60604, filed with the Commission, pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. 94-29, § 16 (June 4, 1975) (the "Act"), and Rule 19b-4 thereunder, copies of a proposed rule change (the "Proposal") to amend CBOE Rule 5.4 ("Rule 5.4"). Notice of the Proposal, together with the terms of substance thereof, was given by publication of a Commission Release (Securities Exchange Act Release No. 12178, March 8, 1976) and by publication in the FEDERAL REGISTER (41 FR 10974, March 15, 1976). The submission was then amended by three separate amendments submitted on April 26, 1976, April 28, 1976 and May 12, 1976, respectively.

Amendment No. 4 to the Proposal was submitted on June 2, 1976; notice of the filing of such amendment, together with the terms of substance thereof, was given by publication of a Commission Release (Securities Exchange Act Release No. 12540, June 11, 1976) and by publication in the FEDERAL REGISTER (41 FR 24782, June 18, 1976). Additional amendments to the Proposal were submitted on July 22, 1976 and August 4, 1976, respectively.

The Proposal, as amended ("Amended Proposal"), is to revise Rule 5.4 so as to set forth delisting (i.e., maintenance) standards for underlying securities of option contracts traded on the CBOE.

The Commission understands that CBOE is prepared, subject to review of public comments on a related proposed rule change (submitted as File No. SR-CBOE-76-18) and the Commission's final decision thereon, to adopt certain amendments to CBOE Rule 5.3 which would set forth initial listing standards for underlying securities of option contracts traded on the CBOE and to adopt additional amendments to Rule 5.4. The Commission further understands, however, that CBOE will reconsider, in accordance with the Commission's suggestion, a certain proposed "maintenance" standard relating to minimum market price set forth in such related proposal. On that basis, the Commission finds that the Amended Proposal is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of section 6 of the Act and the rules and regulations thereunder.

It is therefore ordered, Pursuant to section 19(b)(2) of the Act, that the Amended Proposal be, and it hereby is, approved.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

ADVISORY COMMITTEE ON REPLACEMENT COST IMPLEMENTATION

Meeting

This is to give public notice, pursuant to section 10(a) of the Federal Advisory Committee Act, 5 U.S.C. App. I, 10(a), that the Securities and Exchange Commission Advisory Committee on Replacement Cost Implementation will conduct a meeting on September 17, 1976 at the Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. beginning at 9:30 a.m. This meeting will be open to the public.

This will be the fourth meeting of the Advisory Committee. The purpose of the meeting is to (1) discuss the Chief Accountant's recommended solutions to questions put before the Advisory Committee at its previous meeting (August 9, 1976), (2) discuss various aspects of the Commission's replacement cost regulation and (3) discuss implementation questions having come to the attention of the Chief Accountant of the Securities and Exchange Commission since the date of the previous meetings.

In addition, the Disclosure sub-committee of the Advisory Committee on Replacement Cost Implementation will meet on September 16, 1976, beginning at 1:30 p.m. to discuss sample disclosures.

Further information on this matter may be obtained by writing:

Mr. George A. Fitzsimmons, Secretary, Securities and Exchange Commission, United States Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549.

GEORGE A. FITZSIMMONS,
Advisory Committee Management Officer.

MIDWEST SECURITIES TRUST CO.

Proposed Rule Change; Self-Regulatory Organizations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on July 14, 1976, the abovementioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

Agreement made this ------- day of ---------- 1976, by and between Midwest Securities Trust Company, an Illinois corporation and trust company, hereinafter called the "Depository", and Bradford Trust Company, 95 Wall Street, New York, New York 10005, hereinafter called the "Custodian".

In consideration of the fees to be paid by the Depository to the Custodian in accordance with the attached fee schedule designated as Schedule "A", and other valuable considerations, receipt of which is hereby acknowledged, the parties mutually agree as follows:

1. From time to time, the Depository will deliver to the Custodian certificate(s) representing securities which the Custodian will hold, safeguard, and transfer solely in the manner provided herein. As used in this agreement, "securities" shall mean common and preferred stock certificates and American depository receipts.

V 41 1167 AUG 26 76 UMI

2. The Custodian shall, solely in accordance with the written instructions of the Depository, receive securities from the Depository, hold such securities in safekeeping, and deliver such securities to the Depository or (to the extent permitted by the rules and procedures of the Custodian) to such parties as the Depository shall designate. Prior to the delivery of any securities in accordance herewith, the Custodian shall, if the Depository so requests, transfer or procure the transfer of such securities into such name or names as the Depository shall specify. All of the aforesaid written instructions and requests will be delivered by the Depository to the manager of the Custodian's TAD Division at the address of the Custodian.

3. At the end of each business day, the Custodian shall (a) provide the Depository with a dated statement showing, in respect of each class of securities held by the Custodian for the Depository, (i) an opening balance, (ii) the total number of shares deposited with the Custodian for the account of the Depository on that business day, (iii) the total number of shares withdrawn from the account of the Depository on that business day, (iv) a closing balance, and (v) the total number of shares subject to transfer and other instructions received from the Depository which are being processed; and (b) hold within its custody certificates, registered in or endorsed for transfer into the name of the Custodian's nominee (TAD & Co.), representing the aggregate number of shares of each security reflected in the closing balances shown on the Custodian's statement to the Depository for that business day, less such shares as shall be represented by certificates which have been submitted by the Custodian for transfer into the name of its nominee.

4. Certificates evidencing securities held by the Custodian for the account of the Depository may be commingled by the Custodian and held in a fungible bulk with certificates evidencing securities held by the Custodian for other depositors. As between the Depository and the Custodian (including, without limitation, its creditors, lien holders, and pledgees) all securities from time to time held by the Custodian for the account of the Depository shall be deemed to be the sole property of the Depository and the Custodian shall have no interest in them whatsoever. The Custodian agrees that it will not for any reason, including the assertion of any claim, right or lien of any kind, refuse or refrain from promptly delivering any such securities to the Depository or as directed by it: *Provided, however,* That if the Custodian is served with a notice of levy, seizure or similar notice, or order or judgment, issued or directed by a governmental agency or court, or officer thereof, having jurisdiction over the Custodian, which on its face affects such securities, the Custodian may, pending further direction of such goverenmental agency or court, refuse or refrain from delivering in contravention of such notice of levy, seizure or similar notice, or order or judgment, securities not greater in amount or number than the securities which are affected by such notice of levy, seizure or similar notice, or order or judgment, on the face thereof. No amendment shall be made to this paragraph unless such amendment shall have been filed with the Securities and Exchange Commission pursuant to the provisions of Rule 19b-4 and Rules 8c-1(g) and 15c2-1(g) under the Securities Exchange Act of 1934, as amended, and approved and deemed adequate by the Securities and Exchange Commission for the protection of investors.

5. The Custodian shall hold the securities held by it hereunder in a secure area(s) located at 2 Broadway, New York, New York 10004. The Custodian shall remove such securities from the secure area(s) only to the extent necessary to register transfers and effect deliveries as directed by the Depository's written instructions.

6. The Custodian shall provide and be responsible for the safekeeping of the securities held by it hereunder, and shall, at its expense, replace, within the shortest time practicable, any such securities which shall be lost or destroyed in any manner or for which the Custodian shall be unable to account after such securities have been delivered to and received by the Custodian. Any such loss or destruction of securities, or inability to account therefor, shall be reported immediately by the Custodian to the Depository.

7. During the term of this Agreement, the Custodian will provide, at its expense, blanket insurance coverage which will be in the form of the customary Bankers Blanket Bond Form (or comparable plan of insurance). The Custodian shall, from time to time, upon Depository's request, furnish the Depository with copies of the policies evidencing such coverage, and such copies shall be certified as correct and current by responsible officers of the Custodian.

8. The Custodian in its Transfer Agent Custodian capacity shall not assert or claim any lien of any nature with respect to the certificates held by it hereunder.

9. The Custodian may delegate or subcontract to its subsidiary TAD Depository Corporation the duty of processing securities held by the Custodian for the Depository hereunder, provided that (a) such securities shall remain at all times (except as otherwise expressly permitted herein) within the custody of the Custodian and in a secure area or areas under its control; and (b) the delegation or subcontracting of any of the duties or responsibilities of the Custodian hereunder shall not, as between the Depository and the Custodian, relieve the Custodian of responsibility therefor.

10. The Custodian shall act upon the Depository's instructions only when in writing and when transmitted to it by the Manager of the Depository's Transfer Department, or by such other persons as said Depository shall from time to time designate in writing to the Custodian.

11. This Agreement may be terminated by either party upon ten (10) days' written notice to the other party. At the termination of this Agreement, the Custodian shall deliver all securities and certificates then held by it to the Depository, at the Depository's expense, at 120 South LaSalle Street, Chicago, Illinois 60603 or such other address as the Depository may from time to time designate.

12. This Agreement shall be interpreted and construed in accordance with the laws of the State of Illinois and all other statutory, regulatory or common law binding either or both of the parties.

13. In addition to the normal written instructions hereinbefore provided, any additional notices given here under shall be in writing, shall be delivered by hand or mailed by certified or registered mail and a return receipt requested, and shall be addressed to the Custodian at 2 Broadway, New York, New York 10004, and to the Depository at 120 South LaSalle Street, Chicago, Illinois 60603 or at such other address as either party may designate by a notice mailed in the same manner.

STATEMENT OF BASIS AND PURPOSE

The proposed rule change creates a New York custodian agent for the Midwest Securities Trust Company for the holding, safeguarding, and transferring of securities on its behalf.

The proposed rule change facilitates the prompt and accurate clearance and settlement of securities transactions.

Comments were neither solicited nor received.

The Midwest Securities Trust Company believes that no burdens have been placed on competition.

On or before September 29, 1976, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 15, 1976.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 16, 1976.

[File No. 81-216]

SOUTHEAST ACQUISITION CO. AND PALMER BANK CORP.

Application and Opportunity for Hearing

AUGUST 18, 1976.

Notice is hereby given that Southeast Acquisition Company, successor by merger to Palmer Bank Corporation ("Applicant") has filed an application pursuant to section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act"), that Applicant be granted an exemption from filing with respect to Palmer Bank Corporation ("Palmer") an annual report on Form 10-K for the year ended December 31, 1975 and all other reports required to be filed pursuant to section 13 or 15(d) of the 1934 Act.

Section 12(g) of the 1934 Act requires the registration of the equity securities of every issuer which is engaged in a business affecting interstate commerce, or whose securities are traded by use of the mails or any means or instrumentality of interstate commerce, and on the last day of the fiscal year has total assets exceeding $1 million and a class of equity securities held of record by 500 or more persons.

Sections 13 and 15(d) of the 1934 Act require that issuers of securities registered pursuant to section 12 or that have filed a registration statement that has become effective pursuant to the Securities Act of 1933, must file certain periodic reports with the Commission for the protection of investors and to insure fair dealing in the security.

Section 12(h) of the 1934 Act empowers the Commission to exempt, in whole, or in part, any issuer or class of issuers from the provisions of section 12(g), 13, 14 or 15(d) of the 1934 Act, if the Commission finds, by reason of the number of public investors, amount of trading interest in the securities, the nature and extent of the activities of the issuer, income or assets of the issuer or otherwise, that such exemption is not inconsistent with the public interest or protection of investors.

The Applicant states in part that:

(1) Applicant is a wholly-owned subsidiary of Southeast Banking Corporation ("Southeast").

(2) Prior to the merger of Palmer into Applicant, Palmer was subject to the provisions of section 15(d) of the 1934 Act and its common stock was registered pursuant to section 12(g) of the 1934 Act.

(3) Prior to the merger of Palmer into Applicant, Palmer had 1,745,324 shares of its common stock issued and outstanding.

(4) A plan to merge Palmer into Applicant was submitted to the shareholders of Palmer at a special meeting held on December 18, 1975 and proxy soliciting materials containing detailed information, including financial statements, concerning Palmer and the terms of the merger were filed with the Commission and distributed to shareholders. The plan was approved by the shareholders of Palmer and the merger was consummated on January 15, 1976.

(5) Pursuant to the terms of the merger, all of the outstanding securities of Palmer were converted into securities of Southeast Banking Corporation. Applicant is a wholly-owned subsidiary of Southeast Banking Corporation.

(6) There is no trading in Palmer's common stock.

In the absence of an exemption, Applicant is required to file pursuant to sections 13 and 15(d) of the 1934 Act and the rules and regulations thereunder, an annual report on Form 10-K for the year ending December 31, 1975. Applicant believes that its request for an order exempting it from the provisions of sections 13 and 15(d) of the 1934 Act is appropriate in view of the fact that Palmer no longer exists as a corporation and there is no trading in its securities. Applicant believes that the time, effort and expense involved in the preparation of additional period reports would be disproportionate to any benefit to the public or to former holders of Palmer's securities.

For a more detailed statement of the information presented, all persons are referred to the application which is on file in the offices of the Commission at 500 North Capitol Street NW., Washington, D.C. 20549.

Notice is further given that any interested persons, not later than September 13, 1976, may submit to the Commission in writing his views or any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed to: Secretary, Securities and Exchange Commission, 500 North Capitol Street NW., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reasons for such request, and the issues of fact or law raised by the application which he desires to controvert. At any time after that date, an order granting the application in whole or in part may be issued upon request or upon the Commission's own motion.

By the Commission.

SHIRLEY E. HOLLIS,
Assistant Secretary.

TAXPAYERS AID SOCIETY, INC.

Order Permanently Suspending Exemption

AUGUST 20, 1976.

I. On December 23, 1975, Taxpayers Aid Society, Inc. (the "issuer"), a North Carolina corporation with offices at 107 N. Vance Street, Pembroke, North Carolina 28372, filed with Atlanta Regional Office of the Securities and Exchange Commission a Notification, offering circular and related exhibits for a proposed offering of $500,000 (aggregate) of short-term promissory notes in order to obtain an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to section 3(b) thereof and Regulation A promulgated thereunder. No amendments have been filed and a commencement date for the offering has not been established.

II. On June 15, 1976, the Commission temporarily suspended the Regulation A exemption of the issuer, stating that it had reasonable cause to believe that:

A. The notification, offering circular and other sales literature contain untrue statements of material facts and omit to state material facts necessary to make the statements made, in light of the circumstances under which they were made, not misleading, in particular with respect to:

1. The failure to disclose that the issuer had commenced the offering of its short-term promissory notes prior to the filing of the notification and the issuer's sales of securities in violation of section 5(a) of the Securities Act of 1933 within one year prior to the filing of the notification;

2. The failure to disclose that the issuer's "guaranteed" notes were, in fact, unsecured.
unsecured:

3. The failure to disclose adequately the nature of the issuer's business operations;

4. The failure to provide the financial statements required by Regulation A prepared in accordance with generally accepted accounting principles; and

5. The inclusion of an inadequate and misleading accountant's report on the financial statements furnished.

B. The terms and conditions of Regulation A have not been met in the following respects:

1. The offering, if allowed to commence, would exceed the ceiling restrictions imposed by Rule 254; and

2. Subsequent to the filing, an injunction was issued by the United States District Court for the Eastern District of North Carolina against the issuer and other related persons which would have rendered the Regulation A exemption unavailable if it had occurred prior to filing; and

3. The failure to provide in the offering circular the financial statements required by Regulation A.

C. The offering, if commenced, would be in violation of Section 17 of the Securities Act of 1933, as amended.

III. No hearing having been requested by the issuer within thirty days after the entry of the order temporarily suspending its exemption under Regulation A, the Commission finds that it is in the public interest and for the protection of investors that the exemption be permanently suspended.

It is ordered, Pursuant to Rule 261 of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption of the issuer under Regulation A be, and it is hereby, permanently suspended.

For the Commission, by its Secretary, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY ELIMINATION OF GATEWAY APPLICATIONS

AUGUST 20, 1976.

The following applications to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's Gateway Elimination Rules (49 CFR 1065(d)(2)), and notice thereof to all interested persons is hereby given as provided in such rules.

Carriers having a genuine interest in an application may file an original and three copies of *verified statements* in opposition with the Interstate Commerce Commission on or before September 27, 1976. (This procedure is outlined in the Commission's report and order in *Gateway Elimination*, 119 M.C.C. 530). A copy of the verified statement in opposition must also be served upon applicant or its named representative. The verified statement should contain all the evidence upon which protestant relies in the application proceeding including a detailed statement of protestant's interest in the proposal. No rebuttal statements will be accepted.

No. MC 87103 (Sub-No. 21-G), filed July 23, 1976. Applicant: MILLER TRANSFER AND RIGGING CO., P.O. Box 6077, Akron, Ohio 44312. Applicant's representative: A. David Millner, 167 Fairfield Road, Fairfield, N.J. 07006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Heavy machinery and contractors' equipment and supplies* which by reason of size or weight require the use of special devices for handling, between points in Clarion County, Pa., on the one hand, and, on the other, points in Connecticut, Massachusetts and Rhode Island; and (2) *Articles* which by reason of size or weight require the use of special equipment or devices for handling, between Clarion, Pa., and points within 40 miles thereof, on the one hand, and, on the other, points in Connecticut, Massachusetts and Rhode Island. The purpose of this filing is to eliminate the gateway at points in New York within 25 miles of Pittsfield, Mass.

(3) *Machinery and contractors' equipment and supplies* which by reason of size or weight require the use of special equipment or devices for handling, between points in Connecticut, Massachusetts and Rhode Island, on the one hand, and, on the other, points in Illinois, Indiana, Ohio, New York and West Virginia. The purpose of this filing is to eliminate the gateways at Clarion, Pa., points in Clarion County, Pa., points within 40 miles of Clarion, Pa., and points in New York within 25 miles of Pittsfield, Mass.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY—ELIMINATION OF GATEWAY LETTER NOTICES

AUGUST 20, 1976.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce Commission under the Commission's *Gateway Elimination* Rules (49 CFR 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before September 7, 1976. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will not operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

No. MC 40215 (Sub-No. E1), filed May 17, 1974. Applicant: RICHARDSON TRANSFER & STORAGE CO., INC., 246 N. 5th Street, Salina, Kans. 67401. Applicant's representative: Theodore Polydoroff, Suite 600, 1250 Connecticut Ave. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, from points in Arizona on and north of a line beginning at the Arizona-California State line and extending along U.S. Highway 80 and Interstate Highway 8, to junction Arizona Highway 84, thence along Arizona Highway 84 and Interstate Highway 8, to junction Interstate Highway 10 and Arizona Highway 93, and thence along Interstate Highway 10 and U.S. Highway 80 to the Arizona-New Mexico State line, to points in Arkansas; from points in Arizona to points in District of Columbia, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Michigan, Minnesota, and Nebraska on and east of a line beginning at the Nebraska-South Dakota State line and extending along Nebraska State Highway 61 to junction Interstate Highway 80 to the Nebraska-Colorado State line; Oklahoma on and east of a line beginning at the Kansas-Oklahoma State line and extending along U.S. Highway 281 to junction U.S. Highway 60 and U.S. Highway 183, extending along U.S. Highway 183 to the Oklahoma-Texas State line, Pennsylvania, South Dakota on and east of a line beginning at the North Dakota-South Dakota State line and extending along South Dakota Highway 65, to junction U.S. Highway 212, to junction South Dakota Highway 63, to junction Interstate Highway 90, to junction U.S. Highway 83 to the South Dakota-Nebraska State line; Tennessee, Virginia, West

V 41 167 AUG 26 76 UMI

Virginia, and Wisconsin. The purpose of this filing is to eliminate the gateways of Garden City, Kans., Pratt, Kans., Salina, Kans., Galena, Kans., and Ravenna, Ohio.

No. MC 40215 (Sub-No. E2), filed May 17, 1974. Applicant: RICHARDSON TRANSFER & STORAGE CO., INC., 246 N. 5th St., Salina, Kans. 67401. Applicant's representative: Theodore Polydoroff, Suite 600, 1250 Connecticut Ave. NW., Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, from points in Arizona on and east of a line beginning at the Arizona-New Mexico State line and extending along Interstate Highway 10 to junction U.S. Highway 666, thence south along U.S. Highway 666 to the Arizona-New Mexico State line, to points in Colorado on and east of a line beginning at the Colorado-Wyoming State line and extending south along U.S. Highway 85 to junction of U.S. Highway 34, to junction Colorado Highway 71, to junction U.S. Highway 50, to junction Colorado Highway 101, to junction U.S. Highway 160, to junction U.S. Highway 287, to the Colorado-Oklahoma State line. The purpose of this filing is to eliminate the gateway of Coolidge, Kans.

No. MC 87966 (Sub-No. E11), filed May 9, 1974. Applicant: ELEVELD CHICAGO FURNITURE SERVICE, INC., 4020 W. 24th Street, Chicago. Ill. 60623. Applicant's representative: E. H. Eleveld (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (a) *New furniture* (uncrated), as described in Appendix II to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, from Grand Rapids, Mich., to points in Missouri. The purpose of this filing is to eliminate the gateway of Peru, Ind. (b) *New furniture* (uncrated), as described in Appendix II to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, from Grand Rapids, Mich., to points in Pennsylvania within 60 miles of Philadelphia, Pa. The purpose of this filing is to eliminate the gateway of Peru, Ind.

No. MC 87966 (Sub-No. E12), filed May 9, 1974. Applicant: ELEVELD CHICAGO FURNITURE SERVICE, INC., 4020 W. 24th Street, Chicago. Ill. 60623. Applicant's representative: E. H. Eleveld (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such store and office fixtures* (as described in Appendix III to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, 275) and *parts* thereof, as are included in new furniture (uncrated), as described in Appendix II to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209, from the plantsite of Capitol Fixture and Construction Corporation at or near Arlington Heights, Ill., to points in Pennsylvania and Kentucky. The purpose of this filing is to eliminate the gateway of Peru, Ind.

No. MC 112070 (Sub-No. E37), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Connecticut, on the one hand, and, on the other, points in Colorado and Wyoming. The purpose of this filing is to eliminate the gateway of Missouri and Illinois.

No. MC 112070 (Sub-No. E39), filed June 4, 1974. Applicant: GRAY MOVING & STORAGE, INC., 1290 South Pearl, Denver, Colo. 80210. Applicant's representative: D. R. Gray (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Iowa, on the one hand, and, on the other, points in Tennessee, *(Missouri), Kentucky, Indiana, Ohio, Pennsylvania, New York, New Jersey, Connecticut, and *(Illinois). The purpose of this filing is to eliminate the gateways indicated by the asterisks above.

No. MC 113843 (Sub-No. E174) (correction), filed May 17, 1974, published in the FEDERAL REGISTER June 18, 1975, and republished, as corrected, this issue. Applicant: REFRIGERATED FOOD EXPRESS, INC., 316 Summer St., Boston, Mass. 02210. Applicant's representative: Lawrence T. Sheils (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, between (1) Westfield, Dunkirk, Fredonia, Brockton, Silver Creek, Farnham, Angola, North Collins, South Dayton, Lawtons, Gowanda, E. Autora, and Eden, N.Y., on the one hand, and, on the other, points in Towanda, Pa. The purpose of this filing is to eliminate the gateway of Buffalo, N.Y. The remainder of the letter-notice remains as previously published. The purpose of this correction is to correct the destination description in Part (1).

No. MC 113843 (Sub-No. E480) (Partial Correction), filed May 19, 1974, published in the FEDERAL REGISTER June 9, 1975, and republished, as corrected, this issue. Applicant: REFRIGERATED FOOD EXPRESS, INC., 316 Summer Street, Boston, Mass. 02210. Applicant's representative: Lawrence T. Sheils (same as above). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen Foods*, (38) between Atlantic City, Bridgeton, Cape May, Millville, Seabrook, and Vineland, N.J., on the one hand, and, on the other, points in Michigan; (49) from those points in New Jersey bounded on the south by a line beginning at the Atlantic Ocean and extending along U.S. Highway 9 to junction New Jersey Highway 526, thence along New Jersey Highway 526 to junction New Jersey Highway 33, thence along New Jersey Highway 33 to the New Jersey-Pennsylvania State line, and bounded on the north by a line beginning at the New Jersey-Pennsylvania State line and extending along U.S. Highway 1 to junction New Jersey Highway 440, thence along New Jersey Highway 440 to the Hudson River to those points in Kentucky on and west of a line beginning at the Kentucky-Tennessee State line and extending along U.S. Highway 127 to junction U.S. Highway 42, thence along U.S. Highway 42 to the Kentucky-Indiana State line. The purpose of this filing is to eliminate the gateway of Elmira, N.Y. The purpose of this correction is to correct a portion missing in the publication in Part (38) and to correct the territorial description in Part (49). The remainder of the letter-notice remains as previously published.

No. MC 114552 (Sub-No. E189), filed September 22, 1975. Applicant: SENN TRUCKING COMPANY, P.O. Drawer 220, Newberry, S.C. 29108. Applicant's representative: William P. Jackson, Jr., P.O. Box 267, Arlington, Va. 22201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such composition boards as are also supplies and accessories used in the manufacture and installation of composition boards*, from points in Minnesota, on and west of a line beginning at the Minnesota-Canada State line and extending along U.S. Highway 71 to junction Minnesota Highway 27, thence along Minnesota Highway 27 to the Minnesota-South Dakota State line, to points in South Carolina, on and east of a line beginning at the North Carolina-South Carolina State line and extending along U.S. Highway 21 to junction U.S. Highway 321, thence along U.S. Highway 321 to junction U.S. Highway 301, thence along U.S. Highway 301 to the South Carolina-Georgia State line. The purpose of this filing is to eliminate the gateways of the plantsite and warehouse facilities of the Abitibi Corporation near Roaring River, N.C., and the plantsite and warehouse facilities of the Celotex Corporation in Wayne County, N.C.

No. MC 114552 (Sub-No. E198) (Correction), filed September 22, 1975, published in the FEDERAL REGISTER July 28, 1976, and republished, as corrected, this issue. Applicant: SENN TRUCKING COMPANY, P.O. Drawer 220, Newberry, S.C. 29108. Applicant's representative: William P. Jackson, Jr., P.O. Box 267, Arlington, Va. 22201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such composition boards as are also supplies and accessories used in the manufacture and installation of composition boards* (except commodities in bulk) from points in Wisconsin, on and north of a line beginning at Lake Michigan and extending along U.S. Highway 151 to junction Wisconsin Highway 68, thence along Wisconsin Highway 68 to junction Wisconsin Highway 33, thence along Wisconsin Highway 33 to the Wisconsin-Minnesota State line, to points in Florida, on and south of Florida Highway 84. The purpose of this filing is to eliminate the gateways of the plantsite and warehouse facilities of the Abitibi Corporation near Roaring River, N.C., and the plantsite and warehouse facilities of the Celotex Corporation in Wayne County, N.C. The purpose of this correction is to correct the territorial description.

No. MC 114552 (Sub-No. E199) (Correction), filed September 22, 1975, published in the FEDERAL REGISTER July 28, 1976, and republished, as corrected, this issue. Applicant: SENN TRUCKING COMPANY, P.O. Drawer 220, Newberry, S.C. 29108. Applicant's representative: William P. Jackson, Jr., P.O. Box 267, Arlington, Va. 22201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such composition boards as are also supplies and accessories used in the manufacture and installation of composition boards* (except commodities in bulk), from points in Michigan, to points in South Carolina, on and east of a line beginning at the North Carolina-South Carolina State line and extending along U.S. Highway 52 to junction U.S. Highway 521, thence along U.S. Highway 521 to the Winyah Bay. The purpose of this filing is to eliminate the gateways of the plantsite and warehouse facilities of the Abitibi Corporation near Roaring River, N.C., and the plantsite and warehouse facilities of the Celotex Corporation in Wayne County, N.C. The purpose of this correction is to correct the commodity description that was published incorrectly.

No. MC 114552 (Sub-No. E204) (Correction), filed September 22, 1975, published in the FEDERAL REGISTER July 28, 1976, and republished, as corrected, this issue. Applicant: SENN TRUCKING COMPANY, P.O. Drawer 220, Newberry, S.C. 29108. Applicant's representative: William P. Jackson, Jr., P.O. Box 267, Arlington, Va. 22201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such composition boards as are also supplies and accessories used in the manufacture and installation of composition boards* except commodities in bulk) from points in Oklahoma, on and south of a line beginning at the Oklahoma-Arkansas State line and extending along Oklahoma Highway 63 to junction U.S. Highway 271, thence along U.S. Highway 271 to junction Oklahoma Highway 144, thence along Oklahoma Highway 144 to junction Oklahoma Highway 3, thence along Oklahoma Highway 3 to junction U.S. Highway 75, thence along U.S. Highway 75 to the Oklahoma-Texas State line, to points in Pennsylvania, on and east of a line beginning at the Pennsylvania-Maryland State line, and extending along U.S. Highway 11 to junction Pennsylvania Highway 34, thence along Pennsylvania Highway 34 to junction Pennsylvania Highway 279, thence along Pennsylvania Highway 279 to junction U.S. Highway 11, thence along U.S. Highway 11 to junction U.S. Highway 15, thence along U.S. Highway 15 to junction U.S. Highway 220, thence along U.S. Highway 220 to the Pennsylvania-New York State line. The purpose of this filing is to eliminate the gateways of the plantsite and warehouse facilities of the Abitibi Corporation near Roaring River, N.C., and the plantsite and warehouse facilities of the Celotex Corporation in Wayne County, N.C. The purpose of this correction is to correct the territorial description.

No. MC 114552 (Sub-No. E209) (Correction), filed September 22, 1975, published in the FEDERAL REGISTER July 28, 1976, and republished, as corrected, this issue. Applicant: SENN TRUCKING COMPANY, P.O. Drawer 220, Newberry, S.C. 29108. Applicant's representative: William P. Jackson, Jr., P.O. Box 267, Arlington, Va. 22201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such composition boards as are also supplies and accessories used in the manufacture* and installation of composition boards (except commodities in bulk), from points in Texas, on and south of a line beginning at the Gulf of Mexico and extending along U.S. Highway 75 to U.S. Highway 290, thence along U.S. Highway 290 to junction U.S. Highway 183, thence along U.S. Highway 183 to junction Interstate Highway 20, thence along Interstate Highway 20 to junction U.S. Highway 87, thence along U.S. Highway 87 to junction U.S. Highway 180, thence along U.S. Highway 180 to the Texas-New Mexico State line to points in Pennsylvania, on and east of a line beginning at the Pennsylvania-Maryland State line and extending along Interstate Highway 76, thence along Interstate Highway 70 to junction Interstate Highway 76, thence along Interstate Highway 76 to junction U.S. Highway 522 to junction U.S. Highway 22, thence along U.S. Highway 22 to junction Pennsylvania Highway 26, thence along Pennsylvania Highway 26 to junction U.S. Highway 220, thence along U.S. Highway 220 to junction Pennsylvania Highway 287, thence along Pennsylvania Highway 287 to junction U.S. Highway 15, thence along U.S. Highway 15 to the Pennsylvania-New York State line. The purpose of this filing is to eliminate the gateways of the plantsite and warehouse facilities of the Abitibi Corporation near Roaring River, N.C., and the plantsite and warehouse facilities of the Celotex Corporation in Wayne County, N.C. The purpose of this correction is to correct the territorial description.

No. MC 114552 (Sub-No. E214) (Correction), filed September 22, 1975, published in the FEDERAL REGISTER July 28, 1976, and republished, as corrected, this issue. Applicant: SENN TRUCKING COMPANY, P.O. Drawer 220, Newberry, S.C. 29108. Applicant's representative: William P. Jackson, Jr., P.O. Box 267, Arlington, Va. 22201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such composition boards as are also supplies and accessories used in the manufacture and installation of composition boards* (except commodities in bulk), from points in Arkansas, on and south of a line beginning at the Arkansas-Missouri State line, and extending along Arkansas Highway 25 to junction U.S. Highway 67, thence along U.S. Highway 67 to junction U.S. Highway 64, thence along U.S. Highway 64 to junction Interstate Highway 40, thence along Interstate Highway 40 to the Arkansas-Oklahoma State line, to points in Pennsylvania, on and east of a line beginning at the Pennsylvania-Maryland State line and extending along U.S. Highway 22, to junction Pennsylvania Turnpike Extension, thence along the Pennsylvania Turnpike Extension to junction U.S. Highway 209, thence along U.S. Highway 209 to junction Interstate Highway 80, thence along Interstate Highway 80 to the Pennsylvania-New Jersey State line. The purpose of this filing is to eliminate the gateways of the plantsite and warehouse facilities of the Abitibi Corporation near Roaring River, N.C., and the plantsite and warehouse facilities of the Celotex Corporation in Wayne County, N.C. The purpose of this correction is to correct the typographical errors which appear in the FEDERAL REGISTER publication of July 28, 1976.

No. MC 114552 (Sub-No. E216) (Correction), filed September 22, 1975, published in the FEDERAL REGISTER July 28, 1976, and republished, as corrected, this issue. Applicant: SENN TRUCKING COMPANY, P.O. Drawer 220, Newberry, S.C. 29108. Applicant's representative: William P. Jackson, Jr., P.O. Box 267, Arlington, Va. 22201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such composition boards as are also supplies and accessories used in the manufacture and installation of composition boards* (except commodities in bulk), from points in Arkansas on and south of a line beginning at the Arkansas-Mississippi State line, and extending along U.S. Highway 49 to junction U.S. Highway 79, thence along U.S. Highway 79 to junction U.S. Highway 270, thence along U.S. Highway 270 to the Arkansas-Oklahoma State line, to points in Pennsylvania, on and east of a line beginning at the Pennsylvania-Maryland State line and extending along Interstate Highway 83 to junction Interstate Highway 81, thence along Interstate Highway 81 to junction U.S. Highway 209, thence along U.S. Highway 209 to junction Interstate Highway 80, thence along Interstate Highway 80 to the Pennsylvania-New Jersey State line. The purpose of this filing is to eliminate the gateways of the plantsite and warehouse facilities of the Abitibi Corporation near Roaring River, N.C., and the plantsite and warehouse facilities of the Celotex Corporation in Wayne County, N.C. The purpose of this correction is to correct the territorial description.

No. MC 117416 (Sub-No. E5) (Correction), filed June 4, 1974, published in the

V 41 167 AUG 26 76 UMI

FEDERAL REGISTER August 19, 1974, and republished, as corrected, this issue. Applicant: NEWMAN & PEMBERTON CORP., 2007 University Avenue NW., Knoxville, Tenn. 37921. Applicant's representative: William P. Jackson, Jr., 919 Eighteenth Street NW., Washington, D.C. 20006. [Ex Parte No. MC–43; Service Date Aug. 20, 1976]

LEASE AND INTERCHANGE OF VEHICLES BY MOTOR CARRIERS

AUGUST 13, 1976.

It appearing, That a petition has been filed by Watkins Motor Lines, Inc. (MC–95540 and numerous subs) and Watkins Carolina Express, Inc. (MC–30280 and various subs), under permanent common control for waiver of paragraphs (a) (3) and (c) of Section 1057.4 of the Lease and Interchange of Vehicles Regulations (49 CFR 1057), concerning equipment leased between petitioners;

It further appearing, That petitioners have a jointly-administered program applying the same standards of inspection and maintenance to equipment in accordance with the motor carrier safety regulations of the U.S. Department of Transportation;

It further appearing, That the U.S. Department of Transportation offers no objection to a grant of the petition, based on the absence of adverse information in the Department's records;

It is ordered, That waiver of paragraphs (a) (3) and (c) of Section 1057.4, be, and it is hereby granted, provided that the equipment is inspected on the day it is to be leased and found to meet the requirements of the U.S. Department of Transportation and that petitioners remain in satisfactory compliance with those regulations and under common control.

By the Commission, Motor Carrier Leasing Board, Board Members Teeple and Sibbald.

ROBERT L. OSWALD,
Secretary.

[Volume No. 45]

PETITIONS FOR MODIFICATION, INTERPRETATION OR REINSTATEMENT OF OPERATING RIGHTS AUTHORITY

AUGUST 20, 1976.

The following petitions seek modification or interpretation of existing operating rights authority, or reinstatement of terminated operating rights authority.

An original and one copy of protests to the granting of the requested authority must be filed with the Commission within 30 days after the date of this Federal Register notice. Such protest shall comply with Special Rule 247(d) of the Commission's General Rules of Practice (49 CFR 1100.247)[1] and shall include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon petitioner's representative, or petitioner if no representative is named.

No. MC 263 (Notice of Filing of Petition for Clarification and Modification of Certificate) filed February 17, 1976. Petitioner: GARRETT FREIGHTLINES, INC., 2055 Garrett Way, P.O. Box 4048, Pocatello, Idaho 83201. Petitioner's representative: Maurice H. Greene, P.O. Box 4201, Pocatello, Idaho 83201. Petitioner holds a motor *common carrier* Certificate in No. MC 263, issued September 28, 1956, authorizing transportation, as pertinent, over regular routes, of *general commodities* (except those of unusual value, classes A and B explosives, commodities in bulk, and commodities requiring special equipment), between Boise, Idaho, and Portland, Oreg., serving the intermediate points of Nampa, Caldwell, and New Plymouth, Idaho, and Huntington, Baker, Union, LaGrande, Pendleton, Vale, Juntura, Burns, and Bend, Oreg., and the off-route points of Weiser and Payette, Idaho, as follows: from Boise over U.S. Highway 30 to Portland; from Boise over Idaho Highway 44 (formerly U.S. Highway 20) to junction U.S. Highway 30, thence over U.S. Highway 30 to Ontario, Oreg., thence over Oregon Highway 201 (formerly U.S. Highway 28) to junction U.S. Highway 20 (formerly U.S. Highway 28), thence over U.S. Highway 20 to Vale, Oreg., thence over U.S. Highway 20 to Bend, Oreg., thence over U.S. Highway 97 to junction U.S. Highway 26 (formerly Oregon Highway 50), and thence over U.S. Highway 26 to Portland; and return from Portland over U.S. Highway 30 to junction Idaho Highway 44 (formerly U.S. Highway 20) thence over either Idaho Highway 44 or U.S. Highway 30 to Boise. Additionally, and as pertinent, petitioner holds authority in its (Sub-No. 136) Certificate to transport *general commodities* (with the usual exceptions), between Umatilla, and Cold Springs, Oreg., and Westland, Oreg., serving the intermediate and off-route points of Hermiston, U.S. Ordnance Depot, and U.S. Munitions Dump near Hermiston and Westland, Oreg.: From Umatilla over unnumbered highway (formerly U.S. Highway 30) to Hermiston, Oreg., thence over Oregon Highway 207 to Westland, and return over the same route; and From Cold Springs over Oregon Highway 207 to Westland, and return over the same route, restricted in the service authorized immediately above to the condition that no traffic moving to or from points on the carrier's route over U.S. Highway 30 west of Umatilla, Oreg., shall be transported over the immediately above-specified routes between Umatilla and Cold Springs, Oreg., and Westland, Oreg.; and in (Sub-No. 185) petitioner holds authority to transport, as pertinent, over regular and irregular routes, *classes A and B explosives*, between the points authorized and over the routes described in carrier's presently held certificates authorizing the transportation of general commodities (except among other commodities, classes A and B explosives) in Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah and Washington subject to all territorial restrictions applicable to operation in the above states, except that no authority is granted herein to transport classes A and B explosives between Billings, Mont., and St. Paul, Minn., and intermediate points between Billings and St. Paul.

By the instant petition, petitioner seeks clarification of its authority with respect to serving the Umatilla Army Depot, located near Ordinance, Oreg. to indicate that it can serve the Umatilla Army Depot, Oreg. from its lead Certificate from the nearest regular route point and over the shortest practical highways, or in the alternative, modify the lead Certificate to include the Umatilla Army Depot located near Ordinance, Oreg. as a specified off-route point.

No. MC 12720 (Notice of Filing of Petition For Modification of Brokers License), filed August 11, 1976. Petitioner: TRAVEL & TOUR SERVICE, INC., 722 North Third St., Milwaukee, Wis. 53203. Petitioner's representative: William C. Dineen, 710 North Plankinton Avenue, Milwaukee, Wis. 53202. Petitioner holds a license to engage in operations as a *broker* in interstate or foreign commerce, at Milwaukee, Wis., in No. MC 12720, issued August 5, 1960, to arrange the transportation of *passengers and groups of passengers and their baggage*, in charter and special operations, beginning and ending at Milwaukee, Wis., and at points in Brown, Calumet, Dane, Dodge, Fond du Lac, Jefferson, Kenosha, Manitowoc, Outagamie, Ozaukee, Racine, Rock, Sheboygan, Walworth, Washington, Waukeska, and Winnebago Counties, Wis., and extending to points in the United States, including Alaska and Hawaii. By the instant petition, petitioner seeks to modify its territorial description so as to read; "Between points in the United States".

No. MC 123091 and (Sub-No. 13G) (Notice of Filing of Petition to Modify Commodity Description), filed July 29, 1976. Petitioner: NICK STRIMBU, INC., 3500 Parkway Rd., Brookfield, Ohio 44403. Petitioner's representative: James Duvall, 220 West Bridge Street, Dublin, Ohio 43017. Petitioner holds motor *common carrier* Certificates in No. MC 123091 and (Sub-No. 13G), issued June 1, 1965 and May 27, 1975, respectively, authorizing transportation (1) in No. MC 123091 over irregular routes, of *steel and steel products*, between Sharon, Pa., on the one hand, and, on the other, points in Ohio; and (2) in No. MC 123091 (Sub-No. 13G) over irregular routes, of *steel articles*, between points in Ohio, on the one hand, and, on the other, points in that part of Pennsylvania bounded by a line beginning at Sharon, Pa., and extending along U.S. Highway 62 to junction U.S. Highway 322, thence along U.S. Highway 322 to Clarion, thence along Pennsylvania Highway 66 to junction U.S. Highway 119, thence along U.S. Highway 119 to junction Pennsylvania Highway 136, thence along Pennsylvania Highway 136 to junction Pennsylvania Highway 844, thence along Pennsylvania Highway 844 to the Pennsylvania-West Virginia State line, thence along the Pennsylvania-West Virginia State line to the Pennsylvania-Ohio State line, and thence along the Pennsylvania-Ohio State line to the point of beginning, including points on the specified portions of the Highways indicated: From points in Ohio, and points in that part of Pennsylvania bounded by a line beginning at Sharon, Pa., and extending along U.S. Highway 62 to junction U.S. Highway 322, thence along U.S. Highway 322 to Clarion, thence along Pennsylvania Highway 66 to junction U.S. Highway 119, thence along U.S. Highway 119 to junction Pennsylvania Highway 136, thence along Pennsylvania Highway 136 to junction Pennsylvania Highway 844, thence along Pennsylvania Highway 844 to the Pennsylvania-West Virginia State line, thence along the Pennsylvania-West Virginia State line to the Pennsylvania-Ohio State line, thence along the Pennsylvania-Ohio State line to points of beginning, including points on the specified portions of the highways indicated, to points in Arizona, California, Colorado, Florida, Kansas, Mississippi, South Carolina, and Wyoming, that part of Tennessee on and west of a line beginning at the Kentucky-Tennessee State line and extending along U.S. Highway 31W to Nashville, and thence along U.S. Highway 31 to the Tennessee-Alabama State line, and points in Alabama (except Birmingham and points within 65 miles of Birmingham). By the instant petition, petitioner seeks to modify the commodity description in both MC 123091 and (Sub-No. 13G) so as to read: *"Iron and steel articles"*.

[1] Copies of Special Rule 247 (as amended) can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

REPUBLICATIONS OF GRANTS OF OPERATING RIGHTS AUTHORITY PRIOR TO CERTIFICATION

The following grants of operating rights authorities are republished by Order of the Commission to indicate a broadened grant of authority over that previously noticed in the FEDERAL REGISTER.

An original and one copy of protests to the granting of the authority must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protest shall comply with Special Rule 247(d) of the Commission's General Rules of Practice (49 CFR § 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition shall not be tendered at this time. A copy of the protest shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

No. MC 136916 (Sub-No. 13) (Republication), filed February 19, 1976, published in the FEDERAL REGISTER issue of March 18, 1976, and republished this issue. Applicant: LENAPE TRANSPORTATION CO., INC., P.O. Box 227, Lafayette, N.J. 07848. Applicant's representative: Bert Collins, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. An Order of the Commission, Review Board Number 2, dated July 23, 1976, and served August 4, 1976, finds that the present and future public convenience and necessity require operation by applicant, in interstate or foreign commerce, as a *common carrier* by motor vehicle, over irregular routes transporting, *Dry cement additives and dry soil stabilizing compounds*, in bulk, in tank and dump vehicles, from the facilities of Limestone Products Corporation of America, located in Sussex County, N.J., to points in Connecticut, Delaware, Maryland, Massachusetts, New York, Pennsylvania, Rhode Island and the District of Columbia, that applicant is fit, willing, and able properly to perform such service and to conform to the requirements of the Interstate Commerce Act and the Commission's rules and regulations thereunder. The purpose of this republication is to indicate the grant of dry cement additives and dry soil stabilizing compounds in bulk, in tank vehicles and dump vehicles, in lieu of cemdust blend and materials, as previously published.

MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER OPERATING RIGHTS APPLICATIONS

The following applications are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR § 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the FEDERAL REGISTER. Failure to seasonably file a

V 41 1 67
AUG 26 76
UMI

protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with section 247(d) (3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and one copy of the protest shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such requests shall meet the requirements of section 247(d) (4) of the special rules, and shall include the certification required therein.

Section 247(f) further provides, in part, that an applicant who does not intend timely to prosecute its application shall promptly request dismissal thereof, and that failure to prosecute an application under procedures ordered by the Commission will result in dismissal of the application.

Further processing steps will be by Commission order which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication except for good cause shown, and restrictive amendments will not be entertained following publication in the Federal Register of a notice that the proceeding has been assigned for oral hearing.*

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

No. MC 340 (Sub-No. 42), filed June 21, 1976. Applicant: QUERNER TRUCK LINES, INC., 1131-33 Austin Street, San Antonio, Tex. 78208. Applicant's representative: M. Ward Bailey, 2412 Continental Life Building, Fort Worth, Tex. 76102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Malt liquor beverages* (except commodities in bulk, in tank vehicles), from San Antonio, Tex., to points in Indiana, Illinois, Kentucky, Ohio, Wisconsin, the Lower Peninsula of Michigan and St. Louis County, Mo. and points within 50 miles thereof.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either San Antonio or Dallas, Tex.

No. MC 409 (Sub-No. 59) filed July 19, 1976. Applicant: SCHROETLIN TANK LINE, INC., P.O. Box 511, Sutton, Nebr. 68979. Applicant's representative: Patrick E. Quinn, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer and fertilizer materials*, from the facilities of Cominco American, located at or near Hoag, Nebr., to points in Oklahoma and Texas.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Lincoln, Nebr. or Omaha, Nebr.

No. MC 720 (Sub-No. 15), filed July 19, 1976. Applicant: BIRD TRUCKING CO., INC., Box 227, Waupun, Wis. 53968. Applicant's representative: Anthony C. Vance, 1300 Old Chain Bridge Road, McLean, Va. 22101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are dealt in by wholesale, retail, chain grocery, and food business houses (except commodities in bulk), between Hodgkins, Ill., on the one hand, and, on the other, points in Brown Calumet, Columbia, Dodge, Door, Fond du Lac, Green Lake, Jefferson, Kenosha, Kewaunee, Manitowoc, Milwaukee (except points east of Wisconsin Highway 100 in Milwaukee, County), Outagamie, Ozaukee, Portage, Racine, Rock, Sauk, Sheboygan, Walworth, Washington, Waukesha, Waupaca, Waushara, Winnebago, and Wood Counties, Wis., restricted to warehouse and Distributors, Inc., Hodgkins, Ill. If a hearing is deemed necessary, the applicant requests it be held at either Milwaukee, Wis. or Washington, D.C.

No. MC 4405 (Sub-No. 534), filed July 22, 1976. Applicant: DEALERS TRANSIT, INC., 220 E. 170th Street, Lansing, Ill. 60438. Applicant's representative: Alan Foss, 502 First National Bank Bldg., Fargo, N. Dak 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Trailers and trailer chassis*, other than those designed to be drawn by passenger automobiles, in initial movements, in truckaway and driveaway service, from Opole, Minn., to points in the United States (except Alaska and Hawaii); and (2) *tractors*, in secondary movements, in driveaway service when drawing trailer chassis in initial movements, from Opole, Minn., to points in Arizona, Nevada, Oregon and Vermont.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 42011 (Sub-No. 23), filed July 20, 1976. Applicant: D. Q. WISE & CO., INC., P.O. Box 15125, Tulsa, Okla. 74115. Applicant's representative: J. Michael Alexander, 136 Wynnewood Professional Building, Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from Jewett, Tex., to Arkansas, Colorado, Kansas, Louisiana, Missouri, New Mexico and Oklahoma, restricted to shipments originating at the facilities of Nucor Steel Corporation located at Jewett, Texas.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held on a consolidated record with similar applications of C & H Transportation, J. J. Willis Trucking Co., Tom Hicks Transfer Co., Inc., Eagle Motor Lines, Tex-O-Ka-N Transportation Co., Inc., and Wales Transportation, Inc., at Dallas, Tex.

No. MC 51146 (Sub-No. 473), filed July 22, 1976. Applicant: SCHNEIDER TRANSPORT, INC., 2661 South Broadway, Green Bay, Wis. 54304. Applicant's representative: Neil A. DuJardin, P.O. Box 2298, Green Bay, Wis. 54306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Containers, container ends, and equipment, materials, supplies, and accessories* used in the manufacture and distribution of containers and container ends, when moving with containers and container ends, from Fogelsville, Pa., to points in the United States (except Alaska, Hawaii, Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont and West Virginia).

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Washington, D.C., or New York, N.Y.

No. MC 58885 (Sub-No. 30), filed July 19, 1976. Applicant: ATLANTA MOTOR LINES, INC., P.O. Box 345, Conley, Ga. 30027. Applicant's representative: Paul M. Daniell, P.O. Box 872, Atlanta, Ga. 30301. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment); Between Atlanta, and Lavonia, Ga.: (1) From Atlanta, Ga., over U.S. Highway 29 to Winder, Ga., thence over Georgia Highway 11 to Jefferson, Ga., thence over Georgia Highway 15 to Commerce, Ga., and thence over Georgia Highway 59 to Lavonia, Ga., and return over the same route, serving all intermediate points; and (2) From Atlanta, Ga., over Interstate Highway 85 to Lavonia, Ga., and return over the same route serving all intermediate points. Serving Maysville, Homer, Avalon and Martin, Ga., and all points in Franklin County, Ga., as off-route points in connection with Routes 1 and 2 above.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Commerce, Ga.

No. MC 82492 (Sub-No. 134), filed July 16, 1976. Applicant: MICHIGAN & NEBRASKA TRANSIT CO., INC., P.O. Box 2853, 2109 Olmstead Road, Kalamazoo, Mich. 49003. Applicant's representative: William C. Harris (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Calcium chloride; caustic soda; chemicals; cleaning, deodorizing, disinfecting,*

laundry, polishing, scouring and washing compounds; petroleum products, soda ash; laundry sour, and bleach, from Ludington, Midland, Rockwood, St. Louis and Wyandotte, Mich.; Cleveland, Delaware, Macedonia and Painesville, Ohio, and Syracuse, N.Y., to points in Minnesota, North Dakota and South Dakota.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Detroit, Mich. or Washington, D.C.

No. MC 83835 (Sub-No. 133), filed July 20, 1976. Applicant: WALES TRANSPORTATION, INC., P.O. Box 6186, Dallas, Tex. 75222. Applicant's representative: James W. Hightower, 136 Wynnewood Professional Bldg., Dallas, Tex. 75224. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from the facilities of Armco Steel Corporation located at or near Sand Springs, Okla., to points in Arkansas, Kansas, Louisiana, Missouri and Texas.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Kansas City, Mo. or Dallas, Tex.

No. MC 92068 (Sub-No. 17), filed July 13, 1976. Applicant: MUTUAL TRANSPORTATION, INC., President and Fleet Streets, Baltimore, Md. 21202. Applicant's representative: Walter T. Evans, 7401 Wisconsin Avenue, Washington, D.C. 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Such commodities* as are dealt in or used by retail and discount department stores, from the facilities of Mutual Transportation, Inc., at Baltimore, Md., to the store and facilities of Mammoth Mart, Inc., at Odenton, Md., and the store and facilities of the K Mart store of S. S. Kresge Company, at the intersection of U.S. Highway 301 and Maryland Highway 424, near Crofton, Md.; and (2) *returned shipments* of the commodities in (1) above, from the store and facilities of Mammoth Mart, Inc., at Odenton, Md., and from the store and facilities of the K Mart store of S. S. Kresge Company, at the intersection of U.S. Highway 301 and Maryland Highway 424, near Crofton, Md., to the facilities of Mutual Transportation, Inc. at Baltimore, Md.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 94350 (Sub-No. 362), filed July 13, 1976. Applicant: TRANSIT HOMES, INC., P.O. Box 1628, Greenville, S.C. 29602. Applicant's representative: Mitchell King, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Trailers*, designed to be drawn by passenger automobiles, in initial movements, from points in Texas on or east of U.S. Highway 281, to points in Arkansas, Colorado, Kansas, Louisiana, Missouri, New Mexico, and Oklahoma; and (2) *buildings, in sections*, mounted on wheeled undercarriages, from points in Texas on or east of U.S. Highway 281, to points in Arizona, Arkansas, Kansas, Louisiana, and Missouri.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Dallas, Tex.

No. MC 98952 (Sub-No. 36), filed July 13, 1976. Applicant: GENERAL TRANSFER COMPANY, a Corporation, 2880 North Woodford St., P.O. Box 2203, Decatur, Ill. 62526. Applicant's representative: Paul E. Steinhour, 918 East Capitol Avenue, Springfield, Ill. 62701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Food, food products, and food ingredients*, in mechanically refrigerated equipment (except in bulk), from the plant and warehouse facilities owned and operated by Archer-Daniels-Midland Company, located at Decatur, Ill.; also, shipping products for Wilsey Foods, Inc., and others, to Kansas City, Kans., and points in Arkansas, Indiana, Iowa, Kentucky, Michigan, Minnesota, Missouri, Ohio, Tennessee, and Wisconsin, restricted to traffic originating at above origin, and destined to the named destinations.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Springfield or Chicago, Ill.

No. MC 98952 (Sub-No. 37), filed July 20, 1976. Applicant: GENERAL TRANSFER COMPANY, 2880 N. Woodford St., P.O. Box 2203, Decatur, Ill. 62526. Applicant's representative: Paul E. Steinhour, 918 E. Capitol Avenue, Springfield, Ill. 62701. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise*, as is dealt in by wholesale grocery and food business houses, and in connection therewith, *equipment, materials, and supplies* used in conduct of such business (except commodities in bulk and foodstuffs), from the facilities of Consolidated Sales Corp., located at or near Indianapolis, Ind., to facilities of Jewel Food Stores, Division of Jewel Companies, Inc., located at or near Franklin Park, Ill., restricted to traffic originating at named origin and destined to named destination.

NOTE.—Dual operations may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Chicago, Ill., or St. Louis, Mo.

No. MC 99427 (Sub-No. 31), filed July 16, 1976. Applicant: ARIZONA TANK LINES, INC., 3200 Ruan Center, 666 Grand Avenue, P.O. Box 855, Des Moines, Iowa 50309. Applicant's representative: E. Check (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Sulfuric acid*, in bulk, in tank vehicles, from points in Arizona, to points in New Mexico; and (2) *graphite*, in bulk, from Buckeye, Ariz., to points in California, Colorado, Nevada, New Mexico, Texas, and Utah.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Phoenix, Ariz., or Denver, Colo.

No. MC 100449 (Sub-No. 68), filed July 22, 1976. Applicant: MALLINGER TRUCK LINE, INC., Route No. 4, Fort Dodge, Iowa 50501. Applicant's representative: Edward A. O'Donnell, 1004 29th St., Sioux City, Iowa 51104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat byproducts, and articles distributed by meat packinghouses* as described in "Descriptions in Motor Carrier Certificates," 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from Fort Dodge, Hartley, and Spencer, Iowa, Fremont and Schuyler, Nebr., to points in Wisconsin.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Sioux City or Des Moines, Iowa, or Omaha, Nebr.

No. MC 100666 (Sub-No. 327), filed July 2, 1976. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Wilburn L. Williamson, 280 National Foundation Life Bldg., 3535 N.W. 58th Street, Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Gypsum board paper*, from Anniston, Ala., to Medicine Lodge, Kans., and Rotan, Tex.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at Dallas, Tex.

No. MC 100666 (Sub-No. 328), filed July 22, 1976. Applicant: MELTON TRUCK LINES, INC., P.O. Box 7666, Shreveport, La. 71107. Applicant's representative: Wilburn L. Williamson, 280 National Foundation Life Bldg., 3535 N.W. 58th St., Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Roofing and roofing products*, (1) from Los Angeles, Calif., to points in Arizona, Colorado, and New Mexico; (2) from San Antonio, Tex., to points in Arizona and Colorado; and (3) from Houston, Tex., to points in Arizona.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Dallas, Tex.

No. MC 103066 (Sub-No. 36), filed July 21, 1976. Applicant: STONE TRUCKING COMPANY, P.O. Box 2014, Tulsa, Okla. 74101. Applicant's representative: Eugene D. Anderson, 910 Seventeenth St., N.W., Suite 428, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wood products*, from Piscataquis County, Maine, to points in California, Illinois, and Texas.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 103066 (Sub-No. 37), filed July 21, 1976. Applicant: STONE TRUCKING COMPANY, P.O. Box 2014, Tulsa, Okla. 74101. Applicant's representative: Eugene D. Anderson, 910 Seventeenth St., NW., Suite 428, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor

ience and Necessity in MC 111839. If a hearing is deemed necessary, the applicant requests it be held at either Birmingham, Ala., or Chattanooga, Tenn.

No. MC 112617 (Sub-No. 349), filed July 22, 1976. Applicant: LIQUID TRANSPORTERS, INC., P.O. Box 21395, Louisville, Ky. 40221. Applicant's representative: Leonard A. Jaskiewicz, 1730 M Street NW., Suite 501, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Soybean products*, in bulk, in tank vehicles, from Cairo, Ill., to points in Alabama, Arkansas, Georgia, Indiana, Kansas, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Ohio, Tennessee, and Wisconsin.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Louisville, Ky., or Washington, D.C.

No. MC 112617 (Sub-No. 350), filed July 16, 1976. Applicant: LIQUID TRANSPORTERS, INC., P.O. Box 21395, Louisville, Ky. 40221. Applicant's representative: Leonard A. Jaskiewicz, 1730 M Street NW., Suite 501, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting *Liquid chemicals*, in bulk, in tank vehicles, from the plantsite of Rohm & Haas Company, located at Knoxville, Tenn., to points in Alabama, Georgia, Florida, Louisiana, Mississippi, North Carolina, South Carolina, and Virginia, restricted to shipments having an origin at Louisville, Ky., and stopped in transit for additional loading.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Louisville, Ky., or Washington, D.C.

No. MC 113267 (Sub-No. 336), filed July 19, 1976. Applicant: CENTRAL & SOUTHERN TRUCK LINES, INC., 3215 Tulane Road, P.O. Box 30130 A.M.F., Memphis, Tenn. 38130. Applicant's representative: Lawrence A. Fischer (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs, and frozen food* (except in bulk), from the facilities of New Orleans Cold Storage and Warehouse Co., located at New Orleans, La., to points in Alabama, Arkansas, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, Oklahoma, South Dakota, Tennessee, Texas, and Wisconsin.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either New Orleans, La., or Memphis, Tenn.

No. MC 113429 (Sub-No. 3), filed July 21, 1976. Applicant: MIKE CONTRIS, doing business as CONTRIS TRUCKINK, Route 1, Harrod, Ohio 45850. Applicant's representative: Richard H. Brandon, 220 West Bridge Street, P.O. Box 97, Dublin, Ohio 43017. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Machine parts and materials* (except commodities in bulk) used in the manufacture of or repair of construction equipment, in express service, restricted to shipments not exceeding 5000 pounds, between Lima, Ohio, on the one hand, and, on the other, points in the United States (except Alaska, Hawaii and Ohio), under a continuing contract with Clark Equipment Company.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Columbus, Ohio.

No. MC 113495 (Sub-No. 78) (Correction), filed June 22, 1976, published in the FEDERAL REGISTER issue of July 29, 1976, and republished as corrected this issue. Applicant: GREGORY HEAVY HAULERS, INC., 51 Oldham Street, P.O. Box 60628, Nashville, Tenn. 37206. Applicant's representative: Wilmer B. Hill, 805 McLachlen Bank Bldg., 666 Eleventh Street NW., Washington, D.C. 20001. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) (a) *Tractors* (except those with vehicle beds, bed frames, and fifth wheels); (b) *equipment* designed for use in conjunction with trailers; (c) *agricultural, industrial, and construction machinery and equipment;* (d) *trailers* designed for the transportation of the commodities named in (a), (b), and (c) (except trailers designed to be drawn by passenger automobiles); (e) *attachments* for the commodities named in (a), (b) (c), and (d) above; (f) *internal combustion engines;* and (g) *parts* of the commodities named in (a), (b), (c), (d), (e), and (f) above, from the plants, warehouse sites and experimental farms of Deere & Company located at Philadelphia, Pa., Baltimore, Md., Atlanta, Ga., and Wilmington, N.C., and points in Black Hawk, Dubuque, Polk and Wapello Counties, Iowa, Rock Island County, Ill., and Dodge County, Wis., to points in Alabama, Delaware, Georgia, Florida, Kentucky, Maryland, North Carolina, South Carolina, Tennessee, Virginia, and West Virginia; and (2) *returned shipments* of the commodities described above, from the destination named in (1) above, to the origin points named in (1) above.

NOTE.—The purpose of this republication is (1) to correct the territorial description; and (2) to correct applicant's representative's name published as Wilmer B. Hull, in lieu of Wilmer B. Hill. Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Atlanta, Ga., or Charlotte, N.C.

No. MC 113624 (Sub-No. 75), filed July 20, 1976. Applicant: WARD TRANSPORT, INC., P.O. Box 735, Pueblo, Colo. 81001. Applicant's representative: Marion F. Jones, 1600 Lincoln Center, 1660 Lincoln Street, Denver, Colo. 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fertilizer solution*, in bulk, in tank vehicles, from Grant, Nebr., to points in Iowa, Missouri, and North Dakota, and points in Oklahoma south of Interstate Highway 40, and points in South Dakota east of the Missouri River.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Houston, Tex., or Denver, Colo.

No. MC 113678 (Sub-No. 631), filed July 23, 1976. Applicant: CURTIS, INC., 4810 Pontiac Street, Commerce City (Denver), Colo. 80022. Applicant's representative: Richard A. Peterson, P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are manufactured, processed, sold, used, distributed, or dealt in by manufacturers, converters, and printers of paper and paper products (except commodities in bulk), between points in Wisconsin and the Upper Peninsula of Michigan, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Milwaukee, Wis., in consolidation with Aubrey Freight; Container Transit; Diamond Transportation; Carl Subler; and Truck Transport.

No. MC 114211 (Sub-No. 279), filed July 19, 1976. Applicant: WARREN TRANSPORT, INC., 324 Manhard Street, P.O. Box 420, Waterloo, Iowa 50704. Applicant's representative: Daniel Sullivan, 327 South La Salle, Chicago, Ill. 60604. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Commodities*, which because of size or weight, require the use of special *equipment, and related machinery, parts and supplies*, when their transportation is incidental to the transportation of commodities which because of size or weight require the use of special equipment, and *commodities* which do not require the use of special equipment when moving on the same equipment or same bill of lading as commodities which because of size or weight require the use of special equipment; and (2) *self-propelled articles and related machinery, tools, parts, and supplies* moving in conjunction therewith, between the ports of entry on the International Boundary line between the United States and Canada, located in Minnesota, North Dakota, Montana, Idaho, and Washington, on the one hand, and on the other, points in the United States including Alaska but excluding Hawaii, restricted against the transportation of tractors, road making machinery, contractors' equipment and supplies and farm machinery.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Minneapolis, Minn., or Fargo, N. Dak.

No. MC 114569 (Sub-No. 142), filed July 20, 1976. Applicant: SHAFFER TRUCKING, INC., P.O. Box 418, New Kingstown, Pa. 17072. Applicant's representative: Duane W. Acklie, P.O. Box 81228, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Canned goods* (unfrozen), from Belledeau and St. Francisville, La.,

to points in Delaware, Maryland, New Jersey, New York, Ohio, Pennsylvania, and the District of Columbia.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Peoria or Chicago, Ill.

No. MC 114829 (Sub-No. 11), filed July 22, 1976. Applicant: GENERAL CARTAGE COMPANY, INC., West U.S. Route No. 30, Rock Falls, Ill. 61071. Applicant's representative: Daniel C. Sullivan 327 South La Salle St., Chicago, Ill. 60604. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Refractory materials and products* (except in bulk), from points in Lake County, Ind., to Sterling, Ill., under a continuing contract or contracts with Northwestern Steel & Wire Company.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Sterling or Chicago, Ill.

No. MC 115278 (Sub-No. 4) (Clarification), filed June 17, 1976, published in the FEDERAL REGISTER issue of July 29, 1976, and republished, as clarified this issue. Applicant: SIEGEL & COHEN EXPRESS, INC., 566 South 11th Street, Newark, N.J. 07103. Applicant's representative: George A. Olsen, 69 Tonnele Ave., Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Yarn*, in packages, from Henderson, N.C., to points in that part of the New York, N.Y., Commercial Zone, as defined in *Commercial Zones and Terminal Areas*, 53 M.C.C. 451 within which local operations may be conducted pursuant to the partial exemption of Section 203(b)(8) of the Act (the "exempt zone") and points in New Jersey within 35 miles of New York, N.Y., restricted against interlining at origin or destination.

NOTE.—The purpose of this republication is to clarify the territorial description. If a hearing is deemed necessary, the applicant requests it be held at either New York, N.Y., or Washington, D.C.

No. MC 115654 (Sub-No. 55), filed July 21, 1976. Applicant: TENNESSEE CARTAGE COMPANY, INC., Candy Lane, P.O. Box 23193, Nashville, Tenn. 37202. Applicant's representative: Walter Harwood, P.O. Box 15214, Nashville, Tenn. 37215. Authority sought to operate as a *common carrier* by motor vehicle over irregular routes, transporting: *Foodstuffs* (except in bulk), in vehicles equipped with mechanical refrigeration, from Memphis, Tenn., to points in Alabama, Kentucky, and Ohio.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Memphis, Tenn.

No. MC 115904 (Sub-No. 57), filed July 15, 1976. Applicant: GROVER TRUCKING CO., 1710 West Broadway, Idaho Falls, Idaho 83401. Applicant's representative: Irene Warr, 430 Judge Building, Salt Lake City, Utah 84111. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Plastic pipe and fittings*, from Denver, Colo., to points in Colorado, Idaho, Montana, Nebraska, New Mexico, South Dakota, Texas, Utah, and Wyoming, restricted against the transportation of commodities which by reason of size or weight require the use of special equipment, and those commodities falling within the category described in *Mercer Extension—Oil Field Commodities*, 74 M.C.C. 495, and further restricted to the transportation of traffic originating at the facilities of Western Plastics Corp., located at Denver, Colo.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Denver, Colo., or Washington, D.C.

No. MC 116763 (Sub-No. 348), filed July 23, 1976. Applicant: CARL SUBLER TRUCKING, INC., North West Street, Versailles, Ohio 45380. Applicant's representative: H. M. Richters (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Buildings and component parts, materials, supplies* and *fixtures* used in the erection or assembly of buildings, between Victor, N.Y.; Chardon and Jamestown, Ohio; Coraopolis, Eighty-four and Wampum, Pa.; and Fredericksburg, Va., on the one hand, and, on the other, points in Mississippi, under a continuing contract, or contracts, with Ryan Homes, Inc. located in Pittsburgh, Pa., restricted against the transportation of (a) buildings, in sections when mounted on wheeled undercarriages, and (b) cement.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Columbus, Ohio.

No. MC 134405 (Sub-No. 30) filed July 23, 1976. Applicant: BACON TRANSPORT COMPANY, P.O. Box 1134, Ardmore, Okla. 73401. Applicant's representative: Wilburn L. Williamson, 280 National Foundation Life Bldg., 3535 N.W. 58th Street, Oklahoma City, Okla. 73112. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Asphaltic emulsions*, from Springfield, Mo., to points in Arkansas; and (2) *liquid asphalt*, in bulk, in tank vehicles, from Enid and Ardmore, Okla., to points in Missouri.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Dallas, Tex. or Oklahoma City, Okla.

No. MC 134484 (Sub-No. 9), filed July 21, 1976. Applicant: EDWARDS BROS. INC., 1875 North Holmes Ave., P.O. Box 1684, Idaho Falls, Idaho 83401. Applicant's representative: Morgan G. Edwards (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats*, from Flathead County, Mont., to points in Arizona, California, Colorado, Idaho, Nevada, Oregon, Utah and Washington.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Boise, Idaho or Billings, Mont.

No. MC 134922 (Sub-No. 184), filed July 13, 1976. Applicant: B. J. McADAMS, INC., Route 6, P.O. Box 15, North Little Rock, Ark. 72118. Applicant's representative: Bob McAdams (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except commodities in bulk, household goods as defined by the Commission, articles of unusual value, Classes A and B explosives, foodstuffs and commodities requiring special equipment), between the Yellow Creek Port Terminal and Industrial area, located in Tishomingo County, Miss., on the one hand, and, on the other, points in the United States including Alaska, but excluding Alabama, Florida, Georgia, Hawaii, Mississippi, North Carolina, South Carolina and Tennessee.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Little Rock, Ark. or Memphis, Tenn.

No. MC 135183 (Sub-No. 6) filed July 13, 1976. Applicant: KERR CONTRACT CARRIAGE, INC., Route 4, Salem, Mo. 65560. Applicant's representative: B. W. LaTourette, Jr., 11 S. Meramec, Suite 1400, St. Louis, Mo. 63105. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Charcoal, charcoal briquettes, and charcoal lighter fluid*, from the plantsite of Floyd Charcoal Co., located near Salem, Mo., to points in Iowa, Louisiana, Nebraska and South Carolina; (2) *paper bags*, from Mobile, Ala.; Pensacola, Fla.; Savannah, Ga.; Peoria, Ill.; Indianapolis and Seymour, Ind.; West Monroe, La.; Omaha, Nebr.; Spartanburg, S.C.; and Bristol, Tenn.; to the plantsite of Floyd Charcoal Co., located near Salem, Mo.; and (3) *sodium nitrate*, in bags, from Lake Charles, La., to the plantsite of Floyd Charcoal Co., located near Salem, Mo., under a continuing contract, or contracts, with Floyd Charcoal Co.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either St. Louis, Mo. or Springfield, Ill.

No. MC 135185 (Sub-No. 30) filed July 19, 1976. Applicant: COLUMBINE CARRIERS, INC., 5925 East Evans Avenue, P.O. Box 22198, Denver, Colo. 80222. Applicant's representative: Charles J. Kimball, 350 Capitol Life Center, 1600 Sherman Street, Denver, Colo. 80203. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Cleaning, scouring and washing compounds, polishing* and *buffing compounds, disinfectants, deodorants, drugs* and *toilet preparations, insecticides, other household cleaning supplies, chemicals, hydraulic cement, sand, coal tar, adhesive tape, plastic synthetics, paint solvents, rubber cement, caulking and brazing compounds, varnish, paints, phosphoric acid and titanium dioxide*, (a) from Lincoln, Ill., and Toledo, Ohio, to points in Hennepin and Ramsey Counties, Minn.; and (b) from Belle Mead, N.J., to points in California and Massachusetts; and (2) *materials, equipment and supplies* used in the manufacture and distribution of the commodities named in (1) above, from points in Illinois to Toledo, Ohio, under a continuing contract, or contracts, in (1) and (2) above with Lehn & Fink Products Co., a Division of Sterling Drug, Inc.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Newark, N.J. or New York, N.Y.

No. MC 135283 (Sub-No. 17), filed July 16, 1976. Applicant: GRAND ISLAND MOVING & STORAGE CO., INC., Box 1665, E. Highway 30, Grand Island, Nebr. 68801. Applicant's representative: Gailyn L. Larsen, 521 South 14th Street, P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, and articles distributed by meat packinghouses*, as described in sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), from the plantsite and storage facilities of Midwestern Beef, Inc., Platte Valley Division, located at or near Darr, Nebr., to points in Illinois, Indiana, Iowa, Michigan, Minnesota, Missouri, Ohio, Pennsylvania and Wisconsin, restricted to the transportation of traffic originating at the named origin point and destined to the named destination points.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Lincoln or Grand Island, Nebr.

No. MC 135732 (Sub-No. 25), filed July 23, 1976. Applicant: AUBREY FREIGHT LINES, INC., 605 Grove St., P.O. Box 503, Elizabeth, N.J. 07202. Applicant's representative: George A. Olsen, 69 Tonnele Ave., Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities* as are manufactured, processed, sold, used, distributed, or dealt in by manufacturers, converters, and printers of paper and paper products (except commodities in bulk), between points in Wisconsin and the Upper Peninsula of Michigan, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Milwaukee, Wis., in consolidation with Container Transit, Inc.; Curtis, Inc.; Diamond Transportation System; Truck Transport, Inc.; Carl Subler Trucking, Inc.

No. MC 136343 (Sub-No. 87), filed July 2, 1976. Applicant: MILTON TRANSPORTATION, INC., P.O. Box 535, Milton, Pa. 17847. Applicant's representative: George A. Olsen, 69 Tonnele Ave., Jersey City, N.J. 07306. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Wood and plastic mouldings*, from the facilities of Abitibi Corporation located at Middlebury, Ind., to points in the United States in and east of Kansas, Nebraska, North Dakota, Oklahoma, South Dakota and Texas; and (2) *discontinued merchandise, returned, refused and rejected shipments*, from the above destination points to the facilities of Abitibi Corporation located at Middlebury, Ind.

NOTE.—If a hearing is deemed necessary, the applicant requests that it be held at either Columbus, Ohio or Washington, D.C.

No. MC 136762 (Sub-No. 11), filed June 22, 1976. Applicant: OSBORNE HIGHWAY EXPRESS, P.O. Box 763, Ukiah, Calif. 95482. Applicant's representative: J. H. Gulseth, 125 University Avenue, Berkeley, Calif. 94710. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Insulating material*, from Fruita, Colo., to points in Arizona, California, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington and Wyoming.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at San Francisco, Calif.

No. MC 136786 (Sub-No. 101), filed July 7, 1976. Applicant: ROBCO TRANSPORTATION, INC., 309 5th Avenue Northwest, P.O. Box 12729, New Brighton, Minn. 55112. Applicant's representative: Stanley C. Olsen, Jr., 7525 Mitchell Road, Eden Prairie, Minn. 55343. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Printed matter and materials and supplies* used in the manufacture of printed matter (except commodities in bulk), between Willard, Ohio, on the one hand, and, on the other, points in Alabama, Florida, Georgia, Iowa, Kansas, Minnesota, Mississippi, Missouri, Nebraska, North Carolina, North Dakota, Oklahoma, South Carolina, South Dakota, Tennessee, Texas, Virginia and Wisconsin.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Minneapolis, Minn.

No. MC 138308 (Sub-No. 16), filed July 19, 1976. Applicant: KLM, INC., 2102 Old Brandon Road, P.O. Box 6098, Jackson, Miss. 39208. Applicant's representative: Donald B. Morrison, 1500 Deposit Guaranty Plaza, P.O. Box 22628, Jackson, Miss. 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wiring devices and electrical and lighting equipment* (except commodities which by reason of size or weight require the use of special equipment), from the facilities of Union Insulating Co., Inc. located at or near Parkersburg, W. Va., to point in California, Oregon and Washington.

NOTE.—Applicant holds contract carrier authority in MC 128592 and subs thereunder, therefore dual operations may be involved.

Dak., to points in Idaho, Montana and Oregon.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Fargo, N. Dak. or Minneapolis, Minn.

No. MC 139432 (Sub-No. 7), filed July 12, 1976. Applicant: SUNRISE TRANSPORTATION, INC., 9850 East Highway 120, Manteca, Calif. 95336. Applicant's representative: Thomas M. Loughran, 100 Bush Street, 21st Floor, San Francisco, Calif. 94104. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Molasses and liquid feed supplement*, in bulk, in tank vehicles, from the plantsite of Cargill, Inc., at Stockton, Calif., to points in Curry, Josephine, Jackson, Klamath, Lake, Harney, Malheur, Coos, Douglas, Lane, Deschutes, Crook, Wheeler, and Grant Counties, Oreg., under a continuing contract or contracts with Cargill, Inc.

NOTE.—Applicant holds common carrier authority in MC 119912 Sub 1, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at either San Francisco or San Diego, Calif.

No. MC 139495 (Sub-No. 138) (Amendment), filed April 1, 1976, published in the FEDERAL REGISTER issue of May 13, 1975, republished as amended this issue. Applicant: NATIONAL CARRIERS, INC., 1501 East 8th Street, P.O. Box 1358, Liberal, Kans. 67901. Applicant's representative: Herbert Alan Dubin, 1819 H St. NW, Suite 1030, Washington, D.C. 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Cleaning, scouring and washing compounds; and water treating compounds* (except in bulk) from the plantsite and storage facilities of Calgon Corporation located at or near Frisco, Pa. to Hayward, and City

of Industry, Calif.; Denver, Colo.; Atlanta, Ga.; New Orleans, La.; Duluth, Minn.; St. Louis, Mo.; Charlotte, N.C.; Bayport and Houston, Tex.; Salt Lake City, Utah; Seattle, Wash. and Bluefield, W. Va.

NOTE.—The purpose of this republication are to (1) delete activated carbon and lavatory fixtures from the commodity description and (2) delete parts (1), (3) and (4) from the territorial description and (3) to add Denver, Colo., Duluth, Minn. and City Industry, Calif. as destination points in this proceeding. If a hearing is deemed necessary, the applicant requests it be held at Washington, D.C.

No. MC 139743 (Sub-No. 5) (Correction), filed June 23, 1976, published in the FEDERAL REGISTER issue of August 5, 1976, as MC 13974, republished as corrected this issue. Applicant: GEORGIA CARPET EXPRESS, INC., P.O. Box 1680 (Tibbs Road), Dalton, Ga. 30720. Applicant's representative: Archie B. Culbreth, 1252 West Peachtree St., NW, Suite 246, Atlanta, Ga. 30309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Carpets, carpeting and carpet samples*, from the plantsites and warehouse facilities of Salem Carpet Mills, Inc., located at or near Ringgold, Ga., and Normandy Carpets, Inc., located at or near Dalton, Ga., to points in California.

NOTE.—The purpose of this republication is to change docket number MC 139743 Sub-No. 5 in lieu of MC 13974 Sub-No. 5 which was previously omitted. If a hearing is deemed necessary, the applicant requests it be held at Atlanta, Ga.

No. MC 140033 (Sub-No. 15), filed July 19, 1976. Applicant: COX REFRIGERATED EXPRESS, INC., 10606 Goodnight Lane, Dallas, Tex. 75220. Applicant's representative: E. Larry Wells, 4645 N. Central Expressway, Dallas, Tex. 75205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meat, meat products, meat byproducts, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from the plantsite of Maverick Beef Packers, Inc., at or near Eagle Pass, Tex., to points in the United States (except Alaska and Hawaii).

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either San Antonio or Dallas, Tex.

No. MC 140581 (Sub-No. 4), filed July 21, 1976. Applicant: TOMMY HAGWOOD, an individual, doing business as HAGWOOD ENTERPRISES, Route 1, Box 222–A, Trafford, Ala. 35172. Applicant's representative: William P. Jackson, Jr., 3426 North Washington Blvd., P.O. Box 1267, Arlington, Va. 22210. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used motor vehicles*, in truckaway service, between Oakland, Calif., on the one hand, and, on the other, points in Alabama, Connecticut, Delaware, Florida, Georgia, Louisiana, Maine, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, New York, North Carolina, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont, Virginia and the District of Columbia.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Los Angeles, Calif.

No. MC 140743 (Sub-No. 9) (Amendment), filed March 29, 1976, published in the FEDERAL REGISTER issue of April 29, 1976, republished as amended this issue. Applicant: GORSKI BULK TRANSPORT, INC., 21635 East Nine Mile Road, St. Clair Shores, Mich. 48080. Applicant's representative: William B. Elmer (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Alcoholic liquors*, in bulk, in tank vehicles, from the ports of entry on the International Boundary line between the United States and Canada, located in Michigan, Montana, New York and North Dakota, to Cincinnati, Ohio, restricted to traffic originating at Calgary, Alberta, Canada.

NOTE.—The purpose of this republication is to amend the requested authority in this proceeding. Common control and dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.; Cincinnati, Ohio; or Detroit, Mich.

No. MC 141172 (Sub-No. 1), filed June 24, 1976. Applicant: RETTA TRUCKING CO., INC., 3 Pleasantville Road, Ossining, N.Y. 10562. Applicant's representative: Samuel B. Zinder, 98 Cutter Mill Road, Great Neck, N.Y. 11021. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Sauces*, from the facilities of Saucy Susan Products, Inc., in the Village of Briarcliff Manor (Westchester County), N.Y., to points in Connecticut and New Jersey; (2) *glass*, from Port Allegheny, Pa., to the facilities of Saucy Susan Products, Inc., in the Village of Briarcliff Manor (Westchester County), N.Y., under a continuing contract or contracts in (1) and (2) above with Saucy Susan Products, Inc.; and (3) *sauces and mustard*, from the facilities of Aunt Millie's Sauces, Inc., in the Hamlet of Hawthorne (Westchester County), N.Y., to points in Connecticut and New Jersey, under a continuing contract or contracts with Aunt Millie's Sauces, Inc.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at New York, N.Y.

No. MC 141485 (Sub-No. 1), filed July 13, 1976. Applicant: CLIFFORD RAY RUTLAND, doing business as CLIFF RUTLAND TRUCKING, Rural Route No. 1, Independence, Kans. 67301. Applicant's representative: Laurel D. McClellan, 430 North 7th, P.O. Box 478, Fredonia, Kans. 66736. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Animal feeds and feed ingredients*, from Republic, Mo., to points in Alabama, Arizona, Arkansas, California, Colorado, Florida, Illinois, Indiana, Iowa, Kansas, Kentucky, Mississippi, Nebraska, New Mexico, North Carolina, New York, Oklahoma, Tennessee, Texas, Utah, and Wyoming; (2) *feed ingredients*, from Hutchinson and Pittsburg, Kans., Danville, Springfield, and Decatur, Ill., and Stuttgart, Ark., to Republic, Mo.; (3) *feed bags*, from Memphis, Tenn., to Republic, Mo., under a continuing contract, or contracts, in (1) through (3) above, with American Agri Products, Inc., located at Republic, Mo.; (4) animal feeds, from Ava and Republic, Mo., Parsons, Kans., Washington, Okla., and Denver, Colo., to points in Alabama, Arizona, California, Colorado, Florida, Illinois, Indiana, Iowa, Kansas, Kentucky, Mississippi, Nebraska, New Mexico, North Carolina, New York, Oklahoma, Tennessee, Texas, Utah, and Wyoming; (5) *feed ingredients*, from Hutchinson and Pittsburg, Kans., Danville, Springfield, and Decatur, Ill., and Stuttgart, Ark., to Republic, Mo.; (6) *feed bags*, from Memphis, Tenn., to Ava and Republic, Mo.; and (7) *feed bags*, from Ava and Republic, Mo., to Washington, Okla., Denver, Colo., Wills Point, Tex., Parsons and Bonner Springs, Kans., Hubbard, Iowa, Beemer, Nebr., and St. George, Utah, under a continuing contract, or contracts, in (4) through (7) above, with Super Sup Equine Products, Inc., located at Springfield, Mo.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Wichita, Kans., or Joplin or Kansas City, Mo.

No. MC 141550 (Sub-No. 3), filed July 14, 1976. Applicant: HOPPY LINES, INC., 420 Devonshire Drive, Brea, Calif. 92621. Applicant's representative: Kenneth F. Dudley, 611 Church Street, P.O. Box 279, Ottumwa, Iowa 52501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) Chlorinated *paraffin*, in packages and containers, from Santa Fe Springs and Anaheim, Calif., to points in Colorado, Georgia, Illinois, Indiana, Maryland, Massachusetts, Michigan, Minnesota, Missouri, New Jersey, New Mexico, New York, Ohio, Oregon, Pennsylvania, Rhode Island, Texas, Washington, and Wyoming; and (2) *coal tar* and *petroleum resin*, in packages and containers, from Neville Island, Pa., to points in California: (1) and (2) above are under a continuing contract, or contracts, with Neville Chemical Co.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Pittsburgh, Pa., or Washington, D.C.

Peterson, P.O. Box 81849, Lincoln, Nebr. 68509. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by retail stores (except foodstuffs and commodities in bulk), (1)

V 41 1167
AUG 26 76
UMI

from points in New Jersey, New York, and Hanover County, Va., to points in California and Texas; (2) from Arlington, Tex., to points in California and (3) from points in New Jersey and New York, to points in Hanover County, Va., restricted in (1), (2), and (3) to the transportation of traffic originating at the named origins, and destined to the facilities of Best Products Co., Inc., in the described destination area.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Richmond, Va., or Nashville, Tenn.

No. MC 141957 (Sub-No. 1) (Correction), filed May 7, 1976, published in the FEDERAL REGISTER issue of June 17, 1976, republished as corrected this issue. Applicant: EUGENE NAVARRO, doing business as MIAMI CRATING CO., 5522 NW. 72nd Avenue, Miami, Fla. 33178. Applicant's representative: Richard B. Austin, Ste. 214, Palm Coast II Bldg., 5255 NW. 87th Avenue, Miami, Fla. 33178. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, crated or in containers, and *commodities* which by reason of their size and weight do not require the use of special equipment, from applicant's warehouse facilities at or near Miami, Fla., to Miami, Fla., restricted to traffic having a subsequent movement by water.

NOTE.—The purpose of this republication is to correct the requested authority in this proceeding. If a hearing is deemed necessary, applicant requests it be held at Miami, Fla.

No. MC 142038 (Sub-No. 1), filed July 16, 1976. Applicant: DARIO GUERRA, doing business as DARIO GUERRA TRANSFER, 1040 Biscayne Blvd., Miami, Fla. 33132. Applicant's representative: Richard B. Austin, 214 Palm Coast II Bldg., 5255 NW. 87th Ave., Miami, Fla. 33178. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General Commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), in shipper-owned trailers, between Port Everglades, the Port of Miami, and points in Dade County, Fla., restricted to traffic having an immediately prior or subsequent movement by water.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at Miami, Fla.

No. MC 142055 (Sub-No. 3), filed July 19, 1976. Applicant: THOMAS H. PRESLEY, doing business as PRESLEY'S TRUCKING SERVICE, P.O. Box 46, Shuqualak, Miss. 39361. Applicant's representative: John A. Crawford, 1700 Deposit Guaranty Plaza, P.O. Box 22567, Jackson, Miss 39205. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Brick and structural tile*, (1) between the plant and facilities of Delta-Shuqualak Brick & Title Company, Inc., at or near Shuqualak, Miss., on the one hand, and, on the other, points in Alabama, Arkansas, Florida, Georgia, Indiana, Kentucky, Louisiana, Missouri, Oklahoma, Tennessee, and Texas; and (2) between the plant and facilities of Delta Brick & Title Company, Inc., at or near Indianola, Miss., on the one hand, and, on the other, points in Alabama, Arkansas, Florida, Georgia, Indiana, Kentucky, Louisiana, Missouri, Oklahoma, Tennessee, and Texas, under a continuing contract or contracts with Delta Brick & Title Company, Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Jackson, Miss.

No. MC 142145 (Sub-No. 2), filed July 22, 1976. Applicant: LINDSAY TRANSPORTATION, INC., Lindsay, Nebr. 68644. Applicant's representative: Patrick E. Quinn, P.O. Box 82028, Lincoln, Nebr 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Irrigation systems and parts, equipments, materials, and supplies*, used in irrigation systems, their shipment or their installation, from the facilities utilized by Lindsay Manufacturing Co., Inc., at or near Amarillo, Tex., to points in the United States (except Alaska and Hawaii); and (2) *equipment, materials, and supplies*, utilized in the manufacture of irrigation systems, from points in the United States (except Alaska and Hawaii), to the facilities of Lindsay Manufacturing Co., Inc., at or near Amarillo, Tex., restricted to a transportation service to be performed under a continuing contract or contracts with Lindsay Manufacturing Co., Inc.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at either Omaha or Lincoln, Nebr.

No. MC 142172 (Sub-No. 2), filed July 16, 1976. Applicant: CAR TRUCK SHUTTLE SERVICE LIMITED, 1209 North Service Road, Oakville, Ontario, Canada. Applicant's representative: William J. Hirsch, Suite 1125, 43 Court Street, Buffalo, N.Y. 14202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Trucks*, in driveaway service, from the ports of entry on the International Boundary line between the United States and Canada, at or near Buffalo, N.Y., to Buffalo, N.Y.

NOTE.—If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 142221, filed June 14, 1976. Applicant: McAULEY TRUCKING COMPANY, INC., P.O. Box 626, North State Street, Ellsworth, Maine 04605. Applicant's representative: Robert S. Briggs, One Merchants Plaza, Bangor, Maine 04401. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Beams (spools) and boxes of yarn, fibre, and raw materials* used in the manufacture thereof, between the plantsite of McAuley Textile Corporation, located in Ellsworth, Maine, and Fall River, Hudson, Mass., Ellenboro, Kinston, Rocky Mount, and Roxboro, N.C., Norwood, N.J., Woonsocket, R.I., Camlen, Greenville, and La France, S.C., Kingsport, Tenn., and Nitro, W.Va.; and (2) *empty beams (spools)*, between the points named in (1) above to the plantsite of McAuley Textile Corporation located in Ellsworth, Maine.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Portland, Maine, or Boston, Mass.

No. MC 142284 (Sub-No. 1), filed July 21, 1976. Applicant: AIR COURIERS INTERNATIONAL, INC., 4131 N. 36th Street, Suite No. 1, Phoenix, Ariz. 85018. Applicant's representative: Jeremy Kahn, Investment Building, Suite 733, Washington, D.C. 20005. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Business papers*, used or useful in the conduct of insurance business, between the facilities of American Home Assurance Company, located at New York, N.Y., and the facilities of American Home Assurance Company, located at Manchester, N.H., under a continuing contract, or contracts, with American Home Assurance Company.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at New York, N.Y.

No. MC 142296, filed July 19, 1976. Applicant: COX REFRIGERATED EXPRESS, INC., 10606 Goodnight Lane, Dallas, Tex. 75220. Applicant's representative: E. Larry Wells, 4645 North Central Expressway, Dallas, Tex. 75205. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Clothing and wearing apparel and component parts* used in the manufacture thereof, between the plantsite and warehouse facilities of Munsingwear, Inc., located at or near Memphis, Tenn., on the one hand, and, on the other, Los Angeles and San Francisco, Calif., under a continuing contract with Munsingwear/Vassarette.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at either Dallas, Tex., or Minneapolis, Minn.

No. MC 142313, filed July 16, 1976. Applicant: JAMES SWETT, doing business as L. J. TRANSPORT, 1403 South 6th, Mt. Vernon, Wash. 98273. Applicant's representative: George Kargianis, 2120 Pacific Building, Seattle, Wash. 98104. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Fresh and frozen horsemeat, and horsemeat products*, from points in Washington, on the one hand, and, on the other, points in the United States (except Alaska and Hawaii), together with ports of entry on the International Boundary line between the United States and Canada, located in Michigan, New York, and Washington, under contract with Florence Packing; Florence Meat Sales; and Northwest Processor, Inc.

NOTE.—Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash.

No. MC 142315, filed July 23, 1976. Applicant: MEISLER CARTAGE, INC., 1103 East Franklin Street, Evansville, Ind. 47711. Applicant's representative: Warren C. Moberly, 777 Chamber of Commerce Building, Indianapolis, Ind. 46204. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities requiring special equipment, and commodities in bulk, in tank vehicles and in dump vehicles), between points in Illinois, Indiana, and Kentucky, on the one hand, and, on the other, Evansville, Ind., restricted to the transportation of shipments having a prior or subsequent movement by rail.

NOTE.—Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at Indianapolis, Ind.; Chicago, Ill.; or Washington, D.C.

No. MC 142319, filed July 19, 1976. Applicant: STRAUSS TRUCKING, LTD., 54 Matsunaye Drive, Medford, N.Y. 11763. Applicant's representative: William J. Augello, 120 Main Street, P.O. Box Z, Huntington, N.Y. 11743. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Glass, wood and metal store, office, and restaurant fixtures, equipment and showcases*, uncrated, from Copiague and New York, N.Y., to points in Connecticut, Delaware, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, and the District of Columbia; and (2) *used glass, wood and metal store, office, and restaurant fixtures, equipment and showcases, uncrated*, from the destination points named in (1) above to New York, N.Y.

NOTE.—If a hearing is deemed necessary, the applicant requests it be held at New York, N.Y.

PASSENGER APPLICATIONS

No. MC 61016 (Sub-No. 43), filed May 24, 1976. Applicant: PETER PAN BUS LINES, INC., 1776 Main Street, Springfield, Mass. 01103. Applicant's representative: Frank Daniels, 15 Court Square, Boston, Mass. 02108. Application has been filed for temporary authority under section 210a(b).

No. MC-F-12937. Authority sought for purchase by SUNVAN CALIFORNIA, INC. (non-carrier), 100 West Harrison Plaza, Seattle, WA., 98119, of the operating rights and property of BORIS M. PETROFF, an individual, dba, TRANSWORLD VAN LINES, 1520 West 11th Street, Long Beach, CA., 90813, and for acquisition by SUNVAN INTERNATIONAL, INC., and W. E. FALLON, both of Seattle, WA., 98119, address, of control of such rights and properties through the purchase. Applicants' attorney: Alan F. Wohlstetter, 1700 K Street, NW., Washington, D.C. 20006. Operating rights sought to be transferred: *Used household goods*, as a *common carrier*, over irregular routes between points in Kern, Los Angeles, Orange, Riverside, San Bernardino, San Diego, and Ventura Counties, Calif.; *household goods*, between San Francisco and Oakland, Calif., on the one hand, and, on the other, Fresno, Lemoote, Merred, Monterey, Sacramento, San Luis Obispo, Santa Barbara, Santa Clara and Stockton, Calif.; between points in the Los Angeles Harbor Commercial Zone as defined by the Commission and San Diego, Calif., on the one hand, and, on the other, points in Alameda, Contra Costa, Fresno, Kings, Merced, Monterey, Sacramento, San Francisco, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Solano and Tulare Counties, Calif., with restrictions. SUNVAN CALIFORNIA, INC., holds no authority from this Commission. However, SUNVAN INTERNATION, INC., a non-carrier, is the parent company. Subsidiary carrier companies of SUNVAN INTERNATIONAL, INC., are as follows: (1) SUNPAK MOVERS, INC., is a regulated freight forwarder, Permit No. FF-322, authorized to forward used house hold goods, unaccompanied baggage and used automobiles between points in the United States (including Hawaii but excluding Alaska). It also holds C.A.B. air freight forwarder authority and is a non-vessel operating common carrier by water under jurisdiction of the Federal Maritime Commission. (2) SUNVAN HAWAII, INC. is a motor carrier of household goods operating between points in Hawaii, under MC-118498. (3) SUNVAN WASHINGTON, INC. is a motor carrier of household goods operating between points in five counties in the State of Washington, under MC-133356. Application has not been filed for temporary authority under section 210a(b).

No. MC-F-12938. Authority sought for purchase by COOPER-JARRETT, INC., 23 South Essex Avenue, Orange, N.J., 07051, of the operating rights of SCHERER FREIGHT LINES, INC., a subsidiary of ASSOCIATED TRANSPORT, INC., THOMAS J. CAHILL, TRUSTEE, c/o Arthur S. Olick, 39th Floor, 630 Fifth Avenue, New York, N.Y., 10020, and for acquisition by R. E. COOPER, JR., 23 South Essex Ave., Orange, N.J., 07051, of control of such rights through the purchase. Applicants' attorneys: Irving Klein, 371 Seventh Ave., New York, N.Y. 10001, and Fritz R. Kahn, Suite 1100, 1660 L St., NW., Washington, D.C. 20036. Operating rights sought to be transferred: *General commodities* as a *common carrier* over regular routes between Chicago, Ill., and Milwaukee, Wis., from Chicago over Illinois Highway 21 to junction U.S. Highway 45, thence over U.S. Highway 45 to junction Milwaukee County Highway "A", thence over Milwaukee County Highway "A" to Milwaukee, Wis., with restrictions. Vendee is authorized to operate as a *common carrier* in Connecticut, Delaware, Illinois, Indiana, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Missouri, Nebraska, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Tennessee, Washington, West Virginia, and Wisconsin. Application has been filed for temporary authority under section 210a(b).

NOTE.—ASSOCIATED TRANSPORT, INC., owns all of the stock of SCHERER FREIGHT LINES, INC., which holds interstate operating authority under certificates issued in Docket No. MC-21571 and various sub numbers thereof.

No. MC-F-12941. Authority sought for purchase by CONSOLIDATED FREIGHTWAYS CORP. OF DELAWARE, 175 Linfield Drive, Menlo Park, CA 94025, of the operating rights of TERMINAL TRANSPORTATION COMPANY, 701 N. Beach Street, Philadelphia, PA 19123, and for acquisition by CONSOLIDATED FREIGHTWAYS, INC., International Building, 601 California Street, San Francisco, CA 94108, of control of such rights through the purchase. Applicants' attorneys: R. C. Stetson, 175 Linfield Drive, Menlo Park, CA 94025, Eugene T. Lipfert, 1660 L Street, N.W., Washington, D.C. 20036, and Mervin J. Hartman, 1100 Western Savings Bank Bldg., Philadelphia, PA 19107. Operating rights sought to be transferred: *General commodities*, except classes A and B explosives, articles of unusual dimensions, household goods as defined by the Commission, commodities in bulk, and commodities contaminating to other lading, as a *common carrier* over irregular routes between points in the Philadelphia, Pa., Commercial Zone, as defined by the Commission, on the one hand, and, on the other, Vineland, Millville, Minotola, Landisville, Newfield, Clayton, Glassboro, Malaga, Woodbury, Runnemede, Bridgeton, Pitman, Iona, and Franklinville, N.J. Vendee is authorized to operate as a *common carrier* in all the States in the United States including District of Columbia and Alaska but excluding Hawaii, Maine, and Vermont.

Application has been filed for temporary authority under Section 210a(b).

OPERATING RIGHTS APPLICATIONS DIRECTLY RELATED TO FINANCE PROCEEDINGS

The following operating rights applications are filed in connection with pending finance applications under Section 5(2) of the Interstate Commerce Act, or seek tacking and/or gateway elimination in connection with pending transfer applications under Section 212(b) of the Interstate Commerce Act.

An original and two copies of protests to the granting of the authorities must be filed with the Commission within 30 days after the date of this FEDERAL REGISTER notice. Such protests shall comply with Special Rule 247(d) of the Commission's *General Rules of Practice* (49 CFR § 1100.247) and include a concise statement of protestant's interest in the proceeding and copies of its conflicting authorities. Verified statements in opposition should not be tendered at this time. A copy of the protest shall be served concurrently upon applicant's representative, or applicant if no representative is named.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its applications.

No. MC 96979 (Sub-No. 2), filed June 28, 1976. Applicant: T-J MOTOR LINES, INC., Ridge Hill Road, Assonet, Mass. 02702. Applicant's representative: Louis A. Perras, Jr., 45 Chace Road, E. Freetown, Mass. 02717. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those which because of size or weight require the use of special equipment), between points in Massachusetts on and east of a line beginning at the intersection of Massachusetts Highway 19 and the Massachusetts-Connecticut Boundary Line, thence along Massachusetts Highway 19, to junction Massachusetts Highway 9, thence along Massachusetts Highway 9 to junction Massachusetts Highway 31, thence along Massachusetts Highway 31 to junction Massachusetts Highway 2, thence along Massachusetts Highway 2 to junction Massachusetts Highway 13, thence along Massachusetts Highway 13 to junction Massachusetts Highway 225, thence along Massachusetts Highway 225 to junction Massachusetts Highway 40, thence along Massachusetts Highway 40 to junction U.S. Highway 3, thence along U.S. Highway 3 to junction Interstate Highway 495, thence along Interstate Highway 495 to junction Interstate Highway 95, thence along Interstate Highway 95 to junction Massachusetts Highway 110, thence along Massachusetts Highway 110 to junction Massachusetts Highway 1A, thence along Massachusetts Highway 1A to Salisbury Beach, Mass.

NOTE.—The purpose of this application is to convert a Certificate of Registration to a Certificate of Public Convenience and Necessity. This is a matter directly related to a Section 5(a) finance proceeding in MC-F 12728, published in the FEDERAL REGISTER issue of January 14, 1976. Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Providence, R.I. or Boston, Mass.

No. MC 110325 (Sub-No. 74) (Correction), filed May 21, 1976, published in the FR issues of June 24, 1976 and July 15, 1976, and republished as corrected this issue. Applicant: TRANSCON LINES, P.O. Box 92220, Los Angeles, Calif. 90019. Applicant's representative: Wentworth E. Griffin, 1221 Baltimore Avenue, Kansas City, Mo. 64105. Authority sought to operate as a *common carrier*, by motor vehicle, over regular and irregular routes, transporting: (A) Regular routes: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), (1) Between the junction of U.S. Highway 70 and U.S. Highway 27, south of Rockwood, Tenn., (except Rockwood) and Knoxville, Tenn., serving no intermediate points and serving the junction of U.S. Highway 70 and U.S. Highway 27 for purposes of joinder only: (a) From the junction of U.S. Highway 70 and U.S. Highway 27 over U.S. Highway 70 to Knoxville, Tenn., and return over the same route; and (b) From the junction of U.S. Highway 70 and U.S. Highway 27 over U.S. Highway 70 to Kingston, Tenn., thence over Interstate Highway 40, to Knoxville, restricted against either picking up or delivery of any traffic at any point on U.S. Highway 27 south of Rockwood, Tenn., including Chattanooga, Tenn.; (2) Between Nashville, Tenn. and Sparta, Tenn., serving the intermediate and off-route points of Campaign, Rock Island, Quebeck, Doyle, McMinnville, and Walling, Tenn.; From Nashville over Tennessee Highway 1 (U.S. Highway 70-S) to Sparta and return over the same route; (3) Between Sparta, Tenn., and Cookeville, Tenn., serving all intermediate points; From Sparta over Tennessee Highway 42 to Cookeville, and return over the same route; (4) Between Sparta, Tenn. and Spencer, Tenn., serving all intermediate points: From Sparta over Tennessee Highway 111 to Spencer, and return over the same route.

(5) Between Nashville, Tenn. and Cookeville, Tenn., serving no intermediate points: (a) From Nashville over U.S. Highway 70 to junction Interstate Highway 40, thence over Interstate Highway 40 to Cookeville; and (b) From Nashville over Interstate Highway 40 to Cookeville, and return over the same route; (6) Between Chattanooga, Tenn. and Monterey, Tenn., serving all intermediate points between Crab Orchard, Tenn., including Crab Orchard, and Monterey, Tenn.: From Chattanooga over U.S. Highway 27 to the junction of U.S. Highway 27 and U.S. Highway 70 (Rockwood Junction), thence over U.S. Highway 70 to Crossville, Tenn., thence over U.S. Highway 70 N to Monterey, and return over the same route; (7) Between Crossville, Tenn. and Sparta, Tenn., serving all intermediate points: From Crossville over U.S. Highway 70 to Sparta, and return over the same route; (8) Between Crossville, Tenn. and Jamestown, Tenn., serving all intermediate points: From Crossville over U.S. Highway 127 to Jamestown and return over the same route; (9) Between McMinnville, Tenn. and Morrison, Tenn., serving all intermediate points and the plant site of the Carrier Air Conditioning Corporation: From McMinnville over Tennessee Highway 55 to Morrison, and return over the same route; (10) Between Livingston, Tenn. and Cookeville, Tenn., serving all intermediate points: From Livingston over Tennessee Highway 42 to Cookeville, and return over the same route; (11) Between Nashville, Tenn. and Memphis, Tenn., serving no intermediate points and restricted against any service between Chattanooga, Tenn. and Memphis, Tenn.: From Nashville over Interstate Highway 40, and return over the same route; (12) Between Knoxville, Tenn. and Bristol, Tenn., serving all intermediate points between Surgoinsville, Tenn. and Bristol, Tenn., including Surgoinsville, and those intermediate points lying within two miles of U.S. Highway 11-W between Surgoinsville, Tenn. and Kingsport, Tenn.: From Knoxville over U.S. Highway 11-W to Bristol, and return over the same route; (13) Between Knoxville, Tenn. and Bristol, Tenn., serving all intermediate points between Johnson City, Tenn. and Bristol, Tenn., including Johnson City, Tenn.: From Knoxville over U.S. Highway 11-E to Bristol, and return over the same route; (14) Between Knoxville, Tenn. and Bristol, Tenn., serving no intermediate points, and serving all points in Tennessee otherwise authorized to be served in routes (12)-(20) inclusive hereof as offroute points: From Knoxville over Interstate Highway 81 to Bristol, and return over the same route.

(15) Between Kingsport, Tenn. and Erwin, Tenn., serving all intermediate points: From Kingsport over U.S. Highway 23 to Erwin, and return over the same route; (16) Between Elizabethton, Tenn. and Bristol, Tenn., serving all intermediate points: From Elizabethton over U.S. Highway 19-E to the junction of U.S. Highway 19, thence over U.S. Highway 19 to Bristol, and return over the same route; (17) Between Elizabethton, Tenn. and Johnson City, Tenn., serving all intermediate points: From Elizabethton over U.S. Highway 321 to Johnson City, and return over the same route; (18) Between Bristol, Tenn. and Kingsport, Tenn., serving all intermediate points: From Bristol over Tennessee Highway 126 to Kingsport, and return over the same route; (19) Between Blountville, Tenn. and the junction of U.S. Highway 23 and Tennessee Highway 75, serving all intermediate points: From Blountville over Tennessee Highway 75 to the junction of U.S. Highway 23, and Tennessee Highway 75 and return over the same route; (20) Between Blountville, Tenn. and Bluff City, Tenn.,

V 41 167 AUG 26 76 UMI

serving all intermediate points: From Blountville over Tennessee Highway 37 to Bluff City, and return over the same route; (A) Serving the plant site of Firestone Tire & Rubber Company in Rutherford County, near Nashville, Tenn., as an off-route point in connection with carrier's otherwise authorized regular route operations.

(B) Alternate routes for operating convenience only: General commodities (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) Between Sparta, Tenn. and Nashville, Tenn. in connection with carrier's authorized regular route operations serving no intermediate points: From Sparta over U.S. Highway 70, and return over the same route; (2) Between Chattanooga, Tenn. and Nashville, Tenn., in connection with carrier's authorized regular route operations, serving no intermediate points: (a) From Chattanooga over U.S. Highway 64 to junction Interstate Highway 24, thence over Interstate Highway 24 to Nashville and return over the same route; (b) From Chattanooga over Interstate Highway 24 to Nashville and return over the same route; (3) Between Chattanooga, Tenn. and Knoxville, Tenn., in connection with carrier's authorized regular route operations, serving no intermediate points: From Chattanooga over Interstate Highway 75 to Knoxville, and return over the same route; (4) Between Chattanooga, Tenn. and Memphis, Tenn., in connection with carrier's authorized regular route operations, serving no intermediate points: From Chattanooga over Interstate Highway 24 to the junction of U.S. Highway 64, thence over U.S. Highway 64 to Memphis, and return over the same route; (5) Between Sparta, Tenn. and Chattanooga, Tenn., in connection with carrier's authorized regular route operations, serving no intermediate points: (a) From Sparta over Tennessee Highway 111 to junction Tennessee Highway 8, thence over Tennessee Highway 8 to junction U.S. Highway 127, thence over U.S. Highway 127 to Chattanooga, and return over the same route, and (b) From Sparta over Tennessee Highway 111 to junction Tennessee Highway 30, thence over Tennessee Highway 30 to junction U.S. Highway 127, thence over U.S. Highway 127 to Chattanooga, and return over the same route; (6) Between Chattanooga, Tenn. and McMinnville, Tenn., in connection with carrier's authorized regular route operations, serving no intermediate points.

(a) From Chattanooga over U.S. Highway 64 to junction Interstate Highway 24, thence over Interstate Highway 24 to junction Tennessee Highway 55, thence over Tennessee Highway 55 to McMinnville, and return over the same route; and (b) From Chattanooga over Interstate Highway 24 to junction Tennessee Highway 55, thence over Tennessee Highway 55 to McMinnville, and return over the same route; (7) Between McMinnville, Tenn. and Nashville, Tenn., in connection with carrier's authorized regular route operations, serving no intermediate points: From McMinnville over Tennessee Highway 55 to junction Interstate Highway 24, thence over Interstate Highway 24 to Nashville, and return over the same route; (8) Between Sparta, Tenn. and Nashville, Tenn., in connection with carrier's authorized regular route operations, serving no intermediate points: From Sparta over Tennessee Highway 42 to the junction of Interstate Highway 40, thence over Interstate Highway 40 to Nashville, and return over the same route; (9) Between Cookeville, Tenn. and Monterey, Tenn., in connection with carrier's authorized regular route operations, serving no intermediate points: From Cookeville over Interstate Highway 40 to Monterey, and return over the same route; (10) Between Livingston, Tenn. and Jamestown, Tenn., in connection with carrier's regular route operations, serving no intermediate points: From Livingston over Tennessee Highway 52 to Jamestown, and return over the same route; (11) Between Livingston, Tenn. and Monterey, Tenn., in connection with carrier's regular route operations, serving no intermediate points: From Livingston over Tennessee Highway 42 to junction Tennessee Highway 84; thence over Tennessee Highway 84 to Monterey, and return over the same route.

(12) Between Monterey, Tenn. and Clarkrange, Tenn., in connection with carrier's regular route operations, serving no intermediate points: From Monterey over Tennessee Highway 62 to Clarkrange, and return over the same route; (13) Between Sparta, Tenn. and Monterey, Tenn., in connection with carrier's regular route operations, serving no intermediate points: From Sparta over Tennessee Highway 84 to Monterey, and return over the same route; (14) Between Crossville, Tenn. and Chattanooga, Tenn. in connection with carrier's regular route operations, serving no intermediate points: From Crossville over U.S. Highway 127 to Chattanooga, also from Crossville over U.S. Highway 127 to junction Tennessee Highway 68, thence over Tennessee Highway 68 to junction U.S. Highway 27, thence over U.S. Highway 27 to Chattanooga, and return over the same route; (15) Between McMinnville, Tenn. and Nashville, Tenn. in connection with carrier's regular route operations, serving no intermediate points: From McMinnville over Tennessee Highway 56 to junction U.S. Highway 70, thence over U.S. Highway 70 to junction Interstate Highway 40, thence over Interstate Highway 40 to Nashville, and return over the same route; (16) Between McMinnville, Tenn. and Spencer, Tenn., in connection with carrier's regular route operations, serving no intermediate points: From McMinnville over Tennessee Highway 30 to Spencer, and return over the same route; (17) Between Spencer, Tenn. and Chattanooga, Tenn., in connection with carrier's regular route operations, serving no intermediate points: From Spencer over Tennessee Highway 111 to junction Tennessee Highway 8, thence over Tennessee Highway 8 to junction U.S. Highway 127, thence over U.S. Highway 127 to Chattanooga, and return over the same route; (18) Between Crossville, Tenn. and Knoxville, Tenn., in connection with carrier's regular route operations, serving no intermediate points: From Crossville over U.S. Highway 70 to junction Interstate Highway 40, thence over to Interstate Highway 40 to Knoxville, and return over the same route.

(19) Between Crossville, Tenn., and Nashville, Tenn., in connection with carrier's regular route operations, serving no intermediate points: From Crossville over U.S. Highway 127 to junction Interstate Highway 40, thence over Interstate Highway 40 to Nashville, and return over the same route; (20) Between Nashville, Tenn., and Knoxville, Tenn. in conection with carrier's regular route operations, serving no intermediate points: From Nashville over Interstate Highway 40 to Knoxville, and return over the same route. (C) Irregular routes: *General commodities*, (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and commodities requiring special equipment), Between Spencer, Tenn., and Fall Creek Falls State Park, Tenn., serving all points within ten miles of the boundary of said Park, except Dunlap and Pikeville, Tenn., and points on U.S. Highway 127 between Dunlap and Pikeville.

NOTE.—The purpose of this republication is to correct applicant's requested authority, which was published in error. Applicant seeks to convert a Certificate of Registration to a Certificate of Public Convenience and Necessity. This is a matter directly related to a Section 5(2) finance proceeding in MC–F–12843, published in the FEDERAL REGISTER issue of June 10, 1976. Common control may be involved. If a hearing is deemed necessary, the applicant requests it be held at either Nashville or Memphis, Tenn., or Washington, D.C.

No. MC 138991 (Sub-No. 16) filed July 26, 1976. Applicant: K. J. TRANSPORTATION, INC., P.O. Box 9764, Rochester, N.Y. 14623. Applicant's representative: S. Michael Richards, 44 North Avenue, Webster, N.Y. 14580. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Malt beverages*, from Columbus, Ohio and Newark, N.J., to Rochester, N.Y.; (2) *macaroni, spaghetti, and egg noodle products*, from Rochester, N.Y., to points in Connecticut, Illinois, Maryland, Massachusetts, the Lower Peninsula of Michigan, Minnesota, Ohio, Pennsylvania, Rhode Island, West Virginia and Wisconsin; and (3) *malt beverages* (except imported malt beverages), from Brooklyn, N.Y., to Rochester, N.Y.

NOTE.—The purpose of this application is to convert a Permit to a Certificate of Public Convenience and Necessity. This is a matter directly related to a Section 5(2) finance proceeding in MC–F–12900 published in the FEDERAL REGISTER issue of August 12, 1976. If a hearing is deemed necessary, the applicant requests it be held at Rochester or Buffalo, N.Y.

ABANDONMENT APPLICATIONS

FINDINGS

Notice is hereby given pursuant to Section 1a(6)(a) of the Interstate Commerce Act that orders have been entered in the following abandonment applications which are administratively final and which found that subject to conditions the present and future public convenience and necessity permit abandonment.

A Certificate of Abandonment will be issued to the applicant carriers 30 days after this FEDERAL REGISTER publication unless the instructions set forth in the notices are followed.

[Docket No. AB–1(Sub-No. 10)]

CHICAGO AND NORTH WESTERN TRANSPORTATION COMPANY—ABANDONMENT BETWEEN IRVINGTON AND BENNINGTON, NEBRASKA

NOTICE OF FINDINGS

Notice is hereby given pursuant to Section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a) that by an report and order entered on May 25, 1076, a finding, which is administratively final, was made by the Commission, Division 3, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Chicago, B. & Q.R. Co., Abandonment*, 257 I.C.C. 700, the present and future public convenience and necessity permit abandonment by the Chicago and North Western Transportation Company of its branch line beginning at milepost 7.7 near Irvington, Nebraska, and extending in a northwesterly direction to the end of the line at milepost 14.2 at Bennington, Nebraska, a distance of 6.5 miles all within Douglas County, Nebraska. A certificate of abandonment will be issued to the above-named railroad based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) a financially responsible person (including a government entity) has offered financial assistance in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) it is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

[Docket No. AB–6 (Sub-No. 14)]

BURLINGTON NORTHERN, INC., ABANDONMENT BETWEEN SAUK CENTRE AND LONG PRAIRIE, IN TODD AND STEARNS COUNTIES, MINNESOTA

FINDINGS

Notice is hereby given pursuant to section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an initial decision and order served July 13, 1976, to which no exceptions were filed, it was found that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Chicago, B. & Q. R. Co., Abandonment*, 257 I.C.C. 700, the present and future public convenience and necessity permit abandonment by the Burlington Northern Inc. of its line of railroad extending from milepost 0.00 near Sauk Centre, Minn., in a northerly direction to milepost 17.78 near Long Prairie, Minn., a distance of 17.78 miles in Todd and Stearns Counties, Minnesota. A certificate of abandonment will be issued to the Burlington Northern, Inc., based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) a financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) it is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Case" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

[Docket No.(AB–8 (Sub-No. 2)]

DENVER & RIO GRANDE WESTERN RAILROAD COMPANY, ABANDONMENT BETWEEN MONTROSE AND RIDGWAY, MONTROSE AND OURAY COUNTIES, COLO.

FINDINGS

Notice is hereby given pursuant to Section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an initial decision and order served July 15, 1976, to which no exceptions were filed, it was found that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Chicago B. & Q. R. Co., Abandonment*, 257 I.C.C. 700, the present and future public convenience and necessity permit abandonment by the Renver and Rio Grande Western Railroad Company of its branch line of railroad sometimes known as the Ridgway Branch between milepost 352.64 at or just south of Montrose, Colo., and the end of said line at or near Ridgway, Colo., milepost 377.56, a total of about 24.92 miles of running track plus about 1.69 miles of yard and other tracks, in Montrose and Ouray Counties. A certificate of abandonment will be issued to the Denver & Rio Grande Western Railroad Company based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(a) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved in be continued; and

(2) It is likely that such proffered assistance would:

V 41 167 AUG 26 76 UMI

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

[Docket No. AB–55 (Sub-No. 4)]

SEABOARD COAST LINE RAILROAD COMPANY ABANDONMENT BETWEEN RAVENEL AND DRAINAGE, IN CHARLESTON COUNTY, SOUTH CAROLINA

FINDINGS

Notice is hereby given pursuant to Section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an order entered on June 25, 1976, a finding, which is administratively final, was made by the Commission, Commissioner Brown, stating that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Chicago, B. & Q. R. Co., Abandonment*, 257 I.C.C. 700, the present and future public convenience and necessity permit abandonment by the Seaboard Coast Line Railroad Company of its line of railroad extending from railroad milepost MAB–406.41 near Ravenel in a southerly direction to railroad milepost AMB–409.38 near Drainage, a distance of 2.97 miles in Charleston County, South Carolina. A certificate of abandonment will be issued to the Seaboard Coast Line Railroad Company based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) a financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) it is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

[Docket No. AB–57 (Sub-No. 1)]

SOO LINE RAILROAD COMPANY ABANDONMENT BETWEEN RAPID RIVER AND EBEN JUNCTION IN DELTA AND ALGER COUNTIES, MICHIGAN

FINDINGS

Notice is hereby given pursuant to Section 1a(6)(a) of the Interstate Commerce Act (49 U.S.C. 1a(6)(a)) that by an initial decision and order served July 15, 1976, to which no exceptions were filed, it was found that, subject to the conditions for the protection of railway employees prescribed by the Commission in *Chicago, B. & Q. R. Co., Abandonment*, 257 I.C.C. 700, the present and future public convenience and necessity permit abandonment by the Soo Line Railroad Company of its branch line between Rapid River in Delta County, Michigan, and Eben Junction in Alger County, Michigan, beginning at milepost 348.69 at Rapid River and extending in a northerly direction to the end of the line at milepost 379.23 at Eben Junction, a distance of 30.54 miles. A certificate of abandonment will be issued to the Soo Line Railroad Company based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) a financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued; and

(2) it is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such as assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the FEDERAL REGISTER on March 31, 1976, at 41 FR 13691. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced order.

MOTOR CARRIER ALTERNATE ROUTE DEVIATIONS

The following letter-notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Commission's Deviation Rules—Motor Carriers of Property (49 CFR § 1042.4(c)(11)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules (49 CFR § 1042.4(c)(12)) at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of this FEDERAL REGISTER notice.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its request.

MOTOR CARRIER OF PROPERTY

No. MC–76032 (Deviation No. 33), NAVAJO FREIGHT LINES, INC., 1205 S. Platte River Drive, Denver, Colo. 80223, filed August 12, 1976. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From junction U.S. Highway 20 and Ohio Highway 11 near Ashtabula, Ohio over Ohio Highway 11 to junction Interstate Highway 80, thence over Interstate Highway 80 to junction Interstate Highway 76, thence over Interstate Highway 76 to junction Interstate Highway 71 near Wadsworth, Ohio, thence over Interstate Highway 71 to junction Interstate Highway 70 near Columbus, Ohio, thence over Interstate Highway 70 to Indianapolis, Ind. and return over the same route for operating convenience only. The notice indicates that the carrier is presently authorized transport the same commodities, over a pertinent service route as follows: From junction U.S. Highway 20 and Ohio Highway 11 near Ashtabula, Ohio, over U.S. Highway 20 to junction Ohio Highway 120, thence over Ohio Highway 120 to Toledo, Ohio, thence over Ohio Highway 2 to junction unnumbered highway, thence over unnumbered highway to junction U.S. Highway 127, thence over U.S. Highway 127 to junction Ohio Highway 2, thence over Ohio Highway 2 to the Ohio-Indiana state line, thence over Indiana Highway 37 to Ft. Wayne, Ind., thence over U.S. Highway 24 to Huntington, Ind., thence over Indiana Highway 9 to junction U.S. Highway 36, thence over U.S. Highway 36 to Indianapolis, Ind., and return over the same route.

No. MC–85850 (Sub-No. 7) (Deviation No. 3), NEYLON FREIGHT LINES, INC., c/o Jones Truck Lines, Inc., 610 E. Emma Ave., Springdale, Ark. 72764, filed August 6, 1976. Carrier's representative: Kim D. Mann, Suite 1010, 7101 Wisconsin Ave., Washington, D.C. 20014. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *general commodities*, with certain exceptions, over a deviation route as follows: From Kansas City, Mo., over Interstate Highway 29 to junction Iowa Highway 2, thence over Iowa Highway 2 to Lincoln, Nebr., and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport the same commodities, over a pertinent service route as follows: From Kansas City, Mo., over U.S. Highway 73 to Hiawatha, Kans., thence over U.S Highway 36 to junction Kansas Highway 15E, thence east over U.S. Highway 36 to Marysville, Kans., thence over U.S. Highway 77 to Lincoln, Nebr., and return over the same route.

MOTOR CARRIER ALTERNATE ROUTE DEVIATIONS

The following letter-notices to operate over deviation routes for operating convenience only have been filed with the Commission under the Commission's Deviation Rules — Motor Carriers of Passengers (49 CFR § 1042.2(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules (49 CFR § 1042.2(c)(9)) at any time, but will not operate to stay commencement of the proposed operations unless filed within 30 days from the date of this FEDERAL REGISTER notice.

Each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its request.

MOTOR CARRIERS OF PASSENGERS

No. MC–1515 (Deviation No. 710), GREYHOUND LINES, INC., Greyhound Tower, Phoenix, Ariz. 85077, filed August 3, 1976. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage*, and *express* and *newspapers* in the same vehicle with passengers, over deviation routes as follows: From junction unnumbered highway and U.S. Highway 1 north of West Palm Beach, Fla., over unnumbered highway to junction Interstate Highway 95, thence over Interstate Highway 95 to Fort Lauderdale, Fla., with the following access routes: (1) From West Palm Beach, Fla., over city streets to junction Interstate Highway 95, and (2) From Pompano Beach, Fla., over city streets to junction Interstate Highway 95, and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From junction unnumbered highway and U.S. Highway 1 north of West Palm Beach, Fla., over U.S. Highway 1 to Fort Lauderdale, Fla., and return over the same route.

No. MC–1515 (Deviation No. 711) (Cancels Deviation Nos. 668 and 696), GREYHOUND LINES, INC., Greyhound Tower, Phoenix, Ariz. 85077, filed August 2, 1976. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage*, and *express* and *newspapers* in the same vehicle with passengers, over deviation routes as follows: (1) From Savannah, Ga., over Interstate Highway 16 to junction Interstate Highway 95, thence over Interstate Highway 95 to junction U.S. Highway 17 near Richmond Hill, Ga., (2) From junction Interstate Highway 95 and U.S. Highway 17 near Richmond Hill, Ga., over Interstate Highway 95 to junction U.S. Highway 17 near South Newport, Ga., with the following access route: From junction Interstate Highway 95 and Georgia Highway 38 over Georgia Highway 38 to junction U.S. Highway 17, and (3) From junction Interstate Highway 95 and U.S. Highway 17 near South Newport, Ga., over Interstate Highway 95 to Jacksonville, Fla., with the following access routes: (a) From junction Interstate Highway 95 and Georgia Highway 251 over Georgia Highway 251 to junction U.S. Highway 17, (b) From junction Interstate Highway 95 and Georgia Highway 99 over Georgia Highway 99 to junction U.S. Highway 17, (c) From Brunswick, Ga., over U.S. Highway 25 to junction Interstate Highway 95, (d) From Brunswick, Ga., over U.S. Highway 84 to junction Interstate Highway 95, and (e) From Woodbine, Ga., over unnumbered highway to junction Interstate Highway 95 and return over the same routes for operating convenience only. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Savannah, Ga., over U.S. Highway 17 to Jacksonville, Fla., and return over the same route.

MOTOR CARRIER INTRASTATE APPLICATIONS

The following application for motor common carrier authority to operate in intrastate commerce seek concurrent motor carrier authorization in interstate or foreign commerce within the limits of the intrastate authority sought, pursuant to Section 206(a)(6) of the Interstate Commerce Act. These applications are governed by Special Rule 245 of the Commission's General Rules of Practice (49 CFR § 1100.245), which provides, among other things, that protests and requests for information concerning the time and place of State Commission hearings or other proceedings, any subsequent changes therein, and any other related matters shall be directed to the State Commission with which the application is filed and shall not be addressed to or filed with the Interstate Commerce Commission.

California Docket No. A 56643, filed July 26, 1976. Applicant: E AND M TRUCKING, INC., doing business as DELLA ROSA TRUCKING, P.O. Box 150, 3555 Pacheco Blvd., Martinez, Calif. 94553. Applicant's representative: John Paul Fischer, 256 Montgomery Street, San Francisco, Calif. 94104. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *Petroleum products chemicals, catalysts, empty containers, and roofing materials*, between all points and places in the Counties of Contra Costa, Alameda, San Francisco, Santa Clara, and Solano, and between the above named counties, on the one hand, and the City of Stockton, California, on the other. Restriction No. 1: Service to or from the above named points shall be restricted to the transportation of shipments having a prior or subsequent movement by water. Restriction No. 2: The above captioned authority is restricted against the transportation of petroleum products, in containers, over irregular routes from Avon and Martinez, California to Richmond, Point Richmond, Point San Pablo, Oakland, Alameda, and San Francisco, California, and empty containers for petroleum products, over irregular routes from Richmond, Point Richmond, Point San Pablo, Oakland, Alameda, and San Francisco, California, to Avon and Martinez, California, in interstate commerce. Intrastate, interstate, and foreign commerce authority sought.

HEARING: Date, time, and place not yet fixed. Requests for procedural information should be addressed to the Public Utilities Commission, State of California, State Building, Civic Center, 455 Golden Gate Avenue, San Francisco, Calif. 94102, and should not be directed to the Interstate Commerce Commission.

California Docket No. A 56662, filed August 2, 1976. Applicant: SOUTHERN CALIFORNIA MOTOR DELIVERY, INC., 8023 East Slauson Avenue, Montebello, Calif. 90640. Applicant's represent-

V 41 167 AUG 26 76 UMI

ative: Daniel W. Baker, 100 Pine Street, Suite 2550, San Francisco, Calif. 94111. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *General commodities* (except the following: (a) Used household goods and personal effects not packed in accordance with the crated property requirements; (b) Livestock; (c) Liquids, compressed gases, comodities in semi-plastic form and commodities in suspension in liquids in bulk, in tank trucks, tank trailers, tank semi-trailers or a combination of such highway vehicles; (d) Commodities when transported in bulk in dump trucks or in hopper-type trucks; (e) Commodities when transported in motor vehicles equipped for mechanical mixing in transit; (f) Logs; (g) Fresh fruits and vegetables; (h) Articles of extraordinary value; and (i) Automobiles, trucks, busses, and trailer coaches and campers). 1. Between all points and places in the Los Angeles Basin Territory, as described in Note A:

NOTE A

Los Angeles Basin Territory (Revised) includes that area embraced by the following boundary: Beginning at the point the Ventura County-Los Angeles County boundary line intersects the Pacific Ocean; thence northeasterly along said county line to the point it intersects State Highway No. 118, approximately two miles west of Chatsworth; easterly along State Highway No. 118 to Sepulveda Boulevard; northerly along Sepulveda Boulevard to Chatsworth Drive; northeasterly along Chatsworth Drive to the corporate boundary of the City of San Fernando; westerly and northerly along said corporate boundary to McClay Avenue; northeasterly along McClay Avenue and its prolongation to the Los Angeles National Forest boundary; southeasterly and easterly along the Angeles National Forest and San Bernardino National Forest boundary to the county road known as Mill Creek Road; southwesterly along Mill Creek Road to the county road known as Bryant Street 3.8 miles north of Yucaipa; southerly along Bryant Street to the San Bernardino-Riverside County line; west, north and west along the San Bernardino-Riverside County line to Iowa Street; southerly along Iowa Street to U.S. Highway 395; southeasterly along U.S. Highway 395 to Nuevo Road, approximately 1 mile north of Perris; easterly along Nuevo Road through Nuevo and northeasterly and northerly through Lakeview; easterly along Ramona Expressway and Boulevard to the City of San Jacinto; southerly along San Jacinto Street to State Highway No. 74; westerly along State Highway No. 74 to the corporate boundary of the City of Hemet.

Southerly, westerly, and northerly along said corporate boundary to the right of way of the Atchison, Topeka & Santa Fe Railway Company; southwesterly along said right of way to Washington Avenue; southerly along Washington Avenue, through and including the unincorporated community of Winchester to Benton Road; westerly along Benton Road to the County road intersecting U.S. Highway No. 395, 2.1 miles north of the unincorporated community of Temecula; southerly along said county road to U.S. Highway No. 395; southeasterly along U.S. Highway No. 395 to the Riverside County-San Diego County boundary lines; westerly along said boundary line to the Orange County-San Diego county boundary lines; southerly along said boundary line to the Pacific Ocean; northwesterly along the shoreline of the Pacific Ocean to point of beginning. 2. Between all points and places, inclusively, on and within 25 miles of points on the following routes: (a) U.S. Highway 101 between Paso Robles and Los Angeles; (b) State Highway 99 and Interstate Highway 5 between Fresno and Los Angeles; (c) Interstate Highway 5 between Los Angeles and San Diego; and (d) Interstate Highway 15 and U.S. Highway 395 between Riverside and San Diego. Restriction: Transportation under the proposed authority shall be restricted against the transportation of shipments which had an immediate prior or will have an immediate subsequent movement by a regulated freight forwarder or a common carrier by air, motor or water.

In performing the service, applicant proposes to use any and all streets, roads, highways, and bridges necessary or convenient for the performance of the service. Intrastate, interstate, and foreign commerce authority sought.

HEARING: Date, time, and place not yet fixed. Requests for procedural information should be addressed to Public Utilities Commission, State of California, State Building, Civic Center, 455 Golden Gate Avenue, San Francisco, Calif. 94102, and should not be directed to the Interstate Commerce Commission.

New Hampshire Docket No. DT 76–74, filed June 9, 1976. Applicant: ROSS EXPRESS, INC., P.O. Box 42, Route 3, Penacook, N.H. 03301. Applicant's representative: Grenville Clark III and Charles A. DeGrandpre, 40 Stark Street, Manchester, N.H. 03104. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *General commodities* (except Class A and B explosives, household goods, commodities in bulk, commodities requiring special equipment, and those injurious and contaminating to other lading), over regular and irregular routes as authorized in New Hampshire Property Carrier Certificate of Public Convenience and Necessity No. 3, described in Note A.

NOTE A

REGULAR ROUTE COMMON CARRIER

Transportation of general commodities with the exception of Household Goods over the following specified routes, in either direction, as follows: 1. From Nashua to Colebrook, via U.S. Highway Route No. 3, and between Franklin and Ashland, via N.H. Highway Routes Nos. 127 and 3B. 2. Between Colebrook and Errol via N.H. Highway Route No. 26. 3. Between Errol and West Ossipee, via N.H. Highway Route No. 16. 4. Between West Ossipee and Meredith, via N.H. Highway Route No. 25.

5. Between Meredith, N.H. and New Hampton, N.H. via New Hampshire Highway Route No. 104. 6. Between Boscowen and West Lebanon, N.H. via U.S. Highway Route No. 4. 7. Between West Lebanon and Littleton, via N.H. Highway Route No. 10. 8. Between Littleton and Concord, via Interstate Highway No. 93. 9. Between Concord and Salmon Falls, via U.S. Highway Route No. 4 and N.H. Highway Routes Nos. 155 and 4. 10. Between Epson Traffic Circle and Wolfeboro, via N.H. Highway Route No. 28. 11. Between Salmon Falls and Alton, via unnumbered highway to Somersworth; thence via N.H. Highway Route Nos. 16A, 16, and 11 to Alton. 12. Between Concord and Keene, via N.H. Highway Route No. 9. 13. Between Hopkinton and Claremont, via N.H. Highway Route No. 103. 14. Between Potter Place and Newport, via N.H. Highway Route No. 11. 15. Between Newport and Marlow, via N.H. Highway Route No. 10. 16. Between Marlow and Clarmont, via N.H. Highway Routes Nos. 123 and 12. 17. Between Keene and Hampton, via N.H. Highway Route No. 101. 18. Between Seabrook and Durham, via U.S. Highway Routes Nos. 1 and 4. 19. Between Durham and Exeter, via N.H. Highway Route No. 108.

20. Between U.S. Highway Route No. 4 and N.H. Highway Route No. 101, via N.H. Highway Route 125. 21. Between Manchester and Salem, via N.H. Highway Route No. 28. Service is authorized to all intermediate points on the above numbered routes.

IRREGULAR ROUTE COMMON CARRIER

Transportation of *general commodities*, with the exception of Household Goods, as above described, between points and places in New Hampshire. Interstate, interstate, and foreign commerce authority sought.

HEARING: Date, time, and place assigned for October 5, 1976, at 10 a.m. at the offices of the New Hampshire Public Utilities Commission, 26 Pleasant Street, Concord, N.H. 03301. Requests for procedural information should be addressed to the New Hampshire Public Utilities Commission, 26 Pleasant Street, Concord, N.H. 03301, and should not be directed to the Interstate Commerce Commission.

Tennessee Docket No. MC 5317 (Sub-No. 1), filed July 19, 1976. Applicant: VOLUNTEER EXPRESS, INC., 1220 Faydur Court, Nashville, Tenn. 37211. Applicant's representative: Walter Harwood, P.O. Box 15214, Nashville, Tenn. 37215. Certificate of Public Convenience and Necessity sought to operate a freight service as follows: Transportation of *General commodities* (except Classes A and B explosives, household goods, commodities in bulk, and articles requiring special equipment), (1) From Memphis, Tenn., via U.S. Highway 51, to the Obion County Line, thence via any and all highways and roads in Obion and Weakley Counties, Tenn., serving all points in said Counties (but serving no intermediate points between Memphis and the said Obion County Line), and return over the same route. (2) From Memphis, Tenn., via Interstate Highway 40 to junction with U.S. Highway 45, near Jackson, Tenn., thence via U.S. Highway 45 to its junction with U.S. Highway 45E, thence via U.S. Highway 45E to the Weakley County Line, thence via any and all highways and roads in Weakley and Obion Counties, Tenn., serving all points in said Counties (but serving no intermediate points between Memphis and the said Weakley County Line), and return over the same route. Restriction: Restricted against tacking with the carrier's present authority. Intrastate, interstate, and foreign commerce authority sought.

HEARING: Date, time, and place scheduled for September 28, 1976, at 9:30 a.m., in the Governor's Room, Biltimore Motel, Union City, Tenn. Requests for procedural information should be addressed to the Tennessee Public Service Commission, Cordell Hull Building, Room C1–III, Nashville, Tenn. 37219, and should not be directed to the Interstate Commerce Commission.

By the Commission.

ROBERT L. OSWALD,
Secretary.

ASSIGNMENT OF HEARINGS

AUGUST 23, 1976.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 98327 (Sub-No. 17), System 99, A Corporation, now being assigned continued hearing November 2, 1976 (4 days) at San Francisco, California; in a hearing room to be later designated.

MC 141742, Flowers Transportation, Inc., now being assigned November 8, 1976 (1 week) at San Francisco, California; in a hearing room to be later designated.

MC 43269 (Sub-No. 61), Wells Cargo, Inc., now bein gassigned November 15, 1976 (1 week) at Las Vegas, Nevada; in a hearing room to be later designated.

MC 141620, Van Bus Delivery, dba United Van Bus Delivery now assigned September 13, 1976 at St. Paul, Minnesota is now cancelled, application dismissed.

MC 49692 (Sub 50), Henry Edwards, dba Henry Edwards Trucking Company now assigned September 13, 1976 at Memphis, Tennessee and will be held in the Holiday Inn-Rivermont, 200 West Georgia.

MC–C–8733, Cango Corporation, McNair Transport, Inc., Robertson Tank Lines, Inc., Chemical Leaman Tank Lines, Inc., Croendyke Transport, Inc. and Western Commercial Transport, Inc. Investigation and Revocation of Certificates, now assigned September 21, 1976, at Dallas, Tex. is canceled.

MC 75320 (Sub 186), Campbell Sixty-Six Express, Inc. now being assigned October 13, 1976 (8 days) at St. Louis, Missouri and will be held in Court Room 3, 5th Floor, 1114 Market Street.

MC 126305 Sub 13, 14, 22, 24, 25, 28, 29, 30, 31, 37, 39, and 40; Boyd Brothers Transportation Co., Inc., now being assigned October 13, 1976 (1 day), at Birmingham, Ala., in a hearing room to be later designated.

[No. 36342]

COLORADO INTRASTATE FREIGHT RATES AND CHARGES—1976

Petition for Investigation

Present: Dale W. Hardin, Commissioner, to whom this matter has been assigned for action.

By joint petition authorized under section 13(3) of the Interstate Commerce Act, filed April 5, 1976, petitioners, eleven common carriers by railroad [1] subject to Part I of the Interstate Commerce Act, and also operating in intrastate commerce in the State of Colorado, request that this Commission institute an investigation of their Colorado intrastate freight rates and charges on recyclable materials, under sections 13 and 15a of the Interstate Commerce Act, among others, wherein they will seek an order authorizing them to increase such rates and charges in the amounts presently applied on interstate traffic, currently the subject of the investigation in Ex Parte No. 305–RE, Increased Freight Rates and Charges, 1975—Recyclable Materials.

By tariff filed October 17, 1975, with the Public Utilities Commission of the State of Colorado, petitioners sought to increase their rail freight rates and charges on Colorado intrastate traffic of recyclables by 10 percent, effective November 12, 1975, to correspond to the recent 10-percent increase in the rail freight rates and charges on interstate traffic of recyclables, which 10-percent increase is presently the subject of the investigation in Ex Parte No. 305–RE, *supra*. Following suspension of said tariff, the Colorado Commission, by decision No. 88281, dated February 25, 1976, authorized petitioners to file a tariff increasing their rail freight rates and charges on Colorado intrastate traffic of recyclables, but only by 4 percent.

Petitioners contend that present interstate rail freight rates on recyclable materials moving from, to, and within Colorado are just and reasonable and that the proposed intrastate rail freight rates on recyclable materials will not exceed a just and reasonable level; that transportation conditions for intrastate traffic of recyclable materials in Colorado are not more favorable than for interstate traffic of recyclable materials; that recyclable traffic moving under present Colorado intrastate rail freight rates and charges fails to provide its fair share of earnings; and, that the present Colorado intrastate rail freight rates and charges on recyclable materials create undue and unreasonable advantage, preference, and prejudice between persons and localities in intrastate commerce within Colorado and interstate or foreign commerce, and result in undue, unreasonable, and unjust discrimination against and an undue burden on interstate commerce in violation of sections 13(4) and 15a of the Interstate Commerce Act, among others, to the extent that they do not include all of the recent 10-percent increase in interstate rail freight rates and charges on recyclable materials, which increase is the subject of the investigation in Ex Parte No. 305–RE, *supra*.

Under sections 13(4) and 13(5) of the Interstate Commerce Act, this Commission is directed to institute an investigation, into the lawfulness of intrastate rail freight rates and charges, upon filing of a petition by the railroads pursuant to section 13(3) of the Act, after the appropriate State agency has reached a final decision or has failed to act within 120 days after a carrier by railroad has filed with such appropriate state body a change in an intrastate rate, fare or charge for the purpose of adjusting such rate, fare, or charge to the rate charged on similar traffic moving in interstate or foreign commerce. This Commission may act not withstanding the laws or constitution of any State, or the pendency of any proceeding before any State court or other State authority.

Wherefore, and good cause appearing therefor;

It is ordered, That the petition be, and it is hereby, granted; and that an investigation, under sections 13 and 15a of the Interstate Commerce Act, be, and it is hereby, instituted to determine whether the Colorado intrastate rail freight rates and charges on recyclable materials in any respect cause any unjust discrimination against or any undue burden on interstate or foreign commerce, or cause undue or unreasonable advantage, preference, or prejudice as between persons and localities in intrastate commerce and those in interstate or foreign commerce, or are otherwise unlawful, by reason of the failure of such rates and charges to include the full 10-percent increase in interstate rail freight rates and

[1] The Atchison, Topeka and Santa Fe Railway Company; Burlington Northern, Inc.; Chicago, Rock Island and Pacific Railroad Company; The Colorado and Southern Railway Company; The Colorado and Wyoming Railway Company; The Denver and Rio Grande Western Railroad Company; The Great Western Railway; Missouri Pacific Railroad Company; San Luis Central Railroad; Southern San Luis Valley Railroad Company; and Union Pacific Railroad Company.

V 41 167

charges on recyclable materials, which increase is the subject of the investigation in Ex Parte No. 305–RE, *supra;* and to determine if any rates or charges, or maximum or minimum charges, or both, shall be prescribed to remove any unlawful advantage, preference, discrimination, undue burden, or other violation of law, found to exist.

It is further ordered, That all common carriers by railroad operating in the State of Colorado, subject to the jurisdiction of this Commission, be, and they are hereby, made respondents in this proceeding.

It is further ordered, That all persons who wish to actively participate in this proceeding and to file and receive copies of pleadings shall make known that fact by notifying the Office of Proceedings, Room 5342, Interstate Commerce Commission, Washington, D.C. 20423,, on or before 15 days from the FEDERAL REGISTER publication date. Although individual participation is not precluded, to conserve time and to avoid unnecessary expense, persons having common interests should endeavor to consolidate their presentations to the greatest extent possible. The Commission desires participation of only those who intend to take an active part in the proceeding.

It is further ordered, That as soon as practicable after the date of indicating a desire to participate in the proceeding has passed, the Commission will serve a list of names and addresses of all persons upon whom service of all pleadings must be made and that thereafter this proceeding will be assigned for oral hearing or handling under modified procedure.

And it is further ordered, That a copy of this order be served upon each of the petitioners herein; that the State of Colorado be notified of the proceeding by sending copies of this order and of the instant petition by certified mail to the Governor of the State of Colorado and The Public Utilities Commission of the State of Colorado, Denver, Colorado; and that further notice of this proceeding be given to the public by depositing a copy of this order in the office of the Secretary of the Interstate Commerce Commission, at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register, for publication in the FEDERAL REGISTER.

Dated at Washington, D.C., this 20th day of August, 1976.

By the Commission, Commissioner Hardin.

ROBERT L. OSWALD,
Secretary.

[FR Doc.76–25074 Filed 8–25–76;8:45 am]

FOURTH SECTION APPLICATIONS FOR RELIEF

AUGUST 23, 1976.

An application, as summarized below, has been filed requesting relief from the requirements of Section 4 of the Interstate Commerce Act to permit common carriers named or described in the application to maintain higher rates and charges at intermediate points than those sought to be established at more distant points.

Protests to the granting of an application must be prepared in accordance with Rule 40 of the General Rules of Practice (49 CFR 1100.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

FSA No. 43220—*Joint Rail-Water Container Rates—Hoegh Lines.* Filed by Hoegh Lines, (No. 1), for itself and interested rail carriers. Rates on general commodities, from rail stations on the U.S. Atlantic and Gulf Seaboard, to ports in The Federation of Malaysia and The Republic of Singapore. Grounds for relief—Water competition.

FSA No. 43221—*Joint Rail-Water Container Rates—The Shipping Corporation of India, Ltd.* Filed by The Shipping Corporation of India, Ltd., (No. 1), for itself and interested rail carriers. Rates on general commodities, from rail stations on the U.S. Atlantic and Gulf Seaboard, to ports in The Federation of Malaysia and The Republic of Singapore. Grounds for relief—Water competition.

FSA No. 43222—*Joint Rail-Water Container Rates—Maritime Company of The Philippines.* Filed by Maritime Company of The Philippines, (No. 101), for itself and interested rail carriers. Rates on general commodities, from and to rail and water terminals on the U.S. Atlantic and Gulf Coast Seaboard, and ports and terminals in Hong Kong, Japan, and The Philippines. Grounds for relief—Water competition.

FSA No. 43223—*Joint Rail-Water Container Rates—Baltic Shipping Company.* Filed by Baltic Shipping Company, (No. 104), for itself and interested rail carriers. Rates on general commodities, between railroad terminals at U.S. Pacific Coast ports, and ports in Continental Europe, United Kingdom, Black Sea, Scandinavia, Denmark, and the U.S.S.R. Grounds for relief—Water competition.

Tariff—Baltic Shipping Company tariff No. 3, I.C.C. No. 3, F.M.C. No. 28. Rates are published to become effective on September 19, 1976.

FSA No. 43224—*Joint Rail-Water Container Rates—Black Sea Shipping Company.* Filed by Black Sea Shipping Company, (No. 2), for itself and interested rail carriers. Rates on general commodities, from railroad terminals at U.S. Pacific Coast ports, to ports in the Mediterranean. Grounds for relief—Water competition.

Tariff—Black Sea Shipping Company Eastbound tariff No. 2, I.C.C. No. 2, F.M.C. No. 10. Rates are published to become effective on September 19, 1976.

By the Commission.

ROBERT L. OSWALD,
Secretary.

[FR Doc.76–25073 Filed 8–25–76;8:45 am]

[Notice No. 20]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under Section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission within 30 days after the date of this publication. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC–FC–76626, filed July 12, 1976. Transferee: GEORGE R. MURPHY, doing business as Murphy & Excavating Co., Route No. 1, Marietta, Ohio 45750. Transferor: Ohio Valley Motor Freight, Inc., 504 Peoples Bank Building, Marietta, Ohio 45750. Applicants' representative: William A. Fields, Attorney at Law, 217 Second Street, Marietta, Ohio 45750. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates Nos. MC–114718, MC–114718 (Sub-No. 9), and MC–114718 (Sub-No. 11), issued December 10, 1971, September 29, 1964, and December 17, 1965, respectively, as follows: Ferro alloys, in bulk, in dump vehicles, from Alloy, W. Va., to points in Ohio and Pennsylvania; ferro alloys and silicon metals, from Graham, W. Va., to specified points in Ohio, and Pennsylvania; agricultural commodities, from points in Washington County, Ohio, to Uniontown, Pittsburgh, and Sharon, Pa.; safes, from Marietta, Ohio, to points in Fayette, Washington, Greene, and Westmoreland Counties, Pa.; general commodities, with exceptions, radially, between points in Washington County, Ohio, and points in Wood and Pleasants Counties, W. Va.; heavy machinery, and machinery, materials, supplies, and equipment, used in the oil and gas industry, radially, between points in Washington County, Ohio, and points in that part of West Virginia on and west of U.S. Highway 19 and on and north of U.S. Highway 60 and points in Ohio; livestock, radially,

between points in Washington County, Ohio and Pittsburgh, Pa., household goods, radially, between points in Washington County, Ohio, and points in Illinois, Indiana, Pennsylvania, West Virginia, and the Lower Peninsula of Michigan; tricalcium phosphate, (bond ash), from Riveview, Ohio, to points in Illinois, Missouri, North Carolina, Pennsylvania, and Wisconsin; and ferro chrome, from Baltimore, Md., and Newport News, Va., to points in Michigan, Ohio, Pennsylvania, and West Virginia, from Philadelphia, Pa. to points in Michigan, Ohio (except Ashtabula, Cuyahoga, Lake, Summit, Muskingum, Licking, Franklin, and Wayne Counties), Pennsylvania, and West Virginia. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–76645, filed July 2, 1976. Transferee: MAX KAFER EXPRESS, INC., 262 West 37th Street, New York, N.Y. 10018. Transferor: Rutgers Express, Inc., 189 Townsend Street, New Brunswick, N.J. 08901. Applicants' representative: S. Michael Richards/Raymond A. Richards, Registered I.C.C. Practitioners, 44 North Avenue, Webster, N.Y. 14580. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate No. MC–40896 issued February 12, 1976, as follows: Wearing apparel, cut and uncut goods, trimmings, buttons, clips, clasps, and other articles used in the manufacture of wearing apparel which is being transported or is to be transported, cutlery, resin, unfinished cutlery, paper compounds, handles, chests, and such other articles and ingredients used in the manufacture and sale of cutlery, between Englishtown, N.J., and New York, N.Y., and all intermediate points other than Woodbridge, N.J.; and also off-route points in Monmouth and Ocean Counties, N.J.; and wearing apparel between Orange, N.J., and Elizabeth, N.J. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–76672, filed July 22, 1976. Transferee: JERRY D. LANDING, doing business as Jerry Landing Moving Service, 260 N. Main Street, St. Clair, Mo. 63077. Transferor: Herb Whitworth Moving & Storage Co., A Corporation, 3344 Greenwood Blvd., Maplewood, Mo. 63143. Applicants' representative: Charles R. Preslar, President, 3344 Greenwood Blvd., Maplewood, Mo. 63143. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC–126852, issued October 2, 1973, as follows: Uncrated new household furniture, household furnishings, household appliances, and pianos, from St. Louis, Mo., and points in St. Louis County, Mo., to points in that part of Illinois south of a line beginning at the Illinois-Iowa State line, near Burlington, Iowa, and extending along U.S. Highway 34 to junction Illinois Highway 116, thence south and east along Illinois Highway 116 to junction U.S. Highway 24 at Peoria, Ill., thence east along U.S. Highway 24, to the Illinois-Indiana State line. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–76687, filed July 30, 1976. Transferee: Clinton Shrum, doing business as Ambassador Coaches, 212 "A" Street N.W., Miami, OK 74354. Transferor: Missouri, Kansas and Oklahoma Coach Lines, Inc., doing business as M. K. & O. Lines, 321 S. Cincinnati Street, Tulsa, OK 74103. Transferee's representative: Robert A. Miller, Attorney-at-Law, 2505 City Nat'l Bank Tower, Oklahoma City, OK 73102. Transferor's representative: John L. Arrington, Jr., Attorney-at-Law, 510 Oklahoma Natural Bldg., Tulsa, OK 74119. Authority sought for purchase by transferee of that portion of the operating rights of transferor as set forth in Certificate No. MC–36364, issued June 15, 1972, as follows: Passengers and their baggage, and express and newspapers, in the same vehicle with passengers, between Coffeyville, Kans., and Tulsa, Okla., serving all intermediate points, from Coffeyville over U.S. Highway 169 to Collinsville, Okla., thence over U.S. Highway 75 to Tulsa, and return over the same route. Incidental charter operations in interstate or foreign commerce may be conducted. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under Section 210a(b).

No. MC–FC–76698, filed August 10, 1976. Transferee: Sebring Transport, Inc., 2101 Davis Street, San Leandro, CA 94577. Transferor: Senna Trucking Co., Inc., 2101 Davis St., San Leandro, CA 94577. Applicants' representative: E. H. Griffiths, 1182 Market Street, Suite 207, San Francisco, CA 94903. Authority sought for purchase by transferee of that portion of the operating rights of transferor, as set forth in Certificate of Registration No. MC–111313 (Sub-No. 1), issued June 20, 1975, as follows: General commodities, and other specified commodities, between the San Francisco Territory, California. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–76699, filed August 10, 1976. Transferee: King Delivery, Inc., 5600 W. Arbor Vitae, Los Angeles, Calif. 90045. Transferor: Swift Transportation Company, 14719 South San Pedro St., Gardena, Calif. 90247. Applicants' representative: LeRoy R. Davis, Attorney-at-Law, 9454 Wilshire Blvd., Suite 400, Beverly Hills, Calif. 90212. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate of Registration No. MC–99497 (Sub-No. 4), issued April 29, 1964, and those set forth in Certificate of Registration No. MC–10881 (Sub-No. 3), issued to S & M Freight Lines and acquired by transferor herein pursuant to No. MC–F–12654, as follows: General commodities, with specified exceptions, between specified points in California. Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC–FC–76705, filed August 12, 1975. Transferee: Lane Truck Lines, Inc., 120 Newby Court, Rocky Mount, N.C. 27801. Transferor: Bundy Truck Line, Inc., Gatesville, N.C. 27938. Applicants' representative: Ralph McDonald, Attorney-at-Law, P.O. Box 2246, Raleigh, N.C. 27602. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificates Nos. MC–115056 (Sub-No. 2), MC–115056 (Sub-No. 13), MC–115056 (Sub-No. 14), MC–115056 (Sub-No. 15), and MC–115056 (Sub-No. 16), issued July 6, 1961, February 14, 1963, June 25, 1964, April 15, 1966, and August 6, 1968, respectively as follows: Lumber, wooden boxes, box shooks, wooden pallets, fiberglass swimming pools, pickle products, glass jars, jar caps, cans, barrels, spices, and sugar, from, to, or between points in North Carolina, Virginia, Maryland, Pennsylvania, Delaware, New Jersey, New York, West Virginia, Connecticut, Ohio, Maine, Vermont, New Hampshire, Massachusetts, Rhode Island, North Carolina, South Carolina, Georgia, Florida, Alabama, Mississippi, Illinois, Texas, Minnesota, Michigan, Kentucky, Tennessee, Louisiana, and the District of Columbia. Transferee presently holds no authority from this Commission. Application has been filed for temporary authority under Section 210a(b).

[Notice No. 109]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 23, 1976.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available

V 41 167 AUG 26 76 UMI

for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 1328 (Sub-No. 21TA), filed August 13, 1976. Applicant: MGS TRANSPORTATION, INC., P.O. Box 270, Alexandria, Ind. 46001. Applicant's representative: Charles Garrett (same address as applicant). Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Rock wool and wool products*, from Rock Wool Industires, Inc., Missouri Division, at Cameron, Mo.; Pueblo, Colorado Division; and Belton, Texas Division, to points in Alabama, Arkansas, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, North Carolina, New Jersey, New York, North Dakota, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Virginia, West Virginia, Wisconsin, and the District of Columbia, under a continuing contract with Rock Wool Industires, Indiana Division, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Rock Wool Industries, Indiana Division, P.O. Box D, Alexandria, Ind. 46001. Send protests to: J. H. Gray, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 345 West Wayne St., Room 204, Fort Wayne, Ind. 46802.

No. MC 93903 (Sub-No. 11TA), filed August 16, 1976. Applicant: ANDERSON'S TRUCKING CORPORATION, P.O. Box 709, Englishtown, N.J. 07726. Applicant's representative: Nathaniel H. Yohalem, Sutton Metro Park, Woodbridge, N.J. 07095. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Concrete poles, light and/or telephone poles, connectors, grout and other accessories* used in the installation thereof, between East Brunswick, N.J., and points in Connecticut, Delaware, the District of Columbia, Indiana, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia and West Virginia, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Interpace Corporation, 260 Cherry Hill Road, Parsippany, N.J. 07054. Send protests to: Dieter H. Harper, District Supervisor, Interstate Commerce Commission, 428 East State St., Room 204, Trenton, N.J. 08608.

No. MC 107496 (Sub-No. 1041TA), filed August 5, 1976. Applicant: RUAN TRANSPORT CORPORATION, 3200 Ruan Center, 666 Grand Ave., Des Moines, Iowa 50309. Applicant's representative: E. Check (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fly ash*, in bulk, in tank vehicles, from Waukegan, Ill., to points in Indiana and Wisconsin, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: American Admixtures Corporation, 5909 North Rogers Ave., Chicago, Ill. 60646. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Bldg., Des Moines, Iowa 50309.

No. MC 109891 (Sub-No. 28TA), filed August 13, 1976. Applicant: INFINGER TRANSPORTATION COMPANY, INC., P.O. Box 7398, 2811 Carner Ave., Charleston Heights, S.C. 29405. Applicant's representative: Frank B. Hand, Jr., P.O. Box 187, Berryville, Va. 22611. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Petroleum No. 2 fuel oil*, in bulk, in tank vehicles, from Duke Power Company plantsites at or near Pelzer (Anderson Cy.) and Chappels (Newberry Cy.), S.C., to Duke Power Company, at or near Gliffside (Rutherford Cy.), N.C.; Mt. Holly (Gaston Cy.), N.C.; Spencer (Rowan Cy.), N.C.; Terrell (Catawba Cy.), N.C.; and Belmont (Gaston Cy.), N.C., for 180 days. Supporting shipper: Duke Power Company, P.O. Box 1339, Charlotte, N.C. 28232. Send protests to: E. E. Strotheid, District Supervisor, Interstate Commerce Commission, Room 320, 1400 Pickens St., Columbia, S.C. 29201.

No. MC 110410 (Sub-No. 17TA), filed August 10, 1976. Applicant: BENTON BROTHERS FILM EXPRESS, INC., 168 Baker St. NW., Atlanta, Ga. 30313. Applicant's representative: Warren A. Goff, 2008 Clark Tower, 5100 Poplar Ave., Memphis, Tenn. 38137. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Printed matter*, (a) between Atlanta, Ga., on the one hand, and, on the other, points in Florida on and east of Florida Highway 83, and U.S. Highway 331; and (b) between points in Florida on and east of Florida Highway 83, and U.S. Highway 331, for 180 days. Supporting shippers: There are approximately 22 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Sara K. Davis, Transportation Assistant, Bureau of Operations, Interstate Commerce Commission, 1252 W. Peachtree St., NW., Room 546, Atlanta, Ga. 30309.

No. MC 110525 (Sub-No. 1163TA), filed August 13, 1976. Applicant: CHEMICAL LEAMAN TANK LINES, INC., 520 East Lancaster Ave., P.O. Box 200, Downingtown, Pa. 19335. Applicant's representative: Thomas J. O'Brien (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous aluminum chloride*, in bulk, or in sealbins, from Aluminum Co., of America plantsite near Palestine, Tex., to Mobile, Ala.; Baton Rouge, La.; Carville, La.; St. James, La.; Baltimore, Md.; Hamilton, Miss.; Picayune, Miss.; Gulfport, Miss.; Sugar Creek, Mo.; Bound Brook, N.J.; East Hanover, N.J.; Ashtabula, Ohio; West Elizabeth, Pa.; Memphis, Tenn.; Institute, W. Va., and ports of entry on the International Boundary line between the United States and Canada located at Port Huron, Mich., for furtherance in foreign commerce, for 180 days. Supporting shipper: Aluminum Company of America, 1501 Alcoa Bldg., Pittsburgh, Pa. 15219. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch St., Room 3238, Philadelphia, Pa. 19106.

No. MC 111729 (Sub-No. 675TA), filed August 16, 1976. Applicant: PUROLATOR COURIER CORP., 3333 New Hyde Park Road, New Hyde Park, N.Y. 11040. Applicant's representative: Elizabeth L. Henoch (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, moving in courier service (except household goods, commodities in bulk, explosives, articles of unusual value, and commodities which because of their size and weight require special equipment); *and commercial papers, documents and written instruments* as are used in the business of banks and banking institutions, between points in Iowa, Kansas, Missouri and Nebraska. Restrictions: (1) No service shall be provided for the transportation of packages weighing more than 50 pounds, and each package or article shall be considered a separate and distinct shipment; (2) No service shall be provided for the transportation of packages or articles weighing in the aggregate more than 100 pounds from one consignor at one location to one consignee at one location in any one day; and (3) No transportation of shipments shall be provided to or from the premises of any shipper for whom applicant or any of its subsidiaries perform contract carrier service, for 180 days. Supporting shippers: There are approximately 30 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Maria B. Kejss, Transportation Assistant, Interstate Commerce Commission, 26 Federal Plaza, New York, N.Y. 10007.

No. MC 114569 (Sub-No. 146TA), filed August 13, 1976. Applicant: SHAFFER TRUCKING, INC., P.O. Box 418, New Kingstown, Pa. 17072. Applicant's representative: N. L. Cummins (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods*, from Fairwater and Beaver Dam, Wis., and their commercial zones, to points in Pennsylvania, New York, New Jersey, Delaware and Maryland, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Acme Markets, Inc., 124 N. 15th St., Philadelphia, Pa. Send protests to: Robert P. Amerine, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 278 Federal Bldg., P.O. Box 869, Harrisburg, Pa. 17108.

No. MC 119555 (Sub-No. 12TA), filed August 10, 1976. Applicant: OIL AND INDUSTRY SUPPLIERS, LTD., P.O. Box 3500, 640 12th Ave., Calgary, Alberta, Canada T2P 2P9. Applicant's representative: D. S. Vincent (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Alcoholic beverages*, in bulk, in tank vehicles, from the United States-Canada International Boundary line at or near Port Huron, Marine City and Sault Ste. Marie, Mich., and Noyes, Minn., to Detroit, Mich., on shipments originating at Berthierville, Quebec, Canada, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: M. Luc Madore, Superintendent, Quality Control, Blending & Maturing, Melchers Distilleries Limited, 555 Montcalm St., P.O. Box 100, Berthierville, Quebec, Canada, JOK 1A0. Send protests to: Paul J. Labane, District Supervisor, Interstate Commerce Commission, 2602 First Ave., North, Billings, Mont. 59101.

No. MC 123778 (Sub-No. 31TA), filed August 13, 1976. Applicant: JALT CORP., in that part of New York on, east, and doing business as United Newspaper Delivery Service, 75 Cutters Dock Road, P.O. Box 398, Woodbridge, N.J. 07095. Applicant's representative: Morton E. Kiel, Suite 6193, 5 World Trade Center, New York, N.Y. 10048. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Magazines and advertising matter*, shipped with magazines, from Old Saybrook, Conn., to points in New Jersey, points in that part of Pennsylvania on and east of U.S. Highway 15, and points in that part of New York on, east, and south of a line beginning at the New York-Pennsylvania State line, and extending along U.S. Highway 11 to Syracuse, thence along New York Highway 5 to Schenectady, and thence along New York Highway 7 to the New York-Vermont State line, and to Wilmington, Del., Baltimore, Md., and the District of Columbia, under a continuing contract with Curtis Circulation Company, for 180 days. Supporting shipper: Curtis Circulation Company, 21 Henderson Drive, W. Caldwell, N.J. 07006. Send protests to: Robert S. H. Vance, District Supervisor, Interstate Commerce Commission, 9 Clinton St., Newark, N.J. 07102.

No. MC 127598 (Sub-No. 2TA), filed August 12, 1976. Applicant: HARRY M. MOWREY, 6597 Rollymead, Cincinnati, Ohio 45243. Applicant's representative: John F. Fulcher, 239 Crescent Lane, Cliffside Park, N.J. 07010. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Dairy products* (except frozen poultry and poultry products), *dairy plant equipment* (except articles because of size, shape or weight requiring the use of special equipment), *materials and supplies*, between Louisville, Ky., on the one hand, and, on the other, points in Michigan, points in Indiana on and north of U.S. Highway 36, points in Ohio on and north of U.S. Highway 30, and those in West Virginia on the east of U.S. Highway 220, under a continuing contract with Breakstone Sugar Creek Foods, Division of Kraftco Corporation, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: John F. Fulcher, General Traffic Manager, Breakstone Sugar Creek Foods, Division of Kraftco Corporation, 800 7th Ave., New York, N.Y. 10019. Send protests to: Paul J. Lowry, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 5514–B Federal Bldg., Cincinnati, Ohio 45202.

No. MC 128133 (Sub-No. 14TA), filed August 2, 1976. Applicant: H. H. OMPS, INC., Route 7, P.O. Box 295, Winchester, Va. 22601. Applicant's representative: S. Harrison Kahn, Investment Bldg., Suite 733, Washington, D.C. 20005. Roscoe, Transportation Assistant, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1386, Chicago, Ill. 60604.

No. MC 139658 (Sub-No. 13TA), filed August 13, 1976. Applicant: HARRY POOLE, INC., 2322 Kensington Road, Macon, Ga. 31201. Applicant's representative: William Addams, Suite 212, 5299 Roswell Road, N.E., Atlanta, Ga. 30342. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Coal and coke*, in bulk, in dump trucks, (1) from points in Etowah, Jackson, DeKalb, Marshall, Blount, Cullman, Cherokee, Madison, Morgan, Cleburn, Saint Claire, and Jefferson Counties, Ala., on the one hand, and on the other, to points in Tennessee; and (2) from Dade, Walker, Chattooga, Floyd, Bartow, Gordan, Murray, Whitefield, Catoosa, Gilmer, and Pickens Counties, Ga., on the one hand, and, on the other, to points in Alabama and Tennessee, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Birmingham Coal & Coke Company, Inc., 4363 1st Ave., N., Birmingham, Ala. 35222. Cotham Smith & Smith Realty Co., 151 Lamar St., Macon, Ga. Send protests to: Sara K. Davis, Transportation Assistant, Bureau of Operations, Interstate Commerce Commission, 1252 W. Peachtree St., N.W., Room 546, Atlanta, Ga. 30309.

No. MC 142113TA, filed June 2, 1976, published in the FEDERAL REGISTER of June 21, 1976, republished in the FEDERAL REGISTER of June 23, 1976, and republished as corrected this issue. Applicant: CHESTER A. RICHMOND, doing business as, RICHMOND CARTAGE, P.O. Box 337, Craigsville, W. Va. 26205. Applicant's representative: John M. Friedman, 2930 Putnam Avenue, Hurrican, W. Va. 25526. Authority sought to operate as a common carrier, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value. Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), Between Charleston, W. Va., and Marlinton, W. Va.: From Charleston, W. Va., over U.S. Highway 119 to junction with Interstate Highway 79, thence over Interstate Highway 79 to junction with U.S. Highway 19 at Sutton, W. Va., thence over U.S. Highway 19 to junction with West Virginia Highway 41, thence over West Virginia Highway 41 to junction with West Virginia Highway 20, thence over West Virginia Highway 20 to junction with West Virginia Highway 39, thence over West Virginia Highway 39 to junction U.S. Highway 219, thence over U.S. Highway 219 to Marlinton, W. Va., and return over the same routes, serving all intermediate points on the above described route between Sutton and Marlinton, W. Va. (except Sutton), and all off-route points in Greenbriar, Nicholas, Pocahontas, and Webster Counties and those in Randolph County on and south of U.S. Highway 33. Applicant intends to interline at Charleston, W. Va. with existing carriers, for 180 days. Supporting shipper: There are approximately 24 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof may be examined at the field office named below. Send protest to: H. R. White, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 3108 Federal Office Bldg., 500 Quarrier St., Charleston, W. Va. 25301.

No. MC 141655 (Sub-No. 3TA), filed August 13, 1976. Applicant: TRANSPHOS, INC., 410 Ware Blvd., Suite 713, Tampa, Fla. 33619. Applicant's representative: Norman J. Bolinger, 1729 Gulf Life Tower, Jacksonville, Fla. 32207. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Waste lime past*, in bulk, in dump vehicles, from Birmingham and Mobile, Ala., to Bartow, Fla., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: Union Carbide Corporation, 270 Park Ave., New York, N.Y. 10017, CF Chemicals, Inc., P.O. Box 1480, Bartow, Fla. 33830. Send protests to: Joseph B. Teichert, District Supervisor, Interstate Commerce Commission, Bureau of Operations, Monterey Bldg., Suite 101, 8410 N.W. 53rd Terrace, Miami, Fla. 33166.

By the Commission.

ROBERT L. OSWALD,
Secretary

FINANCE APPLICATION

The following application seeks approval to consolidate, purchase, merge, lease operating rights and properties, or acquire control through ownership of stock, of rail carriers or motor carriers pursuant to Sections 5(2) or 210a(b) of the Interstate Commerce Act.

An original and two copies of protests against the granting of the requested authority must be filed with the Commission on or before September 27, 1976. Such protest shall comply with Special Rules 240(c) or 240(d) of the Commission's *General Rules of Practice* (49 CFR 1100.240) and shall include a concise statement of protestant's interest in the proceeding. A copy of the protest shall be served concurrently upon applicant's representative, or applicant, if no representative is named.

ACQUISITION INVOLVING BOTH A WATER CARRIER AND MOTOR CARRIER

No. MC-F-12925. (Correction) (SEA-WHEELS, INC.) (formerly PENBROOK HAULING COMPANY, INC.)—Purchase (Portion)—(DAILY EXPRESS, INC.), published in the August 19, 1976, issue of the FEDERAL REGISTER, on page 35133. Prior notice should read as follows: "General commodities with exceptions, in containers or in *Trailers having an immediately prior or subsequent movement* by water"

By the Commission.

GORDON H. HOMME, JR.,
Acting Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social and Rehabilitation Service

SOCIAL SERVICES PROGRAMS FOR INDIVIDUALS AND FAMILIES

Proposed Revisions to Program Regulations

V 41 1 67 AUG 26 76 UMI

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Social and Rehabilitation Service

[45 CFR Part 228]

SOCIAL SERVICES PROGRAMS FOR INDIVIDUALS AND FAMILIES

Proposed Revisions to Program Regulations

Notice is hereby given that the regulations set forth in tentative form below are proposed by the Administrator, Social and Rehabilitation Service, with the approval of the Secretary of Health, Education, and Welfare.

Various sections of the regulations for the title XX program which were published in the FEDERAL REGISTER on June 27, 1975 (40 FR 27352) have been amended during the first program year to ease problems encountered by State agencies. The revisions, published on October 3, 1975, February 9, April 2, and May 19, 1976 primarily: (1) Extended the period of time allowed the States to determine individual eligibility of persons who had been receiving services on the basis of group eligibility under titles IV–A and VI; (2) first extended the period of time allowed the States to establish the individual recipient basic data file, and then rescinded the requirement for the file; (3) liberalized the definition of family and permitted States to use the declaration method or any other method of their choice for determining eligibility on an individual basis; and (4) removed limitations on the services that could be provided to prevent or remedy neglect, abuse or exploitation of children or adults.

The amendments proposed here, however, reflect the first comprehensive review of the regulations since the program began on October 1, 1975. Because of the Department's desire to be open in the rulemaking process and to seek advice from a range of individuals and organizations who are interested in an efficient and effective public social service program, a new process was initiated in the development of these proposals. Between April and June, 1976, advice was sought on an early draft of these regulations from 51 State agencies, and 175 national public and private organizations. In addition to the consideration given to 458 written comments that resulted from that effort, a series of meetings was held with representatives of these groups and others such as the National Association of Counties, National Conference of State Legislatures, National League of Cities, National Governor's Conference, National Association of Social Workers Coalition, and the American Public Welfare Association. Again, comments were received and considered in arriving at these proposals.

Generally, the purposes of the amendments are: To clarify the intent of some aspects of the existing regulations; to eliminate or simplify administrative requirements on States and reduce the possibility of their incurring fiscal sanctions (especially in the preparation and publication of their comprehensive annual services plan); to provide a method for correcting deficiencies in the services plans; to provide specificity where it was requested (as in new and revised definitions and in the provisions dealing with staff training and amendments to the final services plan); and to relieve the States of complicated systems for costing out services and training.

The basis for the amendments is the Department's wish to enhance the ability of the States to focus on the delivery of services to eligible individuals and avoid undue administrative burdens and unnecessary costs. The amendments are aimed at reducing operational difficulties which States have encountered during the 1st year of the program.

The major proposed changes are summarized as follows.

DEFINITIONS

Four definitions in § 228.1 are affected: (1) The term "remedial care" is replaced by the broader term "medical and remedial care" to be used in determining when such care is an allowable cost under title XX as an integral but subordinate part of a service. This responds to requests for a definition of what a medical service is. (2) The definition of "family" is revised for clarification. (3) The definition of "other public agencies" has been added and includes Indian tribes so that they may have the same advantages as providers of services that public agencies do. This change reflects more accurately the true nature of their status in the social services delivery context. This new interpretation also results in revising § 228.54 to delete Indian tribes as non-profit, private agencies and include them as public agencies in § 228.53. (4) The definitions of "room" and "board" are moved from § 228.41 to § 228.1 in order to place in one section all definitions of terms that reoccur in the regulations.

COMPREHENSIVE ANNUAL SERVICES PROGRAM PLAN

Section 228.20 to revised to: (1) Change its heading from "general" to "conditions for FFP"; and (2) clarify when Federal financial participation (FFP) begins for expenditures under a final services plan.

Section 228.24 is revised to require the State agency to include in its annual services plan the operational definition of family it is using in the title XX program. This is necessary because an April 2, 1976 amendment to the regulations, retroactive at State option to October 1, 1975, gave the State several options for defining family. Also added are requirements for additional information in the services plan: (1) If the State wishes to limit services to eligible persons with certain characteristics, it would be required to describe the limiting characteristics in sufficient detail to meaningfully inform the public. In this way, there should be as little misunderstanding as possible about who is eligible for services, and (2) similarly, to inform the public, the State would be required to specify any variations in fee schedules, based on geographic area.

Section 228.25 is revised to delete the requirement that foster care services must be available in a services plan in every geographic area under title XX to all children who are eligible for foster care under Aid to Families with Dependent Children (AFDC). The deletion is made because the requirement for foster care services and the possibility of losing FFP for not providing them are in title IV of the Social Security Act and not in title XX. However, § 228.26(f) requires that the services plan describe the foster care services, if any, provided, to such AFDC children under title XX; and is further revised to clarify what is required for the description of a service in the services plan, and to delete paragraph (e) (inclusion of other services) as superfluous.

Section 228.27 is revised to specify the reason for, and nature of, estimates of expenditures to be included in the annual services plan to clarify that only information applicable to title XX expenditures is necessary.

Section 228.28 is revised, for purposes of clarity, to redefine program resources in terms of Federal title XX funds and State and local appropriated funds and other funds to be used in the program.

Section 228.29 is revised to add a requirement for a description of steps taken to involve various public, private, and governmental groups or individuals in the development of the services program. This is intended to encourage States to involve such groups in title XX planning and subsequently to inform the public, when it reads the services plan, of the extent to which such groups had participated in the development of the services plan.

Section 228.31, "Needs Assessment," and § 228.32, "Planning, Evaluation and Reporting," are revised to give the States more flexibility as to the information they provide on these areas in their services plans. The effect is to free the States from possible fiscal sanctions if they fail to address each and every item as was previously required.

Section 228.33, renamed "The public review process," brings together, for purposes of clarity, all requirements relating to publication of the proposed and final services plans, the content of the display advertisements for each plan and of the summary of the proposed plan, the comment periods, and the handling of public comments and public access. Issuance of a press release prior to publication of the final services plan is made optional in the belief that States will use press releases in any case but that SRS would be reluctant to impose a fiscal sanction if States did not. However, since some have commented that relaxation of the requirements might be detrimental to the public review processes, comments is especially invited on the desirability of these proposed changes.

Section 228.34 now contains the requirements that the State submit to the SRS Regional Commissioner its proposed services plan, display advertisement and other documentation related to the publication of the plan, within 5 days of its

publication; commits the Regional Commissioner to review these materials and notify the State within 10 days following receipt of them of his/her findings (either that the plan meets the requirements or that it is deficient and must be corrected); and specifies what constitutes deficiencies. This change is necessary to answer questions frequently put to SRS about the nature of such deficiencies and to formalize procedures which evolved from experience following issuance of the first proposed and final services plans by the States.

Section 228.35 now deals with how to correct deficiencies in the proposed and final services plans and to the display advertisements of each. Essentially, State must republish in newspapers information that was incorrect initially so that the public will be accurately informed about the content of the services plan. This new material responds to requests from States for guidance about how to correct errors in the services plans so that FFP will not be lost.

The material regarding amendment of the final services plan (now § 228.36) has been revised to specify when the services plan must be amended, to describe the public review process for amendments, and to list the materials to be submitted to the Regional Commissioner. The original requirements were criticized as being too vague and non-specific as to when an amendment was needed and the public review process required to implement it. Now it is clear that amendments to the plan are necessary only when significant changes in a State's services program are planned and that, as a minimum, amendments are required when such changes as deletion or addition of services, revisions in fee schedule or changes in categories of eligible individuals will occur.

LIMITATIONS: SERVICES

Section 226.40 is revised to delete all the material in the present paragraph (b) which defines when medical or remedial care can be considered integral but subordinate to a service, and to eliminate the need for the complex computations to determine amounts payable for such care. In addition to including in its services plan a description of the service of which medical care is integral but subordinate, the State would only be required to document that the medical or remedial care is necessary in the specific case to meet the objective of the service and not merely to correct a medical condition. This change is for the purpose of simplifying administrative procedures. Because there is concern that the liberalization of this requirement may lead to indiscriminate use of medical care, SRS believes documentation is necessary. Comments are solicited on efficient and effective ways of documenting that medical care is integral but subordinate.

Section 228.41 is revised to: (1) Change the time limit on Federal financial participation (FFP) in room or board from a period of 6 consecutive months in any 12 month period to 6 consecutvie months for any one placement; (2) define "placement"; (3) delete the percentage formula for determining when room or board is subordinate to a service; and (4) require the State to document for each case that board or room is necessary to meet the objective of the service and not merely to provide food or shelter. By changing the time frame within which FFP is available in room and board, SRS believes it has now more accurately reflected the statutory requirement which speaks of "a period of not more than six consecutive months." The addition of the definition of placement makes clear the circumstance to which the period of six months applies. Administrative simplicity is the goal of eliminating the percentage formulas. But as in the liberalition of § 228.40, concern remains that indiscriminate charging of board or room to title XX does not follow. Thus, documentation is again seen as essential. Comments are also solicited, therefore, on efficient and effective ways of documenting that board or room is integral but subordinate.

Section 228.44 is revised to clarify what SRS means by the inherent and intrinsic responsibilities of "institutions" for which FFP is not available under title XX. SRS believes this carries out the intent of Congress to provide certain "in reach" social services but not to finance, with title XX funds, aspects of institutional operations which are the responsibility of the States. This section also clarifies the nature of a separate juvenile correctional facility as distinct from a prison and clarifies the availability of FFP for services provided therein.

Section 228.45 is revised to permit a foster caregiver qualified by experience to give special services without further training. This was added because the regulation was unclear and it was mistakenly interpreted by the States to mean that even experienced persons had to receive training before they could give special services.

Section 228.46 is revised to eliminate the requirement that there be "clear and present" danger of abuse, neglect, or exploitation. The change was necessary to eliminate an incorrect interpretation by the States—that the situation had to be critical before services could be provided.

Section 228.47 is revised to permit the title XX agency to accept a bill (as well as a receipt of payment) for a service that has already been rendered to an individual, as a basis for giving him the money to pay for the service. By doing so, SRS seeks to eliminate what may be a hardship for the recipient—that is, requiring him to pay for the service out of his own pocket before the State can make an expenditure for which FFP is available. However, SRS wishes to make clear that money can be given to a recipient only for a service which has already been provided to him with prior State agency approval.

LIMITATIONS: FINANCIAL

Section 228.51 is revised to delete from paragraphs (a) and (b) the parenthetical phrase "less fees collected" in order to underscore the possibility for a State to expand the particular service for which the fee was collected as well as any other service under the services plan. (See § 228.62(e)).

Section 228.55 is revised to delete the words "of child-bearing age" after "individuals" to clarify that family planning services are available to males also.

LIMITATIONS: INDIVIDUALS SERVED, ELIGIBILITY AND FEES

Section 228.60 is reorganized for clarity and revised to make it possible for States to use the median incomes promulgated by the Secretary throughout their program year instead of having to use two different sets of median incomes if their program year does not coincide with the Federal fiscal year. Added are:

(1) The option for States to establish different income levels for different geographic areas (to provide for additional State flexibility and difference in standards of living in the State); (2) a reference to discretionary fees for individuals below the 80 percent level (to alert the user of the regulation to the location of that provision); and (3) requirements for notifying applicants (orally or in writing) regarding their eligibility within 15 days after the agency has made a decision (to assure prompt notification of eligibility) and for entering the date of such notification in the case record. A statement is added to make clear that no application is required for information and referral services.

Section 228.61 is revised to: (1) Clarify that eligibility is determined on an individual basis only; (2) define the "declaration method" of determining eligibility; (3) set forth the conditions for FFP vis-a-vis proper and improper determination or redetermination of eligibility; (4) define "proper determination of eligibility"; (5) provide that an individual who wishes to keep confidential a service (such as services to drug addicts or alcohol abusers) for which the provider determines eligibility, may request and be entitled to have any outside contacts, necessary to determine eligibility, made by the title XX agency rather than the provider agency; (6) give the States the option of redetermining eligibility on an annual basis (rather than every 6 months) for persons whose income is derived exclusively from pensions or Social Security benefits (to ease burdens on elderly individuals); and (7) clarify the nature of the State agency's responsibility for continuous monitoring of its method(s) for determining eligibility.

Changes (3) and (4) in § 228.61 regarding determination of eligibility are designed to establish and make clear that for purposes of FFP, a determination of eligibility that was correctly made on the basis of information available to the agency at the time of the determination will be a proper basis for Federal matching even though subsequent information may prove that the information on which the eligibility determination was based was in error.

V 41 1167 AUG 26 76 UMI

SRS believes this is in line with its policy enunciated throughout these regulations; namely, to encourage the States to use their limited Federal dollars under this program to the greatest extent possible on service delivery and not for administrative costs.

Change (5) in § 228.61 deals only with a phase of confidentiality concerned with determination of eligibility by a provider. All other aspects of and requirements for confidentiality regarding applicants for and recipients of title XX services are covered in § 205.50 which contains provisions for safeguarding information on all persons served under Social Security Act programs administered by the Social and Rehabilitation Service. Preparatory to revising § 205.50 to reflect more clearly the Department's views on privacy for individuals under these programs, SRS staff has met with representatives of State and local agencies in the areas of social services, medical and financial assistance, and has canvassed State legal staff for their input. A Notice of Intent will be published in the FEDERAL REGISTER in the near future to invite public comment on all issues pertinent to confidentiality and privacy in SRS programs. After the conclusion of the public participation activities, SRS will assess the results and develop a proposed regulaton covering title XX and other SRS programs.

Change (7) in § 228.61 regarding State responsibility for monitoring its eligibility determination method(s) is necessary to respond to questions and to avoid confusion about this area of program administration.

This section intends to make clear that the State must continuously monitor the method(s) it uses for determining eligibility for the purpose of making sure that such method(s) result in correct determinations. The State must test its method(s), for example, the declaration method, by going behind some eligibility determinations made by that method and ascertaining whether those determinations are correct. In doing this, if the State finds erroneous determinations, it must take action to eliminate such errors.

The States' responsibility for developing method(s) that achieve the desired result, that is, eligible individuals in accordance with the services plan, is an essential part of implementing its responsibility under § 228.6(e) for establishing and maintaining standards for the determination of eligibility.

Section 228.62 is revised to: (1) Permit the State to vary fees for services in different geographic areas (to allow for differences in cost of living); (2) clarify that fees imposed must be reasonably related to the family's gross monthly income because it is a statutory requirement; (3) deny FFP in the costs of any service for which any fee or charge other than those specified in the regulation is imposed (to prevent the imposition of "unauthorized" fees); and (4) to clarify an optional method for handling fees collected by provider agencies. This option for handling fees emphasizes the States' flexibility in the use of fees to support selected programs. Although as currently written there is no prohibition against the use of fees to expand a particular program, the wording of the regulation seemed to imply that fees collected by a provider agency could only be used to reduce the cost and, thereby, the amount of expenditures subject to Federal participation.

The change in language in these proposals makes clear the State option to authorize a provider to use fees to expand the program under terms of the contract. Because fees collected are income from a program supported in part by Federal funds, such fees may not be used to generate additional Federal participation. Thus, program expansion under this option is limited to the amount of fees collected. Additionally, any amount of fees collected and not used for expansion under this option must be deducted from the total expenditures for which FFP is claimed.

Section 228.64 is revised to reflect the May 19, 1976 revocation of § 228.63 which had required an individual recipient basic data file.

In § 228.65(a)(1), which currently reads ". . . provided to an individual under 18, harmed or threatened with harm by a person responsible for the individual's health or welfare," the limiting phrase "by a person responsible for the individual's health or welfare" has been deleted. States would thus be free to provide services to prevent or remedy neglect, abuse, or exploitation without regard to the kind of person who actually (or potentially) harms the child.

PURCHASE OF SERVICE

Section 228.70, renamed "Procurement standards," is revised to require that purchase of services contracts specify that the provider will impose no fees other than those specified in the regulations and established by the State in accordance with prescribed criteria (to prevent imposition of unauthorized fees); and permit the State agency to purchase services from an individual provider (one with no direct service employees or subcontractors) without a written contract, provided that the State's statute of frauds does not preclude the State agency from enforcing its unwritten contract with the provider, and that the agency documents such contract. The latter change is made to reduce administrative requirements on the individual provider.

TRAINING AND RETRAINING

Subpart H—Training and Retraining—has been extensively reorganized and rewritten.

Within SRS, the question is now being raised whether this regulation should be combined with the one on training under title I, IV-A, X, XIV, XVI (AABD) or XIX. One school of thought favors a self-contained title XX regulation to the greatest extent possible for ease of State use and in view of some basic differences with other SRS programs. Another school of thought prefers one regulation covering training for all SRS support programs under title XX and the other six titles of the Social Security Act. Comments by States and the public are solicited on the desirability of a separate title XX training regulation or one combining training for all programs for which SRS is responsible.

Section 228.80 is now called "Conditions for FFP." It describes the kind of training which may be provided, and when FFP may be claimed for training expenditures.

The requirement that State agencies file with SRS their training plans for each program year was deleted from this section because it was considered needlessly burdensome to States. While SRS believes that careful planning of training is essential to sound program management, it is thought that States can be encouraged and assisted in such planning without mandating submittal of a training plan to SRS.

Section 228.81 is revised to: (1) Include the training of provider agency personnel who are determining eligibility for title XX services (as well as those who are providing the title XX services); (2) identify provider agency service delivery and eligibility determination personnel who may be trained; (3) expand the circumstances under which foster caregivers providing special services may be trained; and (4) provide FFP for training of foster caregivers whose homes provide a resource to the title XX agency in its own directly operated foster care services program for eligible children and adults.

Regarding the changes in § 228.81, training provider eligibility workers is a logical outcome of permitting providers to determine eligibility of persons applying to them for services.

In reference to the training of foster caregivers, the present regulation permits training only of those who will provide special services. Under past and present law and regulations, other foster caregivers, although undeniably necessary to the provision of services to children and adults, have not been eligible for training because their function was defined in terms that would preclude training—they were not "staff of the agency" or defined as "providers of services." However, since foster caregivers are necessary to enable the title XX agency to have a foster care program, they are seen as "directly related to the provision of services" and thus meet the training eligibility requirements under title XX.

Section 228.82 is revised to delete the requirement that specified categories of students shall be included in the classroom program of instruction funded under grants to educational institutions, and to substitute a requirement that such grants contain specific objectives and be evaluated as a condition for continued funding. This provides an alternative for an administratively infeasible requirement.

Section 228.83 is revised to: (1) Revoke the provision for disallowance of Federal funds when less than 90 percent of the persons preparing for employment with the title XX agency (and whose training was funded under title XX) report for employment following such training by either the title XX agency, a public or private title XX provider agency, or a title XX agency in another State (experience has shown that all the foregoing are administratively infeasible requirements); (2) substitute procedures to be followed by the student and the State agency by requiring simply that the student accept employment if offered by the agency within six months after completion of his training and, if not employed, keep the agency informed of his employment status for one year; and that the State agency offer employment to the student unless precluded by circumstances beyond its control. (SRS believes this alternative is a reasonable way to facilitate increased numbers of qualified staff in State services programs); and (3) clarify that any funds received by the State from students who fail to meet their commitment to accept employment and, instead, repay all or part of funds provided to them by the State to defray the costs of their training, shall be subtracted from the State's total expenditures for training before FFP is claimed.

Section 228.84 is revised to exclude FFP from dependency allowances of provider agency employees in training programs of 8 consecutive weeks or longer. The availability of FFP for such costs under the present regulation was an inadvertent error. Dependency allowances are ancillary to salaries; and since salaries are not eligible for FFP under title XX, SRS believes that it is unreasonable to include dependency allowances. Eight weeks refer to the length of a semester in a tri-semester system and is generally accepted as the least amount of time in which a full course of study can be completed.

A second revision to § 228.84 adds the provision of FFP in the training costs for activities of staff development personnel of provider agencies who are conducting title XX training under the contract. The same costs are covered as those for staff development personnel of the State agency: Salaries, fringe benefits, travel and per diem. This policy was inadvertently omitted in the present regulation. SRS believes that provider agencies and State agencies should both be able to train their own staff in title XX eligibility or service delivery where they have the capability to do so.

GENERAL PROVISIONS

In Subpart I—General Provisions—§ 228.90 is revised to permit FFP in: (1) Costs of transportation (tokens or tickets) and medical examinations (not available to the individual under title XVIII or XIX) which are necessary for the development of a services plan for him; and (2) costs of administrative support activities furnished by private organizations and individuals. These changes are included for administrative convenience.

In addition to the substantive amendments discussed in the foregoing, extensive editorial, technical, and clarifying changes have been made in all reprinted sections, including such things as recoding, insertion of paragraph titles where they weer lacking, and more detailed references to other documents.

Prior to the adoption of the proposed amendments, consideration will be given to any written comments, suggestions, or objections thereto received by the Administrator, Social and Rehabilitation Service, P.O. Box 2366, Washington, D.C. 20013, on or before October 12, 1976. Comments received will be available for public inspection in Room 5225 of the Department's offices at 330 C Street, SW., Washington, D.C., beginning approximately two weeks after publication of this Notice in the FEDERAL REGISTER, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (area code 202-235-0950).

(Catalog of Federal Domestic Assistance Program No. 13.771, Social Services for Low Income and Public Assistance Recipients.)

It is hereby certified that the economic and inflationary effects of this regulation have been carefully evaluated in accordance with Executive Order No. 11821.

Dated: August 9, 1976.

ROBERT FULTON,
Administrator, Social and Rehabilitation Service.

Approved: August 13, 1976.

MARJORIE LYNCH,
Acting Secretary.

228.13 Standards for child day care services.
228.14 Fair hearings.
228.15 Amendments to State plan.
228.16 Submittal of State plan and amendments for approval by the Secretary.
228.17 Reports and maintenance of records.
228.18 Maintenance of effort.
228.19 Noncompliance.

Subpart C—Comprehensive Annual Services Program Plan

228.20 Conditions for FFP.
228.21 Establishment of program year.
228.22 Services plan.
228.23 Program goals and objectives.
228.24 Individuals to be served.
228.25 Availability of services by geographic area.
228.26 Services.
228.27 Estimates of individuals to be served and expenditures.
228.28 Program resources.
228.29 Program coordination and utilization.
228.30 Organizational structure.
228.31 Needs assessment.
228.32 Planning, evaluation and reporting.
228.33 The public review process.
228.34 Regional review of proposed and final services plans.
228.35 Correction of proposed and final services plans.
228.36 Amendments to final services plan.

Subpart D—Limitations: Services

228.39 General.
228.40 Minor medical and remedial care.
228.41 Room or board.
228.42 Child care standards.
228.43 Educational services.
228.44 Services to individuals living in hospitals, skilled nursing facilities, intermediate care facilities (including hospitals or facilities for mental diseases or for the mentally retarded), or prisons.
228.45 Special services provided by foster family homes.
228.46 Emergency shelter.
228.47 Payments to recipients for services.

Subpart E—Limitations: Financial

228.50 Services and individuals covered in the services plan.
228.51 Matching rates.
228.52 Allotments to States.
228.53 Public sources of State's share.
228.54 Private sources of State's share.
228.55 Family Planning Services.
228.56 Fifty Percent Rule.

Subpart F—Limitations: Individuals Served, Eligibility and Fees

228.60 Persons eligible.
228.61 Determination and redetermination of eligibility.
228.62 Fees for services.
228.63 [Reserved].
228.64 Information and referral services.
228.65 Services directed at the goal of preventing or remedying neglect, abuse or exploitation of children or adults unable to protect their own interests.
228.66 Monthly gross income.

Subpart G—Purchase of Service

228.70 Procurement standards.
228.71 Rates of payment.

Subpart H—Training and Retraining

228.80 Conditions for FFP.
228.81 Who may be trained.
228.82 Grants to educational institutions.
228.83 Financial assistance to students.
228.84 Activities and costs matchable as training expenditures.
228.85 Activities and costs not matchable as training expenditures.
228.86 Phase-in of training requirements.

Subpart I—General Provisions

228.90 Expenditures for which Federal financial participation is available.
228.91 Expenditures for which Federal financial participation is not available.

AUTHORITY: Sec. 1102, 49 Stat. 647 (42 U.S.C. 1302).

Subpart A—Scope and Definitions

2. Section 228.1 is amended by revising the following definitions to read as follows:

V 41 167 AUG 26 76 UMI

§ 228.1 **Program definitions.**

As used in this Part:

Act means the Social Security Act.

Administrator means the Administrator of the Social and Rehabilitation Service of the U.S. Department of Health, Education, and Welfare.

Categories of individuals means groupings of persons on the basis of common characteristics such as recipient status (AFDC, SSI, Medicaid), income level, age, physical or mental condition, or any other characteristic that the State specifies in its comprehensive annual services plan.

Family means one or more adults and children, if any, related by blood, or law, and residing in the same household. Where adults, other than spouses, reside together, each may be considered a separate family by the State. Emancipated minors and children living under the care of individuals not legally responsible for that care may be considered one-person families by the State.

Fiscal year means the Federal fiscal year unless otherwise specified.

FFP means Federal financial participation.

Geographic area means any identifiable area encompased within the State.

Indian tribal council means the official Indian organization administering the government of an Indian reservation.

Indian tribe means any Indian tribe band, nation, or other organized group or community, including any Alaska Native region, village or group as defined in the Alaska Native Claims Settlement Act (85 Stat. 883), which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

Medical or remedial care means care directed toward the correction or amelioration of a medical condition which has been diagnosed as such by a licensed medical practitioner operating within the scope of medical practice as defined by State law, and which care is provided by or under the direct supervision of such a medical practitioner or other licensed health professional.

Monthly gross income means the monthly sum of income received from sources identified by the U.S. Census Bureau in computing median income. (See 228.66.)

Other public agencies means State and local public agencies other than the State agency, and Indian Tribes.

Room means shelter only; and board means 3 meals a day or any other full nutritional regimen.

• • • • •

Subpart B—State Plan Requirements, Reports, Maintenance of Effort, Compliance

3. In § 228.6, paragraph (f) and the introduction text of paragraph (e) are revised to read as follows:

§ 228.6 **State agency.**

• • • • •

(e) *Authority and responsibility of the agency.* There shall be maintained within the State agency the authority and responsibility for:

• • • • •

(f) *Administrative support agreements.* In carrying out the responsibilities under paragraph (e) of this section, the State agency may enter into agreements in accordance with the procurement requirements of 45 CFR Part 74, Subparts P and Q, with public or private entities to provide administrative support. A local agency administering the program under the supervision of the State agency may also enter into such agreements.

Subpart C—Comprehensive Annual Services Program Plan

4. Section 228.20 is revised to read as follows:

§ 228.20 **Conditions for FFP.**

(a) The State's final services plan shall meet all requirements of this Subpart and of § 228.50; if it does not (except for family planning services provided pursuant to § 228.26(g)), there will be no FFP in expenditures for services under the services plan.

(b) FFP will be available in expenditures under the final services plan for services that are provided:

(1) No earlier than 90 days after a proposed services plan has been published and made available for public review and any corrections necessary to bring such proposed plan into compliance with all requirements of §§ 228.21 through 228.33 have been published, with 45 days for public comment; and

(2) No earlier than the date of publication of a final services plan that meets all requirements of §§ 228.21 through 228.35 (if applicable).

5. Section 228.21 is revised to read as follows:

§ 228.21 **Establishment of program year.**

The State shall establish the beginning of the fiscal year or the fiscal year of the State government as the beginning of the State's services program year.

6. Section 228.22 is revised to read as follows:

§ 228.22 **Services plan.**

(a) The State agency shall prepare and publish in both proposed and final form a Comprehensive Annual Service Program Plan (hereinafter in this Part referred to as the sevices plan) prior to the beginning of each services program year. The proposed and final services plans shall meet all requirements of this Subpart.

(b) The final services plan shall also include an explanation of differences between the proposed and final services plans and the reasons therefor, and a summary of the public comments.

7. Section 228.24 is revised to read as follows:

§ 228.24 **Individuals to be served.**

The proposed and final services plans shall:

(a) Specify which of the categories of individuals described in § 228.60 will be provided services in the forthcoming program year; describe the income levels for eligibility, and include the Statewide definition of family in accordance with § 228.1;

(b) If the State limits services to individuals with certain characteristics, describe the limitations imposed for each category in sufficient detail to enable individuals to know if they are likely to meet the eligibility requirements, e.g., female-headed families whose income is not more than 80 percent of the median income; mentally retarded SSI recipients, and alcohol abusers whose income does not exceed 50 percent of the median income;

(c) Specify which of the categories to be served will be charged a fee;

(d) Include the fee schedule, specifying any variations by service or by geographic area, as permitted under § 228.52; and

(e) Specify whether information and referral services, and services to prevent or remedy neglect, abuse or exploitation will be provided without regard to income.

8. Section 228.25 is revised to read as follows:

§ 228.25 **Availability of services by geographic area.**

For the purpose of delivering services described in the service plan, the State agency may divide the State into geographic areas, but only if such geographic areas encompass the entire State, including Indian reservations. The State shall consider, in defining geographic areas, the boundaries of planning areas of other human services programs. If the State chooses to establish such geographic areas, the services plan shall:

(a) Describe those geographic areas;

(b) Provide that the services described in § 228.26(e) will be available to eligible individuals in every geographic area; and

(c) Where different services are made available to a category of individuals in different geographic areas, provide that the services furnished in a geographic area will be available to all eligible individuals in that category who reside in that area.

9. Section 228.26 is revised to read as follows:

§ 228.26 **Services.**

The services plan shall: (a) Describe each discrete service in as much detail as necessary to enable a reasonably prudent person to understand what is included in the service. For purposes of this paragraph, services such as "child welfare services" "services to alcoholics" or "protective services" are not discrete services but rather clusters of services, each of which shall be separately described. If medical or remedial care or room or board as described in §§ 228.40 and 228.41 are part of a service, the plan shall so specify in describing that service.

(b) Specify the method of delivery for each service, i.e., directly by the State agency, by a provider (public or private), or both;

(c) Indicate the relationship of each service to one or more of the program goals and one or more of the program objectives specified in § 228.23;

(d) Specify the categories of individuals in each geographic area to whom each service will be provided.

(e) Include among the services to be provided in each geographic area:

(1) At least three services for SSI recipients;

(2) At least one service directed at each of the program goals specified in § 228.23.

(f) Describe the foster care services required under section 408 of the Act to be provided to all recipients of AFDC–FC, if such services are available under title XX;

(g) Describe any family planning services that will be provided pursuant to section 402(a)(15) of the Act. Failure to include such family planning services will not constitute a deficiency in the services plan. However, failure to provide family planning services pursuant to section 402(a)(15) of the Act may result in a loss of FFP to the State under its AFDC program.

10. Section 228.27 is revised to read as follows:

§ 228.27 **Estimates of individuals to be served and expenditures.**

In order to provide residents of the State with information on the scope of the services program, the services plan shall include estimates of State and Federal expenditures applicable to the title XX program as follows:

(a) For each service, a list of estimated expenditures and estimated numbers of individuals to be served, by each category of eligible individuals and by each geographic area;

(b) Estimated expenditure for the forthcoming program year; and

(c) A comparison of estimated aggregate non-Federal expenditures for the forthcoming program year with those of the preceding completed program year.

11. Section 228.28 is revised to read as follows:

§ 228.28 **Program resources.**

The services plan shall indicate how the State intends to finance its title XX program by providing an estimate of the funds to be used from the State's title XX allotment, and by separately identifying and estimating State and local appropriated funds, and the aggregate of donated and other funds to be used to meet the expenditures under the program.

12. Section 228.29 is revised to read as follows:

§ 228.29 **Program coordination and utilization.**

The services plan shall describe:

(a) How the planning and the provision of services under the program will be coordinated with and utilize the following programs:

(1) Under the Social Security Act:

(i) title IV–A, AFDC (including WIN);

(ii) title IV–B, Child Welfare Services;

(iii) title XVI, SSI; and

(iv) title XIX, Medical Assistance (Medicaid); and

(2) Other appropriate programs for the provision of related human services within the State—for example, programs for the aging, children, develop mentally disabled, alcohol and drug abusers; programs in corrections, public education, vocational rehabilitation, mental health, housing, medical and public health, employment and manpower.

(b) The steps taken to assure maximum feasible utilization of services under these programs to meet the needs of the low income population; and

(c) The steps taken to assure public participation in the development of the services program, including contacts with public and private organizations, officials of county and local general purpose government units, and citizen groups and individuals, including recipients of services.

13. Section 228.30 is revised to read as follows:

§ 228.30 **Organizational structure.**

The services plan shall describe the organizational structure of the State agency through which the program will be administered including where individuals may apply for services and have their eligibility determined, and the estimated number of volunteers or a brief description of volunteer activities.

14. Section 228.31 is revised to read as follows:

§ 228.31 **Needs assessment.**

The services plan shall describe the steps taken to assure that the needs of all residents of, and all geographic areas in, the State are taken into account in the development of the services plan. The description shall include the data sources used (or to be used).

15. Section 228.32 is revised to read as follows:

§ 228.32 **Planning, evaluation and reporting.**

The services plan shall describe the planning, evaluation, and reporting procedures and activities the State has carried out or plans to carry out in connection with its services program. Examples of these procedures and activities which may be described include the following:

(a) *Planning.* Relationship with the State budget process and the legislature; input from other State, regional and local planning units and from local general purpose governmental units; citizen organizations and individuals; relationship of needs assessment and service resources inventory to setting of program priorities and allocation of resources.

(b) *Evaluation.* Purpose, scope and timing of current and proposed evaluations, and the schedule for dissemination of evaluation results.

(c) *Reporting.* Description of planned formal reports, such as reports to elected officials or to the public (but excluding reports furnished to SRS), and the schedule for issuance.

16. Section 228.33 is revised to read as follows:

§ 228.33 **The public review process.**

A State's services plan does not become effective for its services program year until the public review process is completed in accordance with § 228.33, § 228.34, and § 228.35 (if applicable).

(a) *Purpose.* The purpose of the public review process is to enable the residents of each State to participate meaningfully in the State decision-making process with respect to the States' services plan.

(b) *Scope.* The public review process shall include at least:

(1) Publication of the proposed services plan and a display advertisement describing that plan, and a summary of the plan, if any, at least 90 days before the beginning of the program year, with a 45-day period for public comment;

(2) Consideration of, and public access to, comments received;

(3) Publication of any corrections required to bring the proposed services plan into compliance with the requirements of §§ 228.21 through 228.33;

(4) Publication of the final services plan and a display advertisement announcing its publication no earlier than 45 days after publication of the proposed services plan;

(5) Publication of any necessary corrections to the final plan;

(6) Publication of any proposed amendments to the final plan with a 30-day period for comments;

(7) Publication of the final amendments; and

(8) Public access to copies of the proposed and final services plans.

(c) *Approval prior to publication.* Prior to publication, the proposed and final services plans shall each be approved by the Governor or such other official as the laws of the State provide.

(d) *Retention of published services plans.* Copies of the proposed and final services plans shall be retained in specified local public offices and made available for public inspection throughout the program year.

(e) *Handling of public comments.* (1) Written comments on the proposed services plan shall be considered by the State agency if received within 45 days after publication of the display advertisement announcing publication and availability of the proposed services plan; and

(2) Such comments shall be retained for at least 3 years for inspection by the public and by Federal officials.

(f) *Display advertisement; general requirements.* (1) A display advertisement is one prepared for and published within the main news section of a newspaper; advertisements placed in the legal or classified sections of a newspaper do not meet this requirement.

V 41 1 67 AUG 26 76 UMI

(2) Such advertisement must be published in the newspaper of widest circulation (and in foreign languages or foreign language newspapers where appropriate) in each geographic area described in the proposed and final services plans.

(g) *Display advertisement for the proposed plan.* A display advertisement shall at least:

(1) Specify the beginning and ending dates of the program year;

(2) Include a brief description of the services to be offered under the services plan;

(3) Describe the categories of individuals to be served:

(i) Identify those whose eligibility is based on their status as recipients of AFDC or SSI; and

(ii) Specify the maximum dollar amount of income that a family of four can have and still be eligible on the basis of income status; and

(iii) Indicate that such dollar amount is adjusted by family size.

(4) If the State has different income levels for different services, or different income levels for different geographic areas, specify that those different income levels are described in the proposed plan and in the plan summary (if the State has published a summary);

(5) Indicate beginning and ending dates of the 45-day period for public review and comment.

(6) Specify a toll-free telephone number that can be called to obtain without charge either a copy of the proposed plan or a summary thereof; or state that such copies can be obtained by calling a specified local public agency in each county, such as the local social services agency.

(7) Identify a local public agency in each county such as the social services agency, where copies of the proposed services plan are available for public review; and for distribution to the public either free (if no summary is provided) or at a reasonable cost; and

(8) Specify the address where written comments may be sent and, if there are to be public hearings on the proposed plan, the location, date, and time for such hearings; or state that information concerning the hearings can be obtained by calling a specified toll-free number or by telephoning specified local agencies after a given date.

(h) *Summary of proposed services plan.* If the State publishes a services plan summary (to be provided free in lieu of a free copy of the entire services plan), it shall contain at least the following information:

(1) The beginning and ending dates of the program year;

(2) The categories of individuals including any limitations, who are eligible for services;

(3) The categories of individuals to whom a fee will be charged if they wish to be provided services under the services plan;

(4) Fee schedules, including any variations by service or by geographic area;

(5) A description of each discrete service to be provided under the plan;

(6) The services that will be made available to each category of individuals in each geographic area under the services plan;

(7) For each service, estimated expenditures, and estimated numbers to be served by each category of eligible individuals and by each geographic area; and

(8) Amount and sources of funds to finance the services program.

(i) *Display advertisement of the final services plan.* The display advertisement of the final services plan shall contain at least:

(1) A statement that the final services plan has been published and is available for review by the public;

(2) An explanation of any differences between the proposed and final services plans and the reasons therefore;

(3) A toll-free telephone number that can be called to obtain information about the services plan and where to apply for services; or the name of a local public agency in each county, where information regarding the services plan will be made available and where applications for services will be accepted;

(4) The name of a local public agency in each county where copies of the final services plan are available for public review and distribution to the public either free or at a reasonable cost; and

(5) The location where public comments on the proposed services plan are available for review.

18. Section 228.34 is revised to read as follows:

§ 228.34 Regional review of proposed and final services plans.

(a) *Proposed services plan.* (1) Not later than 5 working days after publication of the proposed services plan, the State shall submit to the SRS Regional Commissioner the following: 7 copies of the proposed services plan and its summary, if any; a dated copy of the display advertisement; the names of the newspapers in which the display advertisement appeared; and the geographic areas covered by those newspapers.

(2) The Regional Commissioner will review the materials submitted to determine whether all requirements of §§ 228.21 through 228.33 have been met.

(3) Within 10 working days following receipt of the materials described in paragraph (a)(1) of this section, the SRS Regional Commissioner will notify the director of the State agency in writing that those materials meet all the requirements of this Subpart, or will specify the deficiencies that must be corrected in accordance with § 228.35. For purposes of this paragraph, a display advertisement which does not meet each requirement of paragraphs (f) and (g) of § 228.33, or a proposed services plan which does not comply with each required item under §§ 228.21 through 228.32, and 228.33(c) is deficient.

(4)(i) If correction(s) to the proposed services plan or to the display advertisement announcing the proposed services plan is necessary, the State shall submit to the SRS Regional Commissioner no later than 5 working days after publication of such correction(s), the following:

(A) For correction(s) to the proposed services plan, 7 copies of the corrected pages and one dated copy of the display advertisement announcing the correction(s). (The State shall file the corrected pages in the proposed services plan.)

(B) For correction(s) to the display advertisement announcing the proposed services plan, one dated copy of the display advertisement containing the correction(s) to the original display advertisement.

(ii) Within 5 working days of receipt of the materials submitted pursuant to paragraph (a)(4)(i)(A) and (B) of this section, the SRS Regional Commissioner will notify the director of the State agency in writing that the correction meets the requirements of §§ 228.21 through 228.32, 228.33(c), and 228.35; and that the State is free to publish its final services plan following expiration of the 45-day comment period; or will specify the additional correction that must be made in accordance with § 228.35.

(b) *Final services plan.* (1) Not later than 5 working days after publication of the final services plan, the State shall transmit to the SRS Regional Commissioner: 7 copies of such plan; a dated copy of the display advertisement; and a statement containing the date of publication of the final services plan; the names of newspapers where the display advertisement appeared; and the geographic areas in the services plan covered by those newspapers;

(2) The Regional Commissioner will review the materials submitted to determine whether all requirements of §§ 228.21 through 228.33 have been met;

(3) Within 5 working days following receipt of the materials described in paragraph (b)(1) of this section, the SRS Regional Commissioner will notify the director of the State agency in writing that the final services plan meets all the requirements of §§ 228.21 through 228.33, or will specify the deficiencies that must be corrected in accordance with § 228.35. For purposes of this paragraph (b)(3), a display advertisement that does not meet all requirements of § 228.33(i), or a final services plan that does not comply with each requirement of §§ 228.21 through 228.32, and 228.33(c) is deficient.

(4)(i) If correction(s) to the final services plan or to the display advertisement announcing the final services plan is necessary, the State shall submit to the SRS Regional Commissioner no later than 5 working days after publication of such correction(s), the following:

(A) For correction(s) to the final services plan, 7 copies of the corrected pages and one dated copy of the display advertisement announcing the correction(s). (The State shall file the corrected pages in the final services plan.)

(B) For correction(s) to the display advertisement announcing the final services plan, one dated copy of the display advertisement containing the correction(s) to the original display advertisement.

(ii) Within 5 working days of the receipt of the materials specified in paragraph (b)(4)(i)(A) and (B) of this section, the SRS Regional Commissioner will notify the State agency in writing that the correction(s) meets all the requirements of §§ 228.21 through 228.32, 228.33(c) and 228.35; and that the final services plan is in effect; or specify the additional corrections that are required before the plan can become effective.

19. Section 228.35 is revised to read as follows:

§ 228.35 Correction of proposed and final services plans and display advertisements.

(a) A display advertisement which is deficient shall be corrected by publication of correct information for each deficient item in a display advertisement in all newspapers in which the original display advertisement appeared.

(b) A deficient proposed or final services plan shall be corrected by publishing the following information in a display advertisement in all newspapers in which the original advertisement apeared:

(1) The items being corrected;

(2) A statement that corrected pages for insertion in the plan are available without charge; and

(3) A toll-free number or the address of the local public office where corrected pages may be obtained.

(c) For correction of a proposed services plan, the display advertisement shall contain the information specified in paragraph (b) of this section and also indicate the beginning and ending dates of the new 45-day comment period on the corrected plan, and the method for submitting comments.

20. Section 228.36 is added to read as follows:

§ 228.36 Amendments to final services plan.

(a) Amendments to the final services plan are necessary at least when:

(1) Changes are to be made in the program year;

(2) Geographic areas are to be realigned; or

(3) Any of the following changes are to be made, whether applicable Statewide or only in particular geographic areas:

(i) Specific services are to be added or deleted;

(ii) Fees are to be changed, or the charging of fees is to be initiated or discontinued; or

(iii) The categories of individuals to be served are to be changed.

(b) Any amendment to a final services plan shall be prepared by the State agency and approved, published, and made generally available to the public by the Governor or such other official as the laws of the State provide in the following manner:

(1) The proposed amendment shall be published in a display advertisement in the newspaper of widest circulation (and in foreign languages or foreign language newspapers, where appropriate) in each geographic area in which the change has impact, and shall provide for a public comment period of at least 30 days. The display advertisement shall contain at least:

(i) A description of the proposed changes and the reasons therefor, and the proposed effective date of the changes which shall be no earlier than 30 days after publication of the proposed changes;

(ii) The method for public comment and where comments will be received; and

(iii) The beginning and ending dates of the 30 day period for public comment.

(2) No earlier than 30 days following the publication of the proposed amendment, the final amendment shall be published as a display advertisement in each newspaper in which the proposed amendment was published. This display advertisement shall contain at least:

(i) A description of the final amendment of the services plan;

(ii) The effective date of the amendment; and

(iii) An explanation of the differences, if any, between the proposed and final amendments and the reasons therefor.

(c) The effective date of an amendment shall be no earlier than the date of publication of the final amendment.

(d) Not later than 5 calendar days following publication of the final amendment, the State agency shall submit to the SRS Regional Commissioner 7 copies of the final amendment and a dated copy of the display advertisements which announced the proposed and final amendments.

Subpart D—Limitations: Services

21. Section 228.40 is revised to read as follows:

§ 228.40 Minor medical and remedial care.

(a) FFP is not available for medical or remedial care, other than family planning services, except when it is an integral but subordinate part of a service described in the services plan, and the medical or remedial care is not available to the individual under the State's approved title XIX plan and to the extent the individual or the provider is not eligible to receive payment under title XVIII for the provision of the service to the individual.

(b) Medical and remedial care is deemed to be an integral but subordinate component of a service if it is included in the description of that service in the State's services plan, and the State documents for each case that the medical or remedial care is necessary to achieve the objective of that service and not merely to correct a medical condition.

22. Section 228.41 is revised to read as follows:

§ 228.41 Room or board.

(a) FFP is not available for room or board under a services plan, except when provided in emergency shelter under § 228.46, or as an integral but subordinate part of another service and then only for a period of not more than six consecutive months for any one placement.

(b) Room or board is deemed to be as an integral but subordinate component of a service if it is included in the description of that service in the State's services plan and the State documents, for each case that the room or board is necessary to achieve the objective of that service and not merely to provide food or shelter.

(c) Room or board under this Part shall not be considered an integral but subordinate part of a service when provided to an individual in a foster family home or other facility such as a foster care institution or other facility whose primary purpose is to provide board, room and care or supervision.

(d) As used in this section, the term *placement* means an uninterrupted period of time during which an individual takes up, or is placed in, residence in a facility other than his usual place of residence, for the purpose of undergoing a specific regimen of services or treatment according to a prescribed plan.

23. Section 228.44 is revised to read as follows:

§ 228.44 Services to individuals living in hospitals, skilled nursing facilities, intermediate care facilities (including hospitals or facilities for mental diseases or for the mentally retarded), or prisons.

(a) FFP is available for services to individuals living in hospitals, skilled nursing facilities, intermediate care facilities (including any such hospitals or facilities for mental diseases or for the mentally retarded), or prisons only under the following conditions:

(1) The services provided are separately identifiable in the services plan (generalized descriptions such as "services to nursing home patients" or "services to increase socialization skills" are unacceptable under this provision).

(2) Such services are provided by other than the facility in which the individual is living. This requirement is not met if the services are provided by:

(i) Staff or contractors who are under the professional direction or direct supervision of the facility; the facility exercises control of the employment, tenure or compensation of such staff or contractors or makes assignments or alters the service regimen provided by them; or

(ii) Staff of like facilities under reciprocal arrangement.

(3) Such services are also provided to individuals who:

(i) Are not living in a hospital, skilled nursing facility, intermediate care facility (including any such hospitals or facilities for mentaly retarded), or prison; and

(ii) Are residents of any part of a geographic area that is within the catchment area of such facility.

(b) FFP is not available for:

(1) Inherent responsibilities of a facility including but not limited to the pro-

V 41 167
AUG 26 76
UMI

vision of food, clothing, shelter, general supervision and care; or

(2) Activities that are intrinsic to the purpose of such facility including but not limited to training in self care medical or psychiatric treatment, psychological or rehabilitative services, or detention functions.

(c) For purposes of this section:

(1) *"Prison"* means any State or local correctional institution or facility for the confinement of individuals charged with or convicted of criminal offenses. The term does not include separate juvenile correctional facilities nor community-based residential service facilities, such as half-way houses.

(2) *Separate juvenile correctional facility* means one that is located in a separate building or buildings; is served by separate day-to-day operational staff; and provides a separate and distinct program of services.

(3) *Skilled nursing facility (SNF)* means an institution primarily engaged in providing to inpatients skilled nursing care and related services for patients requiring medical or nursing care, or rehabilitation services for the rehabilitation of injured, disabled or sick persons.

(4) *Intermediate care facility (ICF)* means an institution which provides on a regular basis, health related care and services to individuals who do not require the degree of care which a hospital or SNF is designed to provide, but who because of their mental or physical condition require health related care and services above the level of room or board which can be made available to them only through institutional facilities.

(5) *Hospital* means an institution which is primarily engaged in providing by or under the supervision of physicians, to inpatients diagnostic services and therapeutic services for medical diagnosis, treatment, and care of injured, disabled, or sick persons, or rehabilitation services for the rehabilitation of injured, disabled, or sick persons.

(d) Services in separate juvenile correctional facilities may be provided by staff of the facility. However, FFP is not available for inherent responsibilities and intrinsic activities as defined in paragraph (b) of this section.

24. Section 228.45 is revised to read as follows:

§ 228.45 Special services provided by foster family homes.

(a) A foster family home is a home licensed or approved by appropriate State or local authority or an Indian tribal council, in accordance with § 228.12, to provide board and care including parenting for children and oversight for adults.

(b) *Special services provided by foster family homes.* FFP is not available for activities described under paragraph (a) of this section, but is available for special services provided by a foster family home to an individual living in that home, only upon documentation, by an appropriately qualified professional person who is other than the placement worker, that:

(1) The individual requires an identified special service because of a health (physical or mental) condition, an emotional or behavioral problem; and

(2) The caregivers are capable, by virtue of special training, or experience, of providing the needed service.

(c) Nothing in this section precludes the provision of any other service in the services plan to eligible individuals living in foster family homes when provided by other than the foster family.

25. Section 228.46 is revised to read as follows:

§ 228.46 Emergency shelter.

(a) FFP is available for emergency shelter as a protective service to any child, including runaways, only under the following conditions:

(1) The child is in danger of abuse, neglect or exploitation;

(2) The need for emergency shelter is documented bp personnel authorized by State law to place children, or by an Indian tribal council; and

(3) Emergency shelter is provided for not in excess of 30 days in any 12 month period, which may be consecutive or may accumulate over more than one stay.

(b) Emergency shelter may be provided in facilities such as foster family homes, institutions, and group homes.

26. Section 228.47 is revised to read as follows:

§ 228.47 Payments to recipient for services.

FFP is available in cash payments made to a recipient for a service already rendered to him, upon presentation of a bill for, or presentation of a receipt of payment for, such service if he was eligible under the services plan for the service at the time it was provided and if the purchased service:

(a) Is identified in the services plan;

(b) Was authorized by the State agency prior to its purchase and meets applicable standards, if any; and

(c) Was secured by the individual within a period of time and at a cost which were approved by the State agency.

Subpart E—Limitation: Financial

27. Section 228.51 is revised to read as follows:

§ 228.51 Matching rates.

(a) *Seventy-five percent FFP.* FFP is available at the 75 percent rate for service costs and for personnel training and retraining directly related to the provision of services under the services plan.

(b) *Ninety percent FFP.* Notwithstanding paragraph (a) of this section, FFP is available at the 90 percent rate for costs of family planning services provided under the services plan.

28. In § 228.52, paragraphs (a), (e) and (f) are revised as follows:

§ 228.52 Allotments to States.

(a) *Basic Limitation.* The amount of Federal funds payable to the 50 States and the District of Columbia under this Part for any fiscal year with respect to expenditures for services under the services plan (other than expenditures for personnel training or retraining directly related to the provision of services) may not exceed the allotment set forth in this section.

* * * * *

(e) *Date of Expenditure.* For purposes of this section, expenditures for services are ordinarily considered to be incurred on the date on which the State or local agency makes payment or the date to which the expenditure was allocated, pursuant to the cost principles of Subpart Q of 45 CFR Part 74 and the cost allocation procedures of 45 CFR 205.150. In the case of local administration, the date of expenditures by the local agency governs. In the case of purchase of services from another public agency, the date of expenditure by such other public agency governs. Different rules may be applied with respect to a State, either generally or for particular classes of expenditures, only upon justification by the State to the Administrator and approval by him. In reviewing State requests for approval, the Administrator will consider generally applicable State law, consistency of State practice, particularly in relation to periods prior to October 1, 1975, and other factors relevant to the purposes of this section.

(f) *Procedures for making grants to States.* See 45 CFR Part 201.

29. Section 228.53 is revised to read as follows:

§ 228.53 Public sources of State's share.

(a) *Funds available for matching.* Public funds used by the State or local agency for its services programs, including administrative functions, may be considered as the State's share in claiming FFP only where such funds are:

(1) Appropriated directly to the State or local agency; or

(2) Funds of another public agency (including Indian tribes) which are:

(i) Transferred to the State or local agency and are under its administrative control; or

(ii) Certified by the contributing public agency as representing expenditures for services eligible for FFP under this Part; or

(iii) Representing value, as determined in accordance with 45 CFR 74.53(b) and (c), and Appendix C, Part II, B.11 of 45 CFR 74, of goods or property provided by a public agency even if the agency does not incur any current expenditures for such goods or property during the period of their use in the services program.

(b) *Funds not available for matching.* Notwithstanding paragraph (a) of this section, public funds used by the State or local agency for its services programs may not be used as the State's share in claiming FFP where such funds are:

(1) Federal funds not authorized by Federal law to be used to match other Federal funds; or

(2) Used to match other Federal funds.

30. Section 228.54 is revised to read as follows:

§ 228.54 Private sources of State's share.

(a) *Funds available for matching.* Funds donated from private sources for services or administrative functions may be considered as State funds in claiming FFP only where such funds are:

(1) Transferred to the State or local agency and under its administrative control;

(2) Donated to the State, without restrictions as to use, other than restrictions as to the services, administration or training with respect to which the funds are to be used imposed by a donor who is not a sponsor or operator of a program to provide those services, or the geographic area in which the services with respect to which the contribution is used are to be provided; and

(3) Not used to purchase services from the donor unless the donor is a nonprofit organization and it is an independent decision of the State agency to purchase services from the donor.

(b) For purposes of this Part, a voluntary federated fund-raising organization is not considered to be a sponsor or operator of a service facility, and member agencies are considered separate autonomous entities so long as control by interlocking board membership or other means does not exist.

31. Section 228.55 is revised to read as follows:

§ 228.55 Family planning services.

(a) For purposes of this Part, family planning services means counseling, educational and medical services (including diagnosis, treatment, drugs, supplies, devices and related counseling furnished, prescribed by, or under the supervision of a physician) to enable individuals (including minors) voluntarily to limit their family size or to space their children.

(b) Where a State authorizes sterilization as a family planning service, it must comply with the provisions of 45 CFR 205.35.

Subpart F—Limitations: Individuals Served, Eligibility and Fees

32. Section 228.60 is revised to read as follows:

§ 228.60 Persons eligible.

(a) *Categories of individuals.* FFP is available only for services to individuals included in the categories identified in the services plan who are determined to be eligible under the provisions of this section and of § 228.61.

(1) *Income maintenance status.* The following individuals are eligible on the basis of income maintenance status:

(i) Recipients of AFDC; and

(ii) Those persons whose needs were taken into account in determining the needs of AFDC recipients; and

(iii) Recipients of SSI benefits or State supplementary payments.

(2) *Income status.* Individuals other than those described in paragraph (a)(1) of this section, are eligible if the family's monthly gross income is less than 115 percent (or, at State option, a lower percentage) of the median income of a family of four in the State adjusted for size of family, subject to the limitations set forth in § 228.62.

(b) *Median income.* (1) On or before December 1 of each year, beginning with calendar year 1975, the Secretary will promulgate the median income for a family of four for each State and for the 50 States and the District of Columbia.

(c) *Income levels.* (1) The State shall use the lower of its median income, or the median income for the 50 States and the District of Columbia, to establish income levels to be used throughout its ensuing program year for the purposes of eligibility determination and imposition of fees for services.

(2) A State may establish an income level:

(i) At a lower level than 115 percent of the median income;

(ii) At different levels for different services under the services plan;

(iii) At different levels for different categories of individuals;

(iv) At different levels in different geographic areas; or

(v) At different levels for different sizes of families within the limits for eligibility and fees set forth in paragraph (c)(4) of this section.

(3) A State shall not establish an income level which is in excess of 115 percent of the median income.

(4) All median income figures used for eligibility at the 115 percent level and the imposition of fees above the 80 percent level in accordance with this paragraph shall be adjusted by family size according to the following percentages of the State median income for a family of four:

(i) One person—52 percent.
(ii) Two person family—68 percent.
(iii) Three person family—84 percent.
(iv) Four person family—100 percent.
(v) Five person family—116 percent.
(vi) Six person family—132 percent.
(vii) For each additional family member above six persons, add 3 percentage points to the percentage for a family of six.

(5) For discretionary fees, applicable to families who are at or below the 80 percent level or are eligible on the basis of income maintenance status, see § 228.62(b).

(d) *Services without regard to income.* Notwithstanding paragraphs (a) and (b) of this section, information or referral services under § 228.64 or services directed at the goal of preventing or remedying neglect, abuse, or exploitation of children or adults under § 228.65 may, if included in the services plan, be provided to all individuals who need them.

(e) *Responsibility of State agency.* (1) FFP is available, with respect to expenditures, only for services provided to categories of individuals identified in the services plan who are eligible when the service is delivered and such service is included in the State's services plan.

(2) Each individual wishing to do so shall be assured the opportunity to apply for services without delay. The application shall be in writing in a form prescribed by the agency, dated and signed by the applicant. When information needed to establish eligibility is included in an application, or on a different form, the applicant shall certify that the information is correct. The application may be filed by the applicant himself or his authorized representative, or where the applicant is incompetent or incapacitated or in an emergency, by some one acting responsibly for him, including agency staff.

(i) When protective services are provided without regard to income under conditions specified in § 228.65, a dated agency record that documents the circumstances of actual or potential abuse, neglect, or exploitation of a child or adult, may be considered an acceptable alternative to the written application for that individual.

(ii) A written application is not required for information and referral services.

(3) A decision shall be made on all applications within time standards established by the State agency pursuant to § 228.6, but not to exceed 30 calendar days from the date of application.

(4) The agency shall notify applicants about their eligibility within 15 calendar days after it makes a decision. The date of each notification shall be entered in the case record. Applicants found to be eligible shall be notified orally or in writing; those found to be ineligible shall be notified in writing unless the requested service is provided to them through another funding source.

(5) At the time of application for services, each applicant shall be given information about the right to request and obtain a fair hearing, in accordance with § 228.14.

(6) FFP is not available for services provided prior to the date of request for information and referral services, or the date on which the application for other services is signed, or the need for protective services is documented in accordance with paragraph (e)(2)(i) of this section.

(7) Standards and methods for determination of eligibility will be consistent with the objectives of the program, will respect the rights of individuals under the United States Constitution, the Social Security Act, title VI of the Civil Rights Act of 1964, and all other relevant Federal and State requirements.

33. In § 228.61, paragraphs (a), (b), (d), (e), (f), and (g) are revised to read as follows:

§ 228.61 Determination and redetermination of eligibility.

(a) *Methods of determining (or redetermining) eligibility.* (1) States may establish any method or methods, including a declaration method, for determining individual eligibility in accordance with § 228.60 and § 228.66.

(i) *Declaration method* means acceptance of an individual's statements re-

V 41 167
AUG 26 76
UMI

garding the source and amount of his family's gross monthly income, and the income maintenance status (as described in § 228.60(a)(1)) of any member of the family.

(2) States may use one method for determining eligibility for all services, categories of individuals and geographic areas, or they may use different methods for different services, different categories of individuals and different geographic areas.

(3) States shall have available for Federal review a written description of the method(s) they have established for determining and redetermining eligibility.

(b) *Conditions for FFP.* Regardless of the method chosen for determination or redetermination of eligibility:

(1) An individual properly determined to be eligible on the basis of information available to the agency at the time of determination shall be deemed to be eligible until the end of the month in which he is determined to be ineligible;

(2) FFP is available in the cost of services provided prior to the actual date of an initial determination of eligibility only if such determination is made within 30 days of the date of application and the individual is properly determined to have been eligible when the services were initiated.

(3) FFP is available in the cost of services provided to a recipient in any month if such recipient was properly determined to be eligible for such service for any part of such month.

(4) When a recipient of services was improperly determined to be eligible, FFP is not available in the cost of services provided during the period of improperly determined eligibility.

A proper determination of eligibility is a determination which is based on a correct assessment of the information available to the agency at the time of such determination, provided that all information necessary to make a determination is available; a proper redetermination is one which meets those criteria and, in addition, is made within the time limits established by paragraph (b) of ths section.

• • • • • •

(d) *When redetermination shall be made.*

Redetermination of eligibility shall be made:

(1) When required on the basis of information the agency has obtained about anticipated changes in the individual's situation;

(2) Promptly, not to exceed 30 days, after information is obtained about changes which have occurred in the individual's circumstances that may make him ineligible; and

(3) Periodically, but not less frequently than every 6 months except that for individuals whose family gross monthly income at the time of determination is derived exclusively from pensions or social security benefits, redetermination may be made at 12-month intervals.

(e) *Who makes the determination.* Determinations of eligibility shall be made by the State agency, or, pursuant to written contract in accordance with Subpart G, by a provider of services.

(f) *Outside contacts.* (1) When the provider agency determines eligibility, it shall inform the applicant or recipient that, if it is necessary to contact outside sources (including employers) and the applicant or recipient wishes to keep the service confidential, he is entitled to request that such contacts be made by the State agency; and

(2) The State agency, upon notification of the individual's request, shall make the outside contacts and relay the information to the provider.

(g) *State monitoring of eligibility process.* Whether the determination of eligibility is made by the State or the provider, the State shall establish and implement a continuous monitoring procedure to test the ability of its method(s) for determining eligibility to correctly make those determinations and shall, where erroneous determinations are disclosed, take action designed to eliminate such errors. A monitoring procedure under this paragraph may include the use of statistically valid samples. Periodic reports on the State agency's monitoring procedures, findings, and actions under this paragraph will be required pursuant to § 228.17(b).

34. In § 228.62 paragraphs (a), (c), and (d) are revised and paragraphs (e) and (f) are added to read as follows:

§ 228.62 Fees for services.

(a) *Mandatory fees.* FFP is available for a service provided to an individual whose eligibility is based on income status if his family's monthly gross income exceeds 80 percent of the median income of a family of four in the State or the median income of a family of four in all States, whichever is less, and does not exceed 115 percent of the median income of a family of four in the State, adjusted as to family size, only if a fee or other charge, based on a fee schedule in accordance with paragraph (c) of this section, is imposed.

• • • • • •

(c) *Criteria for fees.* (1) Fees established by the State agency:

(i) May be different for different services;

(ii) May be different for different geographic areas;

(iii) Shall be reasonably related to the individual's income; and

(iv) Shall not exceed the cost of the service.

(2) Where several services are provided concurrently to an individual, the total fees imposed shall not exceed the amount reasonably related to his income.

(d) *Methods of collection.* The State agency shall:

(1) Establish methods for the collection of any fee or other charge imposed; and

(2) Maintain evidence of a reasonable effort to collect such fee or charge.

(e) *Disposition of fees collected.* Fees collected from service recipients may, at State option:

(1) If provided for in the purchase of service agreement, be retained by the provider and used to expand the service under that contract; or

(2) Be used to reimburse the provider, if the contract so specifies, for costs above the negotiated rate when it is lower than his normal charge for the service. Any amount remaining after such reimbursement to the provider for these costs shall be deducted from the amount of expenditures for which FFP is claimed; or

(3) Be deducted from service expenditures before FFP is claimed.

(f) FFP is not available in the costs of any service for which the State agency imposes any fees or other charges which do not meet the requirements in § 228.24 (c) and (d) and paragraph (c) of this section.

§ 228.63 [Reserved]

35. Section 228.63 is deleted and reserved.

Section 228.64 is revised to read as follows:

§ 228.64 Information and referral services.

FFP is available: (a) Only for information about services provided under title XX and related service programs, brief assessment (but not diagnosis and evaluation) to facilitate appropriate referral, and referral to and follow-up with those community resources which provide or make available such services; and (b) Only when provided by an agency that has information and referral as a specific recognized function and that has a staff with identifiable tasks relating to information and referral.

36. In § 228.65, paragraph (a)(1) is revised to read as follows:

§ 228.65 Services directed at the goal of preventing or remedying neglect, abuse, or exploitation of children or adults unable to protect their own interests.

(a) FFP is available without regard to income for services directed at the goal of preventing or remedying neglect, abuse or exploitation of children and adults unable to protect their own interests, only as follows:

(1) With respect to children, only when provided to or in behalf of an individual under the age of 18 who is harmed or threatened with harm through nonaccidental physical or mental injury, sexual abuse (as defined by State law); or negligent treatment or maltreatment, including the failure to provide adequate food, clothing, or shelter. For purposes of this section, runaways are presumed to be harmed or threatened with harm by virtue of their status.

• • • • • •

Subpart G—Purchase of Service

37. Section 228.70 is revised to read as follows:

§ 228.70 Procurement standards.

FFP is available in the costs of purchased services only if they are secured in accordance with relevant provisions of Subpart P of 45 CFR 74, and the requirements of this Subpart.

(a) *Written contracts.* The State agency executes a written contract in accordance with requirements under this Part and 45 CFR 74.159 with the agency, individual, or organization from which services are purchased. In addition to the applicable requirements of § 74.159, the contract shall:

(1) Include all terms of the contract in one instrument, be dated, and be executed by authorized representatives of all parties to the contract prior to the date of implementation;

(2) Have a definite effective and termination date;

(3) Contain a detailed description of the services to be provided and of the methods, including subcontracting, to be used by the provider in carrying out its obligations under the contract;

(4) If eligibility determinations are to be made by the provider, contain a statement to that effect and criteria in accordance with Subpart F which shall be used by the provider for such determinations; and specify that the provider will inform individuals of their right to fair hearings in accordance with § 228.14;

(5) Provide for a stated number of units of service at a specific dollar rate, or for a specific dollar amount, or for costs to be determined in accordance with acceptable cost allocation methods;

(6) Specify the method and source of payment to the provider, including collection and disposition of fees, if applicable;

(7) Specify that no fees shall be imposed by the provider other than those set by the State in accordance with § 228.62 and described in the services plan;

(8) Include a statement that the provider meets applicable State or Federal standards as specified in this part;

(9) Specify the locations of facilities to be used in providing services;

(10) Provide that the provider will comply with the requirements of the Civil Rights Act of 1964, and for safeguarding information in accordance with § 228.10;

(11) Provide that any subcontracts permitted by the contract shall be subject to the requirements of this Part; and that the provider is responsible for the performance of any subcontractor;

(12) Specify requirements for fiscal and program responsibility, billing, records, controls, reports, and monitoring procedures; and

(13) Provide for access to financial and other records pertaining to the program by State and Federal officials.

(b) The requirements of this section may be satisfied by a simple printed contract form so long as all items described in paragraph (a) of this section are contained therein.

(c) The provisions of this section do not apply when services are obtained directly by the recipient and payment is made to him. (See § 228.47.)

(d) A written contract is not required for purchase of services from an individual provider who has no direct service employees or subcontractors provided:

(1) The State's statute of frauds does not preclude the agency from enforcing its unwritten contract with the provider; and

(2) The State agency maintains documentation of the terms of the unwritten contract including all applicable items specified in paragraph (a) of this section.

38. Section 228.71 is revised to read as follows:

§ 228.71 Rates of payment.

(a) FFP is available for expenditures for services only where the rates of payment for services do not exceed the amounts reasonable and necessary to assure the quality of service, and where services are purchased from other public agencies, are in accord with cost principles of Appendix C of 45 CFR Part 74 and are reasonably assignable to such services. The State agency shall maintain and make available for Federal review records which describe and support the rates of payment and the methods used to establish and maintain such rates.

(b) Public Health Service grant funds from programs specified in 42 CFR Part 50 of the Health Services Funding regulation (as well as any matching funds required to earn those grant funds) which have been made available under a grant to a health service project, if not required to be used to finance cost of services to individuals eligible for services under title XX, shall not be deemed by the State agency to be available to reduce the costs otherwise subject to reimbursement under title XX. This precludes double Federal payment for the same individuals.

Subpart H—Training and Retraining

39. Section 228.80 is revised to read as follows:

§ 228.80 Conditions for FFP.

FFP is available in expenditures for personnel training and retraining that is directly related to the services program if the State meets all requirements of this Subpart. The training may include in-service training, and short and long-term training at educational institutions. FFP in such training expenditures may be claimed inside or outside the State's allotment for services and is available at the 75 percent rate. FFP shall be available for training expenditures no earlier than the date on which FFP is available for the provision of services under the final services plan in accordance with § 228.20.

40. Section 228.81 is revised to read as follows:

§ 228.81 Who may be trained.

FFP is available for training only the following individuals:

(a) State agency staff employed in all classes of positions which directly relate to the operation of the Title XX program;

(b) Volunteers attached to the State agency and supervised by it in relation to duties directly related to the program;

(c) Service delivery and eligibility determination personnel employed by providers only when:

(1) A purchase of service contract which includes determination of eligibility by the provider, is in effect in accordance with Subpart G;

(2) The training provided is directly related to the provision of services, or the determination of eligibility under the contract; and

(3) The provider personnel, during or immediately following the training period, participate in the provision of services or the determination of eligibility under the contract for a period of time at least equal to the period of time for which training was provided;

(d) Persons preparing for employment in the State agency in all classes of positions which directly relate to operation of the title XX program;

(e) Individual providers who are currently under contract pursuant to Subpart G including, but not limited to:

(1) Foster family caregivers who need training to enable them to provide special services (as defined in §228.45) to eligible individuals living in the home, or to prepare them to receive eligible individuals who need such services if the home is used within the period covered by the contract, or

(2) Family or in-home day care givers;

(f) Individuals who provide services paid for by the recipient, as provided in § 228.47, if training is directly related to such service, and

(g) Foster family caregivers whose homes provide a resource to the title XX agency in carrying out its directly operated foster care services program for eligible children and adults.

41. Section 228.82 is revised to read as follows:

§ 228.82 Grants to educational institutions.

(a) FFP is available in payments for training furnished under grants to educational institutions, if all conditions specified in this section are met:

(1) Grants are made: (i) For the purpose of developing, expanding, or improving training for employees of the State agency and of providers, or persons preparing for employment with the State agency; (ii) for an educational program (curriculum development, classroom instruction, and related field instruction) that is directly related to the title XX program and provision of services; and (iii) for not more than three years, renewable subject to the provisions of paragraph (b) of this section;

(2) Grants are available only to post secondary, undergraduate and graduate educational institutions and programs

V 41 167
AUG 26 76
UMI

that have been accredited by the appropriate institutional accrediting body recognized by the U.S. Commissioner of Education. A specialized program for which there is a specialized accrediting body shall be accredited by, have pre-accreditation status from, or have applied for, accreditation by such body, (45 CFR Part 149 specifies the criteria and prodcedures for obtaining recognition as an accrediting agency or association. Lists of currently recognized accrediting bodies are published in the FEDERAL REGISTER periodically. See also "Nationally Recognized Accrediting Agencies and Associations" dated June, 1975 and published by the Office of Education).

(3) The State agency has written policies establishing conditions and procedures for such grants; and

(4) Each grant specifies objectives in terms of how the educational program is related to the title XX services program and how it is designed to meet the State agency's manpower needs.

(b) An evaluation of the educational program funded by each grant is made no later than the close of the second year of the grant. The evaluation shall be conducted by a panel consisting of representatives from the educational institution, the State agency, and the SRS Regional Office to determine whether the conditions and objectives specified in the grant are being met.

(c) If a majority, which includes equal representation from the three groups comprising the panel, finds that the educational programs are failing to meet such conditions and objectives, payment shall be terminated no later than the close of the second year of the grant.

42. Section 228.83 is revised to read as follows:

§ 228.83 Financial assistance to trainees.

(a) FFP is available for expenditures in the costs of training persons specified in § 228.81. If the following conditions are met, and within the specified limitations:

(1) State agency employees and service delivery personnel and eligibility workers of provider agencies who are in attendance full-time at training programs for 8 consecutive workweeks or longer have a legally binding commitment to continue to work in the State or provider agency for a period of time at least equal to the period for which financial assistance is granted.

(2) Persons preparing for employment in the State agency are:

(i) Selected by the State agency and accepted by the school;

(ii) Pursuing educational programs approved by the agency; and

(iii) Legally committed to work for the State agency for a period of time at least equal to the period for which financial assistance is granted if employment is offered within 6 months after training is completed. If not employed by the State agency, such persons shall keep the agency informed of their employment status for one year.

(b) *State agency responsibilities.* The State agency shall:

(1) Offer employment to the individual preparing for employment in the State agency during the 6 months following completion of the training, unless precluded by Merit System requirements, legislative cuts, position freezes, or other circumstances beyond the agency's control; and

(2) Evaluate the training programs.

(c) Any recoupment of funds by the State from trainees failing to fulfill their commitment under this section shall be treated as a refund and deducted from total training costs for the purpose of determining net costs for FFP.

43. Section 228.84 is revised to read as follows:

§ 228.84 Activities and costs matchable as training expenditures.

FFP is available in the following costs as training expenditures:

(a) *State agency employees.* (1) For State agency employees in full-time training programs of eight consecutive work weeks or longer (with no assigned agency duties); salaries (including fringe benefits), dependency allowances, travel, and education costs (that is, tuition, books, and supplies);

(2) For State agency employees in full-time training programs of less than eight consecutive work weeks: per diem, travel, and education costs;

(3) For State agency employees in part-time training programs (part of work week, evenings, mornings): Education costs.

(b) *State agency staff development personnel.* For State agency staff development personnel (including support staff), assigned full time to training functions: salaries, fringe benefits, travel and per diem. (Costs of staff spending less than full time on training for the title XX program must be allocated according to the time actually spent on such training.)

(c) *State agency training activities.* (1) For experts engaged to develop or conduct special programs: salary, fringe benefits, travel and per diem;

(2) For State agency training activities directly related to the title XX program: cost of use of space, postage, teaching supplies, and purchase or development of teaching materials and equipment—for example, books and audio-visual aids.

(d) *Persons preparing for employment.* For persons preparing for employment with the State agency: stipends, travel, and education costs.

(e) *Provider agency personnel.* FFP is available in the following costs of training provider agency personnel as training costs, provided such costs are not included in the cost of services purchased from the provider agency, and provided they are reasonably assignable to title XX training:

(1) For provider agency employees in full-time training programs of 8 consecutive work weeks or longer (with no assigned provider agency duties): travel and education costs;

(2) For provider agency employees in full-time training programs of less than 8 consecutive work weeks: per diem, travel, and education costs;

(3) For provider agency employees on part-time educational leave: education costs;

(f) *Provider agency staff development personnel.* For provider agency staff development personnel (including support staff) engaged in providing training to provider agency staff eligible for training under § 228.81(c) salaries and fringe benefits, travel and per diem.

(g) *Provider agency training activities.* (1) For experts engaged to develop or conduct special programs: salary, fringe benefits, travel and per diem.

(2) For provider agency training activities directly related to the title XX program: cost of teaching supplies and purchase or development of teaching materials and equipment—for example, books and audio-visual aids.

(h) *Individual providers.* For individual providers and foster parents in part-time training: travel and education costs.

(i) *Payments to educational institutions.* Under conditions specified in § 228.82, for curriculum development, classroom and field instruction: salaries, fringe benefits and travel of instructors; clerical assistance; teaching materials and equipment—for example, books and audio-visual aids.

Subpart I—General Provisions

44. Section 228.90 is revised to read as follows:

§ 228.90 Expenditures for which Federal financial participation is available.

(a) Federal financial participation is available only for expenditures which are identified and allocated in accordance with grant administration requirements set forth in 45 CFR Part 74, and, where appropriate, with the cost allocation provisions of 45 CFR 205.150.

(b) Under this Part, expenditures for the following are considered appropriate for the effective and efficient administration of the program:

(1) Salary, fringe benefits and travel costs of staff engaged in carrying out service work or service related work;

(2) Costs or related expenses, such as equipment, furniture, supplies, communications, and office space, transportation (such as tokens or tickets) and medical examinations, when necessary for the development of a services plan for an individual, provided such medical examination is not available to the individual under title XVIII or title XIX of the Act.

(3) Costs of State advisory committees on services, including expenses of members in attending meetings, supportive staff, and other technical assistance;

(4) Costs of agency staff attendance at meetings pertinent to the development or implementation of Federal and State service policies and programs;

(5) Cost to the agency for the use of volunteers in the program;

(6) Costs of operation of agency facilities used solely for the provision of services, except that appropriate distribution of costs is necessary when other agencies also use such facilities in carrying out their functions;

(7) Costs of administrative support activities furnished by other public agencies, private organizations, or individuals, or other units within the State agency which are properly cost allocated;

(8) Costs of technical assistance, data collection, surveys and studies performed by other public agencies, private organizations or individuals to assist the State agency in developing, planning, monitoring, and evaluating the services program; and

(9) Costs of public liability and other insurance protection.

44. Section 228.91 is revised to read as follows:

§ 228.91 Expenditures for which Federal financial participation is not available.

(a) Federal financial participation is not available under this Part in expenditures for:

(1) Carrying out any maintenance assistance payments functions or any other functions or activities which are not related to services under this Part;

(2) The purchase, construction, or major modification of any land, building or other facility, or fixed equipment. However, FFP is available in the cost of using buildings, capital improvements, and equipment, in accordance with 45 CFR 74, Appendix C, Part II, B. 11.

(3) Housing costs for families and individuals including rent, deposits, purchase, construction, major renovation or repair;

(4) Goods or services provided in-kind by a private organization; and

(5) Sabbatical leave.

THURSDAY, AUGUST 26, 1976

PART III:

FEDERAL ENERGY ADMINISTRATION

MANDATORY PETROLEUM PRICE REGULATIONS

Clarifications Applicable to Domestic Crude Oil

V41 167 AUG 26 76 UMI

Title 10—Energy

CHAPTER II—FEDERAL ENERGY ADMINISTRATION

PART 212—MANDATORY PETROLEUM PRICE REGULATIONS

Clarifications to Mandatory Petroleum Price Regulations Applicable to Domestic Crude Oil

On April 13, 1976, the Federal Energy Administration ("FEA") gave notice (41 FR 16179, April 16, 1976) of a proposed rulemaking and public hearing to consider clarifications to certain technical aspects of the Mandatory Petroleum Price Regulations applicable to domestic crude oil (10 CFR Part 212, Subpart D).

The FEA did not propose in this rulemaking proceeding to alter any of the major policy decisions already reached, or now under consideration, in the three rulemaking stages to implement the crude oil pricing policies of the Energy Policy and Conservation Act ("EPCA," Pub. L. 94–163). Rather, the purpose of the present rulemaking proceeding has been to resolve as many as possible of a variety of more technical subsidiary issues that have arisen in connection with the implementation of the EPCA. These issues include those related to the definition of "property" and "posted price;" whether a well is properly classified as an "oil well" for purposes of the stripper well lease rule; the partial rescission and modification of Ruling 1975–15, including the issue whether a property's producing patterns have been "significantly altered" for purposes of the enhanced recovery rule applicable to unitized properties (10 CFR 212.75); and whether the certification of domestic crude oil sales presently required in 10 CFR 212.131 is adequate to enable crude oil purchasers to report on the Form FEA–P124–M–O, Domestic Crude Oil Purchaser's Monthly Report, notice of which was also issued on April 13, 1976.

In this proceeding, written comments were received from more than 45 interested persons, and public hearings were held in Denver, Colorado; Dallas, Texas; and Washington, D.C., at which oral presentations were received from more than 45 interested persons. After consideration of all the written and oral presentations, the FEA has determined that certain actions should be taken at this time.

I. The Definition of "Property"

A. Outline of Common Legal Relationships in Crude Oil Production

Before discussing the purpose and intent of the crude oil pricing regulations and the definition of "property," a brief outline of the general nature of the legal relationships pursuant to which crude oil is typically produced should prove helpful in affording a better understanding of the issues involved.

Crude oil which can be commercially produced generally must be found in underground reservoirs—geological formations which have trapped a sufficient quantity of marketable crude oil to make production economically feasible. The nature of the interests which may exist in crude oil is extremely complex. In the simplest case, the owner of land in fee is generally entitled to produce and dispose of any crude oil which may be recovered by wells on that land. This right is not unqualified, however, but is subject to laws and regulations, which have been adopted in various states for conservation and other purposes, and to various legal doctrines which have evolved with respect to protection of the correllative rights of other parties, such as adjoining landowners, that may be affected by the landowner's production of crude oil.

In the typical case, however, the landowner does not exercise the right to produce crude oil which is inherent in the fee interest; rather, the various rights, powers, privileges, and immunities associated with the ownership of land in fee (and the crude oil which may be recovered therefrom) are transferred or otherwise divided among several parties. Although the nature of the interests which may be created by such transactions is virtually limitless, certain principal rights have been grouped together with sufficient frequency that they may be generally described as follows:

(a) Mineral interests,
(b) Royalty interests, and
(c) Leasehold interests.

Thus, the owner of the land may grant to others (or reserve to himself) the right to go upon the land and remove therefrom the crude oil (or other minerals) which may be found beneath the surface, thus separating this right (the "mineral interest") from the balance of rights otherwise appurtenant to the ownership of land.

The owner of the mineral interest may, in turn, execute what is generally known as an oil and gas lease, which typically conveys the right to go upon the land for the purpose of prospecting for and producing crude oil (the "leasehold interest"). Such leases are typically for a term of years, subject to extension in the event crude oil is produced from the land during the term described in the lease. In consideration for receiving such a "leasehold interest," the lessee usually agrees to deliver to the lessor free of cost a share of the crude oil produced from the land (said to be taken by the lessor "in kind"), or a share of the proceeds of such crude oil produced and sold from the land. This right, typically retained by the holder of the mineral interest, to a share of production or proceeds is described as a "royalty interest." (See generally 1 H. Williams and C. Meyers, Oil and Gas Law §§ 101, 201–202 (1975 Supp.), hereinafter cited as "Williams and Meyers.") An oil and gas lease may be described as follows:

> The basic document of the oil and gas industry is the lease which authorizes an operator, the lessee or his assignee, to enter upon described premises for the purpose of exploring for and developing the mineral resources in the premises. . . .
>
> The modern oil and gas lease is the product of conflicts between the landowner and the operator of the oil and gas interest. The operator has been desirous of securing a lease with a small capital investment, keeping the lease as long as it was productive or was valuable for speculative purposes, and at the same time, being able to terminate an unprofitable lease without liability to the lessor. The landowner has been interested primarily in obtaining royalties from the lease and therefore has pressed for immediate exploration and development operations. In lieu of exploration and development operations, the lessor has tried to secure a periodic return for the holding of the leasehold interest. However, he has also wanted to limit the time the lessee can postpone drilling by periodic payments, in order to prevent the lessee from holding the lease merely for speculation, and to assure the exploration and development of the lease within a short time. (3 Williams and Meyers § 601, at 1–2.)

B. Regulatory Background

In the April 13 Notice, FEA traced briefly the history of the two tier crude oil pricing system and the fundamental role played by the property concept under that system. To delineate further the issues addressed in this proceeding with respect to the definition of the term "property," and in order to place the comments received and the actions being taken by FEA in more adequate perspective, a more detailed review of that history is appropriate.

The two tier pricing system was proposed on July 19, 1973 (38 FR 19464, July 20, 1973), by the Cost of Living Council ("CLC") under authority of the Economic Stabilization Act of 1970, as amended. In proposing the two tier system, CLC stated:

> The Council recognizes a need to stimulate increased production and is proposing a system which allows increased production (new crude petroleum) from each producing property and an equal amount of the current production (old crude petroleum) to be sold without respect to the ceiling price rule. Adoption of this incentive plan creates a two-tier pricing system for crude oil, which requires posting of two sets of prices, one for "old oil" and one for "new oil." Postings for "old oil" can be no higher than the ceiling price and postings for "new oil" is (sic) at the buyer's discretion.
>
> A crude oil producer is required to prorate among all his "old oil" buyers the amount of "old oil" freed from ceiling limitations by the production of a like amount of "new oil." (38 FR 19467.)

The regulations proposed on July 19 did not include a definition of the term "property," but defined "base production control level" (i.e., the level above which a property's current production and sale would qualify as "new oil") as follows:

> "Base production control level" for a particular month means—
>
> (1) For a particular property on which the producer has leased production rights, the total number of barrels of domestic crude petroleum produced in the same month of 1973 from that property.
>
> (ii) For a particular property on which the producer owns production rights, the total number of barrels of domestic crude petroleum produced in the same month of 1972 from that property. (38 FR 19482.)

In adopting the two tier pricing system on August 17, 1973 (effective August 19, 1973,) (38 FR 22536, August 22, 1973), CLC indicated:

> A 2-tier price system has been adopted, providing for a ceiling on domestic crude petroleum prices but allowing new crude and an equivalent amount of old crude to be sold at prices above the ceiling. . . . (38 FR 22536.)

CLC also stated:

> . . . The substantive policy changes (between the July 19, 1973 proposal and the August 17, 1973 final regulations) were publicly announced on August 10. These regulations implement those policy decisions and, in addition, incorporate numerous changes to better implement the program. (38 FR 22536.)

The August 10 public announcement referred to above was in the form of a press release issued by CLC, stating that with respect to the two tier pricing system

> The Council has been very concerned that the final regulations strike a balance between constraining prices while at the same time encouraging the necessary increase in supplies which the country must have. . . .

The press release explained the two tier pricing system as follows:

> Rule: A two-tier pricing system is provided. Producers will have the opportunity to sell "new oil"—that above 1972 production levels—at free market prices.
>
> Reason: The two-tier pricing system which allows new oil to be sold at higher prices than "old oil" is expected to stimulate domestic crude oil production while maintaining price controls on oil presently being produced. The two-tier system will encourage increased investment in domestic exploration and will provide an economic incentive to allow the recovery of a larger percentage of oil in existing reservoirs. (2 Historical Working Papers on the Economic Stabilization Program August 15, 1971 to April 30, 1974, at 1259–60.)

There was no discussion of the term property in the preamble to the final regulations, but a definition of property was included in 6 CFR 150.354 of the August 17, 1973 final regulations, as follows:

> "Property" is the right which arises from a lease or from a fee interest to produce domestic crude petroleum. (38 FR 22538.)

Thus, from the very inception of the two tier pricing system, producers were required to measure current monthly production and sale of crude oil from a "property" against the amount of crude oil produced and sold from that same "property" in the same month of 1972, in order to determine the amount of current crude oil production which would be subject to the ceiling price rule.

CLC did not elaborate on the rationale for the two tier price system, beyond the statements quoted above concerning the need to constrain prices while at the same time encouraging increased production. Thus, CLC perceived its statutory objective as primarily to control inflation with what was envisioned to be a short-term program under authority of the Economic Stabilization Act of 1970. That Act was scheduled to expire, as it did, eight months later, on April 30, 1974. (Thus, for example, CLC began sector-by-sector decontrol on October 25, 1973.) FEA noted in the April 13 Notice with respect to this consideration that:

> Because the Economic Stabilization Program was always intended to be a temporary program, the regulations adopted pursuant to that program were designed so as to achieve the price control regulatory objectives with minimal disruption to normal business practices. Thus, a definition of property was adopted to serve two basic purposes. First, the entity was intended to be one for which producers would in their normal course of business maintain production records so that new recordkeeping or data collection by the producers would not generally be necessary and audits for compliance purposes would be facilitated. Second, the entity was designed to serve as the basic building block for the incentive system which rewarded increased or new production from a property by classifying that production as new crude oil. (41 FR 16180.)

It should be noted also that the concept of a "current cumulative deficiency" was also incorporated in the two tier pricing system from the outset. (Once new crude oil had been produced and sold from a property, and current production and sale then fell short of 1972 production and sale levels, new crude oil could not thereafter be sold from the property until enough production in excess of 1972 levels had been sold at the ceiling price even though it would otherwise have qualified as new crude oil but for the requirement to make up the cumulative deficiency.) However, the cumulative deficiency rule was not a significant factor in the early months of the two tier system, since production and sale levels in late 1973 were, in general, not significantly less than 1972 levels.

C. Legislative Background

The term "property" gained further significance under the crude oil pricing regulations with the advent of the statutory exemption from those regulations of the first sale of crude oil produced from stripper well leases, which was initially provided for by the Trans-Alaska Pipeline Authorization Act ("TAPAA," Pub. L. 93–153), signed by the President on November 16, 1973. The exemption was implemented by CLC by an amendment to its regulations, which was issued November 21, 1973 and made effective as of November 16, 1973 (38 FR 32494, November 26, 1973). The amendment defined "stripper well lease" to mean a "property" (as previously defined in the two tier crude oil pricing regulations) whose average daily production did not exceed the qualifying limits set by the statute. In so doing, CLC stated:

> . . . For purposes of this exemption, the term "property" is described as being co-extensive with that "property" used to determine 1972 base production control levels, as measured by leases in existence in 1972. This narrow definition was adopted in order to comply with the Congressional intent expressed in the Conference Report which stated that the "Congress specifically intends that the regulations shall, among other things, prevent any 'gerrymandering' of leases to average down high production wells with a number of low production stripper wells to remove the high production wells from price ceilings" (H.R. Rep. No. 93–624). (38 FR 32495.)

On November 27, 1973, the Emergency Petroleum Allocation Act of 1973 ("EPAA," Pub. L. 93–159) was enacted, and it modified the test for stripper well lease qualification from one based on production levels during the preceding calendar month to one based on production levels during the preceding calendar year. A corresponding change in the crude oil pricing regulations was made by CLC, effective November 27, 1973 (38 FR 34464, December 14, 1973), but in all other respects the definition of stripper well lease remained as initially adopted.

Section 4(e)(2) of the EPAA provided for the stripper well lease exemption (until its repeal, effective February 1, 1976, by the Energy Policy and Conservation Act) and read, in part, as follows:

> (A) The regulation promulgated under subsection (a) of this section shall not apply to the first sale of crude oil produced in the United States from any lease whose average daily production of crude oil for the preceding calendar year does not exceed ten barrels per well.
>
> (B) To qualify for the exemption under this paragraph, a lease must be operating at the maximum feasible rate of production and in accord with recognized conservation practices.

Neither the EPAA nor the TAPAA included a definition of the term "lease." The most extensive legislative history concerning the original stripper well lease exemption is found in the Conference Report accompanying the TAPAA.

Although the Conferees did not discuss the meaning of the term "lease," they did state:

> The Congress intends that the provisions of this section will be strictly enforced and regulated by the administering agency to insure that the limited exemption of this class of wells for the express purposes described above is not in any way broadened. . . . Congress also directs that the administering agency shall promulgate regulations to implement the provisions of this section before it becomes operative. The Conferees expect the administering agency to utilize State data regarding production volumes, and to provide by regulation safeguards against the manipulation of gerrymandering of lease units in a manner that evades the price control and allocation programs.
>
> These regulations shall be so designed as to provide safeguards against any abuse, over-reaching or altering of normal patterns of operations to achieve a benefit under this section which would not otherwise be available. Congress specifically intends that the regulations shall, among other things, prevent any "gerrymandering" of leases to average down high production wells with a number of low production stripper wells to remove the high production wells from price ceilings. The sole purpose and objective of this Section 406 is to keep stripper wells—those producing less than ten barrels per day—in production and to insure that the crude oil they produce continues to be available for U.S. refineries and U.S. consumers. It is not intended to confer any benefit on the owners and operators of wells producing in excess of ten barrels per day.
>
> The Congress also intends that the regulations provide appropriate limitations and provisions in the definition of "lease" to in-

V 41 167 AUG 26 76 UMI

sure that an administratively workable system is established which does not permit abuse. (Emphasis in original, H.R. Rep. No. 624, 93d Cong., 1st Sess. at ——— (1973).)

The TAPAA stripper well lease exemption originated with a floor amendment that was introduced by Senator Bartlett of Oklahoma. The original text of the amendment provided that:

> Those oil leases whose average daily production per well does not exceed that of a stripper well of not more than ten barrels of oil per day shall be exempt from any allocation or price restraints. . . . (119 Cong., Rec. S13432 (daily ed. July 14, 1973).)

In explaining this amendment Senator Bartlett stated:

> So if the stripper producer had production that did not qualify, he, of course, would not be in any position to have that production exempted from price controls. It is done on a lease basis, because normally all the wells on one lease go into one tank or on a several tank basis. So if it is from a big well, the average goes away (sic) up.
>
> Incidentally, when subsidies were put on (stripper well production) during World War II, that went beyond just a lease basis; that was done on a field basis, because it is easier to do all the accounting that way. But in this case, it is only decided on a lease basis. (Id. at S13435, remarks of Senator Bartlett.)

It should be noted also that the sponsor of the amendment understood stripper wells typically to be operated by independent producers pursuant to a lease:

> Large oil companies have few stripper wells. Because of their higher operational costs, major oil companies are forced to sell their leases to independents—who can operate these leases for a longer period. (Id. at S13432.)

The legislation which became the Emergency Petroleum Allocation Act of 1973 ("EPAA") originated in the Senate where a bill was passed on June 5, 1973, containing no stripper well provision of any kind. When the House passed a similar version of the emergency petroleum allocation measure on October 17, 1973, it contained a "stripper" exemption applicable to wells rather than to leases. In the Conference Report of November 10, 1973, a stripper well lease provision was substituted, without comment, and this provision was subsequently adopted by Congress in the final version of the EPAA without debate or comment on the meaning of "leases."

The general legislative silence on the meaning of stripper well "leases" in connection with the drafting and passage of the EPAA can therefore be explained only by the fact that this matter was decided largely in connection with the TAPAA companion measure. These two statutory stripper well lease provisions, although identical insofar as the concept of "leases" is concerned, contained certain technical differences. Because of the use of the same language in both enactments concerning "leases," however, the legislative history of the TAPAA is relevant and applicable to the meaning of stripper well "leases" under the EPAA and the implementing CLC, FEO, and FEA regulations.

D. CHANGES SINCE ADOPTION OF THE TWO TIER CRUDE OIL PRICING SYSTEM

Several important changes in circumstances have occurred since the initial definitions of "property" and "stripper well lease" were adopted. First, with the passage of time, the natural decline in the rate of production has operated to make the cumulative deficiency provision of the two tier pricing system increasingly more significant. Second, the initial emphasis of CLC on restraining prices and controlling inflation has tended to be of lesser significance compared with the need to provide effective incentives for increased domestic production of crude oil. Third, the price differential between "old crude oil" and crude oil not subject to the ceiling price limitation has increased dramatically, from modest initial levels of $.50 per barrel or less, to amounts of $7.00 per barrel or more. The "old crude oil allocation" or "entitlements" program was instituted in response to this increased price disparity, and since November, 1974, refiners have been required to have an "entitlement" to refine a barrel of old crude oil, with those refiners having more than the national average of old crude oil generally required to purchase such entitlements from refiners having less than the national average of old crude oil. Finally, enactment of the EPCA on December 22, 1975, effectively changed the crude oil pricing program from one which was expected only to be temporary to one which would be mandatory for at least 40 months.

The amendments to the crude oil pricing regulations adopted to implement the crude oil pricing policies of the EPCA are intended to reflect these changed circumstances. Under the two tier pricing system as revised effective February 1, 1976, existing cumulative deficiencies were eliminated for all properties. Also, provisions were subsequently added to take into account the natural rate of production decline in future months, so that the level of production which must be exceeded before crude oil produced from a property may be sold at upper tier prices (the "base production control level") may be adjusted downward at six month intervals. These provisions were added to help keep the incentive of higher, upper tier prices within the reach of producers of most properties, so that measures taken to increase rates of production could realistically be expected to result in upper tier prices without regard to the time that has elapsed since the initial base production control levels were first established. Also, the "released crude oil" provisions which were included in the initial two tier pricing system as a special incentive for increased production in the short term were eliminated on a prospective basis, and base production control levels are now determined with reference to the average monthly volume of "old crude oil" produced and sold from each property in 1975.

E. GENERAL CONSIDERATIONS

Because the considerations involved with respect to past applications of the term "property" are significantly different from the considerations involved in prospective applications of the term, FEA has concluded that the clarifications that are appropriate with respect to past applications of the term are likewise different from those which are to be applied on a prospective basis. With respect to past interpretations FEA is, of course, bound to formulate those clarifications which are most consistent with the purpose and intent of the regulations in effect during that time, whereas with respect to future applications of the term, FEA enjoys greater latitude to make such prospective adjustments in the meaning of the term as will best suit the current objectives of the two tier pricing system.

In seeking at this time to clarify the meaning of a term that has been so widely applied for almost three years, FEA has sought, first, to determine the legal significance of the words used to define the term and, second, to identify and evaluate the extent to which other factors (extrinsic to the language of the definition itself) may have made it inequitable or impracticable to apply the literal meaning of that definition in certain circumstances. With this intention, and based upon the comments received in this proceeding, therefore, FEA has concluded that the literal meaning of the term "property," as defined by FEA, is generally to be understood as synonymous with the physical "tract" or "premises" as to which a working interest is established by an oil and gas lease, or by a fee interest. It has also concluded that in certain instances it is permissible to segregate the interest so described for purposes of delineating an FEA "property," while in other instances the aggregation of such interests to form a single FEA "property" is appropriate.

The conclusion that the term "property" (i.e., "the right which arises from a lease or from a fee interest to produce domestic crude petroleum") is, in the strictest sense, generally synonomous with the tract or premises as to which a right to produce exists pursuant to an oil and gas lease or a fee interest, is based in large measure on the foregoing review of the history of these concepts.

Although the evidence is not unambiguous, FEA has concluded that CLC by its definition of the term "property" intended to refer to the premises described in the oil and gas lease pursuant to which crude oil was being produced. It also appears that this is the reasonable meaning of the definition that CLC used and that the definition should have been so understood. Thus, when CLC first proposed the two tier concept, it described the productive entity with respect to which production was to be measured as "a particular property on which the producer has leased production rights." Use

of the phrase "property on which" suggests that CLC contemplated that crude oil production would be measured according to the surface acreage, or "tract," as to which a producer had obtained production rights through an oil and gas lease. (Such leases typically describe the premises by surface boundaries, although they may also delineate particular underground strata as to which rights are conferred. (See e.g., 3 Williams and Meyers, § 665).)

When the two tier pricing system was adopted, property was defined, as noted above, as "the right which arises from a lease or a fee interest to produce domestic crude petroleum." The term "lease" has been generally defined, for purposes of oil and gas law, as "[t]he instrument by which a leasehold or working interest is created in minerals. . . ." Williams and Meyers, Manual of Oil and Gas Terms at 240–241 (3d ed. 1971). "Working interest" has been defined, in turn, as "[t]he operating interest under an oil and gas lease. The owner of the working interest has the exclusive right to exploit the minerals on the land. . . ." (Id. at 511.)

Inasmuch as the lease is the basic document of the oil and gas industry, there should have been no doubt but that CLC intended by its definition of property to signify the premises described by an oil and gas lease (or by a deed, in those comparatively few instances in which the operator was also the owner of the mineral interest). FEA believes that this term, which has generally uniform historic meaning throughout the crude oil production industry, was used initially with the intention and expectation that it would provide a uniform basis for application of price controls throughout the industry and would avoid the need for taking into account the varying state regulatory concepts and internal systems of accounting.

Also relevant to the intent with which CLC used the term is that the concept of released crude oil was specifically designed as an incentive to increased production over a relatively short time. The fastest means of increasing production was through maximum exploitation by producers of tracts subject to their working interests—whether by application of enhanced recovery techniques, re-working of wells, or by re-completion of wells in new producing formations. The treatment, for example, of separate reservoirs subject to the same oil and gas lease as separate properties would have been inconsistent with the objective of the released crude oil concept to provide producers with maximum incentives to exploit to the fullest extent the tracts which were subject to their existing rights to produce crude oil.

The evidence with respect to the legislative treatment of the term "lease" is not inconsistent with this conclusion. FEA's review of the legislative history of the stripper well lease exemption indicates that the sponsor of the stripper well lease exemption used the "lease" as the unit of measurement simply because the production of several wells subject to a single lease is commonly commingled in one or more storage tanks. He proposed that the stripper well exemption be "decided on a lease basis," rather than on some other basis, solely because of the practical necessity inherent in the common collection and storage systems in use. Thus, a well-by-well measurement would not normally be possible on the one hand and, on the other hand, averaging per well production across an entire field, to the extent a field "went beyond" or was broader in scope than a lease, was presumably not desirable because it would in some cases have unnecessarily expanded the scope of the exemption to leases that were not marginal and in other cases would have unnecessarily prevented marginal leases from benefiting from the exemption. The term "lease" therefore appears to have been regarded as the most appropriate term available to describe an interest that would typically encompass more than a "well" but less than a "field." It also appears that the term was regarded to be commonly understood as no definition was included in the Act.

However, notwithstanding the strong support, both in the legislative history and elsewhere, for a literal interpretation of the definition of property, FEA has determined that the clarification of past applications of the property concept should recognize more flexibility because of a variety of circumstances under which an interpretation of the term property that was limited to the literal meaning of the language of the definition would be inequitable. Several considerations led to this conclusion.

As noted in the foregoing review of the concept of property and its significance under the two tier price system, the term "property" was first defined in regulations which were issued on August 17, 1973, and became effective on August 19, 1973. Thus, producers were required immediately (i.e., by the end of August) to apply the new definition to their particular circumstances to determine whether any "new" or "released" crude oil had been produced from a property in that month. While the definition of the term appears to have been premised on the assumption that it would provide a common and easily-understood basis for delineating appropriate productive entities, comments received in this and other proceedings indicate that there have, in fact, been many differing interpretations of the meaning of the term among producers.

With respect to the extent to which differing and possibly conflicting interpretations of the term should be recognized by FEA as consistent with the regulations, it must be recognized that producers had no detailed guidance initially from CLC, FEO, or FEA with respect to the numerous questions that arose with respect to the property definition. The first ruling on the definition of property was not issued until August 29, 1975 (FEA Ruling 1975–15, 40 FR 40832, September 4, 1975). Further, when the CLC definition of property had to be adapted by producers to their particular circumstances in August, 1973, the benefits or detriments of alternative approaches, to the extent they may have been considered, would have been perceived much differently than at a later time.

It should be recognized, for example, that the two tier pricing system initially operated generally to provide an economic incentive for the aggregation of productive entities if one such entity was capable of producing significantly higher volumes of crude oil than it produced in 1972. This is because there had not yet been time for significant current deficiencies to accumulate as to most productive entities, and the increased production from one entity, if sufficient, would serve under the special release rule to release from the ceiling price rule crude oil from other productive entities only if they were treated as part of the same property. Of course, to the extent that any cumulative deficiency had accrued at that date, selective segregation of entities would have served immediately to result in all "new crude oil" from any separate entity with respect to which production was just being initiated. As a general matter, however, it seems unjust, with the benefit of hindsight, to ascribe now improper motivations to applications of the property concept which were made under considerably different circumstances nearly three years ago.

Also favoring a more flexible interpretation of past applications of the term property is the reality of several significant consequences attached to the determinations that have been made with respect to the meaning of the term "property." Volumes of "old," "new," "released," and "stripper well lease" crude oil are a function of the scope of the "property" as determined by the producer. "Old" crude oil volumes, thus determined, have been certified, and entitlements have been purchased by refiners with respect to such volumes. The costs of the crude oil and entitlements to refiners have, in turn, generally been passed through in prices charged for refined products. Revenues paid to producers have, in like manner, generally been used to pay operating costs or to initiate enhanced recovery or new exploration and development, and remitted to royalty owners, or otherwise disposed of. In addition, since February 1, 1976, the "base production control level" of each property has been defined by reference to the volume of "old crude oil" produced and sold from the property concerned during 1975.

FEA recognizes the substantial reliance that has been placed on these determinations by numerous parties, that there is no basis for concluding in general that such determinations were other than good faith attempts to comply with the regulations, and that there is a substantial need for a measure of administrative finality to attach to as many of these determinations as possible, so as to avoid substantially disruptive retroactive adjustments.

The legislative history of congressional intent with respect to the meaning of "lease" in the context of the stripper well

V 41 N 167 A AUG 26 76 UM

lease exemption is not inconsistent with the need to afford some measure of flexibility in the definition of the term "property." The Conference Report accompanying the TAPAA states that "Congress . . . intends that the regulations provide appropriate limitations and provisions in the definition of 'lease' to insure that an administratively workable system is established which does not permit abuse." This statement clearly indicates that rigid adherance to a "lease" system was not expected and that the necessity for some degree of flexibility in defining the term was acknowledged. Consistent with this intent, the regulatory definition of a stripper well lease provided for, among other understandable exercises in flexibility, inclusion of "fee interests" within the meaning of the statutory term "lease."

The strictures in the Conference Report on the subject of stripper well "gerrymandering" do not contradict this view. The only express qualification on administrative flexibility in defining "lease" would seem to be one which would be present by implication in any event (i.e., that the administrative treatment of the term "lease"—as in any other phase of administering the stripper well exemption—must not be such as to permit abuse of the exemption).

On the other hand, FEA does not regard its ability retroactively to provide for a more flexible interpretation of the term property to be unqualified. Principles of equity generally favor that those who are similarly situated receive comparable treatment. In this regard, it would be particularly inappropriate for those producers which closely adhered to the regulatory definition of the term "property" to be treated much less favorably than those producers which interpreted the term in a less formal manner. Moreover, FEA is also concerned that unwarranted departures from its regulations not be permitted and that the interests of consumers in full and fair enforcement of the price controls on crude oil be adequately protected.

Accordingly, the detailed discussion setting forth the proper clarification of past applications of the property concept in the following Section I. F. represents FEA's attempt to strike an appropriate balance between the foregoing considerations as to a literal interpretation of the term property vis-a-vis a more flexible interpretation which takes into account factors extrinsic to the language of the definition itself.

FEA believes that the clarifications adopted today are consistent with the practices that have been followed by the substantial majority of producers. However, to the extent that these clarifications would permit any producer to calculate larger volumes of "new," "released," or "stripper well lease" crude oil than were calculated and certified in prior months, no recertifications of additional volumes will be permitted. Such recertifications will be considered, if at all, only on a case-by-case basis on normal grounds of inequity or hardship through the FEA exceptions process. FEA is aware that in so affording significance to differing good faith definitions of property that have been adopted by producers, similarly situated persons will in some instances be treated differently under the regulations. This fact is, however, counterbalanced in FEA's view by the need for the greatest possible measure of administrative finality to be afforded the determinations already made as to volumes of old crude oil. Appropriate compliance actions will, of course, be taken with respect to applications of the term property which are not consistent with the clarifications set forth herein, to the extent that they have resulted in the certification of greater volumes of new or upper tier crude oil than is permitted. FEA reserves the right in such compliance actions to determine whether any misapplication of the "property" concept, which resulted in improper classification of lower tier crude oil as upper tier crude oil to a particular purchaser, also resulted in that purchaser receiving at lower tier prices other volumes of crude oil that could properly have been certified as upper tier crude oil. In such cases, and in the context of formal compliance action (i.e., by remedial order or consent order), FEA may permit the producer to recertify such amounts of crude oil mistakenly invoiced as lower tier crude oil, but only to the extent that additional funds due the producer because of such recertification do not exceed refunds due to the purchaser because of sales of crude oil by the producer at prices in excess of the appropriate ceiling prices.

F. PAST APPLICATIONS OF THE TERM "PROPERTY"

The issues with respect to past applications of the term property may, for purposes of convenience, be generally divided into three categories: (1) Those involving the delineation of the premises which are subject to a single "right to produce" pursuant to a lease or fee interest, (2) those involving the aggregation of two or more such premises, and (3) those involving the segregation of such premises subject to a single "right to produce."

(1) *The right to produce.* Ruling 1975–15 made it clear that the property concept is one that begins with "the right *to produce crude oil.*" Consistent with the discussion above of the common meaning of that term as being generally synonomous with the concept of "working interest," the analysis of property will generally begin with identifying the one or more "premises" or "tracts" described in the instrument that confers the right to produce. Generally speaking, except in those cases where the right to produce is conveyed separately with respect to separate horizontal strata, the "premises" as to which the right to produce exists will generally be described in terms of surface acreage—commonly referred to as a "tract." In those instances in which production is undertaken by the owner of the mineral interest in fee, rather than by a lessee, the instrument conveying the fee interest will similarly describe the premises typically in terms of surface acreage, also referred to as a "tract." The terms "premises" and "tract" are both used here to refer to the physical limits as to which a right to produce exists. Since "tract" implies surface acreage, whereas "premises" is not so limited (but also signifies use of three dimensional boundaries), the latter term is preferred.

Difficult issues can arise with respect to construing a lease or deed to delineate the one or more premises as to which a "right to produce" exists under that instrument. This can occur, for example, where a lease conveys a right to produce with respect to described premises, but imposes differing or special rights or obligations with respect to the development of and production from particular portions of the described premises. Generally speaking, where the rights or duties created under a single instrument are significantly different with respect to particular identified portions of a described premises, where a producer has in good faith relied upon such differences in its exploration and development activities, and where the producer has consistently and historically accounted for such portions separately, FEA will permit the lease concerned to be considered as having established more than a single "right to produce" and, consequently, more than a single property. Thus, for example, where the time within which a lessee is obligated to begin production activities varies as to specified portions of a particular tract, those portions of the tract would be subject to differing "rights to produce," and hence, could constitute separate "properties."

(2) *Segregation of premises subject to a single right to produce.* More complex issues are posed with respect to the extent to which the premises subject to a single right to produce may appropriately be subdivided to form separate "properties." As noted above, there are instances in which a single lease may create several distinct "rights to produce" with respect to specified portions of the premises described therein. And as discussed below, the aggregation (with premises subject to other rights to produce) of less than all of the premises covered by a single right to produce may result in the subdivision of the premises formerly subject to a single right to produce into at least two properties—the portion which has been aggregated and the portion which remains. There are, however, still further instances in which segregation into one or more properties of a premises subject to a single right to produce appears to have been appropriate under the existing regulations.

a. *Non-contiguous tracts.* One such instance is in the case of non-contiguous tracts. Particularly in the case of fee interests, but also in the case of certain large leases (typically old leases), a single instrument may convey a single undifferentiated right to produce with respect to multiple, non-contiguous tracts, which may be located at great distances from one another. In all cases in which it can be shown that such non-contiguous tracts were developed and produced separately, and where they have historically and consistently been accounted for as separate properties, FEA will continue to permit them to be so regarded. The basis for this determination is principally that FEA understands this to have been a consistent and historic practice and one which was followed to conform the treatment of the atypical situation of multiple tracts subject to a single instrument to that afforded in the more typical situation of a single tract subject to a single lease.

b. *Very large tracts.* Another such instance is in the case of very large tracts which are subject to a single right to produce. Although this problem appears to exist mainly with respect to large fee interests, it also obtains with respect to certain large leases, particularly those granted many years ago by Federal and state governments. As noted above, the modern oil and gas lease typically conveys a right to produce which must be exercised within a specified period in order for production rights to be retained by the lessee. The objective of the lessor is to obtain production in a specified area within a specified time. Accordingly, most oil and gas leases confer a right to produce as to an area within which exploration and development by the lessee can reasonably be expected within a reasonable time—five years is typical.

Owners of mineral interests in fee which undertake their own exploration and development activities are not, of course, bound by any lease obligations with respect to the time within which such activities must take place. Accordingly, exploration and development of a large fee interest may take place over an extended period of time, in much the same manner as if several leases had been conveyed with respect to particular areas and time periods. Similarly, with respect to large leases, a comparable form of phased development may have taken place. Indeed, as to certain large government-granted leases, a "selection" process has been employed, whereby only with respect to those portions of the lease that are developed does the lessee retain production rights. In such cases, the right conveyed by the initial "lease" is more in the nature of a right to explore, which ripened into a right to produce those areas that the lessee has developed in a timely fashion.

In order to treat holders of large tracts subject to a single right to produce—whether by a lease or by fee interest—in a manner that is comparable to the treatment of those who hold a right to produce under the more limited typical modern oil and gas lease which covers a lesser area, FEA has concluded that separate geological formations subject to the same right to produce which have been developed and produced separately, and which have historically and consistently been accounted for separately may continue to be so regarded.

c. *Partial unitization or other aggregation of interests.* It is not uncommon for less than the total premises subject to a right to produce to be unitized or otherwise aggregated with all or portions of premises subject to other rights to produce, to form a single "property," leaving the balance of the premises formerly subject to a single right to produce not aggregated with any other such rights. The portion of the premises which is not aggregated is appropriately recognized as a property separate and apart from the portion of the premises which has been aggregated with other rights to produce.

In some cases, FEA understands that the inclusion of the so-called "Pugh" clause in a lease would operate to create a separate and distinct right to produce with respect to the non-unitized portion of the premises subject to that lease, by stating that production from the unitized portion of a lease will not serve to fulfill the lessee's production obligations with respect to the non-unitized portion. Thus, the two portions of the lease including such a clause would become separate properties by the terms of the lease itself. However, even where such a clause is not included, FEA has concluded that treatment of the non-unitized portion of the premises as a separate property is appropriate.

d. *Severance tax or royalty owner accountability.* Another instance in which segregation of a premises subject to a single right to produce is appropriate is where the production from identifiable portions of the premises is required to be measured and accounted for separately for purposes of determining severance tax liability or for purposes of accounting to royalty owners. FEA has concluded that where the payment of revenues to state tax authorities or to royalty owners requires separate accounting for production from identified portions of a premises subject to a single right to produce, and where such a portions of the premises have consistently and historically been treated as separate properties, such separate treatment may appropriately be continued.

e. *Other segregation not permitted.* The most complex and apparently controversial issue with respect to segregation of a premises subject to a single right to produce has to do with production from separate "reservoirs." FEA has studied this issue at considerable length but has been unable to find a solution which is likely to be satisfactory to all parties concerned. FEA has concluded on the basis of the review of the legislative and regulatory history and the general considerations outlined above that a premises which contains multiple reservoirs but which is subject to a single right to produce may not, simply by virtue of the existence of separate reservoirs, be treated as comprising multiple "properties."

FEA does not believe that the language of the definition of the existing term "property" can be construed to mean that production from separate reservoirs subject to the same working interest would, simply by virtue of the fact that the several reservoirs have been developed and produced separately, be regarded as production from separate properties. (Producers have been on express notice of this at least since the issuance of FEA Ruling 1975–15 on August 29, 1975.) Moreover, any producer which adopted a reservoir-by-reservoir approach to the definition of property (and, hence, to the computation of amounts of "new" and "released" crude oil) would typically have been in a position to achieve greater benefits under the price regulations over the past three years than those producers who took the approach of aggregating production from all reservoirs subject to the same right to produce, as required under the regulations. At least until February 1, 1976, any producer that treated each reservoir as a separate property automatically would have obtained "new" crude oil whenever production was obtained from a new reservoir. Producers using the lease approach, on the other hand, were required first to exceed 1972 levels of production from the lease concerned before any production from a new reservoir would be regarded as "new" crude oil. FEA has unfortunately not been able to obtain any approximation of the extent to which producers have actually adopted a reservoir-by-reservoir definition of property.

Under these circumstances, FEA has concluded that it would be inequitable to permit producers who took an expansive—and, in FEA's view, unwarranted—view of the meaning of the term property to obtain benefits that were not afforded to producers who adhered closely to the regulations. Thus, FEA has concluded that separate reservoirs which are subject to the same right to produce will generally not be treated as separate properties under existing regulations.

There are, however, instances in which for a variety of reasons, it would have been impracticable or inequitable for producers not to have treated separately production from a separate reservoir or reservoirs. Those instances of which FEA is aware have been noted above. There may well be other instances of which FEA is not aware, but which may be appropriately addressed in subsequent rulings, as they become known. The mere existence of separate reservoirs and the requirement to report separately the production from such reservoirs in itself will, however, only suffice to permit separate property treatment if the producer has applied for exceptions relief and has been permitted to use such a definition in order to avoid serious hardship or gross equity.

(3) *Aggregation of "rights to produce."* The aggregation of separate "rights to produce" pursuant to a unitization agreement was discussed in FEA Ruling 1975–15. There are, however, other circumstances under which separate rights to produce may appropriately be aggregated, pursuant to either voluntary or involuntary arrangements.

Thus, for example, various parties may hold partial undivided interests in the right to produce crude oil from a particular tract. Whether voluntarily through a joint operating agreement or other

V 41 167 AUG 26 76 UMI

type of agreement, or pursuant to compulsory state regulations, such undivided interests in the right to produce from a tract must typically be aggregated before production can begin. Under such circumstances, no apparent purpose would be served by requiring property delineations to be carried back to the individual partial undivided interests which have been aggregated in order to perfect the right to produce.

Another instance in which rights to produce may be aggregated occurs where the premises subject to such rights are required to be combined by a state regulatory agency as a condition to the operation of production activities. Thus, for example, in Louisiana the state regulatory agency will compel a "unit" to be formed by the owners of the tracts with respect to the surface area which overlies the portion of a reservoir that may be efficiently drained by a single well, provided the owners of at least 75 percent of the surface area agree to the formation of a unit.

Similarly, in states that maintain spacing requirements for oil wells, individual rights to produce may need to be combined, whether voluntarily or involuntarily, before a single well may be drilled and the right to produce made effective. Such aggregations of rights to produce (sometimes known as "drilling units") are also appropriately recognized as single "properties."

Generally speaking, FEA will follow a liberal policy with respect to the aggregation of rights to produce which will be permitted to be treated as a single "property," as long as a bona fide reason for the aggregation can be demonstrated by the producer.

G. *Prospective amendments to the term "property."* The issuance by FEA of Ruling 1975–15 engendered significant comment, primarily from crude oil producers urging FEA to adopt a property concept that would recognize as separate properties each producing reservior underlying a lease. Since that time, FEA has undertaken an analysis of the property concept as conceived and first implemented by the Cost of Living Council (and set forth in some detail in Part A above), and concluded preliminarily that the incentives offered under the tract-by-tract concept were better suited to the temporary program envisioned by CLC, but that in the more than two years since the two tier system was first implemented those incentives had decreased in impact or effectiveness. Accordingly, on January 6, 1976, in connection with the first stage of rulemaking proceedings to implement the crude oil pricing policy of the EPCA, FEA proposed for comment an amended definition of property (to have been applied prospectively, effective February 1, 1976) that would have recognized the existence of separate properties under the same tract, where the tract encompassed separate and distinct producing reservoirs. When final regulations were adopted on February 1, 1976, FEA rejected the proposal and generally indicated

(1) the uncertainty over the effect of such an amendment on the relative proportions of old, new, and stripper well lease crude oil; and

(2) the likelihood of enormous administrative problems associated with determining the limits of thousands of different reservoirs.

Comments submitted in connection with the first stage proceeding either did not address these concerns, or tended to confirm FEA's belief that data sufficient to make such determinations were generally unavailable.

However, after issuance of the February 1 amendments, FEA again received a significant number of inquiries and comments, urging reconsideration of the proposal to establish a property concept based upon separate reservoirs. Accordingly, as part of the continuing analysis of the property issue, FEA again reviewed this matter so as to formulate for public comment a proposed revision of the property concept. In this regard, FEA sought a concept that would optimize the incentives under the two tier system in a manner that is administratively feasible for FEA and that would facilitate compliance by crude oil producers.

The resulting proposal, as set forth in the April 13 Notice, was to afford under FEA regulations the maximum practical significance to pre-existing state regulatory concepts and historical accounting systems that have been developed within the framework of the various state regulatory concepts. With this goal in mind, FEA solicited comments in the April 13 Notice and indicated its intention to consider the adoption of retroactive amendments and the issuance of rulings, as well as the adoption of prospective amendments, to the extent that such actions were determined to be appropriate in resolving the issues under consideration. The discussion in Part F above represents the formal interpretation of FEA of the definition of property as promulgated by CLC and carried foward by FEO and FEA, and will be applied until the amendment discussed below becomes effective on September 1, 1976.

Although a number of different property concepts were discussed in the comments received in connection with this proceeding, most commenters still seem to favor reservoir-by-reservoir determinations. Under such an approach, each non-unitized reservoir or portion of a reservoir underlying each tract would constitute a separate property. Some producers have argued that this is the best approach because it would provide the greatest incentive to develop new reserves and maintain production of existing reserves. The incentive would arguably be maximized under the reservoir approach because decisions regarding the exploration for and development of crude oil reserves could be made on an individual reservoir basis without regard to the happenstance of production characteristics of other reservoirs underlying the same tract. It follows that a producer would more likely search for and develop new reserves (or increase the development of certain existing reserves) if the producer could be assured that resulting increased production would qualify as upper tier crude oil.

A property concept that follows tract boundaries, on the other hand, without regard to the separate reservoirs which may underlie the tract, may not provide appropriate incentives under the two tier pricing system. This is because increased production from one reservoir may fail to qualify as upper tier crude oil because of the requirement that tract production must exceed the BPCL and cumulative deficiency determined from all reservoirs that underlie the tract.

For example, a producer holds the right to produce crude oil from tract X under which are situated four separate and distinct reservoirs, with production figures as set forth in Table 1 below:

TABLE 1

Reservoirs	1972	1973	1974	1975	1976
A	11,000	8,000	5,000	3,000	1,000
B	7,500	5,000	4,000	3,000	2,000
C	0	0	11,000	10,000	9,000
D	0	0	0	0	
Totals	18,500	13,000	20,000	16,000	12,000

As Table 1 indicates, the incentive intended to be provided by the CLC has diminished over time. While the producer was able to respond to the short term incentive by developing production from reservoir C and thereby exceeding the property's BPCL in 1974, the continued decline in production from reservoirs A and B makes remote any incentive in 1976 or later to develop production from reservoir D. Under a reservoir-by-reservoir determination of upper and lower tier crude oil, however, production from reservoir C would continue to qualify as upper tier crude oil, as would any production from reservoir D.

The merit in a property concept that recognizes separate reservoirs (to some extent at least) is undeniable. However, an unqualified reservoir-by-reservoir concept is largely administratively infeasible. First, unitizations aside, crude oil accounting has consistently and historically had some relation to the lease because it is the lease that in the first instance describes ownership interests. Accordingly, a true reservoir-by-reservoir concept would require the establishment of reservoir BPCL's without regard to producing interests, and would force producers to determine production on a reservoir basis in the same manner as is done for unitizations, but where there is no agreement among various interest holders for that purpose. Moreover, additional problems would be encountered due to differences among various lease operators of the same reservoir.

Accordingly, the reservoir concept that FEA proposed in the January 8 Notice was one which would have recognized separate reservoirs underlying the same tract. In this way, it was thought that a system would result that benefited from the best aspects of a reservoir concept but which remained subject to the legal requirements entailed by tract concepts.

As noted above, the January 8 proposal was not adopted primarily because FEA concluded that it would be infeasible to attempt to administer a program under which FEA could not require easily understandable records from which could be determined the limits of each producing property. FEA has neither the expertise nor the resources required to monitor reservoir-by-reservoir production, and FEA auditors would not have at their disposal adequate means to confirm or deny that production had in fact resulted from two or more separate and distinct producing reservoirs.

This problem would be minimized if FEA could defer to other expert agencies to make reservoir-by-reservoir determinations. For this reason, FEA proposed in this proceeding to recognize the existence, as separate properties, of each separate and distinct producing reservoir underlying the tract, to the extent that such reservoirs have been recognized by the appropriate state regulatory body, and production is separately reported as such.

While many comments evidence a continued preference for a property definition that would recognize each reservoir regardless of state recognition, vel non, most comments indicated approval of the tentative conclusions set forth by FEA in the April 13 Notice. Therefore, effective September 1, 1976, the definition of property is amended to recognize as separate entities, each reservoir underlying a tract, to the extent that the reservoir is recognized by the appropriate state regulatory body, and production has been consistently and historically reported as such. The following guidelines are set forth to aid producers in making property determinations effective September 1, 1976.

(1) *Unitizations.* Where two or more tracts, or parts of two or more tracts, are unitized so that production is undertaken from the reservoir as a single unit, the reservoir, as unitized, constitutes the property. In most cases, the unitization of several tracts is accomplished by a unitization agreement, which describes the unitized reservoir and is submitted to the state regulatory body for prior approval. The method of determining upper tier crude oil volumes from unitized properties was addressed in Ruling 1975–15. The ruling did not, however, address an important aspect of unitization that has given rise to several questions from producers.

A unitization, as stated in Ruling 1975–15, constitutes a single property, but non-unitized production, if any, from each of the participating tracts continues to be accounted for on a tract-by-tract basis. This should mitigate some of what producers have perceived as the harshness of the requirement that unitization requires the accumulation of BPCL's from all participating tracts. The ruling is, therefore, amended by this Notice to make it clear that only that part of each tract's BPCL attributable to the unitized reservoir is accumulated to determine the new unit BPCL so that no participating tract carries into the unit an unrepresentatively high BPCL. For the non-unitized portion, if any, of each tract, the tract-by-tract rule discussed below is operative. (The allocation of a BPCL—which was formerly attributable to the entire tract—between the unitized and non-unitized portions of the tract would be made in the same manner as is discussed below with respect to implementing the reservoir-by-reservoir property definition, effective September 1, 1976.)

It has become evident during the course of this rulemaking that there has been some confusion resulting from the various meanings which may be attributed to the term "unit," which has two generally-accepted meanings: (1) The total area incorporated in a unitization agreement; and (2) the acreage allocated to a particular well. (See Williams and Meyers, Manual of Oil and Gas Terms at 484.) The rule discussed above applies to unitizations (the combining of all or parts of two or more tracts in order to operate the reservoir as a single productive unit subject to a single operating interest), and not to "spacing units," which merely define the minimum acreage allotted to a single well within the confines of a single tract. With respect to "drilling units," a term that is sometimes used to signify the forced pooling of two or more small tracts into sufficient area to meet the spacing requirement, the drilling unit will constitute the property if it is recognized as such by the state body, and production is reported as such.

(2) *Determination of base production control levels.* Because the amendment to the property definition adopted today is expected in many cases to result in a recalculation of BPCL's where the amended definition of property results in a greater number of producing properties for any producer, the following guidelines are set forth to aid producers in making those recalculations.

For each non-unitized tract, the producer should first determine how many properties are contained within that tract. If the tract produces only from one reservoir the tract constitutes the property and the BPCL, as previously calculated under FEA price regulations, remains the same. This will be true even though the producer may have reason to believe that crude oil has been produced from two or more separate reservoirs under the tract, but where no such separate recognition has been accorded the reservoirs by the state regulatory authority.

However, where the tract encompasses more than one producing reservoir, each of which has been recognized by the state regulatory authority as a separate and distinct reservoir, each may be treated as a separate property under the amendment adopted today, in which case a BPCL must be determined for each property. This should be done as follows:

(A) Reservoirs (properties) from which there was no production and sale of crude oil in 1972 will have a BPCL of zero;

(B) For reservoirs (properties) from which there was production and sale of crude oil in 1972, the producer will recompute levels of new, released, and old crude oil (since September 1, 1973) for each reservoir in order to determine revised levels of old crude oil for each reservoir in calendar year 1975. In this way, for each state-recognized reservoir (property) within the tract, the producer will be able to determine the production and sale of old crude oil in 1975, and hence a revised BPCL.

Although such calculations will need to be done for as far back as September 1973, no recertification of new crude oil is intended and none will be permitted. Such recalculations are to be done only for the purpose of establishing new BPCL's, where needed, effective September 1, 1976.

FEA is aware that the amended definition of property adopted today is likely to result, effective September 1, 1976, in the reclassification of some volumes of old crude oil as new crude oil. This will occur for some properties where the recalculation of BPCL's on a reservoir basis will result in the classification as new crude oil of some volumes that had (under the previous definition) been used each month to offset production from other reservoirs which had declined since the base year.

With respect to any amendment to the regulations that would permit an increase in the price for any volume of "old crude oil production" (as defined in section 8(b)(3) of the EPAA) after December 22, 1975, section 8(b)(2) of the EPAA requires the President to find that such amendment—

(A) Will give positive incentives for (i) enhanced recovery techniques, or (ii) deep horizon development from such properties; or

(B) Is necessary to take into account declining production from such properties; and

(C) Is likely to result in a level of production from such properties beyond that which would otherwise occur if no such amendment were made.

The FEA finds that the amendment adopted today comports with all three of the objectives set forth in section 8(b)(2). To the extent that producers elect to treat separate reservoirs as separate properties, an incentive is provided to develop new deep reservoirs which would result in all new crude oil production. Moreover, the amendment adopted today removes the disincentive some producers faced with respect to properties where declining production from existing reservoirs offset new production from other reservoirs which would otherwise have qualified for treatment as new crude oil. To the extent that this disincentive is eliminated, the amended definition of property is likely to result in production from those reservoirs which would not otherwise have occurred under the previous property definition.

II. THE DEFINITION OF "POSTED PRICE"

FEA price regulations employ historical crude oil posted prices as references for determining lower and upper tier ceiling prices, with lower tier ceiling prices determined by reference to the

V 41 167
AUG 26 76
UMI

highest posted price for the same grade of crude oil in the same or nearest field on May 15, 1973, plus a per-barrel increment, and with upper tier ceiling prices determined by reference to the highest posted price for the same grade of crude oil in the same or nearest field on September 30, 1975, less a per-barrel increment.

The definition of "posted price" was adopted by the Cost of Living Council on November 30, 1973, and has remained substantially unchanged since that time:

> "Posted price" means a written statement of crude petroleum prices circulated publicly among sellers and buyers of crude petroleum in a particular field in accordance with historic practices, and generally known by sellers and buyers within the field. (38 FR 33577 at 33578, December 6, 1973.)

Although FEA has until this time issued no interpretive ruling with respect to this definition, the posted price concept has served as the basis for determining lower tier ceiling prices for nearly three years.

On February 1, 1976, in connection with the first stage of rulemaking proceedings to implement the crude oil pricing policy of the EPCA, the FEA rejected its proposal (41 FR 1564, January 8, 1976) to determine upper tier ceiling prices by reference to actual transaction prices, and decided instead to determine upper tier ceiling prices with reference to highest posted prices on September 30, 1976. Most of the comments submitted in the first stage proceeding indicated that postings were prevalent in September 1975, and suggested that the use of field-wide September postings would avoid other difficulties inherent in FEA's proposal to base upper tier ceiling prices upon actual transactions (*e.g.*, the need to establish a price where there had been no production and sale of crude oil from the property concerned in September 1975).

After publication of the February 1 amendments, however, a substantial number of inquiries were received by FEA relative to the correct application of the posted price concept to the determination of upper tier ceiling prices. (To a much lesser extent, inquiries were also received relative to the posted price for purposes of determining lower tier ceiling prices. However, the problem was said to be not as prevalent with respect to lower tier ceiling prices due to the relative uniformity of crude oil prices in May 1973.) Accordingly, FEA determined that comments should be received in this rulemaking in order to determine whether any clarifications were necessary with respect to the definition of posted price. Notwithstanding the clearly expressed purpose of the rulemaking in this regard, however, a large number of written and oral comments suggested that FEA either (1) depart from the posted price concept in favor of the actual transaction approach that was specifically rejected on February 1, or (2) interpret the definition of "highest posted prices" as the "highest prevailing price," so as to include within the definition actual transaction prices that prevailed on September 30, 1975. After consideration of all the written and oral comments FEA has determined that while amendments to the current definition are unnecessary, the following clarifications should resolve any confusion that persists with respect to the posted price concept.

Prior to the implementation of price controls by CLC, the traditional and historical operation of the crude oil market included the use of posted field prices, a mechanism well known among buyers and sellers of crude oil throughout the world as

> The announced price at which a crude oil purchaser will buy the oil (of specified quality) from a field. At one time, the price was actually announced by a statement posted in the field. [More recently], the announcement is usually made in the newspapers. (*Williams and Meyers, Manual of Oil and Gas Terms* at 339.)

The general practice among principal purchasers has been periodically to issue price bulletins, which are widely circulated to the public, announcing the price that that particular purchaser would pay for a particular grade crude oil in a particular location.

It was in this context that CLC adopted the two tier pricing system in August 1973. In the Notice of Proposed Rulemaking issued on July 19, 1973, CLC indicated that the ceiling price for crude oil was to be "the price posted on May 15, 1973 for each grade of petroleum from each particular field." (38 FR 19464 at 19467, July 20, 1973.) The posted price concept was selected because the ready availability of price bulletins (which were understood to be in normal circulation in May 1973) provided a mechanism whereby producers and purchasers alike could be able to determine the ceiling price for any grade crude oil in any particular field. Moreover, the use of price bulletins avoided the enormous administrative complexity of having to establish ceiling prices that would maintain traditional gravity and quality price differentials.

Although the August 17, 1973 Subpart L Petroleum Price Regulations did not contain a definition of posted price, a definition was adopted by CLC on November 30, 1973 to make it clear "that a posted price must be a publicly circulated written offer to purchase." (Emphasis added, 38 FR 33577 at 33578, December 6, 1973.)

Although the CLC definition did not require the formality of a printed price bulletin such as is published by major purchasers, the CLC did require the formality of a "publicly circulated written offer." The requirement that the offer be in writing eliminates verbal offers, and the requirement that the written offer be publicly circulated eliminates offers (even though written) to specified producers. Accordingly, other than the published price bulletins of the type traditionally issued by major oil companies, FEA will only recognize as a "posted price" written offers to purchase only so long as they were bona fide public offers of general applicability to crude oil producers in the field. For example, a letter from a purchaser to all crude oil producers in a field or in an area would constitute a posted price if the letter was understood by producers and the purchaser to be a bona fide offer to purchase from all producers in that field or area. A written contract, of course, would not qualify as a posted price because it represents an agreement between a buyer and specific producer, not a bona fide offer to purchase from all producers.

Accordingly, in determining the "highest posted price," a producer should first determine which offers qualify as posted prices under the definition as interpreted above. The next inquiry is into which of those posted prices were on September 30, 1975 (or May 15, 1973 for lower tier ceiling prices) applicable to the particular field in question. Once that determination has been made the producer simply identifies the highest price offered among qualified postings.

With respect to determining the applicability of specific postings to particular fields, it has become clear that the principal issue relates to the use of the term "field" in the definition of posted price. Buyers and sellers alike indicated that inasmuch as "field" is not a defined term, conflicting September 30, 1975 "highest posted prices" occur in many areas of the country. Specifically, the term field has different accepted meanings and usages in various producing areas, and consequently might have been interpreted to mean an area as small as a lease, or as large as one or more entire states. However, for purposes of posting crude oil prices, crude oil producers and purchasers have generally understood the term "field" to signify a general area underlain by one or more reservoirs. For example, while some price bulletins refer specifically to named fields in which the particular price prevails, other types of bulletins specify a price for a particular grade of crude oil, which is produced over a large geographical area—perhaps even over an area of one or more states.

The problem arises where a single price bulletin was issued for an area and grade of crude oil (without specifying particular fields), while a price bulletin was issued by a competing buyer offering a higher price, but specifically limited to certain named fields which do not include all the fields within the larger area referred to in the price bulletin offering a lower price. Resolution of such disputes should be as follows: Price bulletins which specify only a geographical area and crude oil grade (e.g., "West Texas Sour") are presumed to be applicable to every field within the named area, unless a particular field is specifically excluded. However, the existence of a price bulletin stating a higher price for specifically named fields within the same area will, of course, supersede the area-wide price bulletin, for the named field only.

Finally, there should remain no question that posted prices used to establish lower tier ceiling prices, as well as posted prices for upper tier crude oil, do "not include premiums above posted prices which may have been paid for crude purchased on May 15, 1973 [or September 30, 1975] (38 FR 33577 at 33578, December 6, 1973)." This was made clear by CLC in November 1973 and should have been understood since that time.

III. Applicability of the Stripper Well Property Rule to Condensate Produced From Gas Wells

Prior to February 1, 1976, 10 CFR 210.32 provided an exemption from price and allocation regulations for the first sale of "crude oil, including condensates, produced from any stripper well lease. . . ." A stripper well lease was defined in § 210.32 as a

> "property" whose average daily production of crude oil, including condensates, per well did not exceed 10 barrels per day during any preceding calendar year beginning after December 31, 1972.

In Ruling 1974–28 (39 FR 44414, December 24, 1974), FEA held that the stripper well lease exemption was inapplicable to condensate produced from gas wells. This issue was subsequently reconsidered in the context of a formal rulemaking proceeding, and on August 29, 1975, FEA determined that, in all respects except the applicability of the stripper well lease exemption to gas wells, Ruling 1974–28 remains interpretive of the price regulations since they were first promulgated (40 FR 40818, September 4, 1975). With respect to the treatment of gas-well condensate for purposes of the stripper well lease exemption, FEA concluded that because of the good faith treatment by producers of gas-well condensate as being eligible for treatment under the stripper well lease exemption prior to the issuance of Ruling 1974–28, FEA would not require gas-well condensate to be excluded from the scope of the stripper well lease exemption until January 1, 1975, so that the impact of Ruling 1974–28 in this respect was made prospective only.

On February 1, 1976, the stripper well lease exemption was deleted from FEA price and allocation regulations pursuant to the removal of the former exemption of the EPAA by section 401(b)(1) of the EPCA. However, FEA determined that in keeping with the congressional objectives embodied in the EPCA, crude oil produced from stripper well leases should qualify for treatment as upper tier crude oil. At that time the definition of a stripper well lease was modified to make it clear that only "crude oil (excluding condensate recovered in non-associated production)" is counted in determining whether the property qualifies as a stripper well lease.

Since the issuance of Ruling 1974–28, certain producers have indicated that some uncertainty exists as to the meaning of the term "gas-well condensate," inasmuch as different state classifications might result in wells having basically the same productive characteristics being classified as a gas well in one state and an oil well in another.

In the August 29 Notice, FEA recognized this issue and stated:

> In order further to eliminate any uncertainty that might have arisen from the [original] regulatory language, conforming amendments are made today, effective January 1, 1975, to the stripper well lease exemption in 10 CFR 210.32 to reflect that the *exemption extends only to crude oil and condensate recovered in associated production.* (Emphasis added, 40 FR 40820.)

Thus, the qualification of a property as a stripper well property is only prohibited to the extent that the property consists of wells having only non-associated production of natural gas and condensates. That is, unless a well produces some crude oil, the well fails to qualify for inclusion as a producing well in the stripper well lease computations.

Therefore, if a well produces from an associated reservoir (i.e., a reservoir in which gas occurs in association with crude oil), that well may be included to determine if the property is a stripper well property only if crude oil is produced from that well. If only condensate is produced, in association with the gas, the well may not be included to determine if the property is a stripper well property. On the other hand, if a well is producing non-associated gas (i.e., free gas not in contact with crude oil in the reservoir), or only natural gas (even if from an associated gas reservoir), that well may not be included as a producing well because it does not produce crude oil.

To the extent that a single property includes wells of both types, only the wells that produce crude oil may be counted in calculating average daily production. The volumes of condensate produced from the non-associated gas wells are not properly included in the calculation of the property's average daily production.

In this rulemaking, comments were solicited on the extent to which the distinctions outlined above may be made with uniformity in various states. Notwithstanding this specific request, the thrust of most comments was to urge FEA to eliminate the distinction between condensate produced in associated and non-associated production, and to extend the stripper well property provisions to all condensate production. The FEA has rejected these suggestions but is currently considering in the context of the third stage rulemaking to implement the EPCA to adopt a stripper well property rule applicable to condensate recovered in non-associated production. (*See* 41 FR 18873, at 18878, May 7, 1976.)

With respect to the current stripper well property rule, however, the FEA has determined that the distinctions set forth in the April 13 Notice and reproduced here are valid and will continue to serve to determine which producing wells are to be counted for purposes of determining if the property is a stripper well lease.

IV. Enhanced Recovery Units

In the amendments adopted February 1, FEA promulgated a new 10 CFR 212.75 ("Enhanced recovery projects on units.") to provide an incentive for producers to implement enhanced recovery projects on unitized properties. In this regard, FEA rescinded that part of Ruling 1975–15 that required that as of the time a unit agreement becomes effective, current total production and sale of crude oil from the unit must exceed the total base production control levels for all the participating tracts before any of the unit production qualifies as new crude oil. This partial rescission of Ruling 1975–15 was intended to permit but not to require tract-by-tract calculations of upper tier crude oil volumes for tracts subject to unitization agreements to be continued even after the unitization agreement has become effective.

However, it is nevertheless clear that due to the eventual alteration of tract-by-tract producing patterns, production from the unit must at some point be treated as the aggregate of production from all the participating tracts, in order to obtain a meaningful comparison of production levels. Accordingly, in connection with the first stage of EPCA rulemaking proceedings, FEA determined that upon implementation of enhanced recovery techniques, or upon the significant alteration of producing patterns, a producer must treat the unit as a single property, if it has not already been treated as such. If the unit is an enhanced recovery property as defined in § 212.75, a unitized BPCL would be calculated. Regardless whether the unit was formed for enhanced recovery, the new rule required that the unit be treated as the property from such time as there has been a significant alteration in producing patterns.

In this rulemaking, FEA solicited comments on the appropriate manner for determining the point at which there has been a significant alteration in producing patterns. Comments received in response to the April 13 Notice included a variety of suggestions for determining when producing patterns have been significantly altered. These included (1) requiring a unitized BPCL as of the date of unitization; (2) permitting the use of an option until injection occurs; (3) permitting the use of an option for two years; and, among others, (4) permitting the use of an option for an indefinite period.

FEA has considered carefully all the suggestions contained in the comments, and has concluded that the use of any fixed date other than the effective date of unitization would be arbitrary. On the other hand, the comments submitted in connection with this rulemaking indicated the difficulty associated with attempting to develop a workable standard for determining the point at which production patterns have been significantly altered.

In response to the various comments received in this regard, FEA is today adopting a modified unitization rule intended to provide a mechanism whereby producers can determine quantities of upper and lower tier crude oil from unitized properties in a way that provides a meaningful comparison of current production and base level production, and to provide a mechanism that does not discourage the increased production of crude oil that might otherwise be obtained through unitization.

V 41 167 AUG 26 76 UMI

Accordingly, the rule adopted today fixes a date certain for each unitized property to be treated as a single property under FEA regulations, but provides sufficient flexibility for extending that date in those cases where the producer can establish that there is no need to depart from tract-by-tract determinations of upper and lower tier crude oil.

The rule provides that as of the effective date of unitization, the producer must (unless certain conditions are met) treat the unit as the property and determine upper tier crude oil by comparing current production and sale from the unit with the accumulated BPCL's of all of the participating properties. The effective date of unitization is appropriate because it is a well-defined date that is established by the state regulatory authority and is the date generally recognized throughout the industry and by the states for the purposes of accounting and making payments to interest owners. The use of any other date would necessarily entail the establishment of a separate system of reporting and accounting.

FEA recognizes that some producers perceived the use of this date as stated in Ruling 1975–15 as a disincentive to unitization because new crude oil produced from some of the pre-unitized properties that comprise the unit might be required after that date to be sold at old crude oil prices to compensate for other pre-unitized properties that contributed production to the unit that was significantly below their BPCL's or that had cumulative deficiencies. This result was avoided in substantial measure, however, by the elimination of all cumulative deficiencies as of the date that the unit is treated as a single property. However, because a unit BPCL is based upon the average monthly production and sale of old crude oil (with respect to non-stripper well properties) in the 12 month period immediately preceding unitization, to the extent that following unitization some pre-unitized properties were producing less than their average monthly production in the preceding 12 month period, those amounts would have to be compensated for by selling at old crude oil prices that would otherwise be new crude oil production from other pre-unitized properties.

In order to eliminate any remaining disincentive to producers of new crude oil to enter unitized properties, a special rule is adopted today which will ensure that once a unit BPCL has been established there will be no decrease in absolute volumes of new crude oil. Thus, regardless whether the unit BPCL is exceeded by current unit monthly production and sale, a mount of production from the unit will always qualify for treatment as new crude oil. This amount, referred to as "imputed new crude oil," is a number of barrels each month equal to the number of barrels of new crude oil produced and sold from each of the participating properties during the 12 month period immediately preceding the establishment of a unitized BPCL. Production and sale of "imputed new crude oil" will have no effect insofar as the "current unit cumulative deficiency" is concerned. Only when production and sale of crude oil from a unit exceeds the unit BPCL will the deficiency provision be operative, and the amount of any such deficiency will be calculated from month to month also without regard to any production and sale of "imputed new crude oil."

FEA will not prescribe the distribution of such volumes of upper tier crude oil among unit participants, but will continue to permit such determinations to be made by the parties concerned. The existing rule with respect to contribution to the unit of volumes of crude oil produced from stripper well properties remains unchanged. The new unitized BPCL rule applies to all unitizations approved by applicable governmental authority, regardless whether for enhanced recovery purposes or not. Accordingly, the former definition of "enhanced recovery project" is deleted from § 212.75. The requirement that a unit BPCL be adopted on the date of unitization contains an exception to provide the maximum flexibility to producers seeking to form and maintain unitized properties. The exception provides that notwithstanding the requirement to adopt a unitized BPCL as of the effective date of unitization, determinations of upper and lower tier crude oil volumes may continue to be made separately for properties that comprise the unit, after certification to FEA of intention to do so and only for so long as (1) injection has not begun, and (2) there has been no transfer of production allowables among participating leases. Such certifications should be made to FEA pursuant to the provisions of 10 CFR Part 210, Subpart G (Other Proceedings). Beginning with the month following the occurrences of either event the producer will be required to treat the unit as a single property.

Finally, some producers erroneously interpreted Ruling 1975–15 to require the accumulation into a unit BPCL of the entire BPCL of each property as to which any portion has been unitized, including amounts of the BPCL attributable to non-unitized portions of participating properties. This is not required, however, as FEA has pointed out above in connection with the definition of property.

The foregoing clarifications and modifications to the regulations concerning unit BPCL's should serve effectively to remove any FEA regulatory impediments to the formation of units, and thereby facilitate the enhanced recovery projects such units are typically intended to promote.

V. Miscellaneous

FEA also solicited comments in any other area of the price regulations applicable to domestic crude oil which might need clarification or amendment. Particularly in this regard, producers were asked to address the extent, if any, to which the certification requirements of 10 CFR 212.131 impose an unnecessary burden on small producers. Some small producers had indicated that this has been the case due to the nature of their relationships with their purchasers, where, for example, the purchaser (rather than the producer) may have access to the information needed to effect a valid certification. Comments were solicited to address the extent of this problem and possible alternative methods of certifying the information currently required under § 212.131.

Specifically, several first purchasers have indicated that the certification requirements of § 212.131(a)(1) are unclear with respect to the alternative one-time certification provision in cases of production from stripper well properties, since the requirement to certify a property's base production control level has no meaning for stripper well properties.

After consideration of the comments submitted in this proceeding, as well as other available information, FEA has determined that it is appropriate to amend § 212.131(a) applicable to certifications by producers, in order to provide a less complicated procedure for such certifications. Questions concerning certifications by resellers will be considered in a subsequent proceeding.

The previous certification requirements evolved over the past three years from the rule originally adopted by CLC on August 17, 1973, requiring producers which charged a price in excess of the ceiling price to certify in writing to the purchaser in each sale: (1) the ceiling price of the crude oil; (2) the amount of new crude oil; and (3) the base production control level. These certifications were required to contain a statement that the price charged for the crude oil was not greater than the price permitted under Subpart L (6 CFR 150.354, 38 FR 22536 at 22539, August 22, 1973).

These requirements were substantially continued by FEO in 10 CFR 212.74(c) (39 FR 1924, January 15, 1974) and remained unchanged until August 29, 1974 (39 FR 31622, August 30, 1974) when FEA issued amendments to lay the foundation for the implementation of the old crude oil allocation program. At that time the certification requirements were deleted from § 212.74 and appeared in a new § 212.131, which required each producer and each seller of domestic crude oil to certify in writing to the purchaser, with respect to each sale: (1) The ceiling price (in first sales), (2) the amount of stripper well lease crude oil, (3) the amount of new crude oil, (4) the amount of released crude oil, and (5) the amount of old crude oil. These certifications also were required to contain a statement that the price charged was not greater than permitted pursuant to Part 212.

FEA amended the certification requirements to "insure that old domestic crude petroleum [would] be more easily traced" in connection with the anticipated program to allocate old crude oil (39 FR 31623), and in adopting the old oil allocation program (39 FR 42246, December 4, 1974), FEA further amended § 212.131 to provide that the certification requirements as to a first sale of domestic crude oil may be satisfied by a one-time certification as to the BPCL for each month of 1972 for the particular property. The requirements remained

substantially unchanged until February 1, 1976 when FEA adopted the first stage of EPCA implementing regulations (41 FR 4931, February 3, 1976). At that time, basically three changes were made:

(1) The requirement to certify "ceiling price" was expanded to "ceiling price or prices" to account for the upper tier ceiling price rule adopted on February 1, 1976;

(2) The permissive one-time certification provision was amended to make it clear that (a) prior to February 1, 1976, the rule required a certification of the property's BPCL for each month in 1972, and (b) effective February 1, 1976, the rule required a certification of the property's BPCL (either average monthly production and sale of crude oil in 1972, or average monthly production and sale of old crude oil in 1975), and a certification of the upper and lower tier ceiling prices for the particular crude oil; and

(3) Each producer was required in the month of February 1976 to certify in writing to each purchaser for each property whether 1972 or 1975 would be used to determine the property's BPCL.

With respect to the one-time certification procedure permitted under § 212.131, then, prior to February 1, 1976, a producer could comply fully with the requirements of the rule by certifying once in writing to the purchaser (1) the monthly production and sale of crude oil from the property concerned in 1972, and (2) that the price charged for the crude oil was not in excess of the maximum price permitted under Part 212. The requirement (2) above did not necessitate the use of an actual price, but only a certification that the price charged was not unlawful.

Effective February 1, 1976, however, new written certifications were required by each producer for each purchaser from each property. The certification requirements could be satisfied by a new one-time certification containing (1) the property's BPCL (either average monthly production and sale of crude oil during 1972 or average monthly production and sale of old crude oil during 1975, selected by the producer); (2) the lower and upper tier ceiling prices; and (3) a statement that the price charged is not in excess of that permitted under Part 212. Moreover, in the month of February 1976, each producer was required to certify in writing to each purchaser from each property whether the BPCL would thereafter be based upon average monthly production and sale of crude oil in 1972 or average monthly production and sale of old crude oil in 1975.

Producers have indicated basically two problems with the one-time certification provision of § 212.131, which the amendment adopted today is designed to eliminate. First, with respect to stripper well properties, the one-time certification of the "BPCL" is confusing in that such properties are not required to compute BPCL's. Second, with respect to a non-stripper well property from which crude oil is sold to more than one purchaser, the one-time certification of the property's BPCL does not accomplish the purpose of the certification requirement, in that it does not provide the purchasers with sufficient information to determine how much of that purchaser's crude oil purchased each month is properly classified as new crude oil. Where the property's total monthly production is sold to a single purchaser, of course, that purchaser can easily determine the amount of new crude oil each month by subtracting the property's BPCL from the current monthly production and sale. Where the property's total monthly production is sold to two or more purchasers, however, none of the purchasers is able to determine the amount of new crude oil without knowing how much production was sold to other purchasers.

Finally, with respect to all properties, the requirement that the one-time certification contain the lower and upper tier ceiling prices is also confusing due to the monthly upward adjustments in the lower and upper tier ceiling prices established under the second stage rulemaking proceeding to implement the crude oil pricing policy of the EPCA (41 FR 15566, April 13, 1976). Although the monthly upward adjustments to crude oil prices established under the second stage have been temporarily discontinued (41 FR 27730, July 6, 1976) they will, of course, resume after the overrecoupment has been corrected, and a one-time certification of those ceiling prices is obviously not possible under a system of continuing adjustments.

The amendment adopted today is designed to resolve any confusion with respect to the problems discussed above, and to eliminate any unnecessary certification burden on producers by requiring (wherever possible) only a one-time certification, containing the minimum amount of information needed to ensure the efficient monitoring of crude oil prices and to maintain the necessary lower and upper tier distinction with respect to a fungible commodity. Accordingly, under the amendments adopted today, a producer of a stripper well property is required only to certify to each purchaser (1) that the property has qualified as a stripper well property, (2) the property's average daily production during the 12 month period in which it qualified as a stripper well property, and (3) the highest posted price on September 30, 1975 which forms the basis for the upper tier ceiling price of the crude oil sold from that property. With respect to nonstripper well properties from which crude oil is sold only to one purchaser, the producer is required only to certify (1) the property's monthly BPCL (and whether based upon 1972 or 1975), and (2) the highest posted prices on May 15, 1973 and September 30, 1975, which form the bases for the lower and upper tier ceiling prices for crude oil sold from that property. With respect to nonstripper well properties from which crude oil is sold to two or more purchasers, the producer will, in addition to a one-time certification, of posted prices used to determine lower and upper tier ceiling price, be required in each sale to certify (1) the number of barrels of new crude oil, and (2) the number of barrels of old crude oil.

For crude oil produced from unitized properties for which the producer has determined a unit base production control level, if crude oil is sold only to one purchaser, the producer is required only to certify (1) the monthly unit base production control level, (2) the amounts, if any, of "imputed new crude oil" and "imputed stripper well crude oil," and (3) the highest posted prices on May 15, 1973 and September 30, 1975, which form the bases for the lower and upper tier ceiling prices for crude oil sold from that property. With respect to such unitized properties from which crude oil is sold to two or more purchasers, the producer will, in addition to a one-time certification of posted prices used to determine lower and upper tier ceiling prices, be required in each sale to certify (1) the number of barrels of new crude oil (and whether "actual new crude oil" or "imputed new crude oil"), (2) the number of barrels of "imputed stripper well crude oil," and (3) the number of barrels of old crude oil.

All producers are required by October 1, 1976 to render the one-time certifications in writing to the purchaser. Exceptions will be permitted, of course, for (1) those stripper well properties which qualify after September 1, 1976, in which event the one-time certification will be required within 60 days after qualification; (2) those properties from which crude oil is first produced and sold after September 1, 1976, in which event the one-time certification will be required within 60 days after crude oil has first been produced and sold; (3) those cases in which new supplier/purchaser relationships are properly established after September 1, 1976, in which event the one-time certification to that purchaser will be required within 60 days after crude oil has first been sold to that purchaser; and (4) those unitized properties for which a unit base production control level is first established after September 1, 1976, in which event the one-time certification will be required within 60 days after a unit BPCL has been established.

Finally, it should be noted that it has been the practice among many purchasers and producers for the purchaser to prepare the certification and send it to the producer for completion and authentication and return to the purchaser. FEA has no objections to this practice to the extent that it permits any large purchaser to help to relieve the certification burdens on a small producer. However, the certification responsibility must in every case rest ultimately with the producer.

Moreover, § 212.131(c) makes it clear that "[n]o firm may sell domestic crude oil unless it provides the certification required by this section." To ensure compliance with the requirements of this section, a purchaser may refuse to recognize a sale of crude oil at other than

V 41 167 AUG 26 76 UMI

lower tier prices until the necessary certification has been made. Indeed, the purchase of crude oil at other than lower tier prices, in the absence of a valid certification, clearly constitutes a violation of FEA regulations.

VI. FURTHER COMMENTS REQUESTED

FEA has attempted in this proceeding to undertake a comprehensive analysis of the definition of "property," as well as other technical issues that have arisen with respect to the proper application of the Mandatory Petroleum Price Regulations applicable to first sales of domestic crude oil. Nevertheless, FEA is concerned that there may remain some peripheral issues that justify further consideration. Moreover, the conclusions set forth in this Notice—although the result of FEA's thorough consideration of all the comments and data available to FEA—may engender further comment from those parties that are likely to be affected by those conclusions.

Accordingly, FEA requests further comments addressed to the resolution of the issues addressed in this Notice, or to any other issue not specifically addressed in this Notice, that might need further clarification or modification. In this regard, comments should be restricted to issues concerning the Mandatory Petroleum Price Regulations applicable to first sales of domestic crude oil. Comments should be addressed to Executive Communications, Room 3309, Federal Energy Administration, Box GQ, Washington, D.C. 20461, and should be identified on the outside envelope and on documents submitted to FEA Executive Communications with the designation "Clarifications to the Mandatory Petroleum Price Regulations Applicable to Domestic Crude Oil: Further Comments."

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93–159, as amended, Pub. L. 93–511, Pub. L. 94–99, Pub. L. 94–133, Pub. L. 94–163, and Pub. L. 94–385; Federal Energy Administration Act of 1974, Pub. L. 93–275, as amended, Pub. L. 94–385; Energy Policy and Conservation Act, Pub. L. 94–163, as amended, Pub. L. 94–385; E.O. 11790, 39 FR 23185.)

In consideration of the foregoing, Part 212 of Chapter II of Title 10 Code of Federal Regulations is amended as follows, effective September 1, 1976.

Issued in Washington, D.C., August 20, 1976.

MICHAEL F. BUTLER,
General Counsel,
Federal Energy Administration.

1. Wherever the term "stripper well lease" appears in Part 212, it is changed to read "stripper well property."

2. Section 212.72 is amended to read as follows:

§ 212.72 Definitions.

* * * * *

"Property" means the right to produce domestic crude oil, which arises from a lease or from a fee interest. A producer may treat as a separate property each separate and distinct producing reservoir subject to the same right to produce crude oil, provided that such reservoir is recognized by the appropriate governmental regulatory authority as a producing formation that is separate and distinct from, and not in communication with, any other producing formation.

* * * * *

3. Section 212.75 is revised to read as follows:

§ 212.75 Determination of upper tier crude oil produced from unitized properties.

(a) *Rule.* With respect to each unitized property, a producer shall, as of the effective date of unitization, establish a unit base production control level.

(b) *Definitions.* For purposes of this section:

"Current unit cumulative deficiency" means the total number of barrels by which production and sale of crude oil from the unitized property was less than the unit base production control level subsequent to the first month (following the establishment of a unit base production control level for that unitized property) in which any crude oil produced and sold from that unit was eligible to be classified as actual new crude oil (without regard to whether the amount of actual new crude oil was exceeded by the amount of imputed new crude oil), minus the total number of barrels of domestic crude oil produced and sold in each prior month from that unitized property (following the establishment of a unit base production control level for that unitized property) which was in excess of the unit base production control level for that month, but which was not eligible to be classified as actual new crude oil because of this requirement to reduce the amount of actual new crude oil in each month by the amount of the current unit cumulative deficiency.

"New crude oil" means either (a) actual new crude oil, which is the total number of barrels of crude oil produced and sold in a specific month from all properties that constitute the unitized property, less (1) the unit base production control level, and less (2) the current unit cumulative deficiency; or (b) imputed new crude oil, which is a number of barrels of crude oil equal to the total number of barrels of new crude oil produced and sold during the 12 month period immediately preceding the establishment of a unit base production control level for the unitized property, from all properties that constitute the unitized property, divided by 12; whichever number is greater.

"Old crude oil" means the total number of barrels of crude oil produced and sold in a specific month from all properties that constitute the unitized property, less the total number of barrels of new crude oil produced and sold from the unitized property in that month, and less the total number of barrels of crude oil sold at the upper tier ceiling price pursuant to the provisions of paragraph (f) of this section.

"Significant alteration in producing patterns" means the occurrence of either (1) the application of extraneous energy sources by the injection of liquids or gases into the reservoir, or (2) the increase of production allowables for any property that constitutes the unitized property.

"Unit base production control level" means, (1) the total number of barrels of old crude oil, as defined in § 212.72, produced and sold during the 12 month period immediately preceding the establishment of a unit base production control level for the unitized property from all properties that constitute the unitized property; plus (2) the total number of barrels of crude oil produced during the 12 month period immediately preceding the establishment of a unit base production control level for the unitized property from all stripper well properties that constitute the unitized property; divided by 365, and multiplied by the number of days in the particular month.

"Unitized property" means the right to produce crude oil that arises from a unitization agreement approved by the applicable governmental regulatory authority (or FEA).

(c) Notwithstanding the provisions of paragraph (a) above, a producer shall not be required to establish a unit base production control level for a particular unitized property, provided that the producer has (pursuant to the provisions of 10 CFR Part 205, Subpart G) certified to FEA its intention to continue to determine volumes of upper and lower tier crude oil separately for all properties that constitute the unitized property, and provided further that the unitized property has not sustained a significant alteration in producing patterns.

(d) Except as provided in paragraphs (e) and (f) below with respect to new crude oil and imputed stripper well property crude oil, no produeer of crude oil from a unitized property may charge a price higher than the lower tier ceiling price (as set forth in § 212.73 of this Part) for any first sale of domestic crude oil produced and sold from the unitized property.

(e) Notwithstanding the provisions of paragraph (d) above, a producer of crude oil from a unitized property may, in any month, charge a price not to exceed the upper tier ceiling price (as set forth in § 212.74) in first sales of new crude oil produced and sold from the unitized property.

(f) Notwithstanding the provisions of paragraphs (d) and (e) above, a producer of crude oil from a unitized property may, in any month, charge a price not to exceed the upper tier ceiling price (as set forth in § 212.74) in first sales of imputed stripper well crude oil, which is a number of barrels of crude oil equal to the total number of barrels of crude oil produced during the 12 month period immediately preceding the establishment of a unit base production control level for the unitized property, from all stripper well properties that constitute the unitized property, divided by 12.

4. Section 212.131 is revised to read as follows:

§ 212.131 Certification of domestic crude oil sales.

(a) (1) *Stripper well properties.* With respect to each stripper well property, the producer shall certify in writing to each purchaser of crude oil produced from that property:

(i) That the property concerned has qualified as a stripper well property;

(ii) The average daily production for the 12 month period during which the property qualified as a stripper well property; and

(iii) The highest posted price on September 30, 1975, for transactions in that particular grade of crude oil in that field in September 1975, or if there was no posted price in that field for that grade of domestic crude oil, the related price for that grade of domestic crude oil which is most similar in kind and quality in the nearest field for which prices were posted.

The certification required under paragraph (a)(1) of this section shall be made (i) on or before October 1, 1976, with respect to any property which qualified as a stripper well property on or before August 1, 1976; and (ii) with respect to any property which qualifies as a stripper well property after August 1, 1976, within 60 days from the date that such property qualifies as a stripper well property.

(2) *Non-stripper well properties.* (i) With respect to each sale of crude oil from a property which has not qualified as a stripper well property, the producer shall certify in writing to the purchaser the number of barrels of new crude oil and the number of barrels of old crude oil. With respect to any property which has not qualified as a stripper well property, and from which crude oil is only sold to one purchaser, the requirements of this paragraph (a)(2)(A) may be complied with by a one-time certification to the purchaser of the property's monthly base production control level determined pursuant to 10 CFR 212.72, and whether based upon production and sale of crude oil in 1972 or upon production and sale of old crude oil in 1975.

(ii) With respect to each property which has not qualified as a stripper well property, the producer shall certify in writing once to each purchaser of crude oil produced and sold from that property:

(A) the highest posted price at 6 a.m., local time, May 15, 1973, for transactions in that grade of crude oil in that field, or if there was no posted price in that field for that grade of domestic crude oil, the related price for that grade of domestic crude oil which is most similar in kind and quality in the nearest field for which prices were posted; and

(B) the highest posted price on September 30, 1975 for transactions in that particular grade of crude oil in that field in September 1975, or if there was no posted price in that field for that grade of domestic crude oil, the related price for that grade of domestic crude oil which is most similar in kind and quality in the nearest field for which prices were posted.

(iii) The one-time certification required under paragraph (a)(2)(ii) of this section, and the one-time certification permitted under paragraph (a)(2)(i) of this section, shall be made on or before October 1, 1975, provided that with respect to any property from which crude oil has not been produced and sold prior to August 1, 1976, the one-time certification required under paragraph (a)(2)(ii) of this section, and the one-time certification permitted under paragraph (a)(2)(A) of this section, shall be made within 60 days from the date when such crude oil is first produced and sold.

(3) *Unitized properties.* (i) With respect to each sale of crude oil from a unitized property for which the producer has determined a unit base production control level, the producer shall certify in writing to the purchaser the number of barrels of new crude oil (and whether "actual new crude oil" or "imputed new crude oil" determined pursuant to 10 CFR 212.75(b)), the number of barrels of old crude oil, and the number of barrels of imputed stripper well crude oil (if any) determined pursuant to 10 CFR 212.75(b). With respect to any unitized property for which the producer has determined a unit base production control level, and from which crude oil is only sold to one purchaser, the requirements of this paragraph (a)(3)(i) may be complied with by a one-time written certification to the purchaser of (A) the monthly unit base production control level determined pursuant to 10 CFR 212.75(b); (B) the amount of imputed new crude oil (if any, determined pursuant to 10 CFR 212.75(b)); and (C) the amount of imputed stripper well crude oil (if any, determined pursuant to 10 CFR 212.75(b)).

(ii) With respect to each unitized property for which the producer has determined a unit base production control level, the producer shall certify in writing once to each purchaser of crude oil produced from the property:

(A) the highest posted price at 6 a.m., local time May 15, 1973, for transactions in that grade of crude oil in that field, or if there was no posted price in that field for that grade of domestic crude oil, the related price for that grade of domestic crude oil which is most similar in kind and quality in the nearest field for which prices were posted; and

(B) the highest posted price on September 30, 1975, for transactions in that particular grade of crude oil in that field in September 1975, or if there was no posted price in that field for that grade of domestic crude oil, the related price for that grade of domestic crude oil which is most similar in kind and quality in the nearest field for which prices were posted.

(iii) The one-time certification required under paragraph (a)(3)(ii) of this section, and the one-time certification permitted under paragraph (a)(3)(i) of this section, shall be made on or before October 1, 1975, provided that with respect to any unitized property for which a unit base production control level has not been established prior to August 1, 1976, the one-time certification required under paragraph (a)(3)(ii) of this section, and the one-time certification permitted under paragraph (a)(3)(A) of this section, shall be made within 60 days from the date when such unit base production control level is established.

(4) *New purchasers.* With respect to any purchaser who has not purchased crude oil from the property (or the unitized property) concerned prior to August 1, 1976, the one-time certifications required under paragraphs (a)(2)(ii) and (a)(3)(ii) of this section, and the certifications permitted under paragraphs (a)(2)(i) and (a)(3)(i) of this section, shall be made within 60 days from the date such purchaser first purchases crude oil from that property or unitized property.

(b)(1) Each seller of domestic crude oil, other than a producer of domestic crude oil covered by paragraph (a)(1) of this section shall, with respect to each sale of domestic crude oil other than (i) an allocation sale pursuant to § 211.65 of Part 211, or (ii) a sale in which no volumes of old crude oil are deemed to have been transferred pursuant to § 211.67(g) of Part 211, certify in writing to the purchaser the amount of old crude oil included in the volume of domestic crude oil so sold. The certification shall also contain a statement that the price charged for the domestic crude oil is no greater than the maximum price permitted pursuant to this part.

(2) Each seller of domestic crude oil, other than a producer of domestic crude oil, shall make the certification required by this paragraph as soon as practicable after receipt of the required certifications from its sellers, but in no event later than 30 days following such receipt. However, if the domestic crude oil is not sold until after the expiration of the thirty-day period, the certification required by this paragraph shall be made within ten days following the sale of the domestic crude oil.

(c) With respect to each allocation sale under § 211.65 of Part 211, the seller shall certify in writing to the purchaser the amount of old crude oil deemed (under the provisions of § 211.67(f) of Part 211) to be included in the volume of crude oil so sold. Such written certification shall be made within 25 days following the month in which the crude oil so sold is delivered to or for the account of the purchaser.

(d) No firm may sell domestic crude oil unless it provides the certification required by this section. No firm may knowingly purchase domestic crude oil for which there is no certification as required by this section; provided, however, that the provisions of this paragraph do not apply to the sale of domestic crude oil to a firm under circumstances of economic or other coercion in which the buyer, because of its need for crude oil, had no reasonable alternative but to purchase the domestic crude oil for which there is no certification, and such firm promptly reports the purchase to the Federal Energy Administration for investigation.

(e) All certifications required by this section shall be in writing, either upon an invoice or billing or by separate instrument, and shall be effective only when delivered to and received by the purchaser of domestic crude oil.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PRIVACY ACT OF 1974

Systems of Records and Notice of Proposed Routine Uses Therefor

Pursuant to the Privacy Act of 1974 (Pub. L. 93-579) as prescribed in 5 U.S.C. 552a(e)(4), the following notices of systems of records that are maintained by the Department of Health, Education, and Welfare are published as set forth below. These systems are currently ongoing and were either inadvertently omitted from past publications because of administrative oversight and/or they are notices of contractor systems of records where the contracts were entered into before September 27, 1975.

Prior to the final adoption of the proposed routine uses for these notices, consideration in accordance with the requirements of 5 U.S.C. 552a(e)(11) will be given to comments which are submited in writing on or before September 27, 1976. Comments should be addressed to the Director, Fair Information Practice Staff, Department of Health, Education, and Welfare, 200 Independence Ave., S.W., Washington, D.C. 20201. Comments received will be available for inspection in Room 526E, South Portal Building, at the above address.

Dated: August 20, 1976.

JOHN OTTINA,
Assistant Secretary for Administration and Management.

NIH NIDR 0334.00

System name: Research studies dealing with prevention of dental caries, plaque, and gingivitus, HEW/NIH/NIDR.

Security classification: None.

System location:

Westwood Building, Rm 534
5333 Westbard Ave.
Bethesda, Md 20014
and at medical/dental facilities, clinics, etc. under contract or participating in direct operations. A list of locations is available from system manager.

Categories of individuals covered by the system: Volunteers and patients participating in research projects involving dental caries, plaque, gingivitus, and agents and/or techniques for their prevention and control.

Categories of records in the system: Individual medical/dental records of participating individuals.

Authority for maintenance of the system: 42 U.S.C. 241, 288a.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.
2. Appendix B Departmental Regulations (45 CFR part 5b) Item 100 - 'To the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual.'

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders, computer tapes, or discs.

Retrievability: Name or identifier code. HEW uses: data analysis; program management; HEW user (National Institute of Dental Research) will receive data extracted by principal investigators from volunteer and patient research records concerning medical/dental measures of dental caries, plaque, gingivitus, and other oral health-related variables.

Safeguards: The records are maintained in locked cabinets with access limited to authorized personnel (system manager, principal investigator, and his staff assigned to the project, project officer, contracting officer). For computerized records, safeguards established in accordance with Departmental standards and National Bureau of Standards guidelines (e.g., security codes) will be used limiting access to authorized personnel.

Retention and disposal: One year to indefinitely, depending on the requirements of the specific study. Records are shredded, burned or erased.

System manager(s) and address:

Chief, Biometry Section
National Caries Program
National Institute of Dental Research
Westwood Building, Rm 534
5333 Westbard Ave
Bethesda, Md 20014

Notification procedure: To determine if a file exists, write to the System Manager and provide the following information:

1. approximate dates and place of examination or treatment
2. name of the study, if known
3. an individual who requests notification of or access to a medical/dental record shall, at the time the request is made, designate a responsible representative in writing who will be willing to review the record and inform the subject individual of its contents at the representative's discretion. (These notification and access procedures are in accordance with Department Regulations (45 CFR Part 5b.6) Federal Register, October 8, 1975, page 47411).

Record access procedures: Same as notification procedures. Requesters should also reasonably specify the record contents being sought.

Contesting record procedures: Write to system manager, and reasonably identify the record and specify the information to be contested, in accordance with Department Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR, Part 5b.7).

Record source categories: Information provided by subject individuals and clinical investigators.

Systems exempted from certain provisions of the act: None.

NIH NIAID 0335.00

System name: Kidney Transplant Histocompatibility Study(KTHS) DHEW/NIH/NIAID.

Security classification: None.

System location: Records included in this system are located in hospitals, research foundations, and universities under contract, in the Naval Medical Research Institute, and in the National Institute of Allergy and Infectious Diseases facilities in Bethesda, Md. (See Appendix I).

Categories of individuals covered by the system: Patients who have received kidney transplants and donors of kidneys transplanted at participating institutions (See Appendix I) during the period January 1, 1974, through December 31, 1976.

Categories of records in the system: Clinical and medical records containing information on clinical examinations, laboratory findings, and related research records. For kidney recipients, a demographic profile is also included.

Authority for maintenance of the system: 42 U.S.C. 241(g) and 289c.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses:

1. Disclosure may be made to a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of the individual.
2. Disclosure may be made to the Department of Justice or other appropriate Federal agencies in defending claims against the United States when the claim is based upon an individual's mental or physical condition and is alleged to have arisen because of activities of the Public Health Service in connection with such individual. (Appendix B, Departmental Regulations (45 CFR Part 5b), Item 100).
3. Clinical research data are made available to authorized individuals and organizations deemed qualified to carry out specific research solely for the purpose of carrying out such research. (Appendix B, Departmental Regulations (45 CFR Part 5b) Item 101).
4. Research data may be made available to organizations deemed qualified by the Secretary to carry out quality assessment, medical audits, or utilization review. (Appendix B, Departmental Regulations (45 CFR Part 5b) Item 102).
5. Certain infectious diseases are reported to state governments as required by law.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: File folders, punched cards, and magnetic tapes or discs.

Retrievability: Information is retrieved by name and location of study and by transplant number. HEW Uses: Summaries of the data developed in this study will be used to study the relevance of tissue typing to the outcome of kidney transplants. The influence of organ preservation techniques and various surgical and medical therapies will be similarly studied. As a regular part of these studies, clinical research data are made available to collaborating researchers who are part of the program. These are HEW employees and/or researchers employed by the contractors.

Safeguards: The records are maintained in file cabinets in offices which are locked when not attended, with access limited to authorized personnel (system manager, principal investigator and his staff assigned to the project, project officer, contracting officer). For computerized records, safeguards are established in accordance with Departmental standards and National Bureau of Standards' guidelines, e.g., security codes will be used limiting access to authorized personnel.

Retention and disposal: Records are retained for five years to indefinitely, depending on the requirements of the study. Records are burned or erased.

System manager(s) and address:

Chief, Transplantation and Immunology Branch
National Institute of Allergy and Infectious Diseases, NIH
Westwood Building, Room 750
5333 Westbard Avenue
Bethesda, Maryland, 20016

Notification procedure: To determine if a record exists, write to the System Manager and provide the following information:

V 41 167 AUG 26 76 UMI

1. Full name
2. Name and location of clinical trial facility
3. Approximate dates of enrollment in the research study An individual who requests notification of or access to a medical record shall, at the time the request is made, designate a responsible representative in writing who will be willing to review the record and inform the subject individual of its contents at the representative's discretion (these notification and access procedures are in accordance with Department Regulations (45 CFR, Part 5b.6), Federal Register, October 8, 1975, page 47411.

Record access procedures: Same as notification procedures. Requestors should also reasonably specify the record contents being sought.

Contesting record procedures: Write to system manager, and reasonably identify the record and specify the information to be contested, in accordance with Department Regulations, Federal Register, October 8, 1975, page 47411 (45 CFR, Part 5b.7).

Record source categories: Information contained in these records is obtained directly from individual participants and from medical records and clinical research observations.

Systems exempted from certain provisions of the act: None.

Salt Lake City, Utah 84112

SSA PP RSL 0375.00

System name: Matches of Social Security Administration, Department of Defense and Veterans Administration Data Relating Earnings History to Armed Forces Training Experience.

Security classification: None.

System location:
Social Security Administration
Universal North Building
1875 Connecticut Avenue
Washington, D.C. 20009

Categories of individuals covered by the system: Samples of enlisted men who separated from active duty during fiscal 1969 after having satisfactorily completed one term of service.

Categories of records in the system: Limited Social Security Administration earnings information, Department of Defense sociodemographic and post-service data, and Veterans Administration program participation information.

Authority for maintenance of the system: Section 702 of the Social Security Act, 42 U.S.C. 902.

Routine uses of records maintained in the system, including categories of users and the purposes of such uses: To a congressional office from the record of an individual in response to an inquiry from the congressional office made at the request of that individual.

Policies and practices for storing, retrieving, accessing, retaining, and disposing of records in the system:

Storage: Records stored on magnetic tape.

Retrievability: Records are indexed by social security number during the matching steps at the Social Security Administration but identifiers are not made available outside SSA.

Safeguards: Social Security Administration keeps all records in a secured building (and locked file) and all employees having access to records have been notified of criminal sanctions for unauthorized disclosure of information on individuals. Social security employees access only to particular items of Department of Defense and Veterans Administration data relevant to the matched study. All social security numbers have been removed from tapes made available outside the Social Security Administration. However, matched files containing identifiers are being maintained at Social Security for possible use in further matching of later years.

Retention and disposal: Records will be held for three years at which time the program will be reviewed for need to retain identifiers. Whenever all matching operations are complete, the identifiers will be eliminated.

System manager(s) and address:
Assistant Commissioner for Research and Statistics
Social Security Administration, Room 1121
1875 Connecticut Avenue, N.W.
Washington, D.C. 20009

Notification procedure: In order to gain access to the intermediate extract files which are the only ones for which the Social Security Administration retains identifying information, the system manager would require the name of the system; the individual's Social Security Number; and, for verification purposes, name, address, date of birth, and sex.

Record access procedures: Same as above.

Contesting record procedures: Same as above.

Record source categories: Social Security Administration summary earnings record and Department of Defense Manpower Research and Data Analysis Center post-service file; veterans entitlement and program participation data from VA.

Systems exempted from certain provisions of the act: None. /*

List of Public Laws

NOTE: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's LIST OF PUBLIC LAWS.

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see OFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202–523–5286. For information on obtaining extra copies, please call 202–523–5240. To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202–523–5022.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

CHAPTER VII—AGRICULTURAL STABILIZATION AND CONSERVATION SERVICE (AGRICULTURAL ADJUSTMENT), DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—FARM MARKETING QUOTAS AND ACREAGE ALLOTMENTS

[Amdt. 11]

PART 722—COTTON

Subpart—Acreage Allotments for 1966 and Succeeding Crops of Extra Long Staple Cotton

MISCELLANEOUS AMENDMENTS

This amendment is issued pursuant to the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.). The purposes of this amendment are as follows:

1. To provide that the total State reserve for all purposes established by the State committee shall not exceed one percent of the State allotment available for distribution to counties in the State.

2. To delete Lake County, Florida and Puerto Rico from the list of ELS cotton counties since these counties no longer receive ELS cotton allotments.

3. To provide that any new ELS cotton acreage allotment established for the farm shall be automatically reduced to the sum of the ELS cotton planted acreage and the ELS cotton prevented planted acreage when the sum of such acreage is less than 75 percent of the farm acreage allotment.

4. To make minor technical changes in the provisions on county allotments and reserves.

Since this amendment only involves technical, corrective, and clarifying changes, it is hereby found that compliance with the notice, public procedure and 30-day effective date requirements of 5 U.S.C. 553 is unnecessary and contrary to the public interest. Accordingly, this amendment shall become effective on date of publication in the Federal Register.

The Subpart—Acreage Allotments for 1966 and Succeeding Crops of Extra Long Staple Cotton, of Part 722, Subchapter B of Chapter VII, Title 7 (31 FR 6247, 13530, 32 FR 5416, 33 FR 8427, 16066, 16434, 34 FR 5808, 37 FR 9202, 11965, 24428, 38 FR 5880) is amended as follows:

1. The first sentence of § 722.506 is revised to read as follows:

§ 722.506 Apportionment of national allotment among States.

The national allotment proclaimed for the current year shall be apportioned among the States on the basis of the average acreage planted to ELS cotton in each such State for the State base years, with adjustments in such acreage for failure to seed ELS cotton because of abnormal weather conditions. * * *

2. Paragraph (a) of § 722.507 is revised to read as follows:

§ 722.507 Annual allocations.

(a) The regulations in §§ 722.501 to 722.550 will be supplemented to establish for each year for which farm acreage allotments and farm marketing quotas are proclaimed the following:

(1) State allotment which is the State's share of the national allotment,

(2) County allotment.

(3) Allocations of State reserve.

3. Section 722.508 is amended by revising paragraph (a) and paragraphs (b) (4) and (5) to read as follows:

§ 722.508 State reserve.

(a) *Establishment of State reserve.* The total reserve for all uses established by the State committee shall not exceed one percent of the State allotment available for distribution to counties in the State. The allotment available for distribution to counties shall be the State's share of the national allotment less the allotment in the State productivity pool attributable to history acreage pooled as a result of productivity adjustments under § 722.529(b). The State committee shall divide the State reserve among the categories listed in this paragraph.

(1) Adjusting computed county allotments for trends in acreage,

(2) Adjusting computed county allotments for abnormal conditions affecting plantings,

[Amdt. 11]

PART 722—COTTON

Subpart—Acreage Allotments for 1966 and Succeeding Crops of Extra Long Staple Cotton

MISCELLANEOUS AMENDMENTS

This amendment is issued pursuant to the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.). The purposes of this amendment are as follows:

1. To provide that the total State reserve for all purposes established by the State committee shall not exceed one percent of the State allotment available for distribution to counties in the State.

2. To delete Lake County, Florida and Puerto Rico from the list of ELS cotton counties since these counties no longer receive ELS cotton allotments.

3. To provide that any new ELS cotton acreage allotment established for the farm shall be automatically reduced to the sum of the ELS cotton planted acreage and the ELS cotton prevented planted acreage when the sum of such acreage is less than 75 percent of the farm acreage allotment.

4. To make minor technical changes in the provisions on county allotments and reserves.

Since this amendment only involves technical, corrective, and clarifying changes, it is hereby found that compliance with the notice, public procedure and 30-day effective date requirements of 5 U.S.C. 553 is unnecessary and contrary to the public interest. Accordingly, this amendment shall become effective on date of publication in the Federal Register.

The Subpart—Acreage Allotments for 1966 and Succeeding Crops of Extra Long Staple Cotton, of Part 722, Subchapter B of Chapter VII, Title 7 (31 FR 6247, 13530, 32 FR 5416, 33 FR 8427, 16066, 16434, 34 FR 5808, 37 FR 9202, 11965, 24428, 38 FR 5880) is amended as follows:

1. The first sentence of § 722.506 is revised to read as follows:

§ 722.506 Apportionment of national allotment among States.

The national allotment proclaimed for the current year shall be apportioned among the States on the basis of the average acreage planted to ELS cotton in each such State for the State base years, with adjustments in such acreage for failure to seed ELS cotton because of abnormal weather conditions. * * *

2. Paragraph (a) of § 722.507 is revised to read as follows:

§ 722.507 Annual allocations.

(a) The regulations in §§ 722.501 to 722.550 will be supplemented to establish for each year for which farm acreage allotments and farm marketing quotas are proclaimed the following:

(1) State allotment which is the State's share of the national allotment,

(2) County allotment.

(3) Allocations of State reserve.

3. Section 722.508 is amended by revising paragraph (a) and paragraphs (b) (4) and (5) to read as follows:

§ 722.508 State reserve.

(a) *Establishment of State reserve.* The total reserve for all uses established by the State committee shall not exceed one percent of the State allotment available for distribution to counties in the State. The allotment available for distribution to counties shall be the State's share of the national allotment less the allotment in the State productivity pool attributable to history acreage pooled as a result of productivity adjustments under § 722.529(b). The State committee shall divide the State reserve among the categories listed in this paragraph.

(1) Adjusting computed county allotments for trends in acreage,

(2) Adjusting computed county allotments for abnormal conditions affecting plantings,

V 41 1 68 AUG 27 76 UMI

(3) Adjusting allotments determined for small farms,

(4) Adjusting farm allotments to correct inequities and to prevent hardships,

(5) Establishing allotments for new ELS cotton farms.

(b) Use of State reserve. • • •

• • • • •

(4) State reserve to correct inequities in farm allotments and to prevent hardships shall be used by the county committee to adjust farm allotments to correct inequities and to prevent hardships. Allocation of such reserve acreage shall be made on the basis of facts determined for each farm and shall not be apportioned among farms on the basis of a formula.

(5) State reserve for new ELS cotton farms shall be used by the county committee to establish farm allotments for new ELS cotton farms. Such State reserve may also include reserve acreage to assist county committees in correcting allotments, in establishing allotments for missed farms and in making late adjustments to correct inequities and to prevented hardship.

4. Paragraph (b) of § 722.509 is amended by deleting from the list of designated counties, Lake County, Florida and Puerto Rico.

5. Section 722.509 is amended by adding a new sentence at the end of the last sentence in paragraph (d) to read as follows:

§ 722.509 Apportionment of State allotment among counties and establishment of county reserve.

• • • • •

(b) [Amended]

• • • • •

(d) *County reserve.* • • • The amount of county reserve held in each county is available for inspection at the local ASCS office.

• • • • •

6. Section 722.511 is amended by adding a new sentence at the end of the last sentence in paragraph (h) (4) to read as follows:

§ 722.511 Establishment of farm allotments.

• • • • •

(h) *Use of county reserve.* • • •

• • • • •

(4) *Acreage allotments for missed farms and correction of errors.* • • • The county committee shall not correct the allotment for a farm if reserve acreage is not available as authorized by the State committee.

• • • • •

7. Paragraph (e) of § 722.512 is revised to read as follows:

§ 722.512 Allotments for new ELS cotton farms.

• • • • •

(e) *Reduction of new ELS cotton farm allotments for underplanting.* Any new ELS cotton acreage allotment established for the farm shall be automatically reduced to the sum of the ELS cotton planted acreage and the ELS cotton prevented planted acreage when the sum of such acreage is less than 75 percent of the farm acreage allotment.

(Secs. 344, 347, 375, 63 Stat. 670, as amended, 675, as amended, 52 Stat. 66, as amended (7 U.S.C. 1344, 1347, 1375).)

Effective date. This amendment becomes effective August 27, 1976.

Signed at Washington, D.C., on August 18, 1976.

E. J. PERSON,
Acting Administrator.

[Amdt. 7]

PART 729—PEANUTS

Subpart—Regulations for Determination of Acreage Allotments and Marketing Quotas for 1972 and Subsequent Crops of Peanuts

MISCELLANEOUS CHANGES

This amendment of the allotment and marketing quota regulations for peanuts of the 1972 and subsequent crops is issued pursuant to the Agricultural Adjustment Act of 1938, as amended (7 U.S.C. 1281 et seq.).

The purposes of this amendment are (1) to include failed acreage and acreage prevented from being planted because of a natural disaster in the final peanut acreage for the farm, (2) to provide that a new farm allotment be reduced to the sum of the planted acreage and the prevented planted acreage when the sum of such acreage is less than 75 percent of the allotment and (3) to implement the provisions of Pub. L. 94-247 (approved March 25, 1976) which permits transfer of peanut acreage allotments because of a natural disaster.

Since farmers need to know these provisions of the program for the 1976 crop as soon as possible, it is hereby determined that compliance with the notice of proposed rulemaking, public procedure, and 30-day effective date provisions of 5 U.S.C. 553 is impracticable and contrary to the public interest.

The regulations for determination of acreage allotments and marketing quotas for 1972 and subsequent crops of peanuts (37 FR 2645, 3629, 23414, 39 FR 10883, 36564, 40578, 41 FR 1885; 7 CFR Part 729) are amended as follows:

1. The table of contents is revised by adding a new § 729.70 to read as follows:

Sec.
729.70 Transfer of farm peanut acreage allotment for farms affected by a natural disaster.

2. Paragraph (b) of § 729.11 is revised to read as follows:

§ 729.11 Determination of farm peanut history acreage.

• • • • •

(b) *Farm acreage allotment fully preserved.* The farm acreage allotment is fully preserved as peanut history acreage for the current year if in the current year or either of the two preceding years, as much as 75 percent of the farm allotment, after reduction for violation, release of acreage but before reapportionment or increase for type in short supply, was devoted to the sum of:

(1) the final peanut acreage (including acreage which fails or is prevented from being planted due to a natural disaster) as determined under Part 718 of this chapter, (2) the acreage transferred from the farm by lease or temporarily transferred by owner (except increase for type), (3) the acreage regarded as planted to peanuts under the conservation programs and practices according to Part 719 of this chapter, and (4) the acreage allotment in the eminent domain allotment pool according to Part 719 of this chapter.

• • • • •

3. Section 729.17 is revised to read as follows:

§ 729.17 Reduction and cancellation of new farm allotments.

The allotment determined under this subpart for a new farm shall be reduced to the peanut acreage planted and the acreage prevented from being planted to peanuts due to a natural disaster on the farm when it is found that the sum of the planted and prevented planted acreage is less than 75 percent of the allotment. Any farm allotment established and any history acreage credit shall be void as of the date the new farm allotment was issued if the State committee determines that the applicant knowingly furnished false, incomplete or inaccurate information to obtain the allotment. Any new farm allotment established, where incomplete or inaccurate information was unknowingly furnished by the applicant and so determined by the county committee shall be void for the next crop year. However, the cancellation shall not be applicable to the current year or to prior years.

4. A new section is added following § 729.69 to read as follows:

§ 729.70 Transfer of peanut farm acreage allotment for farms affected by a natural disaster.

(a) *Designation of counties affected by a natural disaster.* The State committee shall determine those counties affected by a natural disaster (including but not limited to hurricane, rain, flash flood, hail, drought, and any other severe weather) which prevents the timely planting or replanting of any of the peanut acreage allotment for any farm in the county. The county committee of each county affected by the determination shall publicize the determination.

(b) *Application for transfer.* The owner or operator of a farm in a county designated for any year under paragraph (a) of this section may file a written application for transfer of peanut acreage within the farm peanut allotment for such year to another farm in the same county or in an adjoining county in the same or adjoining State if such acreage cannot be timely planted or replanted because of the natural disaster. The application shall be filed with the county committee for the county in which the farm affected by such disaster is located. If the application involves a transfer to an adjoining county, the county committee for the adjoining county shall be consulted before action is taken by the county committee receiving the application.

(c) *Amount of transfer.* The acreage to be transferred shall not exceed the farm allotment established under this part less such acreage planted to peanuts and not destroyed by the natural disaster.

(d) *County committee approval.* The county committee shall approve the transfer of such peanut acreage if it finds that:

(1) Such acreage on the transferring farm could not be timely planted or replanted because of the natural disaster; and

(2) One or more of the producers of peanuts on the transferring farm will be a bona fide producer engaged in the production of peanuts on the receiving farm and will share in the proceeds of the peanuts.

(e) *Cancellation of transfers.* If a transfer is approved under this section and it is later determined that the conditions in paragraph (d) of this section have not been met, the county committee, State committee, or the Deputy Administrator may cancel such transfer. Action by the county committee to cancel a transfer shall be subject to the approval of the State committee or its representative.

(f) *Acreage history credits and eligibility as an old peanut farm.* Any acreage transferred under this paragraph shall be considered for the purpose of determining future allotments to have been planted to peanuts on the farm from which such allotment is transferred.

(g) *Closing dates.* The closing date for filing applications for transfers with the county committee shall be July 15 of the current year. Notwithstanding such closing date requirement, the county committee may accept applications filed after the closing date upon a determination by the county committee that the failure to timely file an application was the result of conditions beyond the control of the applicant and a representative of the State committee approves such determination.

(Secs. 358, 358a, 359, 375, 55 Stat. 88, as amended, 81 Stat. 658, as amended, 55 Stat. 90, as amended, 52 Stat. 66, as amended (7 U.S.C. 1358, 1358a, 1359, 1375).)

Effective date: August 27, 1976.

Signed at Washington, D.C., on August 18, 1976.

E. J. PERSON,
Acting Administrator, Agricultural Stabilization and Conservation Service.

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Lemon Reg. 54]

PART 910—LEMONS GROWN IN CALIFORNIA AND ARIZONA

Limitation of Handling

This regulation fixes the quantity of California-Arizona lemons that may be shipped to fresh market during the weekly regulation period Aug. 29-Sept. 4, 1976. It is issued pursuant to the Agricultural Marketing Agreement Act of 1937, as amended, and Marketing Order No. 910. The quantity of lemons so fixed was arrived at after consideration of the total available supply of lemons, the quantity of lemons currently available for market, the fresh market demand for lemons, lemon prices, and the relationship of season average returns to the parity price for lemons.

§ 910.354 Lemon Regulation 54.

(a) *Findings.* (1) Pursuant to the marketing agreement, as amended, and Order No. 910, as amended (7 CFR Part 910), regulating the handling of lemons grown in California and Arizona, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Lemon Administrative Committee, established under the said amended marketing agreement and order, and upon other available information, it is hereby found that the limitation of handling of such lemons, as hereinafter provided, will tend to effectuate the declared policy of the act.

(2) The need for this regulation to limit the quantity of lemons that may be marketed during the ensuing week stems from the production and marketing situation confronting the lemon industry.

(i) The committee has submitted its recommendation with respect to the quantity of lemons it deems advisable to be handled during the ensuing week. Such recommendation resulted from consideration of the factors enumerated in the order. The committee further reports the demand for lemons continues easier this week on all sizes and grades. Average f.o.b. price was $6.34 per carton the week ended August 21, 1976 compared to $6.51 per carton the previous week. Track and rolling supplies at 150 cars were up 5 cars from last week.

(ii) Having considered the recommendation and information submitted by the committee, and other available information, the Secretary finds that the quantity of lemons which may be handled should be fixed as hereinafter set forth.

(3) It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rule-making procedure, and postpone the effective date of this regulation until 30 days after publication hereof in the FEDERAL REGISTER (5 U.S.C. 553) because the time intervening between the date when information upon which this regulation is based became available and the time when this regulation must become effective in order to effectuate the declared policy of the act is insufficient, and a reasonable time is permitted, under the circumstances, for preparation for such effective time; and good cause exists for making the provisions hereof effective as hereinafter set forth. The committee held an open meeting during the current week, after giving due notice thereof, to consider supply and market conditions for lemons and the need for regulation; interested persons were afforded an opportunity to submit information and views at this meeting; the recommendation and supporting information for regulation during the period specified herein were promptly submitted to the Department after such meeting was held; the provisions of this regulation, including its effective time, are identical with the aforesaid recommendation of the committee, and information concerning such provisions and effective time has been disseminated among handlers of such lemons; it is necessary, in order to effectuate the declared policy of the act, to make this regulation effective during the period herein specified; and compliance with this regulation will not require any special preparation on the part of persons subject hereto which cannot be completed on or before the effective date hereof. Such committee meeting was held on August 24, 1976.

(b) *Order.* (1) The quantity of lemons grown in California and Arizona which may be handled during the period August 29, 1976, through September 4, 1976, is hereby fixed at 205,000 cartons.

(2) As used in this section, "handled", and "carton(s)" have the same meaning as when used in the said amended marketing agreement and order.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: August 25, 1976.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.76-25421 Filed 8-26-76;11:58 am]

[Docket No. AO-283-A2]

PART 958—ONIONS GROWN IN CERTAIN DESIGNATED COUNTIES IN IDAHO AND MALHEUR COUNTY, OREGON

Order Amending Order

FINDINGS AND DETERMINATIONS

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and each previously issued amendment

V41168 AUG 27 76 UMI

thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon a proposed amendment of the marketing agreement, as amended, and Order No. 958, as amended (7 CFR Part 958), regulating the handling of onions grown in certain designated counties in Idaho and Malheur County, Oregon.

Upon the basis of the record it is found that:

(1) The order, as amended, and as hereby further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(2) The order, as amended, and as hereby further amended, regulates the handling of onions grown in the production area in the same manner as, and is applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(3) The order, as amended, and as hereby further amended, is limited in its application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(4) The order, as amended, and as hereby further amended, prescribes, so far as practicable, such different terms applicable to different parts of the production area as are necessary to give due recognition to the differences in the production and marketing of onions grown in the production area; and

(5) All handling of onions grown in the production area is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

(b) *Additional findings.* It is necessary in the public interest to make this order amending the order, as amended, effective not later than September 1, 1976. Any delay beyond that date would tend to disrupt the orderly marketing of onions grown in certain designated counties in Idaho and Malheur County, Oregon, because: (1) Shipments of production area onions began on July 25, 1976, and the amendment should be made effective on the date specified herein so that producers may avail themselves of any benefits that may be derivable from the amendment during the greatest possible portion of the current marketing season; (2) the provisions of this order are known to handlers and other interested persons by reason of the public hearing, the recommended decision, and the final decision thereon; (3) the producer referendum was held July 30 through August 9, 1976, when a summary of the amendment was mailed to each known producer; (4) the changes effected by this amendment will not require advance preparation by handlers; and (5) no useful purpose will be served by postponing the effective date beyond that specified herein.

In view of the foregoing, it is hereby found and determined that good cause exists for making this order effective September 1, 1976, and that it would be contrary to the public interest to delay the effective date of this order for 30 days after its publication in the FEDERAL REGISTER (Secs. 553(d), Administrative Procedure Act, 5 U.S.C. 551–559).

(c) *Determinations.* It is hereby determined that:

(1) The "Marketing Agreement, as Amended, Regulating the Handling of Onions Grown in Certain Designated Counties in Idaho and Malheur County, Oregon" upon which the aforesaid public hearing was held has been signed by handlers (excluding cooperative associations of producers who are not engaged in processing, distributing, or shipping onions covered by the said order, as amended, and as hereby further amended) who, during the period July 1, 1975, through June 30, 1976, handled not less than 50 percent of the volume of such onions covered by the said order, as amended, and as hereby further amended, and

(2) The issuance of this amendatory order, amending the aforesaid order, as amended, is favored or approved by at least two-thirds of the producers who participated in a referendum on the question of its approval and who during the period July 1, 1975, through June 30, 1976 (which has been deemed to be a representative period), have been engaged within the production area in the production of onions for market, such producers having also produced for market at least two-thirds of the volume of such commodity represented in the referendum.

ORDER RELATIVE TO HANDLING

It is therefore ordered, That on and after the effective date hereof, the handling of onions shall be in conformity to, and in compliance with, the terms and conditions of the said order, as amended, and as hereby further amended, as follows:

1. Section 958.5 is revised to read as follows:

§ 958.5 Onions.

"Onions" means all varieties of *Allium cepa,* commonly known as onions, grown, or which may be grown in the production area.

2. Paragraphs (e) and (h) of § 958.25 are revised to read as follows:

§ 958.25 Duties.

• • • • • •

(e) To investigate from time to time and to assemble data on the growing, harvesting, shipping and marketing conditions with respect to onions and to engage in such research and service activity which relate to the production, handling or marketing of onions as may be approved by the Secretary.

• • • • • •

(h) Prior to each fiscal period, to submit to the Secretary a budget of its proposed expenses for such fiscal period, together with a report thereon;

• • • • • •

3. Section 958.26 is revised to read as follows:

§ 958.26 Expenses.

Committee members and alternates when acting on committee business shall be reimbursed for reasonable expenses necessarily incurred by them in the performance of their duties and in the exercise of their powers under this part. However, at its discretion the committee may request the attendance of alternates at any or all meetings notwithstanding the expected or actual presence of the respective members.

4. The first sentence of § 958.41 is revised to read as follows:

§ 958.41 Budget.

Prior to each fiscal period, and as may be necessary thereafter the committee shall prepare a budget of estimated income and expenditures necessary for the administration of this part.

• • • • • •

5. A new § 958.46 is added to read as follows:

§ 958.46 Contributions.

The committee may accept voluntary contributions but these shall only be used to pay expenses incurred pursuant to § 958.47. Furthermore, such contributions shall be free from any encumbrances by the donor and the committee shall retain complete control of their use.

6. Section 958.47 is revised to read as follows:

§ 958.47 Research and development.

(a) The committee with the approval of the Secretary, may establish or provide for the establishment of projects involving production research, marketing research and development projects, and marketing promotion including paid advertising, designed to assist, improve, or promote the marketing, distribution, consumption or efficient production of onions. Any such project for the promotion and advertising of onions may utilize an identifying mark which shall be made available for use by all handlers in accordance with such terms and conditions as the committee, with the approval of the Secretary, may prescribe. The expenses of such projects shall be paid from funds collected pursuant to § 958.42 or § 958.46.

(b) In recommending projects pursuant to this section the committee shall give consideration to the following:

(1) The expected supply of onions in relation to market requirements;

(2) The supply situation among competing areas and commodities;

(3) The anticipated benefits from such projects in relation to their costs;

(4) The need for marketing research with respect to any market development activity; and

(5) The need for a coordinated effort with USDA's Food Marketing Alert or other similar programs.

(c) If the committee should conclude that a program of research or development should be undertaken, or continued, in any crop year, it shall submit the following for the approval of the Secretary:

(1) Its recommendations as to the funds to be obtained pursuant to § 958.42 or § 958.46;

(2) Its recommendation as to any research projects; and

(3) Its recommendation as to promotion activity and paid advertising.

(d) Upon conclusion of each activity, but at least annually, the committee shall summarize and report the results of such activity to its members and to the Secretary.

(Secs. 1–19, 48 Stat. 31, as amended; 7 U.S.C. 601–674).

Effective date: September 1, 1976.

Signed at Washington, D.C., on: August 24, 1976.

JOHN DAMGARD,
Deputy Assistant Secretary.

CHAPTER XI—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; MISCELLANEOUS COMMODITIES), DEPARTMENT OF AGRICULTURE

[Amdt. 1]

PART 1207—POTATO RESEARCH AND PROMOTION PLAN

Increase In Expenses

Notice was published in the August 4, 1976, issue of the FEDERAL REGISTER (41 FR 32606) regarding a proposed increase in expenses of $260,000 recommended by the National Potato Promotion Board for its fiscal period ending June 30, 1977. The Potato Board was established pursuant to the Potato Research and Promotion Plan (7 CFR Part 1207) issued under the Potato Research and Promotion Act (7 U.S.C. 2611–2627).

The notice afforded interested persons an opportunity to file written comments not later than August 20, 1976. None was filed.

On May 25, 1976, the Secretary approved Potato Board expenses of $2,109,000 for the fiscal period ending June 30, 1977 (41 FR 22072).

On July 23, 1976, the Administrative Committee voted to budget an additional $260,000 for a potato value advertising campaign to market the expected plentiful supplies of fall crop potatoes, by informing consumers that potatoes are a bargain as an economical source of nutrients.

The proposed increase would result in a Potato Board budget of $2,369,000 for the fiscal period ending June 30, 1977.

After consideration of all relevant matters, including the proposal set forth in the notice, it is hereby found that the increase in expenses will tend to effectuate the declared policy of the act.

It is hereby further found that good cause exists for not postponing the effective date of this section until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that (1) funds will need to be expended for this project shortly; (2) the increase was recommended by the National Potato Promotion Board on July 23, 1976; and (3) notice regarding this increase in expenses was published in the FEDERAL REGISTER on August 4, 1976.

The amendment is as follows:

Revise § 1207.405 (41 FR 22072) as follows:

§ 1207.405 Expenses and rate of assessment.

(a) The reasonable expenses that are likely to be incurred during the fiscal period ending June 30, 1977, by the National Potato Promotion Board for its maintenance and functioning and for such purposes as the Secretary determines to be appropriate will amount to $2,369,000.

Title 9—Animals and Animal Products

CHAPTER III—ANIMAL AND PLANT HEALTH INSPECTION SERVICE (MEAT AND POULTRY PRODUCTS INSPECTION) DEPARTMENT OF AGRICULTURE

SUBCHAPTER A—MANDATORY MEAT INSPECTION

PART 303—EXEMPTIONS

SUBCHAPTER C—MANDATORY POULTRY PRODUCTS INSPECTION

PART 381—POULTRY PRODUCTS INSPECTION REGULATIONS

Edible Livestock Fat Rendering or Refining by Retail Stores; Clarification of Calendar Year

• Purpose: The purpose of this document is to clarify the term "year" as used in the retail store exemption regulations under the Federal Meat Inspection Act and the Poultry Products Inspection Act and to exempt rendering or refining of livestock fat by retail stores from inspection requirements of the Federal Meat Inspection Act. •

Statement of Considerations. On January 30, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 4438) regarding these matters. It was proposed to amend the Federal meat inspection regulations and the poultry products inspection regulations to define the term "year," with respect to limitations of the retail exemptions, as a calendar year from January 1 through December 31. It was also proposed to amend the Federal meat inspection regulations by adding the operations of rendering or refining livestock fat to the list of those of a type traditionally and usually conducted by retail stores. Without such listing, stores conducting rendering or refining of livestock fat would require Federal inspection if operating in intrastate commerce in States or Territories which are designated by the Secretary under the Federal Meat Inspection Act as not having developed or not effectively enforcing requirements at least equal to those imposed under the Act.

Interested persons were given 60 days in which to submit data, views, or arguments concerning the proposed amendment. Sixty-nine comments were received on this proposal.

The Department received statements on, but no specific opposition to, the portion of the proposal relating to the clarification of the term "year."

The rendering proposal was controversial. Favorable comments were received from a retailer, locker plants, butcher shops, associations of meat processors, and State meat inspection programs. These comments stated that: The change is in keeping with the Act because rendering is a traditional and usual part of retail meat processing operations; that the fat is now wasted because it cannot be rendered legally for edible purposes; that the fats used are from inspected meat and are heated so there is no health hazard; and that absence of the proposed regulation has forced some operators to discontinue rendering and still others to place themselves under needless and costly inspection.

Opposition comments were received from renderers' associations, renderers, private citizens, and State meat inspection programs. The opposing comments stated that: (1) This proposal would result is unfair competition for inspected renderers, the rendering of unwholesome fat, and the undermining of inspection; (2) it is contrary to the Act since rendering is not traditional for retail stores and it would allow locker plants to render; (3) there would be control problems since stores having both custom and retail operations could render; and (4) it would result in the loss of rendering residues now used for animal feed.

Although some opponents of this amendment have criticized its adoption on the basis that consumer protection will be lessened, it is the judgment of the Department that this will not occur. Rendering of fats by retail stores generally would involve only a few pieces of relatively simple equipment. It is a much less complex procedure than curing, smoking, and sausage manufacturing which are currently conducted by retail stores under exemption. Commingling of product is a potential problem when custom

V 41 1 68
AUG 27 76
UMI

and retail operations are conducted on the same premises. However, the Act permits such arrangements under specified conditions, and workable measures to insure product separation and compliance with other prescribed requirements have been developed for retail stores having custom operations. It appears that these safeguards would work as well for such stores which also render or refine fats. The Department believes that consumers will have the same opportunity to judge the acceptability of the rendering operation as with other areas in which meat is prepared for their use in retail stores.

In regard to opposition comments that retail rendering would offer unfair competition to inspected renderers, it is the Department's position such would not be the case. The amount of raw fat derived from retail operations is limited and the market for the rendered fat also would be limited since it could be sold directly to household consumers only. Any retailer who renders fat from an uninspected carcass or part thereof for sale would not be exempted from inspection, and such operation without inspection would constitute a violation of the Federal Meat Inspection Act and the regulations issued thereunder and subject the retailer to possible prosecution. The enforcement of this exemption will be accomplished in the same manner as is done now by reviews of premises and examination of records.

Given the small volume of operations at retail stores, any residues from rendering that could be used for animal feed are insignificant. Therefore, the use of rendered fat from such retail operations for sale to household consumers should not have any significant effect on the supply of materials for animal feed. There is no requirement, moreover, that residues which are not capable of use as human food, be withheld from animal feed purposes.

In the final analysis, the question hinges on whether or not the subject operations are traditional and usual to retail stores. The Department finds that there are a significant number of retail store operators who had rendered edible fat for sale to their customers and who wish to resume this practice. The operation would be consistent with, and a useful and a reasonable adjunct to, other food preparation activities at retail stores. Therefore, the Department has determined, from all the information available, that rendering or refining of livestock fat is a traditional and usual retail practice, and, therefore, should be included in the list of operations exempt from inspection under section 301 (c) (2) of the Federal Meat Inspection Act.

Accordingly, the Department has concluded to adopt the amendments as proposed. Therefore, sections 303.1(d) (2) and 381.10(d) (2) are amended as proposed.

1. Section 303.1(d) (2) (i) (c) is amended to read as follows:

§ 303.1 Exemptions.

* * * * *

(d) * * *

(2) * * *

(i) Operations of types traditionally and usually conducted at retail stores and restaurants are the following: * * *

(c) Curing, cooking, smoking, rendering or refining of livestock fat, or other preparation of products, except slaughtering or the retort processing of canned products;

* * * * *

2. Section 303.1(d) (2) (iii) is amended by inserting "calendar" immediately before the word "year" and by inserting "(i.e., January 1 through December 31)" immediately after the word "year."

§ 381.10 [Amended]

3. Section 381.10(d) (2) (iii) is amended by inserting "calendar" immediately before the word "year" and by inserting "(i.e., January 1 through December 31)" immediately after the word "year."

(Sec. 21, 34 Stat. 1260, as amended, 21 U.S.C. 621; Sec. 14, 71 Stat. 441, as amended, 21 U.S.C. 463; 37 FR 28464, 28477)

It does not appear that further public rulemaking procedure on these amendments would make additional relevant information available to the Department which would alter the decision. Therefore, under the administrative procedure provisions in 5 U.S.C. 553, it is found that further rulemaking procedures are impractical and unnecessary.

These amendments shall become effective September 27, 1976.

Done at Washington, D.C., on: August 24, 1976.

HARRY C. MUSSMAN,
Acting Administrator, Animal and Plant Health Inspection Services.

Title 12—Banks and Banking

CHAPTER I—COMPTROLLER OF THE CURRENCY, DEPARTMENT OF THE TREASURY

PART 7—INTERPRETIVE RULINGS

Customer-Bank Communication Terminals Ruling Rescinded

On October 21, 1975 (40 FR 49077), the Comptroller of the Currency published notice that Interpretive Ruling 7.7491, on customer-bank communication terminals, had been suspended pending appellate proceedings in the case of "IBAA, et al. v. Smith," 402 F. Supp. 207 (D. D.C. 1975). Subsequently, the U.S. Court of Appeals for the District of Columbia Circuit affirmed the decision of the district court (D.C. Cir. No. 75-1785, March 23, 1976).

On behalf of the Comptroller, the Solicitor General's Office will file a petition for *certiorari* in the U.S. Supreme Court seeking reversal of the Court of Appeals decision in "IBAA v. Smith." A petition for *certiorari* has also been filed in the related case of "State of Illinois v. Continental Illinois National Bank," 7th Cir. Nos. 76-1084, 1085, 1086 (May 27, 1976), by the banks involved.

On July 29, 1976, the district court in "IBAA v. Smith," issued an order requiring that Interpretive Ruling 7.7491 be formally rescinded. Accordingly, 12 CFR 7.7491 is hereby rescinded.

Dated: August 23, 1976.

ROBERT BLOOM,
Acting Comptroller of the Currency.

Title 16—Commercial Practices

CHAPTER I—FEDERAL TRADE COMMISSION

[Docket No. 8851]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Crown Central Petroleum Corp.

NOTE: Codification under 16 CFR Part 13 appears at 40 FR 12775.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; (15 U.S.C. 45))

In the Matter of Crown Central Petroleum Corporation, a Corporation.

Order modifying an earlier order dated Nov. 26, 1974, 40 FR 12775, 84 F.T.C. 1493, by entering the modifying words "performance" before the words "quality" and "characteristic" in order provision 7(d) of the order.

The modifying order, including further order requiring report of compliance therewith, is as follows: [1]

ORDER MODIFYING ORDER TO CEASE AND DESIST

Respondent having filed a petition for review in the United States Court of Appeals for the District of Columbia Circuit, and that Court having issued, on March 4, 1976, its order affirming the Commission's order to cease and desist entered November 26, 1974, with the insertion of modifying words in one provision thereof:

It is ordered, That the Commission's order issued in this matter on November 26, 1974, be modified in accordance with the decision and judgment of the Court so as to read in full as follows:

It is ordered, That respondent Crown Central Petroleum Corporation, a corporation, its successors and assigns, and its officers, representatives, agents, and employees, directly or through any corporate or other device in connection with the advertising, offering for sale, sale or distribution of Crown gasolines, or the additive CA-101, or any other product in commerce as "commerce" is defined in the Federal Trade Commission Act, do forthwith cease and desist from:

1. Representing directly or by implication that any such product:

(a) Will produce or result in motor vehicle exhaust which is pollution free or generally pollution free; or

(b) Will eliminate or reduce air pollution caused by motor vehicles; or

(c) Will eliminate or reduce emissions from all or any number or group of motor vehicles in which it is used; or that:

(d) Any gasoline or gasoline additive product has any other performance quality, performance ability or performance characteristic; or

(e) Tests, demonstrations, research or experiments have been conducted which prove or substantiate any of said representations;

Unless and only to the extent that each and every such representation is true and has been fully and completely substantiated by competent scientific tests. The results of said tests, the original data collected in the course thereof and a detailed description of how said tests were performed shall be kept available in written form for at least three years following the final use of the representation.

2. Representing directly or by implication that any such product has any effectiveness in reducing air pollution or an air pollutant or air pollutants without at the same time, in the same advertisement or other form of communication, conspicuously disclosing that not all of the harmful pollutants in automotive exhaust are affected by said product.

3. Representing directly or by implication that any product will reduce any emissions of pollutants from automobile exhaust by any percentage or numerical quantity unless in connection therewith there is a clear, accurate and conspicuous disclosure of the type of vehicle which can expect to achieve reductions of such magnitude and the approximate percentage of such vehicles in the general car population.

It is further ordered, That the respondent corporation shall forthwith distribute a copy of this order to each of its operating divisions.

It is further ordered, That respondent shall notify the Commission at least thirty (30) days prior to any proposed change in the corporate respondent such as dissolution, assignment, or sale resulting in the emergence of a successor corporation, the creation or dissolution of subsidiaries, or any other change in the corporation which affects compliance obligations arising out of the order.

It is further ordered, That respondent shall, within sixty (60) days after service of the order upon it, file with the Commission a written report, signed by the respondent, setting forth in detail the manner and form of its compliance with the order to cease and desist.

The Order Modifying Order to Cease and Desist was issued by the Commission August 3, 1976.

CHARLES A. TOBIN,
Secretary.

[FR Doc.76-25205 Filed 8-26-76;8:45 am]

[1] Copies of the Modifying Order filed with the original document.

[Docket No. C-2638]

PART 13—PROHIBITED TRADE PRACTICES, AND AFFIRMATIVE CORRECTIVE ACTIONS

Weaver Airline Personnel School, Inc. and General Education Services Corp.

NOTE: Codification under 16 CFR Part 13 appears at 40 FR 15872.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

In the Matter of Weaver Airline Personnel School, Inc., and General Educational Services Corporation.

Order modifying an earlier order dated February 13, 1975, 40 FR 15872, 85 F.T.C. 237, adds to Paragraph 12(2)(c) of the Order the provision that if money required to be deposited in the Escrow Funds cannot be distributed, respondent must make direct pro rata payments to eligible students within 60 days.

The modifying order, including further order requiring report of compliance therewith, is as follows: [1]

ORDER MODIFYING ORDER TO CEASE AND DESIST AND ORDER DISCONTINUING STAY

On May 18, 1976, the Commission issued an order to show cause why the Commission's Order To Cease and Desist, issued February 13, 1975, in this proceeding, should not be altered and modified by language specified in the order. The modification was proposed to make clear that respondent General Educational Services Corporation's obligation to pay restitution would not be affected by the removal of monies from the escrow account which will be funded by certain students of respondent Weaver Airline Personnel School, Inc. Respondents, in their answer to the Order To Show Cause, indicate that they and Commission's staff have negotiated a modification that differs from the modification proposed in the Order To Show Cause by providing that respondent General Educational Services Corporation "shall make direct pro rata payments to" eligible Weaver students "if any of the sums required to be deposited into the Escrow Funds have been removed or cannot be distributed." The modification proposed in the Order To Show Cause was not so specific: *Providing*, That General Educational Services Corporation "shall assure * * * that the total sums required be deposited into the Escrow Fund for restitution are paid." We agree that the modification recommended by respondents is preferable, and we will order that the Commission's Order To Cease and Desist be modified by the language recommended in respondents' answer to the Order To Show Cause.

Accordingly, it is ordered, That the following language be added to Paragraph 12(2)(c) of the Order:

Provided, however, That if, other than with the express written consent of the Federal Trade Commission, any of the sums required to be deposited in the Escrow Funds have been removed or cannot be distributed, then within sixty (60) days after the final date established for submission of student requests for restitution under this Paragraph, respondent General Educational Services Corporation shall make direct pro rata payments to the eligible Weaver students described in this Paragraph in the same amounts that each such eligible student would have received had such payments been made from the Escrow Funds, but the total amount so paid shall not exceed the total amount required to be deposited in the Escrow Funds.

The Commission further ordered on May 18, 1976, the reopening of this proceeding so as to stay and suspend enforcement of compliance with the notification provision of Paragraph 12 of the order of February 13, 1975. Because the obligation of General Educational Services Corporation has now been clarified, the stay and suspension of compliance is no longer necessary and compliance will be required.

Accordingly, it is ordered, That the stay and suspension of compliance with Paragraph 12 of the order of February 13, 1975 be, and it hereby is, discontinued.

The Order Modifying Order to Cease and Desist and Order Discontinuing Stay was issued by the Commission August 3, 1976.

CHARLES A. TOBIN,
Secretary.

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-12718]

PART 240—GENERAL RULES AND REGULATIONS, SECURITIES EXCHANGE ACT OF 1934

Reports of Municipal Securities Rulemaking Board

In Securities Exchange Act Release No. 11878 (November 26, 1975) [1] the

[1] 40 FR 50084 (1975).

V 41 168
AUG 27 76
UMI

Commission proposed to amend Title 17 of the Code of Federal Regulations by adding a new § 240.17a–21 to require the Municipal Securities Rulemaking Board ("MSRB") to file with the Commission annual and supplemental reports concerning the activities of the MSRB. The Commission has adopted § 240.17a–21 with certain technical amendments designed to facilitate compliance by the MSRB.

Persons other than the MSRB who filed comments expressed concern that the information required to be filed in annual reports be made publicly available, particularly to persons who are required by MSRB rules to pay fees or other charges to defray the costs and expenses of its operation. The Commission expects that such persons will be adequately informed by the MSRB concerning its activities. In any event, reports filed by the MSRB pursuant to § 240.17a–21 will be publicly available documents and the list of such documents at 17 CFR 200.80a will be amended to reflect that fact.

STATUTORY BASIS

The Securities and Exchange Commission, acting pursuant to the provisions of the Securities Exchange Act of 1934 ("the Act") 15 U.S.C. 78a et seq., as amended by the Securities Acts Amendments of 1975, Pub. L. No. 94–29 (June 4, 1975), and particularly sections 2, 17, and 23 thereof (15 U.S.C. 78b, 78q, and 78w), hereby adopts § 240.17a–21 of Title 17 of the Code of Federal Regulations effective September 20, 1976. The Commission finds that any burdens on competition which may be imposed by the aforementioned section are appropriate in furtherance of the purposes of the Act which contemplated that the Commission will require reports from MSRB.

(Secs. 2, 17, 23, 48 Stat. 881, 897, 901, as amended by secs. 2, 14, 18, 89 Stat. 97, 137–141, 155–156 (15 U.S.C. 78b, 78q, and 78w, as amended by Pub. L. No. 94–29))

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 19, 1976.

Section 240.17a–21 is added as follows:

§ 240.17a–21 Reports of the Municipal Securities Rulemaking Board.

(a) *Annual Report of the Municipal Securities Rulemaking Board.* The Municipal Securities Rulemaking Board shall file annual reports with the Commission as follows:

(1) Prior to October 1 of 1976, the Municipal Securities Rulemaking Board shall file with the Commission an annual report for the period from its formation until June 30, 1976 and shall include whatever information, data and recommendations it considers advisable with regard to matters within its jurisdiction.

(2) Prior to December 1 of 1977, the Municipal Securities Rulemaking Board shall file with the Commission an annual report for the period from July 1, 1976 until September 30, 1977 and shall include whatever information, data and recommendations it considers advisable with regard to matters within its jurisdiction.

(3) Prior to December 1 of each year beginning in 1978, the Municipal Securities Rulemaking Board shall file with the Commission an annual report for the twelve months immediately preceding October 1 of that year and shall include whatever information, data and recommendations it considers advisable with regard to matters within its jurisdiction.

(4) The Municipal Securities Rulemaking Board shall include in its annual report a statement and an analysis of its expenses and operations including:

(i) A balance sheet as of the end of the period covered by the report and a statement of revenues and expenses for the Board for that period.

(ii) The rules of the Board (including a statement indicating all additions to or deletions from the rules of the Board during the period covered by the report);

(iii) Written interpretations of the rules of the Board, including staff interpretative letters;

(iv) All forms required by rule of the Board to be filed by municipal securities brokers or municipal securities dealers or any class thereof;

(v) The following information concerning members of the Board: (A) Name, (B) dates of commencement and termination of present term of office, (C) length of time each member has held such office, (D) name of principal organization with which connected, (E) title, (F) city wherein the principal office of such organization is located;

(vi) Address of the Board, the name and address of each person authorized to receive notices on behalf of the Board from the Commission, and the name and address of counsel to the Board, if any;

(vii) A list, including addresses, as of the latest practicable date, alphabetically arranged, of all municipal securities brokers and municipal securities dealers which have paid to the Board fees and charges to defray the costs and expenses of operating the Board;

(5) Within 10 days after the discovery of any material inaccuracy in its annual report or in any amendment thereto the Municipal Securities Rulemaking Board shall file with the Commission an amendment correcting such inaccuracy.

(b) *Supplemental reports of the Municipal Securities Rulemaking Board.* The Municipal Securities Rulemaking Board shall file supplemental reports to the Commission as follows:

(1) Within 10 days after issuing or making generally available to municipal securities brokers and municipal securities dealers any materials (including notices, circulars, bulletins, lists, periodicals, etc.), the Muncipal Securities Rulemaking Board shall file with the Commission three copies of such material (unless such material is filed with the Commission pursuant to Rule 19b–4).

(2) Within 10 days after any action is taken which renders no longer accurate any of the information required by paragraphs (a)(3)(iii), (iv), (v), and (vi) of this section to be contained in the annual report of the Municipal Securities Rulemaking Board (except action reported to the Commission pursuant to Rule 19b–4), the Board shall file with the Commission written notification in triplicate setting forth the nature of such action and the effective date thereof. Such notice may be filed either in the form of a letter or in the form of a notice made generally available to municipal securities brokers and municipal securities dealers.

[FR Doc.76–25149 Filed 8–26–76;8:47 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER E—ANIMAL DRUGS, FEEDS, AND RELATED PRODUCTS

[Docket No. 76N–0294]

PART 510—NEW ANIMAL DRUGS

PART 514—NEW ANIMAL DRUG APPLICATIONS

Maintenance of Copies of Approved Medicated Feed Applications

The Food and Drug Administration (FDA) is requiring that each facility that manufactures animal feeds bearing or containing new animal drugs maintain on its premises certain information regarding the conditions of approval for each such medicated feed; effective November 26, 1976.

The Commissioner of Food and Drugs proposed, in the FEDERAL REGISTER of November 22, 1974 (39 FR 40959), new § 135.14d Maintenance of copies of approved applications for animal feed bearing or containing new animal drugs (now being designated § 510.305, to conform with recodification published in the FEDERAL REGISTER of March 27, 1975 (40 FR 13802)).

The proposal provided that each manufacturer having an approved Form FD–1800, which is the application for the manufacture of an animal feed bearing or containing a new animal drug, shall maintain on its premises either a copy of the approved form or appropriate identification of approval. In either case the labeling that accompanied the approved Form FD–1800 would have to be kept on the premises. The requirements would also be imposed for all supplemental applications. The proposal also included editorial changes in Part 135 (now Part 514) to reflect the designation of the form.

The current regulations permit an applicant to file a single Form FD–1800 if more than one of its facilities is manufacturing a medicated feed provided that applicant has demonstrated that each facility complies with the requirements established by section 512(m) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(m)) and the regulations promulgated thereunder, e.g., 21 CFR Part 225. In such cases, a copy of the approved medicated feed application is usually maintained at the home or central office of the applicant. Therefore, at a particular feed mill an inspection cannot readily determine that the medicated animal feeds are being produced in accordance with an approved Form FD–1800. The Commissioner concludes that adoption of the proposal is necessary to permit inspectors, either FDA employees or employees of state regulatory agencies authorized by the Commissioner under section 702(a) of the act to conduct feed mill inspections on the agency's behalf, to determine that each establishment is producing animal feeds bearing or containing new animal drugs in accordance with an approval granted by FDA.

Nineteen comments on the proposal were received; they came from the following sources: The North Carolina Department of Agriculture, the National Feed Ingredients Association, the American Feed Manufacturers Association, and sixteen feed manufacturers that are multimill operators. Twelve feed manufacturers endorsed the American Feed Manufacturers Association's comment, though several offered additional comments.

The trade associations and most of the multimill operators contended that requiring a copy of the approved Form FD–1800 and the labeling at each manufacturing facility is impractical and burdensome for multimill operators. They acknowledged that records of this type are valuable; and they indicated that an alternative means of maintaining them, e.g., as described in § 510.305(b) of the regulation, would be acceptable.

The Commissioner concludes that the records required by the regulation below are necessary to permit regulatory officials to determine efficiently whether feed mills and medicated animal feeds manufactured by these mills are in compliance with the act. Section 510.305(a) requires each petitioner under section 512(m) of the act merely to maintain a copy of the approved Form FD–1800 for each medicated animal feed that has been approved for manufacture at a mill at a single location in that manufacturing facility. Given the accessibility of copying equipment, e.g., xerographic or microfilm-reader equipment, the Commissioner rejects the suggestion that this requirement is impractical and burdensome. The additional requirement that samples of approved labeling for each medicated feed be kept in this record-keeping system also is practical and is necessary to permit efficient determination of compliance with those sections of the act that are primarily concerned with labeling.

Moreover, the Commissioner has provided an alternative method of supplying this information; the alternative method is described in paragraph (b) of the regulation and is discussed in comment 3 below. The alternative method permits the petitioner to develop a single file or document at each of its manufacturing facilities. This single file or document will include the primary information required by Form FD–1800 and a sample of the approved labeling; it will provide the necessary information needed by an inspector to facilitate a determination that the feed mill and medicated feeds manufactured at that mill are in compliance with the act. Single-mill operations must also comply with this regulation, which may be accomplished, inter alia, by maintaining the original of the approved Form FD–1800 and labeling in the record repository. For these reasons, the Commissioner concludes that this regulation, which is necessary for the efficient enforcement of the act, is practical, fair, and appropriate.

The remaining principal comments and the Commissioner's conclusions regarding them are as follows:

1. One firm questioned the Commissioner's statutory authority to promulgate this regulation.

Section 512(m)(5) of the act (21 U.S.C. 360b(m)(5)) provides explicit statutory authority for this regulation:

> In the case of any animal feed for which an approval of an application filed pursuant to this subsection is in effect—
>
> (A) the applicant shall establish and maintain such records, and make such reports to the Secretary, or (at the option of the Secretary) to the appropriate person or persons holding an approved application filed under subsection (b), as the Secretary may by general regulation, or by order with respect to such application, prescribe on the basis of a finding that such records and reports are necessary in order to enable the Secretary to determine, or facilitate a determination, whether there is or may be ground for invoking subsection (e) or paragraph (4) of this subsection.
>
> (B) every person required under this subsection to maintain records, and every person in charge or custody thereof, shall, upon request of an officer or employee designated by the Secretary, permit such officer or employee at all reasonable times to have access to and copy and verify such records.

The Supreme Court, has also upheld the Commissioner's authority to promulgate binding regulations for the efficient enforcement of the act pursuant to section 701(a) of the act (*Weinberger* v. *Hynson, Westcott and Dunning*, 412 U.S. 609 (1973)). The lower courts have consistently rejected subsequent challenges to this rulemaking authority. (See, e.g., *National Nutritional Foods Ass'n* v. *Weinberger*, 512 F2d 688, 696–99 (2d Cir. 1975); *Cosmetic, Toiletry and Fragrance Ass'n, Inc.* v. *Schmidt*, Civil Action No. 75–1715 (D. D.C. Feb. 3, 1976); *American Frozen Food Institute* v. *Mathews*, Civil Action No. 74–354 (D. D.C. March 30, 1976); *National Confectioners Association* v. *Mathews*, Civil Action No. 75–1272 (D. D.C. April 14, 1976).) Moreover, the Supreme Court has long recognized the value of class regulation through rulemaking. (See, e.g., *Weinberger* v. *Hynson, Westcott and Dunning, supra* at 620–622; *Weinberger* v. *Bentex Pharmaceuticals, Inc.*, 412 U.S. 645, 653 (1973); *Federal Power Commission* v. *Texaco*, 377 U.S. 33, 39–41 (1964); *United States* v. *Storer Broadcasting Co.*, 351 U.S. 192, 202–205 (1956).) In issuing this regulation, the Commissioner has particularized a statutory standard for efficient regulation of feed mills, an action that is amply supported by statutory authority.

2. One comment requested that the regulation apply only to those medicated animal feeds currently being produced at each facility and that records not be required to be maintained for more than 2 years.

The Commissioner rejects this suggestion. Comments revealed that firms hold approvals that may not be in current use, i.e., "they have been obtained for insurance against possible need or shelved in favor of other medicated feeds." The Commissioner therefore concludes that copies of all approved Forms FD–1800 must be retained at each facility to assure that all medicated feeds are manufactured in compliance with section 512(i) of the act and the other provisions of the act, as well as regulations that are designed to assure the integrity of the medicated animal feeds.

A facility that is no longer manufacturing a medicated animal feed for which it holds an approval may on its own initiative file a written request, described in § 514.115(d) (21 CFR 514.115(d)), that the Commisisoner withdraw its approved Form FD–1800 and thereby be relieved of the requirements of this regulation. But any facility retaining approvals must comply with this regulation to assure that all medicated animal feeds manufactured at any feed mill facility are safe, effective, and neither adulterated nor misbranded. For these reasons the Commissioner concludes that the regulation must apply to all medicated feed applications that are approved for each manufacturing facility.

3. Most comments concerned the alternate means by which identification of approved medicated feed applications could be accomplished. The information required by § 510.305(b) is discussed in the sequence it appeared in the proposal:

(a) The date and number of the approval; concentration of drug(s) contained in the premix(es); name(s) of the approved supplier(s) of the premix(es): Comments suggested that the requirement for the date and number of each Form FD–1800 approval, including supplemental approvals could be supplied by including this information on the production formula sheet or master list that is maintained at each facility. Several comments contended that the concentration of drug contained in a premix could be best maintained on a master list or similar sheet at the facility. Others suggested the name of the approved supplier of the premix could be maintained on the same list.

The Commissioner concludes that the alternative method of recordkeeping set forth in § 510.305(b) is appropriate, as modified in response to the comments. The function of this regulation is to provide regulatory officials with easily accessible, readable information about the manufacture of medicated animal feeds, i.e., to facilitate a determination whether the medicated feeds, the facility, the personnel, the manufacturing process, etc. are in compliance with the act. Information that assists such determination

V 41 I 168 AUG 27 76 UMI

is prominent and easily available when copies of all approved Forms FD–1800 for a facility and the accompanying labeling are located in a single accessible location at that facility. When the necessary information is as readily accessible as a complete file of Form FD–1800 copies, the regulatory purpose is satisfied.

The Commissioner has concluded, however, that this function is accomplished only when the information specified in paragraph (b) of the regulation is consolidated not merely in a single accessible location on each premises, but also in a single, readable file or document. Inspectors are familiar with Form FD–1800, and smaller feed mills will be the most likely to elect § 510.305(a) as their recordkeeping system. In these smaller operations, the single location nevertheless still provides the inspector with rapid access to the necessary information. In the larger feed mill facilities, the information, though standardized, may be kept in a manner that is unique to the parent multimill company's recordkeeping system. To assure ease of access to the information, the Commissioner concludes the single file requirement is necessary.

Therefore, the Commissioner concludes that procedures suggested by the comments are acceptable (1) when all information required by § 510.305(b) is maintained in the same readable document and (2) when that document is maintained in a single accessible location at the facility where all other documents identifying approved Form FD–1800 are maintained.

Questions have been raised about the Commissioner's ability to assure the integrity of the records required by this regulation. The failure to establish or maintain these records or the refusal to permit access to them is a violation of section 301(e) of the Act. The Commissioner maintains that the risk of court enforcement action, including criminal prosecution, for violation of this provision will provide sufficient incentive to mill operators to assure the reliability of these records.

(b) Batch formulation with the concentration of the drug(s) in the finished medicated feed: Several comments requested that this provision be modified to be consistent with the information required by Form FD–1800. They stated that the medicated feed application requires the petitioner to list only the quantity of the drug premix ingredient rather than all ingredients in the feed.

The Commissioner agrees that this provision should be modified to be consistent with the information required by Form FD–1800. Because the medicated feed application does not require batch formulation, the provision requiring batch formulation has been deleted. The Commissioner notes, however, that the medicated feed application requires more information about feed ingredients than merely the quantity of the drug premix ingredient. Before it can be approved, Form FD–1800 must include a list of all feed ingredients, including the finished drug level in the finished feed formulation, and this list must appear either on the finished feed's bag label, or, if the finished feed is a bulk or a custom mix, on the invoice that must accompany the placard labeling for that feed as required by section 403(1) of the act and § 1.10 (21 CFR 1.10). For this reason and for the reasons discussed below, the Commissioner concludes that a sample of the approved labeling, which provides the listing of all feed ingredients, including collective names designated under § 1.16 (21 CFR 1.16) must be maintained as a part of the required information. Additionally, to standardize the requirements of § 510.305 (a) and (b), the Commissioner concludes that the name of the drug premix and the premix manufacturer must be maintained because this information is required in the medicated feed application. From a regulatory standpoint, this information, rather than information about the premix's supplier, is essential.

(c) A sample of the approved labeling: One comment suggested that the regulation be revised to refer to "current labeling" since, with the exception of reference to the drug ingredient listing and conditions of use, feed labels are subject to frequent modification. Another comment suggested the term "representative label" be adopted, while a third noted that the label in current use must obviously reflect that which has been approved.

The Commissioner rejects the suggested changes. Sections 512(b)(6) and 512(m)(1)(D) of the act are identical; Specimens of the labeling must be filed with the agency. These requirements have been further amplified by §§ 514.8 and 514.9 (21 CFR 514.8 and 514.9). All labeling for these articles is subject to agency review and approval, and the regulations clearly require the holder of an approval to file a supplemental application for any labeling changes, including additional distributors. The requirements were imposed to assure that all medicated animal feeds are labeled in accordance with the act and the approved safety and effectiveness claims for the new animal drug ingredient. The Commissioner maintains that these requirements remain necessary for effective medicated feed regulation, and he therefore concludes each manufacturing establishment must maintain in the medicated feed approval identification file a sample of all approved labeling.

4. Rather than require that each feed manufacturing facility maintain the information required by this regulation, comments suggested that the Commissioner revive a past practice and supply this information to the inspecting agents.

Approximately 13,000 feed mills are regulated by FDA. Because the agency's resources are limited, the Commissioner, in accordance with section 702(a) of the act, has authorized state feed control officials in many states to examine and investigate the facilities in their states. By this mechanism he can most economically multiply the agency's inspectional capability. Providing the information required by this regulation to inspection officials before an inspection accomplishes merely one element of the regulation's overall function, and the cost to the agency would be very high. By using the overall regulatory scheme, the officials can evaluate precisely what a feed mill is authorized to make, what labeling is approved, what quality control mechanisms have been established, and whether these mechanisms are in accord with current good manufacturing practices; and cost to the government is minimal. Should questions about an approval arise, the inspector can then discuss them with FDA along with other compliance questions. Moreover, the Commissioner could statutorily require each mill to submit a Form FD–1800 for each medicated feed that it manufactures, but he has rejected this because he is of the opinion that the safety, effectiveness, quality, and integrity of medicated animal feeds can be assured when the parent feed mill operator submits the required information that can be easily verified by inspecting each manufacturing facility. This regulation thus aids this inspection process.

When a Form FD–1800 is approved the Commissioner supplies a copy of the approval to the FDA district office having jurisdiction over a multiplant mill's home office. The individual mills are often located in jurisdictions other than that of the home office, and inspectors lack necessary access to the required information when it is not on the manufacturer's premises. Therefore, in lieu of requiring each mill to file a Form FD–1800, the Commissioner concludes that requiring the holder of an approved feed application to maintain the required information at each mill is necessary for the efficient enforcement of the act.

5. It has been suggested that feed mill inspection include an inspection of the general office (home office) of multiplant companies because the pertinent records concerning medicated feed applications are often maintained there.

An inspection of a multiplant mill's home office may fail to disclose whether a particular feed mill is producing medicated animal feeds in accordance with current good manufacturing practices and an approved Form FD–1800, which is essential to a proper feed mill inspection. Moreover, if the home office is in a different inspectional jurisdiction than the manufacturing mill, the inspector lacks the immediate accessibility to pertinent records that is also mandatory for a comprehensive inspection. Consequently, the Commissioner rejects the suggestion. For these same reasons he also rejects the suggestion that the inspecting official obtain this information by telephoning the general office.

6. Some comments requested a reasonable time to complete the clerical work needed for compliance with the regulation.

Comments indicated that many feed mills have recordkeeping systems that can be easily modified to comply with the

regulation. Nevertheless, to assure all affected parties notice and opportunity to comply with the regulation, the Commissioner concludes its effective date shall be November 26, 1976.

The Commissioner has carefully considered the environmental effects of the regulation, and because the action will not significantly affect the quality of the human environment, he has concluded that an environmental impact statement is not required. A copy of the FDA environmental impact assessment is on file with the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 512(m), 701(a), 52 Stat. 1055, 82 Stat. 348–350 (21 U.S.C. 360b(m), 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)), Parts 510 and 514 are amended as follows:

1. In Part 510, by adding new § 510.305 to Subpart D to read as follows:

§ 510.305 Maintenance of copies of approved applications for animal feed bearing or containing new animal drugs.

Each applicant shall maintain in a single accessible location on the premises of each establishment to which an approved medicated feed application (Form FD–1800) or supplemental application applies either:

(a) A copy of the approved medicated feed application (Form FD–1800) and a sample of the approved labeling; or

(b) Identification of the approved medicated feed application in a single file or in a single readable document that includes:

(1) The application number and date of its approval;

(2) The name(s) of the premix(es) and the concentration of the drug(s) contained in the premix(es);

(3) The name(s) of the approved manufacturer(s) of the premix(es);

(4) The concentration of the drug(s) in the finished medicated feed; and

(5) A sample of the approved labeling.

§ 514.2 [Amended]

2. In Part 514, by revising the reference "Form FD–1800 6–68" in the introductory text of § 514.2 to read, "Form FD–1800 (5/72)."

Effective date. This regulation becomes effective November 26, 1976.

(Sec. 512(m), 701(a) 52 Stat. 1055, 82 Stat. 348–350 (21 U.S.C. 360b(m), 371(a)).)

Dated: August 23, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

Title 22—Foreign Relations

CHAPTER I—DEPARTMENT OF STATE

[Dept. Reg. 108.728]

PART 64—PARTICIPATION BY FEDERAL EMPLOYEES IN CULTURAL EXCHANGE PROGRAMS OF FOREIGN GOVERNMENTS

On pages 29410 and 29411 of the FEDERAL REGISTER of July 16, 1976, the Department published a proposed new Part 64 to Chapter I of Title 22 of the Code of Federal Regulations to promulgate regulations to facilitate the participation by Federal employees in cultural exchange programs of foreign governments. Interested persons were given 30 days in which to submit comments, suggestions, or objections regarding the proposed regulations.

No objections were received; therefore, the proposed regulations are hereby adopted without change as set forth below.

Effective date. These regulations are effective August 17, 1976.

Dated: August 19, 1976.

For the Secretary of State.

JOHN RICHARDSON, JR.,
Assistant Secretary for Educational and Cultural Affairs.

Sec.
64.1 Purpose.
64.2 Definitions.
64.3 Submission of application.

64.7 Approval of application.
64.8 Obligation of employee to advise agency.
64.9 Termination of approval.
64.10 Grant not to constitute a gift.

AUTHORITY: Sec. 108A (Pub. L. 94–350, 90 Stat. 823) added to the Mutual Educational and Cultural Exchange Act, as amended, 75 Stat. 527–538, 22 U.S.C. 2451, et seq.; and under Executive Order 11034, as amended, and State Department Delegation of Authority No. 105, as amended.

§ 64.1 Purpose.

This part sets forth the procedures for the application for approval of a cultural exchange program of a foreign government, so that Federal employees may participate in such program; the grant and termination of such approval; and related procedures.

§ 64.2 Definitions.

For the purpose of this part:

(a) "Federal employee" means: (1) An employee as defined by section 2105 of Title 5, United States Code; (2) an individual employed by, or occupying an office or position in, the government of a territory or possession of the United States or the District of Columbia; (3) a member of a uniformed service; (4) the President and Vice President; and (5) a member of the Senate or the House of Representatives, a Delegate from the District of Columbia in Congress, and the Resident Commissioner from Puerto Rico in Congress.

(b) A "foreign government" means a foreign government and an official agent or representative thereof; a group of governments and an official agent or representative thereof; an international organization composed of governments, and an official agent or representative thereof.

(c) A program of the "type described in section 102(a)(2)(i) of the Act" means a cultural exchange program involving "visits and interchanges between the United States and other countries of leaders, experts in fields of specialized knowledge or skill, and other influential or distinguished persons."

(d) The "purpose stated in section 101 of the Act" is to enable the Government of the United States to increase mutual understanding between the people of the United States and the people of other countries by means of educational and cultural exchange; to strengthen the ties which unite us with other nations by demonstrating the educational and cultural interests, developments, and achievements of the people of the United States and other nations, and the contributions being made toward a peaceful and more fruitful life for people throughout the world; to promote international cooperation for educational and cultural advancement; and thus to assist in the development of friendly, sympathetic, and peaceful relations between the United States and the other countries of the world."

(e) "Assistant Secretary" means the Assistant Secretary for Educational and Cultural Affairs, Department of State.

(f) "Department" means the Department of State.

(g) "Act" means the Mutual Educational and Cultural Exchange Act of 1961, as amended (22 U.S.C. 2451 et seq.).

(h) "Member of the family or household" of a Federal employee means a relative of the employee by blood, marriage or adoption or any person who is a resident of the household of the employee.

§ 64.3 Submission of application.

A foreign government intending to provide grants or other assistance to facilitate the participation of Federal employees in a program of cultural exchange shall submit to the Department an application for approval of the program through its Embassy, Mission, or office at Washington, D.C. If there is no Embassy, Mission, or office at Washington, D.C. of the foreign government the application may be submitted by the home office or headquarters of the foreign government. The application shall be addressed to the Assistant Secretary.

§ 64.4 Criteria for approval of program.

To obtain approval of its program of cultural exchanges a foreign government is required to show that:

(a) The cultural exchange program is of the type described in section 102(a)(2)(i) of the Act;

V 41 I 168 AUG 27 76 UMI

(b) The cultural exchange program is conducted for a purpose comparable to the purpose stated in section 101 of the Act; and

(c) A grant under such program will not provide assistance with respect to any expenses incurred by or for any member of the family or household of such Federal employee.

§ 64.5 Contents of application.

The foreign government shall provide information in the application showing that its program meets the criteria set forth in § 64.4, and shall include in such application the following:

(a) Name and description of the program and the provisions of legislation or regulation authorizing the program;

(b) Number of annual United States citizen participants expected, including the number of United States Federal employees;

(c) Average duration of stay abroad;

(d) Agency of the foreign government responsible for the program;

(e) Name and address of contact in the United States with whom communication may be made with respect to the program; in the absence of such a contact in the United States, the name and address of a contact in the home office or headquarters of the foreign government.

§ 64.6 Request for further information.

The Department may request the foreign government to supply additional information.

§ 64.7 Approval of application.

The Assistant Secretary shall review the application and if satisfied that the criteria of § 64.4 are met shall inform the foreign government of the approval of its program.

§ 64.8 Obligation of employee to advise agency.

Any Federal employee receiving any offer of a grant or other assistance under a cultural exchange program approved by the Assistant Secretary shall advise the employee's agency of such offer and shall not accept such offer unless the employee's agency states that it has no objection to such acceptance. In the case of the Department, an employee shall advise the Assistant Secretary who shall, after consultation with appropriate officials of the Department, furnish the no objection statement.

§ 64.9 Termination of approval.

If at any time it appears to the Assistant Secretary that the purpose of a program which has been approved has been changed so that it no longer meets the criteria of § 64.4 or that the program is being misused, the Assistant Secretary may terminate such approval, or suspend such approval pending the supplying of additional information. However, a termination or suspension shall not affect a grant which has been made under a previously approved program.

§ 64.10 Grant not to constitute a gift.

A grant made under an approved program shall not constitute a gift for purposes of 22 CFR 10.735–203 and section 7342 of Title 5, United States Code.

[FR Doc.76–25214 Filed 8–26–76;8:45 am]

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

SUBCHAPTER G—ENGINEERING AND TRAFFIC OPERATIONS

CONSTRUCTION AND MAINTENANCE

General Material Requirements

• Purpose. The purpose of this document is to publish in one subpart general material requirements applicable to Federal-aid highways. •

The Federal Highway Administration is amending Chapter I of Title 23, CFR Part 635 by adding a new Subpart D—General Material Requirements. Heretofore some general material requirements were published in 23 CFR 635, Subpart A and others in various uncodified directives. All of the material requirements applicable to Federal-aid highways have been assembled in a new addition to the Federal-Aid Highway Program Manual, Volume 6, Chapter 4, Section 1, Subsection 16. Those portions of the Manual addition which impose requirements on recipients in order to qualify for Federal aid are hereby published.

The matters affected relate to benefits or contracts within the purview of 5 U.S.C. 552(a)(2), thus general notice of proposed rulemaking is not required.

Effective date: September 10, 1976.

Issued on August 16, 1976.

NORBERT T. TIEMANN,
Federal Highway Administrator.

PART 633—REQUIRED CONTRACT PROVISIONS

1. Conforming amendments to Title 23 CFR are necessary as follows:

§ 633.207 Construction labor and materials.

(a) In § 633.207(e) the reference to "§ 635.116" (40 FR 49084, Oct. 21, 1975) is changed to "§ 635.409."

PART 635—CONSTRUCTION AND MAINTENANCE

Subpart A of Part 635 of Title 23 (39 FR 35152, September 30, 1974) is revised as follows:

1. The table of sections is revised by deletion of the following:

Sec.
635.115 Use of material made available by a public agency.
635.116 Restrictions upon materials.
635.117 Material or product selection.

APPENDIX A.—Summary of Acceptable Criteria for Specifying types of Culvert Pipes.

2. Sections 635.115, 635.116, and 635.117 and Appendix A are deleted.

3. Chapter I of Title 23, Code of Federal Regulations, is amended by adding Subpart D to Part 635 to read as follows:

Subpart D—General Materials Requirements

Sec.
635.401 Purpose.
635.403 Definitions.
635.405 Applicability.
635.407 Use of materials made available by a public agency.
635.409 Restrictions upon materials.
635.411 Material or product selection.
635.413 Guaranty and warranty clauses.

APPENDIX A.—Summary of Acceptable Criteria for Specifying Types of Culvert Pipes.

AUTHORITY: 23 U.S.C. 112, 114, and 315; 49 CFR 1.48(b).

Subpart D—General Material Requirements

§ 635.401 Purpose.

The purpose of this subpart is to prescribe requirements and procedures relating to product and material selection and use on Federal-aid highway projects.

§ 635.403 Definitions.

As used in this subpart, the following terms have the meanings indicated:

(a) "FHWA Division Administrator" means the chief Federal Highway Administration (FHWA) official assigned to conduct business in a particular State;

(b) "Material" means any tangible substance incorporated into a Federal-aid highway project;

(c) "PS&E" means plans, specifications, and estimates;

(d) "Special provisions" means additions and revisions to the standard and supplemental specifications applicable to an individual project;

(e) "Standard specifications" means a compilation in book form of specifications approved for general application and repetitive use;

(f) "State" has the meaning set forth in 23 U.S.C. 101;

(g) "State highway agency" means that department, commission, board, or official of any State charged by its laws with the responsibility for highway construction;

(h) "Supplemental specifications" means approved additions and revisions to the standard specifications.

§ 635.405 Applicability.

The requirements and procedures prescribed in this subpart apply to all contracts relating to Federal-aid highway projects, except those constructed under a Certification Acceptance Plan.

§ 635.407 Use of material made available by a public agency.

(a) Contracts for highway projects shall require the contractor to furnish all materials to be incorporated in the work and shall permit the contractor to select the sources from which the materials are to be obtained. Exception to this requirement may be made when there is a definite finding by the State highway agency and concurred in by the FHWA Division Administrator, that it is in the public interest to require the contractor to use material furnished by the State highway agency or from sources designated by the State highway agency. In cases such as this, the FHWA does not expect mutual sharing of costs unless the State highway agency receives a related credit from another agency or political subdivision of the State. Where such a credit does accrue to the State highway agency, it shall be applied to the Federal-aid project involved. The designation of a mandatory material source may be permitted based on environmental considerations, provided the environment would be substantially enhanced without excessive cost. Otherwise, if a State highway agency proposal to designate a material source for mandatory use would result in higher project costs, Federal-aid funds shall not participate in the increase even if the designation would conserve other public funds.

(b) The provisions of paragraph (a) of this section will not preclude the designation in the plans and specifications of sources of local natural materials, such as borrow aggregates, that have been investigated by the State highway agency and found to contain materials meeting specification requirements. The use of materials from such designated sources shall not be mandatory unless there is a finding of public interest as stated in paragraph (a) of this section.

(c) Federal funds may participate in the cost of specifications materials made available by a public agency when they have been actually incorporated in accepted items of work, or in the cost of such materials meeting the criteria and stockpiled at the locations specified in § 635.114 of this chapter.

(d) To be eligible for Federal participation in its cost, any material, other than local natural materials, to be purchased by the State highway agency and furnished to the contractor for mandatory use in the project, must have been acquired on the basis of competitive bidding, except when there is a finding of public interest justifying the use of another method of acquisition. The location and unit price at which such material will be available to the contractor must be stated in the special provisions for the benefit of all prospective bidders. The unit cost eligible for Federation participation will be limited to the unit cost of such material to the State highway agency.

(e) When the State highway agency or another public agency owns or has control over the source of a local natural material the unit price at which such material will be made available to the contractor must be stated in the plans or special provisions. Federal participation will be limited to (1) the cost of the material to the State highway agency or other public agency; or (2) the fair and reasonable value of the material, whichever is less. Special cases may arise that will justify Federal participation on a basis other than that set forth above. Such cases should be fully documented and receive advance approval by the FHWA Division Administrator.

(f) Costs incurred by the State highway agency or other public agency for acquiring a designated source or the right to take materials from it will not be eligible for Federal participation if the source is not used by the contractor.

(g) The contract provisions for one or a combination of Federal-aid projects shall not specify a mandatory site for the disposal of surplus excavated materials unless there is a finding by the State highway agency with the concurrence of the FHWA Division Administrator that such placement is the most economical except that the designation of a mandatory site may be permitted based on environmental considerations, provided the environment would be substantially enhanced without excessive cost.

§ 635.409 Restrictions upon materials.

No requirement shall be imposed and no procedure shall be enforced by any State highway agency in connection with a project which may operate:

(a) To require the use of or provide a price differential in favor of articles or materials produced within the State, or otherwise to prohibit, restrict or discriminate against the use of articles or materials shipped from or prepared, made or produced in any State, territory or possession of the United States; or

(b) To prohibit, restrict or otherwise discriminate against the use of articles or materials of foreign origin to any greater extent than is permissible under policies of the Department of Transportation as evidenced by requirements and procedures prescribed by the FHWA Administrator to carry out such policies.

§ 635.411 Material or product selection.

(a) Federal funds shall not participate, directly or indirectly, in payment for any premium or royalty on any patented or proprietary material, specification, or process specifically set forth in the plans and specifications for a project, unless:

(1) Such patented or proprietary item is purchased or obtained through competitive bidding with equally suitable unpatented items; or

(2) The State highway agency certifies either that such patented or proprietary item is essential for synchronization with existing highway facilities, or that no equally suitable alternate exists; or

(3) Such patented or proprietary item is used for research or for a distinctive type of construction on relatively short sections of road for experimental purposes.

(b) When there is available for purchase more than one nonpatented, nonproprietary material, semifinished or finished article or product that will fulfill the requirements for an item of work of a project and these available materials or products are judged to be of satisfactory quality and equally acceptable on the basis of engineering analysis and the anticipated prices for the related item(s) of work are estimated to be approximately the same, the PS&E for the project shall either contain or include by reference the specifications for each such material or product that is considered acceptable for incorporation in the work. If the State highway agency wishes to substitute some other acceptable material or product for the material or product designated by the successful bidder or bid as the lowest alternate, and such substitution results in an increase in costs, there will not be Federal-aid participation in any increase in costs.

(c) A State highway agency may require a specific material or product when there are other acceptable materials and products, when such specific choice is approved by the Division Administrator as being in the public interest. When the Division Administrator's approval is not obtained, the item will be nonparticipating unless bidding procedures are used that establish the unit price of each acceptable alternative. In this case Federal-aid participation will be based on the lowest price so established.

(d) Appendix A sets forth the FHWA requirements regarding (1) the specification of alternative types of culvert pipes, and (2) the number and types of such alternatives which must be set forth in the specifications for various types of drainage installations.

(e) Reference in specifications and on plans to single trade name materials will not be approved on Federal-aid contracts.

§ 635.413 Guaranty and warranty clauses.

(a) Except as provided in paragraph (b) of this section, clauses that require the contractor to guarantee or warrant materials and workmanship or to otherwise maintain the work for a specified period after its satisfactory completion by the contractor and its final acceptance by the State, will not be approved for use in Federal-aid contracts. Work performed and materials replaced under such guaranty or warranty clauses after final acceptance of work are not eligible for Federal participation.

(b) Contracts which involve furnishing and/or installing electrical or mechanical equipment should generally include contract clauses that require:

(1) Manufacturer's warranties or guarantees on all electrical and mechanical equipment consistent with those provided as customary trade practice, or

(2) Contractors' warranties or guarantees providing for satisfactory inservice operation of the mechanical and electrical equipment and related components for a period not to exceed 6 months following project acceptance.

V 41 I 168 AUG 27 76 UMI

APPENDIX A.—*Summary of acceptable criteria for specifying types of culvert pipes*

Type of drainage installation	Alternatives required Yes	No	AASHTO designations to be included with alternatives Number		Application	Remarks
Cross drains under high-type pavement.[1]	.....	×	.....		Statewide.....	Any AASHTO-approved material.[2]
Other cross-drain installations.	×	.....	3 minimum.	M-170 and M-190.....	do.....	Do.[2]
Side-drain installations.....	×	.....	do.....	M-36.....	do.....	Do.[2]
Special installation conditions.	.....	×	.....	.....	Individual installation.	Specified to meet special conditions.
Special drainage systems (storm sewers, inverted siphons, etc.).	.....	×	.....	.....	do.....	Specified to meet site requirements.

[1] High-type pavement is generally described as FHWA construction type codes I, J, K, L, and plant mix and penetration macadam segments, respectively shown in the right-hand columns of type codes G and H having a combined thickness of surface and base of 7 in or more (or equivalent) or that are constructed on rigid bases.
[2] Types not included in currently approved AASHTO specifications may be specified if recommended by the State with adequate justification and approved by FHWA.

PART 655—TRAFFIC OPERATIONS

§ 655.407 Project administration.

1. In § 655.407(c) the reference to "Volume 6, Chapter 4, section 2, subsection 5 of the Federal-Aid Highway Program Manual" (39 FR 33208, September 16, 1974) is changed to "§ 635.413 of this chapter."

§ 655.605 Improvement projects.

2. In § 655.605(c)(3) the reference to "23 CFR Part 635, Subparts A and B" (39 FR 35650, Oct. 3, 1974) is changed to "23 CFR Part 635, Subpart D."

§ 655.606 Funding.

3. In § 655.606(a) the reference to "23 CFR Part 635, Subparts A and B" (39 FR 35650, Oct. 3, 1974) is changed to "23 CFR Part 635, Subpart D."

§ 655.608 Pavement markings.

4. (a) In § 655.608(d) the reference to "§ 635.117 of this Chapter" (41 FR 10430, March 11, 1976) is changed to "§ 635.411 of this Chapter."

(b) In § 655.608(d) the reference to "23 CFR Part 635, subpart A and B" (39 FR 35650, Oct. 3, 1974) is changed to "23 CFR Part 635, Subpart D."

[FR Doc.76-25036 Filed 8-26-76;8:45 am]

Title 29—Labor

CHAPTER XVII—OCCUPATIONAL SAFETY AND HEALTH ADMINISTRATION, DEPARTMENT OF LABOR

PART 1952—APPROVED STATE PLANS FOR ENFORCEMENT OF STATE STANDARDS

Alaska; Approval of Plan Supplements

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under Section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter referred to as the Act) for review of changes and progress in the development and implementation of State plans which have been approved in accordance with Section 18(c) of the Act and 29 CFR Part 1902. On August 10, 1973, a notice was published in the FEDERAL REGISTER (38 FR 21628) of the approval of the Alaska plan and the adoption of Subpart R to Part 1952 containing the decision. On June 15, 1976, the State of Alaska submitted supplements to the plan involving developmental changes to the Seattle Regional Office of the Occupational Safety and Health Administration. Following regional review, the supplements were forwarded to the Assistant Secretary of Labor for Occupational Safety and Health for his determination as to whether they should be approved. The supplements are described below:

2. *Description of the supplements.* (a) Staff training. The State has submitted a statement certifying the completion of the training objectives as set forth in the State plan. The Alaska agency has initiated, developed and adopted both an interim and an extended training plan for its compliance officers and voluntary compliance safety consultants. The interim plan was accomplished on April 1, 1974, and the extended plan was accomplished on October 1, 1975.

(b) Management Information System. The system will operate as a manual system. The system will provide, among other things, data on inspection type, employee participation, employee discrimination, special programs, number and type of violations, proposed penalties and collection of penalties, employee complaints, safety and health coverage, serious and non-serious penalties and violations, training, time utilization, and contested cases.

(c) Industrial Health Laboratory. The Alaska Industrial Health Laboratory became fully operational on May 31, 1976, The laboratory is equipped with all necessary equipment to conduct analysis of all samples with the exception of vinyl chloride and carcinogens. These substances will not be analyzed due to the lack of major users within the State. However, when users are identified and evaluated, the samples will be sent to an accredited laboratory for analysis. The laboratory is staffed with a qualified and trained chemist.

3. *Location of the plan and its supplements for inspection and copying.* A copy of these supplements, along with the approved plan, may be inspected and copied during normal business hours at the following locations: Office of the Associate Assistant Secretary for Regional Programs, Occupational Safety and Health Administration, Room N-3112, 200 Constitution Avenue, N.W., Washington, D.C. 20210; Office of the Regional Administrator, Occupational Safety and Health Administration, Room 6048, Federal Office Building, 909 First Avenue, Seattle, Washington 98174; State of Alaska, Department of Labor, Office of the Commissioner, Juneau, Alaska 99810.

4. *Public participation.* Under § 1953.2(c) of this Chapter the Assistant Secretary may prescribe alternative procedures to expedite the review process or for any other good cause which may be consistent with applicable law. The Assistant Secretary finds that the Alaska plan supplements described above are consistent with commitments contained in the approved plan, which were previously made available for public comment. Accordingly, it is found that further public comment is unnecessary.

5. *Decision.* After careful consideration, the Alaska plan supplements described in (a), (b), and (c) above are hereby approved under Subpart B of Part 1953 of this chapter. This decision incorporates the requirements of the Act and implementing regulations applicable to State plans generally. In addition, Subpart R of 29 CFR Part 1952 is hereby amended to reflect the completion of two developmental steps by adding a new § 1952.244 as follows:

§ 1952.244 Completed developmental steps.

(a) In accordance with § 1952.243(g) Alaska has completed the training program as described in the approved plan.

(b) In accordance with § 1952.243(c) Alaska has developed and implemented a manual Management Information System.

(Sec. 18, Pub. L. 91-596, 84 Stat. 1608 (29 U.S.C. 667))

Signed at Washington, D.C. this 20th day of August 1976.

MORTON CORN,
Assistant Secretary of Labor.

[FR Doc.76-25232 Filed 8-26-76;8:45 am]

Title 41—Public Contracts and Property Management

CHAPTER 101—FEDERAL PROPERTY MANAGEMENT REGULATIONS

SUBCHAPTER D—PUBLIC BUILDINGS AND SPACE

[FPMR Amdt. D-55]

PART 101-18—ACQUISITION OF REAL PROPERTY

Subpart 101-18.1—Acquisition by Lease

URBAN CENTERS

This regulation amends the list of urban centers nationwide by adding to the list of urban centers two counties in the State of Oregon previously classified as non-urban.

Section 101-18.102(a) is amended to read as follows:

§ 101-18.102 Acquisition by other agencies.

(a) The Departments of Agriculture, Commerce, and Defense may lease their own building space, and land incidental to its use, and provide for its operation, maintenance, and custody when the space is situated outside an urban center. Urban centers are:

• • • • •

Salem, Oreg.:
Marion County.
Polk County.

• • • • •

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c))

Effective date. This regulation is effective on August 27, 1976.

NOTE: It is hereby certified that the impact does not meet the inflation impact criteria for major rules or regulations.

Dated: August 13, 1976.

JACK ECKERD,
Administrator of General Services.

[FR Doc.76-25131 Filed 8-26-76;8:45 am]

SUBCHAPTER F—TELECOMMUNICATIONS AND PUBLIC UTILITIES

[FPMR Amdt. F-27]

PART 101-35—TELECOMMUNICATIONS

Federal Telecommunications System (FTS) Identification Procedures

This amendment codifies FPMR Temporary Regulation F-368, dated January 16, 1976, which prescribes revised identification procedures to be used on the Federal Telecommunications System (FTS) intercity voice network and amends Subpart 101-35.5 to reflect new directory charges.

The table of contents for Part 101-35 is revised as follows:

Sec.
101-35.505 [Reserved]

Subpart 101-35.3—Utilization and Ordering of Telecommunications Services

Section 101-35.309 is revised to read as follows:

§ 101-35.309 FTS intercity voice network identification symbols.

§ 101-35.309-1 General.

Each Federal agency authorized to use the FTS intercity voice network will be assigned an eight-digit FTS identification symbol by the General Services Administration. The FTS identification symbol is required only for placing calls from commercial telephones to FTS telephones and authorizes FTS operators to complete the call. GSA will revise these FTS identification symbols periodically to assist agencies in ensuring that only authorized personnel have them. These symbols will be distributed by the GSA Central Office to heads of agencies or their designated control personnel. GSA will not distribute these symbols to other agency personnel.

§ 101-35.309-2 Agency responsibility.

Each agency shall issue the eight-digit FTS identification symbol to only those FTS users who are authorized to place FTS calls from commercial telephones to FTS intercity voice network telephones. FTS operators will not accept calls from commercial telephones unless the caller furnishes his name, a valid FTS identification symbol, and the seven-digit FTS telephone number being called. Restricted issuance of the FTS identification symbol is essential since its use is considered certification that such calls are official.

NOTE: Each agency is responsible for controlling use of the FTS intercity voice network and shall limit the calls to only those users authorized by the agency. Agencies shall issue to these users the four-digit agency bureau code. This four-digit code is used for sampling purposes and for completing calls to Alaska, Hawaii, and Puerto Rico.

Agencies shall instruct users who place telephone calls from FTS telephones to non-FTS telephones to provide the FTS operators their FTS telephone number and the telephone number being called. FTS operators will not accept calls unless the caller furnishes this information.

Subpart 101-35.5—Telephone Information Services Provided at GSA-Operated Telephone Switchboards

Section 101-35.502 is revised and 101-35.505 is deleted and reserved as follows:

§ 101-35.502 Directory costs.

The cost of printing and maintaining Government telephone directories is included in the local telephone service charge. Agencies are provided directories on a one-per-telephone-instrument basis plus a reasonable quantity of copies (up to 5 percent additional) for administrative purposes. Agencies will be charged at cost for copies above these normal requirements.

§ 101-35.505 [Reserved]

(Sec. 205(c), 63 Stat. 390; (40 U.S.C. 486(c)))

Effective date. This regulation is effective on August 27, 1976.

NOTE: It is hereby certified that the impact does not meet the inflation impact criteria for major rules or regulations.

Dated: August 13, 1976.

JACK ECKERD,
Administrator of General Services.

[FR Doc.76-25130 Filed 8-26-76;8:45 am]

Title 45—Public Welfare

CHAPTER II—SOCIAL AND REHABILITATION SERVICE (ASSISTANCE PROGRAMS), DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 249—SERVICES AND PAYMENT IN MEDICAL ASSISTANCE PROGRAMS

Prohibition Against Reassignment of Claims; Factoring

Notice of proposed rule making was published on February 4, 1976, in the FEDERAL REGISTER (41 FR 5131), clarifying and expanding the regulations governing the prohibition against reassignment of claims to payment in the medical assistance program administered under title XIX, Social Security Act, which were published in final form on April 9, 1974 and became effective on June 24, 1974.

The purpose of the proposed regulations was to specify that the prohibition covers, in addition to physicians, dentists, and other individual practitioners, all providers who are not reimbursed on a reasonable cost basis. In addition, they provided that payment to the specified providers may not be made to or through a factor. The basis for the proposal was the Department's belief based on its experience in administering this provision under section 1902(a)(32) of the Social Security Act, that these additional safeguards are necessary to carry out the objectives of this State plan requirement.

Comments were received from one voluntary social service agency, one State Medicaid agency, one county social service agency, one provider association, four factoring organizations and four legal firms representing factors.

Specific major concerns expressed and the Department's responses are as follows:

Comment. The provider check should be mailed only to the location where that provider performed the service.

Response. As to the intent of the legislation, there is a specific statement in the Senate Finance Committee Report to accompany H.R. 1 that "This provision would not preclude a physician or other person who provided the services and accepted an assignment from having the payment mailed to anyone or any organization he wishes, but the payment would be to him in his name." However, this does not mean that the regulation can be circumvented to permit the reassignment of claims.

Comment. The provisions of the regulations "requiring direct payment to providers and prohibiting payment to and through a factor [should] apply to *all* Medicaid vendors regardless of whether their fees or rates are cost-based."

Response. The following statement relating to those providers who are reimbursed on a reasonable cost basis appears in the Senate Finance Committee Report: "It is not the intent of the committee that this provision apply to payments to providers of services that are based on the reasonable cost of the services."

Comment. Local government units should be permitted to bill the State directly for medical assistance claims to reimburse providers of services to Medicaid recipients.

Response. The definition of "Factor" in the regulation is not intended to include local government units.

Comment. The definition of a factoring agency should prohibit collection agencies from utilizing the provider's power of attorney in order to achieve a transfer of Medicaid claims.

Response. This suggestion has been accepted. The regulation has also been clarified with respect to the permissible use of billing agents and similar business representatives, a statement on which had appeared in the preamble to the Notice of Proposed Rule Making.

Comment. Proposed revision should be adopted. Commenter also pointed out that voluntary agencies should be able to receive payment for services rendered

V41168 AUG 27 76 UMI

by medical and social service personnel in their employ.

Response. The regulation stipulates that direct payment can be made under specific exceptions (249.31(b)(1)). These cover the direct payment, under certain conditions, for services to employers of personnel providing medical care under the title XIX program.

Comment. There should be a 60-day period between the time the final regulation becomes effective and the date upon which invoices previously submitted by factors would be honored.

Response. The regulation is being made effective 90 days after publication in the FEDERAL REGISTER in order to allow States to complete processing of claims already submitted.

Comment. The arguments submitted against prohibiting payments to or through factors include the following:

Factors perform computer, clerical and accounting services as well as providing financing. Factors are assisting providers in establishing practices in deprived socioeconomic areas who would ordinarily not have the capital to do so—thereby providing for greater and often the only provider participation in these areas.

Many of the providers who furnish medical services to the indigent under the Medicaid program are Spanish or Oriental and are unable to cope with the record-keeping requirements of the Federal and State agencies. These providers are for the most part without sufficient funds to wait for payment of their bills for services rendered. Delays of six months are frequent. Factors supply the cash flow needed for these practitioners to continue providing services.

The news media has been replete with stories of nefarious practices, but very little proof has been forthcoming. Factors obviously perform a valuable service or they would not be used by providers.

"• • • since 1969 the Medicaid factoring industry has become somewhat of a political football • • •." Special Assistants to the Attorney General in one State have investigated numerous factoring companies and have not been able to show one instance of fraud that had been committed by a factor.

Adoption of the regulation would possibly destroy the Medicaid program in the New York area. In 1975, one group of factors purchased $30,000,000 worth of accounts receivable—$11,000,000 of which is still due and owing on these claims. The factor, by providing "the services of immediate cash payment to the provider and relief from voluminous paper work, and record-keeping and cumbersome procedures, effectively attracts providers to participation in the program." At no time is there any provision for the check to be made payable to the factoring organization (power of attorney is used). An anti-factor bias pervades the proposed regulation. One commenter stated that charges that the practice of factoring is "somehow driving up the fees" under Medicaid are false. Specific references were made to the following charges:

(1) Factors change bills after being prepared by the provider so as to pocket the difference between the amount allowed on the bill and the amount collected. In answer to this charge, the factors state that such a change would be presumptively fraudulent and would subject the factor to criminal charges. Such charges could very well disqualify the payment of the item so that the factor can only hurt himself. Also, each of the State payment vouchers identify the amount of each payment request and the amount allowed; thus any provider can determine that he had not received a credit for all the funds paid by the State agency.

(2) Factors represent unsavory or "syndicate" money. The factors reply that, in fact, they deal with reputable banks.

(3) Factors are bill collectors and hence unsavory. Factors state that these charges in the press were designed to identify factors with certain other scandals relating to oppressive practices of bill collectors on small individual debtors. Except for lapse of time, there is no problem of credit in the Medicaid program. The only problems are those of waiting a considerable time for the State agency to improve its administrative processes, of following a complex administrative format, and the lack of certainty as to when payments will be received.

Factors state that the Department of HEW in previous litigation stated that the Department had no objection to the mailing of checks as directed by the provider.

The regulation is contrary to the intent of the statute, which sought only to prohibit assigning claims in a manner that enabled the assignee to submit claims and receive payment in his own name. It does not prohibit sending a check made payable to a provider to a different person or organization. A Federal agency cannot amend the statute by regulation and add requirements not found in the legislation.

In lieu of prohibiting factoring, HEW should require that each item on an invoice be signed or initialed by the provider and that procedures be followed that would preclude addition of any items after signature.

There were suggestions that HEW require State regulation of factoring firms so that they can continue to function. Factors support legislation that would license and regulate medical factoring companies.

Instead of a blanket rejection of all financial institutions, there should be a more definitive study of the problems of "illegal" payments, produced by unethical financing service organizations.

Controls should be established to permit ethical financial institutions to serve provider needs. These controls should include audits of systems and records to assure compliance.

Factors call for a public hearing to express views before the regulation is published in final form in the FEDERAL REGISTER.

Response. The legislative history in expresses the problems factoring of the Senate Finance Committee Report claims had caused and the intent to prevent past abuses: "Such reassignments have been a source of incorrect and inflated claims for services and have created administrative problems with respect to determinations of reasonable charges and recovery of overpayments. Fraudulent operation of collection agencies have been identified in Medicaid. Substantial overpayments to many such organizations have been identified in the Medicare program, one involving over a million dollars." The report sees the subject provision as a means "to overcome these difficulties by prohibiting payment under these programs to anyone other than" the recipient or practitioner.

There is no question that a provider may have his check, made out in his name, mailed to a bank, savings and loan institution, etc., rather than to his office or home. However, use of factoring organizations is not allowed even though the check is payable to the provider and is cashed under power of attorney, since this would negate the purpose of the statutory prohibition against reassignment and could lead to the abuses which the factoring activity is seen to produce.

Providers can continue to utilize billing and other services, as described in the range of services provided by factors, if the service does not include a transfer of the provider's accounts receivable through any means including power of attorney. Thus there is no need for providers themselves to take on the work of preparing and submitting claims, performing bookkeeping tasks, etc. The regulation has been clarified to indicate that performance of such services by business representatives is and always has been permitted.

As more and more State agencies improve their claims processing systems, the problem of delay in payments should be reduced, thus overcoming any cash flow problems. The comments suggesting the licensing and auditing of factors are not germane since factoring itself is prohibited with respect to the Medicaid program.

Accordingly, the regulations as proposed are hereby adopted with the modifications indicated above. Since the regulation previously promulgated pursuant to section 1902(a)(32) could be considered ambiguous with respect to factoring, it has not been clear to some HEW regional offices and States that the practice is prohibited. Consequently, a reasonable amount of time has been allowed in order that States and providers may take the administrative steps necessary for cessation of the practice.

§ 249.31 Prohibition against reassignment of claims to benefits.

(a) *Meaning of terms.* For purposes of this section:

(1) "Facility" is a hospital or other institution which makes provision for furnishing health care services to inpatients.

(2) "Organized health care delivery system" is a public or private organization for delivering health services which may include, but is not limited to, a clinic or a group practice prepaid capitation plan.

(3) "Factor" is an organization, i.e., collection agency or service bureau, which, or an individual who, advances money to a provider for his accounts receivable which have been assigned or sold, or otherwise transferred, including transfer through the use of power of attorney, to such organization or individual for an added fee or a deduction of a portion of such accounts receivable.

For purposes of this regulation, the term "factor" does not include business representatives, such as billing agents or accounting firms, which render statements and receive payments in the name of the individual provider, provided that the compensation of such business representative for such service is reasonably related to the cost of processing the billings and is not related on a percentage or other basis to the dollar amounts to be billed or collected.

(b) *State plan requirements.* A State plan for medical assistance under title XIX of the Social Security Act must provide that (1) no payment under the plan for any care or service provided to a patient by a physician, dentist, other individual practitioner, or any other provider who is not reimbursed on a reasonable cost basis, shall be made to anyone other than such patient (who is eligible to receive such payments in accordance with § 249.32) or to such physician, dentist, practitioner, or any other provider who is not reimbursed on a reasonable cost basis. However, with respect to physicians, dentists, or other individual practitioners, direct payment may be made:

(i) To the employer of the physician, dentist, or other practitioner if the practitioner is required as a condition of his employment to turn over his fees to his employer; or

(ii) Where the care or service was provided in a facility, to the facility in which the care or service was provided, if there is a contractual arrangement between the practitioner and the facility whereby the facility submits the claim for reimbursement; or

(iii) To a foundation, plan, or similar organization, including a health maintenance organization, which furnishes health care through an organized health care delivery system if there is a contractual arrangement between the organization and the person furnishing the service under which the organization bills or receives payments for such person's services; (2) payment under the plan for any care or service furnished to an individual by providers as specified in paragraph (b)(1) of this section shall not be made to or through a factor, either directly, or by virtue of a power of attorney given by the provider to the factor.

(Sec. 1102, 49 Stat. 647 (42 U.S.C. 1302).)

(Catalog of Federal Domestic Assistance Program No. 13.714, Medical Assistance Program.)

Effective date: The regulations in this section will be effective November 26, 1976.

Dated: June 2, 1976.

M. KEITH WEIKEL,
Acting Administrator, Social and Rehabilitation Service.

Approved: August 13, 1976.

REVISION OF OPERATING RULES FOR CLASS D STATIONS IN THE CITIZENS RADIO SERVICES

Correction

In FR Doc. 76-22424, appearing at page 32678, in the issue for Wednesday, August 4, 1976, the following changes should be made:

(1) On page 32680, in the table under "§ 2.106 Table of frequency allocations", the third line of the column designated "Band (megahertz) 7" now reading "(225) (u.S.1)", should read "(225) (U.S.1)".

(2) On page 32681, in the first column, the third line of § 91.404(b)(8), should read "quencies between 26.96 MHz and 27.41".

(3) On page 32682, in the first column, following Part 93, paragraph (12), the following heading should be inserted:

§ ---- Frequencies below 952 MHz available for base, mobile, and operational fixed stations.

(4) On page 32682, in the second column, in the table which follows the paragraph designated "(2)", the second figure in the first column of the table now reading "26.965", should read "26.975."

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[S.O. No. 1245; Amdt. No. 1]

PART 1033—CAR SERVICE

Chicago & Eastern Illinois Railroad Company

AUGUST 24, 1976.

At a session of the INTERSTATE COMMERCE COMMISSION, Railroad Service Board, held in Washington, D.C., on the 23rd day of August, 1976.

Upon further consideration of Service Order No. 1245 (41 FR 26692) and good cause appearing therefor:

It is ordered, That Service Order No. 1245 be, and it is hereby, amended by substituting the following paragraph (e) for paragraph (e) thereof:

§ 1033.1245 Chicago & Eastern Illinois Railroad Company authorized to operate over tracks of Burlington Northern Inc.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., November 30, 1976, unless otherwise modified, changed, or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., August 31, 1976.

(Secs. 1, 12, 15, and 17(2), 24 Stat. 379, 383, 384, as amended; 49 U.S.C. 1, 12, 15, and 17(2). Interprets or applies Secs. 1(10-17), 15(4), and 17(2), 40 Stat. 101, as amended, 54 Stat. 911; 49 U.S.C. 1(10-17), 15(4), and 17(2).)

It is further ordered, That a copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association; and that notice of this amendment be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing it with the Director, Office of the FEDERAL REGISTER.

By the Commission, Railroad Service Board, members Lewis R. Teeple, Thomas J. Byrne, and William J. Love.

ROBERT L. OSWALD,
Secretary.

SUBCHAPTER B—PRACTICE AND PROCEDURE

[Ex Parte No. 277 (Sub-No. 2)]

PART 1124—REGULATIONS GOVERNING THE ADEQUACY OF INTERCITY RAILROAD PASSENGER SERVICE

Adequacy of Intercity Rail Passenger Service—Track

It appearing, That by notice of proposed rulemaking and order served July 17, 1974, the Commission instituted this proceeding under section 801 of the Rail Passenger Service Act with a view to adopting regulations requiring that the condition of all trackage used for intercity rail passenger service be brought up to the level which existed on May 1, 1971; and that the Commission invited the submission of relevant information, including information pertinent to the future adoption of regulations requiring the upgrading of trackage for high-speed passenger service operations;

It further appearing, That the proposed regulations were intended to supplement the Commission's present Adequacy of Service Regulations appearing at 49 CFR 1124.1 *et seq.;* and

It further appearing, That numerous verified statements and comments were received by the Commission with regard to the proposed regulations; that the Commission has given full consideration to all submissions; and that the Commission has made and filed its report herein containing its findings, conclusions, and final regulations, which report is hereby referred to and made a part hereof;

It is ordered, That Part 1124 of Chapter X of Title 49 of the Code of Federal Regulations, Regulations Governing the Adequacy of Intercity Railroad Passenger Service, be, and it is hereby, amended by adding a new § 1124.26 reading as set forth below:

It is further ordered, That this order shall be effective 35 days from the date it is served; and

It is further ordered, That notice of this order shall be given to the general public by depositing a copy thereof in the Office of the Secretary of the Commission in Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission.

ROBERT L. OSWALD,
Secretary.

In view of our above-stated conclusion that an entirely new proceeding will be necessary at some time in the future before any second-step regulations requiring upgrading for high-speed operations can be adopted, we have not made specific findings with regard to the expense and time required for upgrading of trackage for high-speed operations.

An appropriate order will be entered promulgating the regulation set out below.

Commissioner Murphy and Corber voted to concur in the result.

The regulation hereby adopted in this proceeding is as follows:

§ 1124.26 Track standards.

(a) The trackage of a carrier used in intercity rail passenger service shall be maintained by the carrier at not less than the level of utility existing on May 1, 1971.

(b) For purposes of this regulation, the "level of utility" shall be considered as being maintained if the track permits operation of a train between terminals in the same elapsed time as on May 1, 1917, with a reasonable degree of regularity and with a reasonable degree of passenger comfort. The elapsed time shall be determined from the applicable employee timetable speeds, without allowing for slow orders and speed restrictions in effect on May 1, 1971.

The following table lists the maximum allowable operating speeds over the various classes of track as prescribed by the Department of Transportation, Federal Railroad Administration. 49

APPENDIX I

Over track that meets all of the requirements prescribed in this part for—	The maximum allowable operating speed for freight trains is—	The maximum allowable operating speed for passenger trains is—
Class 1 track	10	15
Class 2 track	25	30
Class 3 track	40	60
Class 4 track	60	80
Class 5 track	80	90
Class 6 track	110	110

NOTE.—Trains may operate in excess of the maximum allowable speed of 110 mi/h only upon approval of the Federal Railroad Administration, pursuant to 49 CFR sec. 213.9(c).

APPENDIX II

The following short-haul routes designated by Amtrak as corridor routes were selected for special consideration in this proceeding: New York-Washington, New York-Boston (via Providence), New York-Boston (via Springfield and Worcester), New York-Buffalo, Philadelphia-Harrisburg, Washington-Cumberland, Chicago-Carbondale, Chicago-Champaign, Chicago-Detroit, Chicago-Quincy, Chicago-St. Louis, Chicago-Milwaukee, Seattle-Portland, Oakland-Los Angeles, and Los Angeles-San Diego.

The following routes were also selected for special consideration: Washington-Richmond-Norfolk, Chicago-Indianapolis-Cincinnati, and Orlando-Tampa.

APPENDIX III.—*Table summarizing railroads respondents' statements*

Carrier	Present condition of track	Cost of upgrading to class 4	Cost of upgrading to class 5	Cost of upgrading to class 6
Burlington Northern	Same as May 1971	0	(1)	[3] $992,000,000
C. & O./B. & O	do	(1)	(1)	(1)
D. & R. G. W	do	(1)	(1)	(1)
Illinois Central Gulf	Substantially same as May 1971.	0	[2] $34,770,000	[4] 135,000,000
Milwaukee Rd	Same as May 1971	0	210,000,000	(1)
Missouri Pacific	do	$4,650,000	395,085,000	446,462,000
Penn Central	do	(1)	(1)	(1)
R.F. & P	do	0	26,500,000	109,500,000
Rock Island	Deteriorated	(5)	57,000,000	(1)
Santa Fe	Same as May 1971	0	(6)	(7)
SCL L. & N	do	0	(1)	93,500,000
Southern	do	0	(1)	1,700,000,000
Southern Pacific	do	[8] 941,606,000	5,737,765,000	9,188,008,000
Union Pacific	do	0	8,120,000	(1)

[1] No data.
[2] If separate (nonfreight) track: $1,240,000,000.
[3] Doesn't include new signaling or grade separation; Amtrak projects class 5 Chicago to Carbondale at $85,000,000.
[4] Chicago-St. Louis only (Amtrak estimate).
[5] No data (13,234,552 to class 3).
[6] Much of system good for 110 mi/h:
[7] No data, impossible or unfeasible.
[8] To 80 mi/h., $84,126,000 to class 3.

[FR Doc.76-25071 Filed 8-26-76;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[50 CFR Part 32]

HUNTING

Opening of Barnegat National Wildlife Refuge, New Jersey to Hunting of Migratory Game Birds

Notice is hereby given that it is proposed that 50 CFR Part 32 be amended by the addition of the Barnegat National Wildlife Refuge, New Jersey, to the list of refuge areas opened for the hunting of migratory game birds, which is published at 50 CFR § 32.11.

Pursuant to the authority of 16 U.S.C. 668dd(d) as redelegated to the Director of the United States Fish and Wildlife Service at DM 242.1.1, the Director may open refuge area to public hunting upon a determination that it would be in accordance with provisions of all laws applicable to the area, would be compatible with the principles of sound wildlife management, would otherwise be in the public interest and that such use is compatible with the major purposes for which such areas were established. As a general rule, most areas within the National Wildlife Refuge System are closed to hunting until officially opened by regulation. It is the purpose of this proposed rulemaking to allow the hunting of migatory game birds on the Barnegat National Wildlife Refuge, which is presently prohibited.

Furthermore, pursuant to the requirements of § 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332(2)(C)), an environmental assessment has been prepared on this proposal which will help determine whether this rulemaking constitutes a major Federal action significantly affecting the human enviromnent. A copy of this assessment is available at the address below.

The policy of the Department of the Interior is, whenever practical, to afford the public an opportuinty to participate in the rulemaking process. Therefore, interested persons may submit writen comments, suggestions, or objections regarding the proposed amendment to the Regional Director, U.S. Post Office and Court House, Boston, Massachusetts 02109 on or before September 27, 1976. All relevant comments received will be considered by the Director prior to the issuance of final rulemaking.

Accordingly, it is proposed to amend § 32.11, in Title 50 of the Code of Federal Regulations as set forth below:

§ 32.11 List of open areas; migratory game birds.

[FR Doc.76-25094 Filed 8-26-76;8:45 am]

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 910]

HANDLING OF LEMONS GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Proposed Size Requirements

This notice invites written comment relative to a proposal submitted by the Lemon Administrative Committee that the size regulation currently in effect through September 25, 1976, be continued in effect during the period September 26, 1976, through September 24, 1977. The proposal would continue unchanged the current minimum size requirements for lemons at 1.82 inches in diameter (size 235's in cartons). The size requirements are those which have been found to provide consumers with lemons of acceptable maturity and juice content.

Notice is hereby given that the Department is considering a proposed size regulation for lemons grown in Arizona and designated part of California, pursuant to the applicable provisions of the marketing agreement, as amended, and Order No. 910, as amended, (7 CFR Part 910) regulating the handling of lemons grown in Arizona and designated part of California. The regulatory program is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674).

The current size regulation, Lemon Regulation 11 (40 FR 44120), is effective through September 25, 1976, and the proposed regulation would continue, through September 24, 1977, the same size requirements on the handling of lemons as are currently in effect. The proposed regulation would limit the handling of lemons grown in District 1, District 2, or District 3 to lemons measuring 1.82 inches or larger. The proposal was submitted by the Lemon Administrative Committee, established under said amended marketing agreement and order as the agency to administer the terms and provisions thereof. The regulation unanimously recommended by the committee reflects its appraisal of the lemon crop and the current and prospective marketing conditions. The size limitations proposed are designed to prevent the handling of lemons, on and after the proposed effective date, of sizes smaller than those herein specified so as to provide consumers with a plentiful supply of lemons of acceptable maturity and juice content consistent with (1) the overall size composition of the crop, and (2) improving returns to growers pursuant to the declared policy of the act. The committee advises there are more than adequate quantities of lemons available in a broad range of sizes to fill all market needs, and lemons smaller than 235's have negligible sales opportunity in fresh form, because they are costly to prepare for market, and have lower juice yield than larger lemons.

Order. (a) From September 26, 1976, through September 24, 1977, no handler shall handle any lemons grown in District 1, District 2, or District 3, which are of a size smaller than 1.82 inches in diameter, which shall be the largest measurement at a right angle to a straight line running from the stem to the blossom end of the fruit: *Provided,* That not to exceed 5 percent, by count, of the lemons in any type of container may measure smaller than 1.82 inches in diameter.

(b) As used in this section "handle", and "handler", "District 1", "District 2", and "District 3" each shall have the same meaning as when used in the said amended marketing agreement and order.

All persons who desire to submit written data, views, or arguments for consideration in connection with the proposed regulation shall file same, in quadruplicate, with the Hearing Clerk, United States Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than September 13, 1976. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

Dated: August 23, 1976.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc.76-25155 Filed 8-26-76;8:45 am]

V41168 AUG 27 76 UMI

[7 CFR Part 912]

[Docket No. AO 333–A5]

GRAPEFRUIT GROWN IN THE INDIAN RIVER DISTRICT IN FLORIDA

Recommended Decision and Opportunity To File Written Exceptions to Proposed Further Amendment of Marketing Agreement and Order

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to the proposed further amendment of the marketing agreement, as amended, and Order No. 912, as amended (7 CFR Part 912) regulating the handling of grapefruit grown in the Indian River District in Florida, hereinafter referred to collectively as the "order."

Interested persons may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C. 20250, by September 17, 1976. The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the Office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The above notice of filing of the decision and of opportunity to file exceptions thereto is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

Preliminary statement. This proposed amendment of the marketing agreement, as amended, and order, as amended, was formulated on the record of a public hearing held at Vero Beach, Florida, on June 24, 1976. Notice of the hearing was published in the June 4 and June 18, 1976, issues of the FEDERAL REGISTER (41 FR 22568; 24716). The proposals contained in the notice of hearing were submitted by the Indian River Grapefruit Committee and Mr. Bernard A. Egan, President, D–N–E Sales, Inc., Ft. Pierce, Florida.

Material issues. The material issues of record are as follows:

(1) Substitute a definition of "standard packed carton" for the definition of "standard packed box", and revise the sections on assessments and overshipments to conform therewith;

(2) Revise committee quorum and voting procedures with respect to recommending weekly regulation;

(3) Provide authority for reapportionment of grower member and handler member representation on the committee; and

(4) Make conforming changes.

Findings and conclusions. The following findings and conclusions on the material issues are based on the record of the hearing:

1. The order currently defines "standard packed box" to mean a unit of measure equivalent to one and three-fifths (1⅗) United States bushels of grapefruit. That term was included in the order to provide a convenient unit upon which to base assessments and to compute allotments. Since the standard packed box is no longer used for packaging Indian River grapefruit, the definition of such term should be deleted from the order. A definition of "carton or standard packed carton" should be included in the order. Carton or standard packed carton should be defined to mean a unit of measure equivalent to four-fifths (⅘) of a bushel of grapefruit.

For a number of years the principal container used for shipping fresh grapefruit was a wood box with a capacity of 1⅗ bushels. This container was referred to as a "standard packed box." The wood box now has been replaced by a corrugated paperboard carton with a capacity of four-fifths of a bushel of grapefruit.

The Fruit and Vegetable Inspection Division of the Florida Department of Agriculture at Winter Haven, which compiles much of the data used by the committee has converted all of its fresh citrus records to a four-fifths bushel carton basis. In addition, the Florida Department of Citrus eliminated the 1⅗ bushel box as an approved container, and under the Department of Citrus rules, Chapter 20–39.02, the standard container for shipping fresh citrus is of four-fifths bushel capacity.

The record indicates that during the 1974–75 season, 94 percent of Indian River fresh grapefruit shipments were in four-fifths bushel corrugated containers, with the balance shipped in bulk, bags, and two-fifths bushel cartons. Thus, it is important that the definition of "standard packed box" be replaced by a definition of "carton or standard packed carton" to recognize current industry usage of a four-fifths bushel carton.

Likewise, §§ 912.41 Assessments and 912.50 Overshipments should be amended so that such sections relate to the definition of "carton or standard packed carton." Accordingly, the order should be amended as hereinafter set forth.

2. The order should be amended, as hereinafter set forth, to revise § 912.32 Procedure of committee to provide that for any decision or recommendation for regulations to be effective during any calendar week, except for a week following three or more weeks of continuous regulation, nine members shall constitute a quorum and nine concurring votes shall be required. The amendment should continue the present requirement that eight members shall constitute a quorum and eight concurring votes shall apply to recommendations to amend an existing regulation. Currently, the order requires that for any recommendation for regulation to be effective for any week prior to the first full week in January and during and after the first full week in May, twelve members shall constitute a quorum and twelve concurring votes shall be required.

The order provided that eight members shall be present and eight agree in any recommendation for regulation during the period beginning with the first full calendar week in January and ending with, but not including the first full calendar week in May. It is during the January through April period that the bulk of fresh Indian River grapefruit is shipped. The order should be amended to require that nine members shall be present and nine agree in any recommendation for regulation, except for a week following three or more weeks of continuous regulation, in order to provide uniform quorum and voting requirements, for such recommendations, throughout the entire season. Committee membership includes six grower members and six handler members, and the record indicates that increasing the quorum and vote requirements by one member for recommendations for regulation during the January through April period would not cause any problems. There was no testimony in opposition to the increase in quorum and vote requirements for a recommendation for regulation during such period. Hence, the amendment is appropriate and it is recommended that it be adopted.

When the marketing order was first made effective in 1962, the industry consensus was that conditions calling for regulations, except in the period beginning with the first full calendar week in January and ending with, but not including the first full week in May, would occur only infrequently. It was believed appropriate to adopt a stringent voting requirement to assure that the committee would be fully convinced that regulation was necessary before a recommendation for such was made. Hence, the order provided that all 12 members shall be present and all 12 agree in any recommendation for a regulation, except in the specified period.

Conditions have changed in the industry. Acreage has increased from 23,000 in the 1961–62 season to 52,500 in 1974–75. Production of white and pink seedless grapefruit in that period increased from 9.1 million 1⅗ bushel boxes to 18.9 million. Many increased planting are located south of the area where the industry was located when the order was put into effect. These plantings consist of young vigorous trees located in areas less subject to cold damage. The trees tend to bloom and to mature fruit earlier in the season. Thus, a heavy volume of fruit now is available for shipment early in the season. Moreover, packinghouse and facilities for conditioning fruit for shipment have increased. Hence, there is pressure on handlers to ship heavier volumes of fruit, facilities are available, and the potential for excessive shipments and oversupplied markets in the early part of the season prior to January is substantially greater now than it was when the order was initiated. The evidence indicates that the provision which requires a full committee for a quorum and unanimous vote by all members to recommend a regulation in the May to January period is no longer appropriate. This provision has prevented the committee from taking action to recommend regulations, although such action was favored by as many as eleven members.

Hence, it is concluded that the provision is not in the best interests of the order and its objectives.

The order, in § 912.46, sets forth the factors to be considered by the committee in arriving at a decision as to whether or not to recommend that a regulation be issued by the Secretary. The committee should be in a position to consider such factors and to make such recommendation, if it determines that such is in the best interest of the industry.

The proposal submitted by the committee and carried in the notice of hearing which would provide that nine members shall constitute a quorum and not less than nine concurring votes shall be required to recommend a regulation to be effective during any calendar week, except for a week following three or more weeks of continuous regulation, appears to be reasonable and appropriate in the circumstances. Therefore, it is concluded that the order should be amended to so provide, as hereinafter set forth.

3. The order should be amended, as hereinafter set forth, to revise § 912.25 Selection of handler members of the Indian River Grapefruit Committee to provide for reallocation of the six handler member positions between handlers affiliated with cooperative marketing organizations, hereinafter referred to as "cooperative" members, and handlers not so affiliated, hereinafter referred to as "independent" members, upon the basis of the relative amounts of grapefruit handled during the three most recent completed seasons.

Handler membership currently is divided equally between the two groups with each being allocated three members. It has been customary to consider volume of shipments in the allocation of handler members of marketing order committees among handlers. The current allocation of members was made at the time the order was promulgated in 1962 when, according to the record, cooperative handlers accounted for 45 percent of the volume of shipments and independent handlers for 55 percent. The record indicates independent handlers have increased their proportion of the volume shipped. Hence, the current allocation is not representative of the volume of shipments. The proposition that the order should be modified to provide for reallocation between cooperative and independent handlers was supported by all witnesses, and it was generally agreed that after the initial reallocation further adjustments should be considered at three year intervals to maintain a balance based upon relative volume of shipments. However, there was disagreement as to when the initial reallocation should be made. One view was that it should be made immediately after the amendment is made effective. The other was that it should apply to the committee which would be selected for the 1977–78 term, as nominations had already been submitted for the 1976–77 term. The term of office of the committee begins August 1 of one year and ends July 31 of the following year. While it would be less disruptive of committee operations to delay reallocation until nominations are made for the term beginning August 1, 1977, it is concluded that it is appropriate to provide for the initial reallocation to be made effective at the same time as the amended voting requirements. This will require renomination of handler nominees to effect changes in composition of the handler membership of the committee, as appointments of committee members will have been made for the 1976–77 term by the effective date of the amendment, if the order is amended. However, the production area is comparatively small and nomination meetings of handlers could be held with little difficulty. Such meetings should be held and new appointments made between the time the amended order is issued and the time it becomes effective. Such meetings would be held in accordance with §§ 912.24 and 912.120, except that the times and dates specified therein shall not apply.

Prior to nomination meetings for the initial reallocation, and before the nomination meetings each third year thereafter, the committee should review Indian River grapefruit shipments by cooperative handlers and independent handlers for each of the three most recently completed seasons. For the initial reallocation, this would include shipments for the 1973–74, 1974–75, and 1975–76 seasons. In arriving at the proportional volume of shipments both interstate and export shipments would be tabulated for all cooperative handlers, including handlers affiliated with a cooperative central selling agency, and for all independent handlers. The annual percentages shipped would be calculated for all independent handlers as a group and for all cooperative handlers as a group for each of the three most recently completed seasons. Next a simple average of these percentages would be calculated. By this method, each season would be weighted equally by averaging the percentages handled by each group. This would avoid giving undue weight to seasons when shipments were unusually large.

After the Indian River Grapefruit Committee has compiled the average percentages handled by cooperative and independent handlers for each of the three seasons, it should make its recommendation for allocating handler member positions to the Secretary. It is concluded from the record, however, that regardless of the percentages handled by cooperative or independent handlers that each such group of handlers shall be allocated not less than one handler membership on the committee.

The following percentages of grapefruit shipments were suggested as a basis for allocating handler members and should apply in the initial reallocation. However, the percentages so indicated should not be considered as inflexible for future reallocations as experience may disclose a need for modification by the committee, with the approval of the Secretary, to meet changing circumstances:

Percentages of grapefruit shipped previous 3-year-period		Allocation of handler members	
Cooperatives	Independents	Cooperatives	Independents
Under 25	75 and above	1	5
25 through 41.99	58 through 74.99	2	4
42 through 57.99	42 through 57.99	3	3
58 through 74.99	25 through 41.99	4	2
75 and above	Under 25	5	1

Witnesses representing independents supported the proposal that grower membership should be allocated on the basis of the relative volumes of grapefruit shipped by the two handler groups. However, this was opposed by other witnesses, including committee witnesses, who maintained that allocation of grower representation should recognize the relative numbers of growers shipping through the two types of handlers, and that using shipments of handler groups to determine grower member composition would be inequitable, in that it would tend to give an undue advantage to the larger volume growers. Currently, provisions of the order allocate three grower members to the growers that ship through independent handlers and three members to the growers who ship through cooperatives. Testimony was presented that although the volume of shipments of independent handlers is larger than that of cooperative handlers, the number of growers is more nearly equal as growers who ship through the independent handlers tend to be the larger volume growers. A review of the record does not disclose a preponderence of evidence supporting either position. Therefore, it is concluded that no change should be made in the current allocation of grower membership as between independent and cooperative growers.

4. A proposal in the notice of hearing was that consideration should be given to making such other changes in the order as may be necessary to make the entire order conform to any amendments that may result from this proceeding. This proposal was supported at the hearing without opposition. However, no conforming changes other than those heretofore mentioned are necessary.

Rulings on briefs of interested persons. At the conclusion of the hearing, the Administrative Law Judge fixed July 23, 1976, as the final date for interested persons to file proposed findings and conclusions, and written arguments or briefs, based upon the evidence received at the hearing.

Briefs and proposed findings and conclusions were filed on behalf of certain interested persons. These briefs, proposed findings and conclusions, and the evidence in the record were considered in making the findings and conclusions set

V 41 168
AUG 27 76
UMI

forth herein. To the extent that the suggested findings and conclusions filed by interested persons are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or to reach such conclusions are denied.

General findings. Upon the basis of the record, it is found that:

(1) The findings hereinafter set forth are supplementary, and in addition, to the previous findings and determinations which were made in connection with the issuance of the marketing agreement and order and each previously issued amendment thereto. Except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein, all of said prior findings and determinations are hereby ratified and affirmed;

(2) The marketing agreement and order, as amended, and as hereby proposed to be further amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the act;

(3) The marketing agreement and order, as amended, and as hereby proposed to be further amended, regulate the handling of grapefruit grown in the Indian River District in Florida in the same manner as, and are applicable only to persons in the respective classes of commercial and industrial activity specified in, the marketing agreement and order upon which hearings have been held;

(4) The marketing agreement and order, as amended, and as hereby proposed to be further amended, are limited in their application to the smallest regional production area which is practicable, consistently with carrying out the declared policy of the act, and the issuance of several orders applicable to subdivisions of the production area would not effectively carry out the declared policy of the act;

(5) There are no differences in the production and marketing of grapefruit grown in the Indian River District in Florida which make necessary different terms and provisions applicable to different parts of such area; and

(6) All handling of grapefruit grown in the Indian River District, as defined in the marketing agreement and order, as amended, and as hereby proposed to be further amended, is in the current of interstate or foreign commerce or directly burdens, obstructs, or affects such commerce.

Recommended amendment of the marketing agreement and order. The following amendment of the marketing agreement and order, as amended, is recommended as the detailed means by which foregoing conclusions may be carried out:

1. (a) Section 912.8 is revised to read as follows:

§ 912.8 Carton or standard packed carton.

"Carton or standard packed carton" means a unit of measure equivalent to four-fifths (4/5) of a United States bushel of grapefruit, whether in bulk or in any container.

(b) Paragraph (a) of § 912.41 is revised to read as follows:

§ 912.41 Assessments.

(a) Each handler who first handles fruit shall pay to the committee, upon demand, such handler's pro rata share of the expenses which the Secretary finds will be incurred by such committee for its maintenance and functioning during each fiscal period. Each such handler's share of such expenses shall be that proportion thereof which the total quantity of fruit shipped by such handler as the first handler thereof during the applicable fiscal period is of the total quantity of fruit so shipped by all handlers during the same fiscal period. The Secretary shall fix the rate of assessment per standard packed carton of fruit to be paid by each such handler. The payment of assessments for the maintenance and functioning of the committee may be required under this part throughout the period it is in effect irrespective of whether particular provisions thereof are suspended or become inoperative.

* * * * *

(c) Section 912.50 is revised to read as follows:

§ 912.50 Overshipments.

During any week for which the Secretary has fixed the total quantity of grapefruit which may be handled, any person who has received an allotment may handle, in addition to the total allotment available to him, an amount of grapefruit equivalent to 10 percent of such total allotment or 1,000 cartons, whichever is greater: *Provided*, That the Secretary, on the basis of a recommendation of the committee or other available information, may set such amount at any figure not less than 1,000 cartons and not more than 2,000 cartons. Handlers may overship (a) during such week the entire 1,000 cartons or other amount not in excess of 2,000 cartons as may be set by the Secretary, or (b) during two or more consecutive weekly periods when regulations are in effect, any portion of such 1,000 cartons or any other amount set by the Secretary until the accumulated overshipments reach the applicable maximum number of cartons permitted to be overshipped. The quantity of grapefruit so overshipped when regulations are in effect shall be deducted from such person's allotment for the week following the one in which the total permitted overshipment is reached or for the week in which such person makes no shipments of grapefruit. If such person's allotment for such week is an amount less than the excess shipments permitted under this section, the remaining quantity shall be deducted from succeeding weekly allotments issued to such person until such excess has been entirely offset: *Provided*, That any time there is no volume regulation in effect it shall be deemed to cancel all requirements to undership allotment because of previous overshipments pursuant to this part.

2. Paragraph (b) of § 912.32 is revised to read as follows:

§ 912.32 Procedure of committee.

* * * * *

(b) For any decision or recommendation with respect to regulations to be effective during any calendar week, except for a week following three or more weeks of continuous regulation, nine members shall constitute a quorum and nine concurring votes shall be required. The quorum necessary to make a recommendation for regulation for any week immediately following three or more continuous weeks of regulation shall be twelve members and twelve concurring votes shall be required. The requirements of this paragraph shall not apply to recommendations to amend an existing regulation.

* * * * *

3. Section 912.24 is amended as follows:

(1) Redesignate paragraph (b) as paragraph (c) and insert a new paragraph (b) as follows:

§ 912.24 Nomination of handler members for the Indian River Grapefruit Committee.

(a) * * *

(b) The committee, as soon as practicable after issuance of the amendment to this part and every third year thereafter, not later than the date prescribed in paragraph (a) of this section, shall reallocate the six handler member and six handler alternate member positions for which voting for nominees is to take place. At such meetings, voting for nominees shall be in accordance with representation which may be required as a result of any reallocation. The reallocation of committee member and alternate member positions shall be between handlers affiliated with bona fide cooperative fresh fruit marketing organizations, herein referred to as "cooperative" handlers, and handlers not so affiliated, herein referred to as "independent" handlers, on the basis of the relative amounts of grapefruit shipped by each group during each of the three immediately preceding completed crop years. The committee shall make its recommendation for allocating handler member positions to the Secretary. The following percentages of grapefruit shipments shall be used by the committee as a basis for allocating handler member and alternate member representation: *Provided*, That the committee, with the approval of the Secretary, may modify the percentages and/or allocation, whenever necessary to meet changing circumstances: *Provided*, That in no event shall any group be allocated less than one member.

Percentages of grapefruit shipped previous 3-year-period		Allocation of handler members	
Cooperatives	Independents	Cooperatives	Independents
Under 25	75 and above	1	5
25 through 41.99	58 through 74.99	2	4
42 through 57.99	42 through 57.99	3	3
58 through 74.99	25 through 41.99	4	2
75 and above	Under 25	5	1

* * * * * *

(2) Section 912.25 is amended to read as follows:

§ 912.25 Selection of handler members of the Indian River Grapefruit Committee.

From the nominations made pursuant to § 912.24, or from other qualified persons, the Secretary shall select six members and six alternate members of the committee. Three such members and their alternates shall be affiliated with bona fide cooperative fresh fruit marketing organizations, and three such members and their alternates shall not be so affiliated: *Provided*, That when membership is reallocated as provided in § 912.24(b), selection shall reflect such reallocation.

Signed at Washington, D.C., on August 23, 1976.

WILLIAM T. MANLEY,
Deputy Administrator, Program Operations.

Animal and Plant Health Inspection Service

[9 CFR Parts 320, 325, 327]

IMPORTATION OF UNDENATURED, INEDIBLE MEAT AND MEAT PRODUCTS

Withdrawal of Proposed Regulation

Purpose.—The purpose of this document is to announce that the Department is withdrawing the proposed regulation to permit the importation of undenatured, inedible meat and meat products.

Statement of considerations.—On May 31, 1974, the Animal and Plant Health Inspection Service published in the FEDERAL REGISTER (39 FR 19222) a proposal to amend the Federal meat inspection regulations (9 CFR Parts 320, 325, and 327) to permit the importation of undenatured, inedible meat and meat products for use in nonhuman food products. Forty-four individual written comments were received of which 37 opposed the amendment on grounds that a large surplus of these materials already exists in the United States, and increasing this supply through importation would depress the market for such domestic products. Several comments contended that increasing the volume of inedible products would make control of them more difficult and thereby heighten the potential for the diversion of these articles into human food channels. The possibility for livestock diseases to be introduced by means of the inedible products was referred to in several comments but no evidence to support such a claim was provided.

Those commenting in favor of the proposal cited the need for alternate sources of inedible materials for pet foods and made claims that this proposal would provide more jobs in the pet food industry.

In view of indications that sufficient inedible meat and meat products suitable for use by the pet food industry are now readily available in the United States and that the potential for diversion of these products to human food could be enhanced, the Department has decided good reasons exist to withdraw the proposal published May 31, 1974, in the FEDERAL REGISTER (39 FR 19222).

Done at Washington, D.C., on August 23, 1976.

HARRY C. MUSSMAN,
Acting Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF JUSTICE

Law Enforcement Assistance Administration

[28 CFR Part 30]

FEDERAL AND FEDERALLY ASSISTED PROGRAMS AND PROJECTS

Proposed Draft Regulation Relating to the LEAA Implementation of the OMB Circular No. A-95 Revised: Evaluation, Review, and Coordination

The Law Enforcement Assistance Administration hereby proposes to amend Part 30 to Chapter I of Title 28 of the Code of Federal Regulations. This regulation will amplify current LEAA regulation governing compliance with OMB Circular No. A-95 Revised entitled "Evaluation, Review, and Coordination of Federal and Federally Assisted Programs and Projects."

It is anticipated that this proposed amplification shall be promulgated in final form and become effective on or about October 15, 1976.

Interested persons may sumbit written comments, suggestions, or objections concerning the proposed regulation to Thomas J. Madden, General Counsel, Law Enforcement Assistance Administration, United States Department of Justice, 633 Indiana Avenue, Washington, D.C. 20531, on or before September 30, 1976. All written comments received from the public through that date will be considered by LEAA in formulating the final regulation.

RICHARD W. VELDE,
Administrator.

Accordingly, Part 30 of Title 28 is revised to read as follows:

Subpart A—General Provisions

Sec.
30.1 Purpose.
30.2 Authority.
30.3 Implementation.

Subpart B—Project Notification Procedures

30.4 Notification of intent.
30.5 Application submission.
30.6 Indian tribes.
30.7 Clearinghouse review.
30.8 SPA responsibilities.
30.9 Funding agency responsibilities.
30.10 Requests for exemptions and procedural variations.
30.11 Joint funding.

Subpart C—Direct Federal Development

30.12 Non-applicability.

Subpart D—State Plans

30.13 General.
30.14 Governor's comments.

Subpart E—Coordination of Planning in Multijurisdictional Areas

30.15 Planning and development districts or regions.
30.16 Governor's review and comment.
30.17 Consultation in review boundaries.
30.18 Justification for variance.
30.19 Common and consistent planning bases and coordination of related activities in multijurisdictional areas.
30.20 Memorandum of agreement signatories.
30.21 Applicant for assistance to accomplish areawide planning.
30.22 SPA implementation of memorandum of agreement requirement.
30.23 Inability to effectuate a memorandum of agreement.

Subpart F—Definitions

30.24 Definitions.

AUTHORITY: OMB Circ. No. A-95 Rev.; sec. 501, Crime Control Act of 1973, as amended (42 U.S.C. 3701).

Subpart A—General Provisions

§ 30.1 Purpose.

The purpose of this regulation is to implement OMB Circular A-95 Revised (41 FR 2052 (January 13, 1976)) for the cooperation with the Law Enforcement Assistance Administration (LEAA) and State Planning Agencies (SPAs) in the evaluation, review, and coordination of LEAA assisted programs and projects.

§ 30.2 Authority.

This regulation is based upon and incorporates OMB Circular No. A-95 Revised, and is promulgated for the:

(a) Encouragement for the use of a project notification and review system to facilitate coordinated planning on an intergovernmental basis for certain Federal assistance programs in furtherance of section 204 of the Demonstration Cities and Metropolitan Development Act of 1966 and Title IV of the Intergovernmental Cooperation Act of 1968.

(b) Securing the comments and views of State and local agencies which are authorized to develop and enforce environmental standards on certain Federal or federally assisted projects affecting the environment pursuant to section 102 (2)(C) of the National Environmental Policy Act of 1969 and regulations of the Council on Environmental Quality.

V41168
AUG 27 76
UMI

(c) Furthering the objectives of Title VI of the Civil Rights Act of 1964; section 262(b) of the Juvenile Justice and Delinquency Prevention Act of 1974; and section 518(c) of the Crime Control Act of 1973.

§ 30.3 Implementation.

Full compliance with OMB circular No. A–95 Revised is required by all applicants for funds under programs associated with section 205, section 306(a), section 455(a) and section 515(b) of the Crime Control Act of 1973, Pub. L. 93–83 as amended by Pub. L. 93–415, and section 222(a) and section 224(a) of the Juvenile Justice Delinquency Prevention Act of 1974, Pub. L. 93–415. This regulation and OMB Circular No. A–95 Revised will have applicability to all programs, projects, and activities (or significant substantive changes thereto) for which LEAA assistance is being sought as outlined below:

(a) Subpart B of this part and Part I of OMB Circular No. A–95 Revised cover the following programs:

(1) 16.500 Law Enforcement Assistance—Comprehensive Planning Grants.

(2) 16.501 Law Enforcement Assistance—Discretionary Grants.

(3) 16.502 Law Enforcement Assistance—Improving and Strengthening Law Enforcement and Criminal Justice.

(4) 16.515 Criminal Justice Systems Development.

(5) 16.516 Law Enforcement Assistance—Juvenile Justice and Delinquency Prevention—Formula Allocation to the States.

(6) 16.517 Law Enforcement Assistance—JJPD Special Emphasis Prevention and Treatment.

(b) Part II of OMB Circular No. A–95 Revised does not apply to LEAA assisted programs and projects.

(c) Subpart D of this part and Part III of OMB Circular No. A–95 Revised cover the following programs:

(1) 16.502 Law Enforcement Assistance—Improving and Strengthening Law Enforcement and Criminal Justice.

(2) 16.516 Law Enforcement Assistance—Juvenile Justice and Delinquency Prevention—Allocation to the States.

(d) Subpart E of this part and Part IV of OMB Circular No. A–95 Revised cover the same programs as listed in § 30.3(a).

Subpart B—Project Notification Procedures

§ 30.4 Notification of intent.

(a) Any applicant undertaking to apply to LEAA or an SPA for assistance for a project or program or major substantive modification thereto under a LEAA assisted project or program covered by this Subpart and Part I of OMB Circular No. A–95 Revised is required to notify both the State and areawide planning and development clearinghouses in the jurisdiction in which the project is to be located of the applicant's intent to apply for assistance at such time as the applicant determines to develop an application.

(b) In the case of the applications for projects involving land or water use and development or construction in the National Capital (as defined in section 1(b) of the National Capital Planning Act of 1952, as amended) a copy of the notification is to be sent to the National Capital Planning Commission (NCPC) in addition to the State and area wide clearinghouses.

(c) In the case of an application in any State for an activity that is statewide or broader in nature and does not have specific applicability to areawide or local planning and programs, the notification is to be sent only to the State clearinghouse unless otherwise required by the State clearinghouse.

(d) Notifications shall include a summary description of the proposed project. The summary description shall contain the following information:

(1) Identity of the applicant.

(2) The geographic location of the proposed project. A map should be provided, if appropriate.

(3) A brief description of the proposed project by type, purpose, general size or scale, estimated cost, beneficiaries, or other characteristics which will enable the clearinghouses to identify agencies of State or local government having plans, programs, or projects that may be affected by the proposed project.

(4) A statement as to whether the applicant will be required by the funding agency to submit environmental impact information for the proposed project.

(5) The LEAA program title and number under which assistance will be sought as provided in § 30.3.

(6) The estimated date the applicant expects to formally file an application.

(e) Applicants are encouraged to contact the clearinghouse to which the notification will be sent to obtain notification forms and instructions and to submit the notification containing the preliminary information indicated above to the clearing house at the earliest possible time to expedite clearinghouse review.

(f) Notifications of all projects affecting a unit of general local government may be requested by the chief executive of such unit to be sent to such chief executive or to such central agency as the chief executive may designate for review and reference to appropriate agencies of such unit.

§ 30.5 Application submission.

(a) All applications for assistance under programs covered by this Subpart must be submitted to appropriate clearinghouses for review prior to their submission to the funding agency.

(b) Where review by clearinghouse has been completed prior to completion of an application, the applicant is not required to submit a completed application to the clearinghouses prior to submission to the funding agency. However, the applicant may be requested by the clearinghouses to supply an information copy of the completed application when the application is submitted to the funding agency.

(c) Applicants will include with the completed application as submitted to the funding agency:

(1) All comments and recommendations by or through clearinghouses, along with a statement that such comments have been considered prior to submission of the application; or

(2) Where no comments have been received from a clearinghouse a statement that the procedures outlined in this section have been followed and that no comments or recommendations have been received.

(d) Applications for renewal or continuation grants or applications not submitted to or acted upon by the funding agency within one year after completion of clearinghouse review will be subject to re-review upon request of the clearinghouse.

(e) Applications submitted to clearinghouses for review from nongovernmental applicants are not required to include confidential information concerning the financial status or structure or the personnel of the applicant organization, even though the funding agency may require such information to be sent to the funding agency as part of the application.

§ 30.6 Indian tribes.

(a) Applications from federally recognized Indian tribes are not subject to the requirements of this Subpart or Part II of OMB Circular No. A–95 Revised. However, Indian tribes may voluntarily comply with this Subpart and are encouraged to do so.

(b) The funding agency shall notify the appropriate State and areawide clearinghouses of any applications submitted by federally recognized Indian tribes upon receipt.

(c) Where a federally recognized Tribal Government has established a mechanism for coordinating the activities of Tribal departments, divisions, enterprises, and entities, such Tribal Government may require upon obtaining approval from LEAA that applications for assistance under programs covered by this Subpart from such Tribal departments, division, enterprises, and entities shall be subject to review by such Tribal coordinating mechanism as though it were a State or areawide clearinghouse. Upon receiving such request for approval, LEAA shall transmit the request to the Office of Management and Budget for comment.

§ 30.7 Clearinghouse review.

(a) Comments and recommendations made by or through clearinghouses with respect to any project are for the purpose of assuring maximum consistency of such project with State, areawide, and local comprehensive plans.

(b) An applicant may generally expect that State and areawide clearinghouses will complete review of a project notification within 30 days after receipt of the notification. However, clearinghouses may request an additional 30 days to review the completed application. Where

the applicant has not received a response to the applicant's notification from the clearinghouse within the initial 30-day period, the applicant may consider the clearinghouse to have waived its opportunity to review and comment on the proposed project.

(c) If an applicant submits a completed application to State and areawide clearinghouses during the 30-day notification review period, the applicant may expect that the clearinghouses will complete review within 30 days plus the number of days remaining in the 30-day notification period. If an applicant submits to the clearinghouses a completed application without a project notification, the applicant may expect that the clearinghouses will complete review of the application within 60 days. In all other cases, the applicant may expect that the clearinghouses will complete review of a completed application within 30 days. If clearinghouse review of an application is not completed within these time periods, the applicant may consider that the application has been favorably reviewed and may submit the application to the funding agency for consideration.

§ 30.8 SPA responsibilities.

SPAs shall provide procedures:

(a) For the submission of applications for programs or projects covered by this subpart to the appropriate clearinghouses.

(b) To insure that all applications contain a State Application Identifier (SAI) number. This is mandatory for use in notifying clearinghouses of action taken on the application.

(c) To insure that all comments have been considered and made a part of the application.

§ 30.9 Funding agency responsibilities.

(a) A funding agency that receives an application that does not carry evidence that appropirate clearinghouses have been given an opportunity to review the application shall return the application to the applicant with instructions to fulfill the requirements of this Subpart.

(b) The funding agency must notify appropriate clearinghouses within seven working days of any major action taken on any application that has been reviewed by such clearinghouses. Major actions will include awards, rejections, returns for amendment, deferrals, or withdrawals. The standard multipurpose form, SF 424, as prescribed by Treasury Circular TC 1082 (as revised, October 1975) will be used for this purpose.

(c) Where a clearinghouse has recommended against approval or approval only with specific and major substantive changes and the funding agency approves the application substantially as submitted, the funding agency will provide the clearinghouse with, along with the action notice, an explanation therefor.

(d) Where a clearinghouse has recommended approval of a project because it conflicts with or duplicates another Federal or federally assisted project, the funding agency will consult with the agency assisting the referenced project prior to acting if it plans to approve the application.

§ 30.10 Requests for exemptions and procedural variations.

(a) LEAA may request an exemption from OMB for certain classes of projects or activities under programs otherwise covered which:

(1) Meet any of the following characteristics:

(i) Assistance to organizations and institutions for the provision of education or training not designed to meet the needs of specific individual States or localities.

(ii) Research, not involving capital construction, which is national in scope or is not designed to meet the needs or to address problems of a particular State, area, or locality (except in the case of demonstration or pilot research programs where projects may have an impact on the community or area in which they are being conducted.

(iii) Assistance to educational, medical, or similar service institutions or agencies for internal staff development or management improvement purposes.

(iv) Assistance to educational institutions or activities that are part of a school's regular academic program and are not related to local programs of health, welfare, employment, or other social services.

(v) Assistance for construction involving only routine maintenance, repair, or minor construction which does not change the use or the scale or intensity of use of the structure or facility.

(vi) Assistance for law enforcement projects involving confidential law enforcement investigative information, techniques, or procedures.

(2) Are of small scale or size or are highly localized as to impact; or

(3) Display other characteristics which might make review impractical.

(b) LEAA may request procedural variations from normal review processes:

(1) On a temporary basis for programs with time constraints brought about because of start up requirements or other unusual circumstances beyond the control of the funding agency.

NOTE: Delay in fund availability is not normally an acceptable reason for a variation. When a delay is anticipated, applicants should be instructed to have their applications reviewed by clearinghouses in readiness for submission when funds become available.

(2) For programs where statutory or related procedural limitations make the normal review processes impracticable.

(c) All requests from LEAA offices or SPAs through LEAA Regional Offices for exemptions or procedural variations should be routed through the Office of Regional Operations, LEAA, Washington, D.C. 20531.

(d) Individual clearinghouses may exempt certain types of projects from review for reasons indicated above or for other reasons appropriate to the State or area.

(e) Applicants should be aware that in various States State law requires review of applications for Federal assistance under various programs not covered by this subpart. Implementation of such law is enforced through State rules and regulations, and applicants are urged to ascertain the existence of such laws and to acquaint themselves with applicable State procedures.

§ 30.11 Joint funding.

Applications for assistance to activities under the Joint Funding Simplification Act (Pub. L. 93–510) or any other joint funding authority, which involves activities funded under one or more of the programs covered under this Subpart, will be subject to the requirements of this subpart.

Subpart C—Direct Federal Development

§ 30.12 Non-applicability.

Part II of the OMB Circular No. A–95 Revised does not apply to LEAA.

Subpart D—State Plans

§ 30.13 General.

The purpose of this subpart and Part III of OMB Circular No. A–95 Revised is to provide information about the relationship to State or areawide comprehensive planning of the Annual Comprehensive State Plan.

§ 30.14 Governor's comments.

The Governor, or the agency the Governor has designated to perform reviews under Part III of OMB Circular No. A–95 Revised, must be given an opportunity to comment (up to 45 days) on the relationship of the Annual Comprehensive State Plan to comprehensive and other State plans and programs and to those of affected local or areawide jurisdictions. A period of 45 days must be provided the Governor or the delegated agency to make such comments and any comments must be submitted with the Annual Comprehensive State Plan.

Subpart E—Coordination of Planning in Multijurisdictional Areas

§ 30.15 Planning and development districts or regions.

The States are encouraged to:

(a) Exercise leadership in delineating and establishing a system of planning and development districts or regions in each State, which can provide a consistent geographic base for the planning and coordination of Federal, State, and local development programs.

(b) Use agencies that have been designated to perform areawide comprehensive planning, planning and development districts or regions established pursuant to paragraph (a) of this section (generally, areawide clearinghouses designated pursuant to Part I of OMB Circular No. A–95 Revised) to carry out or coordinate planning. In the case of interstate metropolitan areas, agencies designated as metropolitan areawide clearinghouses

V41168 AUG 27 76 UMI

should be utilized to the extent possible to carry out or coordinate LEAA assisted or required areawide planning.

§ 30.16 Governor's review and comment.

Prior to the designation or redesignation (or the approval thereof) of any planning and development district or region under the LEAA programs, the Governor(s) of the State(s) in which the district or region will be located must be allowed a period of 30 days to review the boundaries thereof and comment on its relationship to planning and development districts or regions established by the State. Where the State has established such planning and development districts, the boundaries of areas designated under LEAA programs will conform to them unless there is clear justification for not doing so.

§ 30.17 Consultation in review boundaries.

Where the State has not established planning and development districts or regions which provide a basis for evaluation of the boundaries of the area proposed for designation, major units of general local government and the appropriate Federal Regional Council (FRC) will also be consulted prior to designation of the area to assure consistency with districts established under inter-local agreements and under related Federal programs.

§ 30.18 Justification for variance.

The Office of Management and Budget will be notified through the appropriate FRC by LEAA of any proposed designation and will be informed of such designation when it is made, including such justifications as may be required under § 30.16 above.

§ 30.19 Common and consistent planning bases and coordination of related activities in multijurisdictional areas.

(a) Each SPA will develop procedures and requirements for applications for multijurisdictional planning and development assistance under appropriate programs to assure the fullest consistency and coordination with planning and development being carried on by the areawide comprehensive planning agency or clearinghouse designated under Part I of the OMB Circular No. A–95 Revised. These procedures shall include provision for submission to the funding agency by any applicant for multijurisdictional planning assistance, if the applicant is other than an areawide comprehensive planning agency, of a memorandum of agreement between the applicant and such areawide comprehensive planning agency covering the means by which their planning activities will be coordinated. The agreement will cover but need not be limited to the following matters:

(1) Identification of relationships between the planning proposed by the applicant and that of the SPA and of similar or related activities that will require coordination;

(2) The organizational and procedural arrangements for coordinating such activities, such as: Overlapping board membership, procedures for joint review of project activities and policies, information exchange, etc.;

(3) Cooperative arrangements for sharing planning resources (funds, personnel, facilities, and services); and

(4) Agreed upon base data, statistics and projections (social, economic, demographic) on the basis of which planning in the area will proceed.

(b) Each SPA must provide to LEAA a description of:

(1) The extent to which law enforcement and criminal justice planning regions are consistent with State established planning and developing districts or regions together with reasons for any inconsistency.

(2) Procedural arrangements to assure maximum coordination with related planning under other Federal programs citing existing or planned memoranda of agreement and specific Regional Planning Units and/or State agencies which must execute memoranda of agreement.

§ 30.20 Memorandum of agreement signatories.

The signatories to the memorandum of agreement are:

(a) The areawide comprehensive planning agency (usually the areawide A–95 clearinghouse), and

(b) The applicant for assistance to carry out areawide planning if other than paragraph (a) of this section. (Not infrequently paragraphs (a) and (b) of this section are the same, in which case no memorandum of agreement is required.)

§ 30.21 Applicant for assistance to accomplish areawide planning.

The applicant referred to in § 30.20 (b) will in most cases mean any Regional Planning Units which cover a multijurisdictional area comprising, encompassing or extending into more than one unit of general local government and which does not operate under the auspices of an areawide comprehensive planning agency.

§ 30.22 SPA implementation of memorandum of agreement requirement.

The SPA is required to implement procedures to assure that the memorandum of agreement requirement is followed.

§ 30.23 Inability to effectuate a memorandum of agreement.

Where an applicant has been unable to effectuate a memorandum of agreement, the applicant will submit a statement indicating the efforts which were made to secure an agreement and the issues that have prevented it. In such case, the SPA in consultation with LEAA and the designated State clearinghouse, will undertake, within a 30 day period after receipt of the application, resolution of the issue before approving the application, if it is otherwise in good order. The SPA may seek the aid of the FRC if LEAA is unable to achieve an acceptable resolution.

Subpart F—Definitions

§ 30.24 Definitions.

(a) "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, the Trust Territory of the Pacific Islands, and any territory or possession of the United States.

(b) "Unit of general local government" means any city, county, township, town, borough, parish, village or other general purpose political subdivision of State, an Indian tribe which performs law enforcement functions as determined by the Secretary of the Interior, or, for the purpose of assistance eligibility, any agency of the District of Columbia government performing law enforcement functions in and for the District of Columbia.

(c) "Special purpose unit of local government" is any special district, public purpose corporation, or other strictly limited purpose political subdivision of a State.

(d) "LEAA assistance, LEAA financial assistance, LEAA assistance program, or LEAA assisted programs" are programs that provide assistance through LEAA grant or contractual arrangements; these also include technical assistance programs or programs providing assistance in the form of loans. The term does not include any annual payment by the United States to the District of Columbia authorized by article VI of the District of Columbia Revenue Act of 1947 (D.C. Code sec. 47–2501a and 47–2501b).

(e) "Funding agency" is the Law Enforcement Assistance Administration or, in the case of block or formula grant programs, the State Planning Agency which is responsible for final approval of applications for assistance.

(f) "Metropolitan area" is a standard metropolitan statistical area as established by the Office of Management and Budget, subject, however, to such modifications and extensions as the Office of Management and Budget may determine to be appropriate for the purpose of section 204 of the Demonstration Cities and Metropolitan Development Act of 1966, and the OMB Circular No. A–95 Revised.

(g) "Areawide" means comprising, in metropolitan areas, the whole of contiguous urban and urbanizing areas; and in non-metropolitan areas, contiguous counties or other multijurisdictional areas having common or related social, economic, or physical characteristics indicating a community of developmental interests or, in either, the area included in a sub-State district designated pursuant to paragraph 1d, Part IV, Attachment A of the OMB Circular No. A–95 Revised.

(h) "Planning and development clearinghouse or clearinghouses" includes:

(1) State Clearinghouse" which is an agency of the State government designated by the Governor or by State law to carry out the requirements of paragraph 3, Part I, Attachment A of the OMB Circular No. A–95 Revised.

(2) "Areawide clearinghouse" means:

(i) In non-metropolitan areas a comprehensive planning agency designated by the Governor (or Governors in the case of regions extending into more than one State) or by State law to carry out requirements of OMB Circular No. A–95 Revised.

(ii) In metropolitan areas an areawide agency that has been recognized by the Office of Management and Budget as an appropriate agency to perform review functions under section 204 of the Demonstration Cities and Metropolitan Development Act of 1966, Title IV of the Intergovernmental Cooperation Act of 1968, and OMB Circular No. A–95 Revised.

(i) "Multijurisdictional area" means any geographical area comprising, encompassing, or extending into more than one unit of general local government.

(j) "Planning and developmental district or region" means a multijurisdictional area that has been formally designated or recognized as an appropriate area for planning under State law or Federal program requirements.

(k) "Direct Federal development" means planning and construction of public works, physical facilities, and installations or land and real property development (including the acquisition, use, and disposal of real property) undertaken by or for the use of the Federal Government or any of its agencies; or the leasing of real property for Federal use where the use or intensity of use of such property will be substantially altered.

Occupational Safety and Health Administration

[29 CFR Part 1952]

ALASKA

Proposed Supplement to Approved Plan

1. *Background.* Part 1953 of Title 29, Code of Federal Regulations, prescribes procedures under Section 18 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 667) (hereinafter called the Act) for the review of changes and progress in State plans which have been approved in accordance with Section 18 (c) of the Act and 29 CFR Part 1902. On August 10, 1973, notice was published in the Federal Register (38 FR 21630) of the approval of the Alaska Plan and the adoption of Subpart R to Part 1952 containing this decision. On June 2, 1976, the State of Alaska submitted to the Seattle Regional Office of the Occupational Safety and Health Administration a supplement to the plan involving a State initiated change. Following regional review, the supplement was forwarded to the Assistant Secretary of Labor for Occupational Safety and Health (hereinafter referred to as the Assistant Secretary) for his determination as to whether it should be approved. The supplement is described below.

2. *Description of the supplement.* The State has submitted a revision to the plan to withdraw from coverage the Maritime issue as set forth in the original plan. The State has requested that OSHA maintain jurisdiction of the on-shore operations within the State for the following reasons: (1) to eliminate jurisdictional problems within a single industry; and, (2) to relieve employers and employees of having to deal with two separate jurisdictions and Review Commissions concerning identical hazards.

3. *Location of the plan and its supplement for inspection and copying.* A copy of the plan and the supplement may be inspected and copied during normal business hours at the following locations: Office of the Associate Assistant Secretary for Regional Programs, Occupational Safety and Health Administration, Room N–3112, 200 Constitution Avenue NW., Washington, D.C. 20210; Office of the Assistant Regional Administrator, Occupational Safety and Health Administration, Room 6048, 909 First Avenue, Seattle, Washington 98174; and the Alaska Department of Labor, Juneau, Alaska 99801.

4. *Public Participation.* Interested persons are hereby given until September 27, 1976 in which to submit written data, views and arguments concerning whether the supplement should be approved. Such submissions are to be addressed to the Associate Assistant Secretary for Regional Programs, Occupational Safety and Health Administration, Room N–3112, 200 Constitution Avenue, NW., Washington, D.C. 20210, where they will be available for inspection and copying.

Any interested person may request an informal hearing concerning the proposed supplement by filing particularized written objections with respect thereto within the time allowed for comments with the Associate Assistant Secretary for Regional Programs. If in the opinion of the Assistant Secretary, substantial objections are filed which warrant further public discussion, a formal or informal hearing on the subjects and issues involved may be held.

The Assistant Secretary shall consider all relevant comments, arguments, and requests submitted in accordance with this notice and shall thereafter issue his decision as to approval or disapproval of the supplement, make appropriate amendments to Subpart R of Part 1952 and initiate further proceedings, if necessary.

Signed at Washington, D.C. this 20th of August 1976.

MORTON CORN,
Assistant Secretary of Labor.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 20894]

FM BROADCAST STATIONS; TABLE OF ASSIGNMENTS

Arizona

1. Notice of proposed rule making is hereby given concerning the proposed amendment of § 73.202(b) of the rules, the FM Table of Assignments, by deleting the present assignment of Channel 269A at San Manuel, Arizona, and substituting Channel 288A. Channel 269A is unoccupied and unapplied for. The Commission makes this proposal on its own motion.

2. San Manuel, an unincorporated community of 4,332 persons, is located in Pinal County (pop. 67,916). Channel 269A is the only FM assignment at San Manuel. It is short spaced 11 kilometers (7 miles) to the first adjacent channel (268) on which Class C Station KHEP, Phoenix, Arizona, operates. In order to solve this short-spacing problem, we propose to replace Channel 269A with a new assignment, Channel 288A, which will not affect any other existing assignments in the FM Table.

3. In view of the fact that San Manuel is within 320 kilometers (199 miles) of the United States-Mexican border, the proposed assignment of Channel 288A to San Manuel is subject to concurrence by the Mexican authorities.

4. Accordingly, the Commission proposes to amend the FM Table of Assignments, § 73.202(b), with regard to the community of San Manuel, Arizona, as follows:

City	Channel No.	
	Present	Proposed
San Manuel, Ariz.	269A	288A

5. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained below and are incorporated herein.

6. Interested parties may file comments on or before October 5, 1976, and reply comments on or before October 26, 1976.

Adopted: August 19, 1976.

Released: August 20, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

V 41 168
AUG 27 76
UMI

[Docket No. 20894]

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the Notice of proposed rule making to which this is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of proposed rule making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of proposed rule making to which this is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of Section 1.420 of the Commission's Rules and Regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc.76–25172 Filed 8–26–76;8:45 am]

[47 CFR Part 73]

[Docket No. 20893; RM–2716]

FM BROADCAST STATIONS; TABLE OF ASSIGNMENTS

New Mexico

1. The Commission has before it a petition filed by Fontana Media Corp. (KMYR(FM)), licensee of Station KMYR(FM) (Channel 258), Albuquerque, New Mexico, proposing the substitution of either Channel 288A or 296A for Channel 257A at Taos, New Mexico. An application has been tendered for filing by the Taos Communications Corp. for Channel 257A. Amendment of this application would be necessary if the proposed substitute channel is assigned. Either of the proposed substitute channels for Taos could be assigned without affecting any other existing FM assignment.

2. KMYR(FM) seeks to relocate its station to a site which it will share with Stations KHFM(FM) and KRKE–FM, also of Albuquerque. Its engineering study shows that the substitution of either Channel 288A or 296A would eliminate the nine mile short-spacing from the proposed transmitter site (BPH–9935) to the reference point of the first adjacent channel (257A) assigned to Taos, New Mexico. The short-spacing to the Taos proposed station would be 10 miles.

3. Taos (pop. 2,475)[1] the seat of Taos County (pop. 17,516), New Mexico, is situated approximately 57 miles northwest of Santa Fe, New Mexico. It is served by one full-time AM station (KKIT) in Taos.

4. KMYR(FM) points out that the proposed substitution will eliminate the short spacing to its proposed transmitter site; affect no other existing FM assignments; and enable Station KMYR(FM) to provide improved service to its listeners. For these reasons, we believe consideration of the proposal to substitute either Channel 288A or 296A for Channel 257A at Taos, New Mexico, is warranted.

5. Accordingly, the Commission proposes to amend the FM Table of Assignments, § 73.202(b), with regard to the community of Taos, New Mexico, as follows:

City	Channel No.	
	Present	Proposed
Taos, N. Mex.	257A	288A or 296A

6. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and filing requirements are contained in the attached below and are incorporated herein.

7. Interested parties may file comments on or before September 27, 1976, and reply comments on or before October 18, 1976.

Adopted: August 13, 1976.

Released: August 20, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[1] All population figures are taken from the 1970 U.S. Census.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the Notice of proposed rule making to which this is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of proposed rule making to which this is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of proposed rule making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420 (a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[FR Doc.76–25173 Filed 8–26–76;8:45 am]

[47 CFR Part 73]

[Docket No. 20895]

FM BROADCAST STATIONS; TABLE OF ASSIGNMENTS

Wyoming

1. The Commission, on its own motion, proposes the substitution of Channel 257A for Channel 221A at Douglas, Wyoming, in order to correct a short spacing situation.

2. Douglas (pop. 2,677), a community in Converse County (pop. 5,938), is located approximately 113 kilometers (70 miles) east of Casper, Wyoming. Channel 221A, which is the only FM assignment in Douglas, is unoccupied and unapplied for.

3. The University of Wyoming has submitted an application (BPED–1864) to change the operation of Station KUWR (FM), Laramie, Wyoming, from Channel 218 to Channel 220 and increase its power. In our analysis of the application, which has since been granted, there appeared to have been a 8 kilometer (5 miles) short spacing from the proposed site of KUWR(FM) to Channel 221A which is assigned to Douglas, Wyoming. Since several substitute Class A channels which meet the minimum mileage separation requirements are available for assignment to Douglas, the short spacing problem can be corrected. We are therefore proposing the assignment of Channel 257A as a substitute for Channel 221A in that community.

4. Accordingly, the Commission proposes to amend the FM Table of Assignments, § 73.202(b), with regard to Douglas, Wyoming, as follows:

City	Channel No.	
	Present	Proposed
Douglas, Wyo.	221A	257A

5. The Commission's authority to institute rule making proceedings; showings required; cut-off procedures; and the filing requirements are contained below and are incorporated herein.

6. Interested parties may file comments on or before October 5, 1976, and reply comments on or before October 26, 1976.

Adopted: August 19, 1976.

Released: August 23, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

1. Pursuant to authority found in sections 4(i), 5(d)(1), 303 (g) and (r), and 307(b) of the Communications Act of 1934, as amended, and § 0.281(b)(6) of the Commission's rules, it is proposed to amend the FM Table of Assignments, § 73.202(b) of the Commission's rules and regulations, as set forth in the Notice of proposed rule making to which this is attached.

2. *Showings required.* Comments are invited on the proposal(s) discussed in the Notice of proposed rule making to which this Appendix is attached. Proponent(s) will be expected to answer whatever questions are presented in initial comments. The proponent of a proposed assignment is also expected to file comments even if it only resubmits or incorporates by reference its former pleadings. It should also restate its present intention to apply for the channel if it is assigned, and, if authorized, to build the station promptly. Failure to file may lead to denial of the request.

3. *Cut-off procedures.* The following procedures will govern the consideration of filings in this proceeding.

(a) Counterproposals advanced in this proceeding itself will be considered, if advanced in initial comments, so that parties may comment on them in reply comments. They will not be considered if advanced in reply comments. (See § 1.420(d) of Commission rules.)

(b) With respect to petitions for rule making which conflict with the proposal(s) in this Notice, they will be considered as comments in the proceeding, and Public Notice to this effect will be given as long as they are filed before the date for filing initial comments herein. If filed later than that, they will not be considered in connection with the decision in this docket.

4. *Comments and reply comments; service.* Pursuant to applicable procedures set out in §§ 1.415 and 1.420 of the Commission's rules and regulations, interested parties may file comments and reply comments on or before the dates set forth in the Notice of proposed rule making to which this Appendix is attached. All submissions by parties to this proceeding or persons acting on behalf of such parties must be made in written comments, reply comments, or other appropriate pleadings. Comments shall be served on the petitioner by the person filing the comments. Reply comments shall be served on the person(s) who filed comments to which the reply is directed. Such comments and reply comments shall be accompanied by a certificate of service. (See § 1.420(a), (b) and (c) of the Commission rules.)

5. *Number of copies.* In accordance with the provisions of § 1.420 of the Commission's rules and regulations, an original and four copies of all comments, reply comments, pleadings, briefs, or other documents shall be furnished the Commission.

6. *Public inspection of filings.* All filings made in this proceeding will be available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 M Street, NW., Washington, D.C.

[Docket No. 20721; RM–2432]

NETWORK BROADCASTING BY STANDARD (AM) AND FM BROADCAST STATIONS

Review of Regulatory Policies

In the matter of review of Commission rules and regulatory policies concerning network broadcasting by standard (AM) and FM broadcast stations and Petitions of Mutual Broadcasting System, Inc. for rules applicable to newswire services.

1. On February 19, 1976, the Commission adopted a Notice of proposed rule making and notice of inquiry, 41 FR 9191, in the above-entitled proceeding. The date for filing comments has expired and the date for filing reply comments is presently August 23, 1976.[1]

2. On August 18, 1976, Mutual Broadcasting System, Inc. (Mutual), by its attorneys, requested that the time for filing reply comments be extended to and including September 2, 1976. Counsel states that in view of the numerous questions raised by the Commission's Notice and the volume of comments filed in this proceeding, a brief additional period of time for Mutual to prepare a response, which will be of maximum assistance to the Commission in its review of the comments, is necessary. Counsel further states that in light of the press of other business, Mutual and its counsel have been unable to devote the attention to the preparation of the reply which this matter deserves.

3. Pursuant to the provisions of § 1.46 of the rules, motions for extension of time are to be filed seven days prior to the filing date to afford the Commission sufficient time to act on the request and give timely notice of the action to interested persons. Late-filed requests will be considered in cases of last minute emergencies which could not have been anticipated by the party requesting the extension. The instant late-filed request is borderline in that counsel should have anticipated that a longer period of time would be needed in order to prepare a meaningful response to the questions raised in the Notice and the numerous comments filed in this proceeding. Since the Commission feels it would be in the public interest to have all material available to it in arriving at a decision in this proceeding, and since this extension of time would not prejudice any parties to the proceeding, we are granting Mutual's request for additional time in which to file reply comments.

4. Accordingly, *it is ordered*, That the date for filing reply comments is extended to and including September 2, 1976.

5. This action is taken pursuant to authority found in sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and §§ 0.281 and 1.46 of the Commission's rules.

Adopted: August 20, 1976.

Released: August 24, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

ELECTRIC RATE SCHEDULE FILINGS

Proposed Statement of Policy; Correction

AUGUST 11, 1976.

In the matter of Policy Statement Concerning Electric Rate Schedule Filings and the Requirement for Filing of Comparative Rate Information in Certain Situations.

In the notice of proposed statement of policy, issued July 29, 1976, (41 FR 32910, Aug. 6, 1976), in the first sentence of the notice, delete "and sections 16 and 17(b) of the Natural Gas Act (52 Stat. 830; (15 U.S.C. 717p(b), 717o)),".

KENNETH F. PLUMB,
Secretary.

[FR Doc.76–25180 Filed 8–26–76;8:45 am]

[1] The original dates for filing comments and reply comments were May 10, and June 7, 1976, respectively. On May 5, 1976, an Order extending these dates to July 9 and August 6, 1976, was adopted. A subsequent Order was adopted August 2, 1976, extending the time for filing reply comments to August 23, 1976, based on a request of United Press International, an opposing party in this proceeding.

[Docket No. R-426]

WATER QUALITY STANDARD CERTIFICATIONS IN APPLICATIONS FOR LICENSE

Order Terminating Proposed Rulemaking

AUGUST 19, 1976.

On August 10, 1971, the Commission issued a notice of proposed rulemaking (37 FR 15669, August 17. 1971) in which we proposed to amend 18 CFR 4.41 (Exhibit H), 131.6, and 131.30. The proposed rulemaking resulted from the passage of the Water Quality Improvement Act of 1970, Pub. L. No. 91-224, 84 Stat. 91, which amended the Federal Water Pollution Control Act.

Comments concerning the proposed rulemaking were invited from interested persons to be submitted by September 15, 1971. Comments were received from five respondents.[1]

Subsequent to our August 10, 1971, notice, Congress passed the Federal Water Pollution Control Act Amendments of 1972, Pub. L. No. 92-500, 86 Stat. 816. This Act was a comprehensive revision of the Federal Water Pollution Control Act as it existed at the time of our proposed rulemaking. We therefore terminate the proposed rulemaking because it is based on an act which has been amended.

The Commission finds: It is appropriate and in the public interest to terminate the proposed rulemaking in Docket No. R-426 entitled "Water Quality Standard Certifications in Applications for Licenses."

The Commission orders: Docket No. R-426 entitled "Water Quality Standard Certifications in Applications for Licenses" is hereby terminated.

By the Commission.

KENNETH F. PLUMB,
Secretary.

HARRY S. TRUMAN SCHOLARSHIP FOUNDATION

[45 CFR Part 1800]

PRIVACY ACT OF 1974

Proposed Regulations for Implementation

The following proposed regulations, drafted in accordance with section (f) of 5 U.S.C. 552a, the Privacy Act of 1974, are hereby offered for public comment. Interested parties should submit comments on or before September 27, 1976. Comments should be addressed to the Executive Secretary, Harry S. Truman Scholarship Foundation, 712 Jackson Place, NW., Washington, D.C. 20006.

Signed this 24th day of August 1976, by

ROBERT E. CLEARY,
Executive Secretary.

[1] State Water Resources Control Board of the Resources Agency of the State of California; State of Oregon Game Commission; Pennsylvania Power & Light Company; Alabama Power Company; Mr. Chris C. Oynes.

It is proposed to add the following Part 1800 to Title 45 of the CFR:

PART 1800—PRIVACY ACT IMPLEMENTATION

Sec.

1800.1 Purpose and scope.
1800.2 Definitions.
1800.3 Procedures for requests pertaining to individual records in a record system.
1800.4 Times, places, and requirements for the identification of the individual making a request.
1800.5 Disclosure of requested information to the individual.
1800.6 Request for correction or amendment to the record.
1800.7 Agency review of request for correction or amendment of the record.
1800.8 Appeal of an initial adverse agency determination on correction or amendment of the record.
1800.9 Disclosure of record to a person other than the individual to whom the record pertains.
1800.10 Fees.

AUTHORITY: 5 U.S.C. 552a; Pub. L. 93-579.

§ 1800.1 Purpose and scope.

The purposes of these regulations are to:

(a) Establish a procedure by which an individual can determine if the Harry S. Truman Scholarship Foundation (hereafter known as the Foundation) maintains a system of records which includes a record pertaining to the individual; and

(b) Establish a procedure by which an individual can gain access to a record pertaining to him or her for the purpose of review, amendment and/or correction.

§ 1800.2 Definitions.

For the purpose of these regulations—

(a) The term "individual" means a citizen of the United States or an alien lawfully admitted for permanent residence;

(b) The term "maintain" includes maintain, collect, use or disseminate;

(c) The term "record" means any item, collection or grouping of information about an individual that is maintained by the Foundation, including, but not limited to, his or her employment history, payroll information, and financial transactions and that contains his or her name, or the identifying number, symbol, or other identifying particular assigned to the individual, such as social security number;

(d) The term "system of records" means a group of any records under the control of the Foundation from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual; and

(e) The term "routine use" means, with respect to the disclosure of a record, the use of such record for a purpose which is compatible with the purpose for which it was collected.

§ 1800.3 Procedures for requests for access to individual records in a record system.

An individual shall submit a request to the Deputy Executive Secretary of the Foundation to determine if a system of records named by the individual contains a record pertaining to the individual. The individual shall submit a request to the Deputy Executive Secretary of the Foundation which states the individual's desire to review his or her record.

§ 1800.4 Times, places, and requirements for the identification of the individual making a request.

An individual making a request to the Deputy Executive Secretary of the Foundation pursuant to Section 1800.3 shall present the request at the Foundation offices, 712 Jackson Place, NW., Washington, D.C. 20006, on any business day between the hours of 9 a.m. and 5 p.m. The individual submitting the request should present himself or herself at the Foundation's offices with a form of identification which will permit the Foundation to verify that the individual is the same individual as contained in the record requested.

§ 1800.5 Access to requested information to the individual.

Upon verification of identity the Foundation shall disclose to the individual the information contained in the record which pertains to that individual.

§ 1800.6 Request for correction or amendment to the record.

The individual should submit a request to the Deputy Executive Secretary of the Foundation which states the individual's desire to correct or to amend his or her record. This request is to be made in accord with the provisions of § 1800.4.

§ 1800.7 Agency review of request for correction or amendment of the record.

Within ten working days of the receipt of the request to correct or to amend the record, the Deputy Executive Secretary of the Foundation will acknowledge in writing such receipt and promptly either—

(a) Make any correction or amendment of any portion thereof which the individual believes is not accurate, relevant, timely, or complete; or

(b) Inform the individual of his or her refusal to correct or to amend the record in accordance with the request, the reason for the refusal, and the procedures established by the Foundation for the individual to request a review of that refusal.

§ 1800.8 Appeal of an initial adverse agency determination on correction or amendment of the record.

An individual who disagrees with the refusal of the Deputy Executive Secretary of the Foundation to correct or to amend his or her record may submit a request for a review of such refusal to the Executive Secretary, Harry S. Truman Scholarship Foundation, 712 Jackson Place, NW., Washington, D.C. 20006.

The Executive Secretary will, not later than thirty working days from the date on which the individual requests such review, complete such review and make a final determination unless, for good cause shown, the Executive Secretary extends such thirty day period. If, after his or her review, the Executive Secretary also refuses to correct or to amend the record in accordance with the request, the individual may file with the Foundation a concise statement setting forth the reasons for his or her disagreement with the refusal of the Foundation and may seek judicial review of the Executive Secretary's determination under 5 U.S.C. 552a(g)(1)(A).

§ 1800.9 Disclosure of record to a person other than the individual to whom the record pertains.

The Foundation will not disclose a record to any individual other than to the individual to whom the record pertains without receiving the prior written consent of the individual to whom the record pertains, unless the disclosure has been listed as a "routine use" in the Foundation's notices of its systems of records.

§ 1800.10 Fees.

If an individual requests copies of his or her record, he or she shall be charged ten cents per page, excluding the cost of any search for review of the record, in advance of receipt of the pages.

DEPARTMENT OF STATE

[Public Notice CM-6/85]

STUDY GROUP 4 OF THE U.S. NATIONAL COMMITTEE FOR THE INTERNATIONAL RADIO CONSULTATIVE COMMITTEE (CCIR)

Meeting

The Department of State announces that Study Group 4 of the U.S. National Committee for the International Radio Consultative Committee (CCIR) will meet on September 14, 1976, at 10 a.m. in the First Floor Auditorium of the ComSat Building, 950 L'Enfant Plaza SW., Washington, D.C.

Study Group 4 deals with matters relating to systems of radiocommunications for the fixed service using satellites. The main items of the agenda for the meeting on September 14 are:

a. Report on the international meeting in May 1976;
b. Review of scheduled pertinent meetings within the International Telecommunication Union;
c. Organization of work programs;
d. Other business.

Members of the general public may attend the meeting and join in the discussions subject to instructions of the Chairman. Admittance of public members will be limited to the seating available.

Dated: August 19, 1976.

GORDON L. HUFFCUTT,
Chairman, U.S. CCIR National Committee.

DRAFT ENVIRONMENTAL STATEMENT

Public Hearing

AUGUST 13, 1976.

It was announced in the July 16, 1976 FEDERAL REGISTER that the U.S. Air Force would hold informal public hearings on August 30, 31 and September 1, 1976 in Grandview, Missouri. The purpose of the hearings is to solicit comments from the public for the proposed relocation of Air Force Communication Service from Richards-Gebaur AFB, Missouri to Scott AFB, Illinois. The Draft Environmental Statement (DES) for this proposed action was filed with the Council on Environmental Quality (CEQ) on June 25, 1976.

The public hearings will be held at the following times and places:

9:00 AM on August 30, 1976 at the Little Theater Municipal Auditorium, 13th and Wyandotte, Kansas City, Missouri;

7:00 PM on August 31, 1976, with the option to continue on September 1, 1976, at the Grandview High School Auditorium, Grandview, Missouri.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ALASKA

Filing of Plat of Survey

1. Plat of survey of the lands described below will be officially filed in the Alaska State Office, Anchorage, Alaska, effective at 10:00 a.m. September 30, 1976.

COPPER RIVER MERIDIAN, ALASKA

T. 8 N., R. 2 W.
Sec. 1: Lots 1 to 9 inclusive, SE¼NE¼, E½SE¼
Sec. 12: Lots 1, 2, 3
Containing 419.12 acres.

2. The portion surveyed lies on the east side of the Gulkana River, south of Sourdough, Alaska. The Richardson Highway traverses the northeast corner of section 1. The land is nearly level to gently rolling, with some steep bluffs along the east side of the Gulkana River. The timber is black spruce, with willow and alder undergrowth.

3. The public lands affected by this order are open to the operation of the public land laws, subject to any valid existing rights, the provisions of existing withdrawals, including PL 92-203, December 18, 1971, Public Land Order 5418, filed March 28, 1974, and the requirements of applicable law, rules and regulations.

4. Inquiries concerning the lands should be addressed to the Alaska State Office, 555 Cordova Street, Anchorage, Alaska 99501.

CLYDE DUREN, JR.,
Acting Chief, Division of Cadastral Survey.

Fish and Wildlife Service

MARINE MAMMALS AND ENDANGERED SPECIES

Issuance of Permit

On June 18, 1976, a notice was published in the FEDERAL REGISTER (41 FR 24737), that an application had been filed with the Fish and Wildlife Service by Frederic Martini, Ph. D., Bradenton, Florida, for a permit to collect and import skeletal material and tissue samples of DUGONGS (*Dugong dugon*), for the purpose of scientific research.

Notice is hereby given that on August 17, 1976, as authorized by the provisions of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407), and the Endangered Species Act of 1973 (16 U.S.C. 1539), the Fish and Wildlife Service issued a permit to Dr. Frederic Martini, subject to certain conditions set forth therein.

The permit is available for public inspection during normal business hours at the Fish and Wildlife Service's office in Suite 600, 1612 K Street, N.W., Washington, D.C.

Dated: August 24, 1976.

C. R. BAVIN,
Chief, Division of Law Enforcement, Fish and Wildlife Service.

Geological Survey

LEGAL REVIEW OF PROCUREMENT ACTIONS

Implementation Agreement

AUGUST 23, 1976.

Notice of an agreement between the Geological Survey and the Office of the Solicitor on the implementation of Interior Procurement Regulations, Subpart 14-1.352, Legal Review of Procurement Actions.

Procedure. The following procurement actions shall be submitted to the appropriate Office of the Solicitor for review of legal sufficiency:

A. All proposed contracts and grants and amendments thereto (including all support documentation) exceeding the following dollar amounts by procurement office.

(1) Headquarters, Branch of Procurement and Contracts, $200,000.00.

(2) Regional Offices (Reston, VA; Denver, CO; Menlo Park, CA), $150,000.00.

These amounts may be modified by subsequent written agreement between the Chief, Branch of Procurement and Contracts, and the Assistant Solicitor—Procurement, Division of General Law, Department of the Interior.

B. All procurement contracts and grants, regardless of amount which involve the interpretation of contract or grant authority which have not previously been approved by the Office of the Solicitor.

C. Any solicitation, procurement contract or grant, or amendments thereto, or any other procurement action may be submitted for legal review, if in the judgment of the contracting officer such review is desirable and advisable.

D. All findings and decisions to be issued pursuant to the disputes clause.

E. All proposed notices of termination, whether for default or convenience, cure notices and show cause letters.

F. All protests and mistakes in bids.

Review. Documents shall be forwarded for review prior to release to contractor or grantee for execution or prior to execution by contracting officer and release to contractor (governed by document involved).

Documents shall be clearly identified as procurement action documents, filed in a contract folder in an orderly and readable manner and delivered to a designated location in the Office of the Solicitor. The contracting officer's name and telephone number will be prominently displayed on the document.

The review will normally be completed within seven working days of receipt of the documents by the Office of the Solicitor. In the event that the Office of the Solicitor needs time in excess of seven days, the contracting officer will be notified. Emergency procurement actions requiring expeditious actions will be hand delivered to the reviewing office, with a memorandum signed by the Chief Procurement Officer of Headquarters or the Regional Procurement Officer setting forth the urgency. These will then be given priority handling by the reviewing office.

The Office of the Solicitor shall review the procurement document and return it to the contracting officer with written findings of legal sufficiency or insufficiency and any recommendation or suggestion deemed appropriate. The contracting officer will address each review comment and indicate in the procurement file the action taken pursuant to it.

EDMUND J. GRANT,
Assistant Director for Administration.

[FR Doc.76-25267 Filed 8-26-76;8:45 am]

National Park Service

WESTERN REGIONAL ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with the Federal Advisory Committee Act that a combined public meeting and field trip of the Western Regional Advisory Committee will be held in Yosemite National Park. The field trip will begin at 8:30 a.m. PDT on September 17, 1976, at the Awahnee Hotel. The public meeting will begin at 9:00 a.m. PDT on September 18, 1976 at the Yosemite Valley Visitor Center auditorium.

The purpose of the Western Regional Advisory Committee is to provide for the free exchange of ideas between the National Park Service and the public and to facilitate the solicitation of advice or other counsel from members of the public on programs and problems pertinent to the Western Region of the National Park Service.

Members of the Advisory Committee are as follows:

Lewis S. Eaton, Fresno, California (Chairman)
Ben Avery, Phoenix, Arizona
David W. Ballie, Jr., Lihue, Kauai, Hawaii
Ed Fike, Las Vegas, Nevada
Bernard Fontana, Tucson, Arizona.
Jean Ford, Las Vegas, Nevada
Sonya Thompson, Agoura, California
Jack Walston, San Marino, California
Todd Watkins, Bishop, California

Friday morning, September 17, the Committee will make a field trip covering those areas of major significance to be involved in the present master planning process and as yet unvisited by the Committee.

Saturday morning, September 18, a public meeting will be held to provide the Committee and the public the opportunity to discuss the various alternatives to be considered in the master plan presently being developed.

The meeting will be open to the public. Any member of the public will also be able to file, with the Committee, a written statement concerning the matters to be discussed.

Persons wishing further information concerning this meeting or who wish to submit written statements may contact Ray C. Foust, Executive Assistant to the Regional Director, Western Regional Office at (415) 556-8227.

Copies of the Committee's recommendations and/or resolutions as a result of this meeting will be available through the Western Regional Office, National Park Service, 450 Golden Gate Avenue, San Francisco, California 94102.

HOWARD H. CHAPMAN,
Regional Director, Western Region.

AUGUST 12, 1976.

Office of Hearings and Appeals

[Docket No. M 76-393]

AFFINITY MINING CO.

Amendment [1] to Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Affinity Mining Company has filed an amended petition to modify the application of 30 CFR 75.1710 to its Keystone No. 5 Mine, Raleigh County, West Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.-1710 is 30 CFR 75.1710-1 which is pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. After filing its initial petition, Petitioner became aware of a memo from the Acting Assistant Administrator, Coal Mine Health and Safety, dated September 20, 1973. That memo defines the term "mining height" as used in § 75.-1710-1 "as being the distance from the floor to the finished roof less 12 inches."

2. The measurements stated in paragraph 4 of the initial petition represent the actual floor-to-roof measurements, without the subtraction of 12 inches.

3. In light of the above interpretation, and in light of the recent amendment to 30 CFR 75.1710-1 (41 FR 23,199-23,200 of June 9, 1976), Petitioner deems it necessary to amend its original petition in order to validly indicate the appropriate governing regulation and to clarify the factual pleadings.

4. Accordingly, the above-captioned petition is amended to substitute references to 30 CFR 75.1710-1(a)(5) (i) and (ii) for references to 30 CFR 75.1710-1 (a)(4). Also, paragraph 1 of the notice of May 13, 1976, is amended to read as follows:

The average "coal seam heights" in the Keystone No. 5 Mine range from 40 to 42 inches. An average of 4 to 7 inches decrease in the effective average height occurs as a result of the installation of supplemental supports and wedges installed in accordance with the approved roof control plan. In addition, the natural undulations and rolls of the coal seam result in ascending and descending grades that further lower the effective height. The average "mining heights" in the Keystone No. 5 Mine range from 28 to 30 inches (see Addendum No. 1).[2] Taken as a whole, these conditions tend to limit and/or prevent the safe use of cabs and canopies on electric face equipment used in the Keystone No. 5 Mine.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 27, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 16, 1976.

[FR Doc.76-25133 Filed 8-26-76;8:45 am]

[1] Notice of the original petition was published in 41 FR 19685 on Thursday, May 13, 1976.

[Docket No. M76-533]

BIG FORK COAL CO., INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301(c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Big Fork Coal Co., Inc., has filed a petition to modify the application of 30 CFR 75.1710 to its Big Fork No. 8, Big Fork No. 9, and Big Fork No. 11 Mines, Nicholas County, West Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.-1710 is 30 CFR 75.1710-1 which is pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On an after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner operates the foregoing mines in seams of coal in heights averaging 44 to 48 inches. In all of the mines covered by this petition, primary problems and hazards occur due to abrupt changes in seam heights and undulations in the mine floors which do not permit clearance between the top of operated equipment and the roof adequate to allow installation of canopies for the protection of the operators.

2. The machinery and equipment being used at the mines covered by this petition consist of a 70UR Cutting Machine, Wilcox WRDD-J6 Roofbolters, S & S UAT74SSBCA Battery Powered Scoops, a M20PF Wilcox Continuous Miner, a Joy 11RU Cutting Machine, a 14BU8 Joy Loading Machine, and Joy 8SC Shuttle Cars. Petitioner states that use of this equipment necessitates that the operators leave the machines to make certain adjustments and to do maintenance which cannot be readily accomplished with canopies in place. In addition the canopies would destroy or partially block the view of the operator or cause him to have to project his head from underneath the canopies for proper visual inspection.

3. Petitioner states that in the mines covered by this petition, hazards exist from roof contact at areas where low seams, rolls, dips, and seam variations drop to the vicinity of equipment height. As a result of the undulation of seam heights in these mines, the installation of canopies would cause equipment clearance to be inadequate causing collisions with the top, sheared roof bolts, damaged cross beams, and destroyed equipment and roof support.

4. Petitioner has been in contact with other coal operators in the area, as well as equipment vendors, and finds that no standard canopy now in production can meet the requirements of the law and still permit coal of these variable fluc-

[2] Addendum No. 1 is available for inspection at the address contained in the last paragraph of this notice.

V 41 168 AUG 27 76 UMI

tuating heights to be satisfactorily removed.

5. Petitioner asks that the standard involved be modified since its enforcement will result in diminution of safety at its mines, and since no technology is available at present to satisfactorily accomplish the desired results of increased safety. The production for these mines will be sharply curtailed, or stopped, if it is required to install the present standard canopy.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 27, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Office of Hearings and Appeals.

AUGUST 16, 1976.

[FR Doc.76-25134 Filed 8-26-76;8:45 am]

[Docket No. M76-540]

CABIN KNOLL COAL CO.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Cabin Knoll Coal Company has filed a petition to modify the application of 30 CFR 75.1710 to its No. 9 Mine.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction wtih § 75.-1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of the foregoing standard with respect to haulage equipment and a roof bolting machine in its No. 9 Mine. Petitioner's said haulage equipment consists of one S & S Scoop, Model 486; one cutting machine; and one roof bolting machine.

2. The No. 9 Mine is in the Lower Elkhorn seam and ranges from 42 to 46 inches in height. The coal seam has consistent ascending and descending grades creating dips in the coal bed.

3. Petitioner states that installation of canopies on the foregoing equipment creates the following hazards to the equipment operators:

(a) As a result of dips in the coal seam, the canopies have to be installed in such a manner as to prevent the canopies from striking the roof and possibly destroying roof support. Also, the canopies allow only a 23-inch vertical operating compartment, thus limiting the vision of the equipment operators and creating a hazard to them a swell as to the other employees in the mine.

(b) Petitioner maintains that since the equipment operators' vision is limited in the postiion required in order to be seated in the operating decks, that the instalation of canopies could be contributing factors in any accidents which may arise.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 27, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 16, 1976.

[FR Doc.76-25135 Filed 8-26-76;8:45 am]

[Docket No. M76-527]

DEAN JONES COAL COMPANY, INC.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Dean Jones Coal Company, Incorporated, has filed a petition to modify the application of 30 CFR 75.1710 to its Mine No. 1, Lee County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. Petitioner seeks modification of the foregoing mandatory standard as it applies to all electric and self-propelled electric face equipment presently in its Mine No. 1 and to any of such equipment purchased in the future for use in this underground mine.

2. The underground Mine No. 1 is an underground bituminous coal mine with an average height of 35 inches.

3. Petitioner states that installation of required canopies would extremely confine the equipment operator and impair his mobility, thus creating a safety hazard.

4. Petitioner states that due to the low coal height in its Mine No. 1, a canopy or cab would prevent the continuous miner operator from having the necessary peripheral vision of equipment and surroundings to permit safe operation.

5. Petitioner states that it has an approved roof control plan, approved by the Virginia Division of Mines and by the Mining Enforcement and Safety Administration, which is adequate for roof support in its Mine No. 1.

6. Petitioner states that its accident record for roof falls is clean. No fatalities or injuries by roof falls in any of its underground mines have occurred since their opening in 1967.

7. Petitioner states that it employs a Wilcox Continuous Miner, which has a height of 26 inches, and that its coalbed has some dips and nonuniform slopes. According to Petitioner, the miner operator believes that it would be impossible to operate the miner safely with a canopy or cab installed as it would diminish peripheral vision and limit operator movement, creating a safety hazard.

8. Petitioner maintains that canopies or cabs installed on its electric face equipment would be a far greater hindrance than a help in its continuous miner operation due to the coal height in the Mine No. 1, the impaired peripheral vision, and the confinement of miner operator's movement. Petitioner states that compliance with this required safety standard presents more of a safety hazard than operating without a canopy or cab in the circumstance of its mining operation.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 27, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

AUGUST 16, 1976.

[FR Doc.76-25136 Filed 8-26-76;8:45 am]

[Docket No. M76-495]

MARY E. COAL CORP.

Petition for Modification of Application of Mandatory Safety Standard

Notice is hereby given that in accordance with the provisions of section 301 (c) of the Federal Coal Mine Health and Safety Act of 1969, 30 U.S.C. 861(c) (1970), Mary E. Coal Corporation has filed a petition to modify the application of 30 CFR 75.1710 to its No. 2 Mine, Whitewood, Buchanan County, Virginia.

30 CFR 75.1710 provides:

An authorized representative of the Secretary may require in any coal mine where the height of the coalbed permits that electric face equipment, including shuttle cars, be provided with substantially constructed canopies, or cabs, to protect the miners operating such equipment from roof falls and from rib and face rolls.

To be read in conjunction with § 75.-1710 is 30 CFR 75.1710–1 which in pertinent part provides:

• • • Except as provided in paragraph (f) of this section, all self-propelled electric face equipment, including shuttle cars, which is employed in the active workings of each underground coal mine on and after January 1, 1973, shall, in accordance with the schedule of time specified in subparagraphs (1), (2), (3), (4), (5), and (6) of this paragraph (a), be equipped with substantially constructed canopies or cabs, located and installed in such a manner that when the operator is at the operating controls of such equipment he shall be protected from falls of roof, face, or rib, or from rib and face rolls. The requirements of this paragraph (a) shall be met as follows:

(1) On and after January 1, 1974, in coal mines having mining heights of 72 inches or more;

(2) On and after July 1, 1974, in coal mines having mining heights of 60 inches or more, but less than 72 inches;

(3) On and after January 1, 1975, in coal mines having mining heights of 48 inches or more, but less than 60 inches;

(4) On and after July 1, 1975, in coal mines having mining heights of 36 inches or more, but less than 48 inches;

(5) On and after January 1, 1976, in coal mines having mining heights of 24 inches or more, but less than 36 inches; and

(6) On and after July 1, 1976, in coal mines having mining heights of less than 24 inches. • • •

The substance of Petitioner's statement is as follows:

1. In its mine Petitioner operates the following equipment:

Name	Type	Model No.	Height	Length	Width
			Inches	*Feet*	*Feet*
S & S	Scoop	74	30	25	9
S & S	do	74	30	25	9
Royal	Cutting machine		28	21	7
Do	do		28	21	7
Do	Roof bolter		28	10	4
S & S	Tractor	80	24	13	6
S & S	do	100	26	15	7½
S & S	do	100	26	15	7½
S & S	do	100	26	15	7½
S & S	do	120	27	15	7½

2. The varying height of the coal seam and the way it dips and rolls prevents any protective device which would increase the height of the equipment from being installed.

3. Cabs and canopies would be dangerous because the height of the coal seam is so low that the operator of the equipment would endanger himself and the other workers. If he operated the equipment with cabs or canopies installed he would be cramped in the deck of the equipment thereby impairing his control of the equipment. Vision would be restricted, endangering the operator and his fellow workers. Many of the employees have stated opposition to operating the equipment with cabs and canopies installed for fear that it would be more of a threat to their safety than if they were to use the equipment without cabs and canopies. Also the uneven mine floor (the many rolls, rises, and drops) prevents the use of cabs and canopies on equipment in this mine.

REQUEST FOR HEARING OR COMMENTS

Persons interested in this petition may request a hearing on the petition or furnish comments on or before September 27, 1976. Such requests or comments must be filed with the Office of Hearings and Appeals, Hearings Division, U.S. Department of the Interior, 4015 Wilson Boulevard, Arlington, Virginia 22203. Copies of the petition are available for inspection at that address.

JAMES R. RICHARDS,
Director, Office of Hearings and Appeals.

TESTING AND CONTROL PROGRAM FOR AFLATOXIN IN IMPORTED IN-SHELL BRAZIL NUTS

Memorandum of Understanding With Food and Drug Administration

CROSS REFERENCE: See FR Doc. 76-25139 in the Notices section of this issue of the FEDERAL REGISTER for a Memorandum of Understanding with the Food and Drug Administration setting forth working arrangements for testing for and control of aflatoxins in imported in-shell Brazil nuts.

Forest Service

BULL RUN PLANNING UNIT

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for Bull Run Planning Unit, USDA–FS–R6–DES(Adm)–76–16.

The environmental statement concerns a proposed land use plan for the 144,294 acre Bull Run Planning Unit, Mt. Hood National Forest, Oregon. The Planning Unit contains the 142,080 acre Bull Run Reserve, established in 1892 by President Benjamin Harrison.

The proposed plan was prepared in cooperation with the City of Portland, Oregon Water Bureau, as the 67,329 acre Bull Run drainage is the watershed for the City of Portland. The proposed plan

V 41 I 168 AUG 27 76 UMI

recommends changing the boundary of the Bull Run Reserve to reduce the area to 95,262 acres.

All management activities inside the Bull Run drainage would be designed to meet the principal objective of maintaining water quality. Activities and uses would include timber harvesting, additional water storage facilities, hydroelectric power generation, research and public education. Public use and entry would be limited to conditions jointly agreed upon by the City of Portland and the Forest Service. A Memorandum of Understanding between the City of Portland Water Bureau and the Forest Service would be maintained. The Planning Unit contains two roadless areas, Lake (10,100 acres) and Big Bend (10,200 acres). The proposed plan does not recommend these areas for Wilderness Study.

The remaining 49,032 acres outside the proposed Reserve would be managed for a full range of multiple uses, including recreation, timber production, water, wildlife, and wilderness study.

Implementation of the proposed plan could require legislation, pending the final outcome of current litigation.

This environmental statement was transmited to CEQ on August 20, 1976.

Copies are available for inspection during regular working hours at the following locations:

Mt. Hood National Forest, 2440 SE. 195th Ave., Portland, Oregon 97233.
Columbia Gorge Ranger Station, Route 3, Box 44A, Troutdale, Oregon 97060.
Zigzag Ranger Station, Zigzag, Oregon 97073.
Hood River Valley Ranger Station, Route 1, Box 573, Parkdale, Oregon 97047.
Portland Water Bureau, 1800 SW. 6th Ave., Portland, Oregon 97201.

A limited number of single copies are available upon request to Forest Supervisor, Mt. Hood National Forest, 2440 SE. 195th Ave., Portland, Oregon 97233.

Copies of the environmental statement have been sent to various Federal, state, and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public, and from State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor, Mt. Hood National Forest, 2440 SE. 195th Ave., Portland, Oregon 97233. Comments must be received by October 30, 1976 in order to be considered in the preparation of the final environmental statement.

F. DALE ROBERTSON,
Forest Supervisor,
Mt. Hood National Forest.

MULTIPLE USE PLAN PROSPECT PLANNING UNIT

Availability of Draft Environmental Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, has prepared a draft environmental statement for the Multiple Use Plan Prospect Planning Unit, USDA-FS-R1(16)DES-Adm-76-23.

The environmental statement concerns a proposed action to implement a revised Multiple Use Plan for the Prospect Planning Unit, located on the Thompson Falls Ranger District, Lolo National Forest in Sanders County, Montana. The action affects 139,000 acres of National Forest Land. The plan recommends that 124,920 acres be managed in various combinations for recreation, esthetics, fisheries, wildlife, watershed, timber and range. An area of 14,080 acres which will remain unroaded will be managed for recreation, esthetics, wildlife, and watershed.

The primary environmental effects involve the modification of natural conditions on 62,830 acres that are presently roadless. The major changes will be in the vegetative patterns and tree species resulting from management of the vegetative resources; the availability of products, employment, and services provided; and in the natural condition of vegetation, soil, water, and wildlife.

This draft environmental statement was transmitted to CEQ on August 20, 1976. Copies are available for inspection during regular working hours at the following locations.

USDA, Forest Service, South Agriculture Bldg., Room 3230, 12th St. and Independence Ave., SW., Washington, D.C. 20250.
USDA, Forest Service, Northern Region, Federal Building, 340 N. Pattee, Missoula, MT 59801.
USDA, Forest Service, Lolo National Forest, Building 24, Fort Missoula, Missoula, MT 59801.
USDA, Forest Service, Thompson Falls Ranger District, Thompson Falls, MT 59873.
University of Montana, University Library, Documents Division, Missoula, MT 59801.
University of Montana, Forestry School Library, Room 411, Science Complex, Missoula, MT 59801.
Missoula City—County Library, Washington and East Main, Missoula, MT 59801.

A limited number of single copies are available upon request to Orville L. Daniels, Forest Supervisor, Lolo National Forest, Building 24, Fort Missoula, Missoula, Montana 59801.

Copies of the environmental statement have been sent to various Federal, State and local agencies as outlined in the CEQ guidelines.

Comments are invited from the public and from the State and local agencies which are authorized to develop and enforce environmental standards, and from Federal agencies having jurisdiction by law or special expertise with respect to any environmental impact involved for which comments have not been requested specifically.

Comments concerning the proposed action and requests for additional information should be addressed to Forest Supervisor, Orville L. Daniels, Lolo National Forest, Building 24, Fort Missoula, Missoula, Montana 59801.

Comments must be received by October 20 in order to be considered in the preparation of the Prospect final environmental statement.

ORVILLE L. DANIELS,
Forest Supervisor.

AUGUST 20, 1976.

Rural Electrification Administration

CHAUTAUQUA AND ERIE TELEPHONE CORP., WESTFIELD, NEW YORK

Proposed Loan Guarantee

Under the authority of Pub. L. 93-32 (87 Stat. 65) and in conformance with applicable agency policies and procedures as set forth in the REA Bulletin 320-22, "Guarantee of Loans for Telephone Facilities," dated February 4, 1975, published in proposed form on the FEDERAL REGISTER, September 16, 1974, (Vol. 39 No. 180, 34 FR 33228-33229) notice is hereby given that the Administrator of REA will consider providing a guarantee supported by the full faith and credit of the United States of America for a loan in the approximate amount of $8,800,000 to Chautauqua and Erie Telephone Corporation, Westfield, New York. The loan funds will be used to finance the construction of facilities to extend telephone service to new subscribers, and improve telephone service for existing subscribers.

Legally organized lending agencies capable of making, holding and servicing the loan proposed to be guaranteed may obtain information and details of the proposed project from Mr. Alastair Nixon, President, Chautauqua and Erie Telephone Corporation, 30 Main Street, Post Office Box B, Westfield, New York.

To assure consideration, proposals must be submitted (within 30 days of the date of this notice) to Mr. Nixon. The right is reserved to give such consideration and make such evaluation or other disposition of all proposals received, as Chautauqua and Erie Telephone Corporation and REA deem appropriate. Prospective lenders are advised that financing for this project is available from the Federal Financing Bank under a standing loan commitment agreement with the Rural Electrification Administration.

Copies of REA Bulletin 320-22 are available from the Director, Information Services Division, Rural Electrification Administration, U.S. Department of Agriculture, Washington, D.C. 20250.

Dated at Washington, D.C., this 20 day of August 1976.

C. R. BALLARD,
Acting Administrator, Rural Electrification Administration.

NATIONAL INDUSTRIAL ENERGY COUNCIL; SUB-COUNCIL ON BUSINESS AWARENESS

Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I (Supp. IV, 1974) notice is hereby given that the meeting of the Sub-Council on Business Awareness of the National Industrial Energy Council will be held on Tuesday, September 14, 1976, from 10:00 a.m. to 12 Noon, in Conference Room 1851, Main Commerce Building, 14th & Constitution Avenue, NW., Washington, D.C. 20230.

The Sub-Council will meet to discuss its progress toward meeting the objectives of the Sub-Council and to prepare a report to be submitted at the next full Council meeting.

The meeting is open to public attendance and a limited number of seats will be available on a first-come, first-serve basis. To the extent that time permits, members of the public may present oral statements to the Sub-Council. Interested persons are also invited to file written statements with the Sub-Council before or after the meeting.

Inquiries should be addressed to Ms. Kay Courtney, Office of Energy Programs, DIBA, Room 2211, U.S. Department of Commerce, 14th & Constitution Ave., NW., Washington, D.C. 20230. Tele: (202) 377-5001.

Dated: August 4, 1976.

ROBERT M. JACKSON,
Acting Executive Director, National Industrial Energy Council.

UNIVERSITY OF OKLAHOMA HEALTH SCIENCES CENTER

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR Part 301).

A copy of the record pertaining to this decision is available for public review during ordinary business hours of the Department of Commerce, at the Office of Import Programs, Department of Commerce, Washington, D.C. 20230.

Docket Number: 76-00360. Applicant: The University of Oklahoma Health Sciences Center, 800 N.E. 13th Street, M.S. Room 137, PO Box 26901, Oklahoma City, Oklahoma 73190. Article: Electron Microscope, Model HS-9 and accessories. Manufacturer: Hitachi, Ltd., Japan. Intended use of article: The article is intended to be used in the course Electron Microscopial Methods, Pathology 6012 in which the basic theory and biological application of the electron microscope in medical research is presented. An indepth training in tissue preparation, specimen cutting and staining, photographic techniques, and the use of the electron microscope are areas that are studied under the guidance of an experienced electron microscopist.

Comments: No comments have been received with respect to this application. Decision: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (March 20, 1975). Reasons: The foreign article is a relatively-simple, easy to operate, medium resolution electron microscope designed for confident use in teaching beginning students with a minimum of detailed programming. The article provides 6Å point-to-point resolution, an accelerating voltage of 75 kilovolts, and low distortion magnification from 500X through 100,000X plus 200X for scanning which permits an overlap of light and electron microscopy.

The most closely comparable domestic instrument available at the time the article was ordered was the Model EMU-4C supplied by the Adam David Company. The Model EMU-4C is a relatively complex instrument vis a vis the article which provides magnifications of 1400X to 240,000X with its standard pole-piece and low distortion magnifications of 500X to 70,000X through the use of a low magnification pole-piece. The Department of Health, Education, and Welfare (HEW) advises in its memorandum dated July 16, 1976 that relative simplicity and ease of operation are pertinent to the applicant's intended educational purposes. HEW also advises that the Model EMU-4C is more complex than the educational work requires.

Adam David Company advertises another model electron microscope, the PA-1. In this regard, we note that a prototype of the PA-1 was first shown by Adam David in November, 1974. The record shows that neither the Department nor its consultants have been able to determine or verify the capabilities of the PA-1 as of the date of this decision. Thus the Department does not have a sufficient basis for ruling that the Adam David Company was able to supply the PA-1 at the time the foreign article was ordered, or that it is the scientific equivalent of the foreign article. We, therefore, find that the Model EMU-4C was not of equivalent scientific value to the foreign article for such purposes as the article is intended to be used at the time the article was ordered.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which was being manufactured in the United States at the time the article was ordered.

(Catalog of Federal Domestic Assistance Program No. 11.105, Importation of Duty-Free Educational and Scientific Materials)

RICHARD M. SEPPA,
Director, Special Import Programs Division.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

COMMUNITY ALCOHOLISM SERVICES REVIEW COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of September 1976:

COMMUNITY ALCOHOLISM SERVICES REVIEW COMMITTEE

September 27-October 1; 8:00 a.m.
Bethesda Holiday Inn, 8120 Wisconsin Avenue, Bethesda, Maryland
Open—September 27, 8:00-9:00 a.m.
Closed—Otherwise
Contact Mr. Sidney Leopold, Parklawn Building, Room 14C-17, 5600 Fishers Lane, Rockville, Md. 20852, 301-443-2080.

V 41 168 AUG 27 76 UMI

Purpose. The Committee provides initial review of applications for community alcoholism services demonstration grants for the prevention of alcoholism and the treatment and rehabilitation of special population groups with drinking problems, such as cross-population, poverty, women and youth and makes recommendations to the National Advisory Council on Alcohol Abuse and Alcoholism for final review.

Agenda. From 8:00 a.m. to 9:00 a.m., September 27, the meeting will be open for discussion of administrative announcements. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contact person listed above.

The NIAAA Information Officer who will furnish summaries of the meeting and rosters of the committee members is Mr. Harry C. Bell, Associate Director for Public Affairs, NIAAA, 6C-15, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, 301-443-3306.

Dated: August 23, 1976.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Correction

In FR Doc. 76-21906, appearing at page 31585, in the issue for Thursday, July 29, 1976, the following corrections should be made:

On page 31586, in the first column, in the table entitled "Criteria Documents", the second line of the left column should read "Carbon Monoxide", and the fourth line of the left column should read "Ultraviolet Radiation".

Food and Drug Administration

TESTING AND CONTROL PROGRAM FOR AFLATOXINS IN IMPORTED IN-SHELL BRAZIL NUTS

Memorandum of Understanding With Agricultural Marketing Service

The Food and Drug Administration is announcing that a Memorandum of Understanding has been executed with the Agricultural Marketing Service of the U.S. Department of Agriculture on August 17, 1976. The purpose of the memorandum is to set forth working arrangements for performing each agency's responsibilities under the Federal Food, Drug, and Cosmetic Act for testing for and control of aflatoxins in imported in-shell Brazil nuts.

Pursuant to the announcement published in the FEDERAL REGISTER of October 3, 1974 (39 FR 35697) that future memoranda of understanding between the Food and Drug Administration and others would be published in the FEDERAL REGISTER, the Commissioner of Food and Drugs is issuing this notice. The Memorandum of Understanding with the Agricultural Marketing Service reads as follows:

MEMORANDUM OF UNDERSTANDING BETWEEN THE AGRICULTURAL MARKETING SERVICE AND THE FOOD AND DRUG ADMINISTRATION

AFLATOXIN TESTING PROGRAM FOR IN-SHELL BRAZIL NUTS

The Food and Drug Administration (FDA) of the Department of Health, Education, and Welfare is charged with the enforcement of the Federal Food, Drug, and Cosmetic Act. In fulfilling its responsibilities under the act, the activities of FDA are directed toward, among other things, the protection of the public health of the Nation by ensuring that foods are safe and wholesome.

The Agricultural Marketing Service (AMS) of the U.S. Department of Agriculture (USDA), under the authority of the Agricultural Marketing Act of 1946, carries out certain voluntary service functions designed to aid in the efficient marketing of agricultural products. These include the development of commercial grade standards and specifications for foods and the furnishing of inspection and grading services, including the issuance of certificates of quality and/or condition to producers, processors, shippers, buyers, or other interested parties.

Since 1967, FDA and AMS have cooperated in a voluntary program with United States importers for aflatoxin testing of in-shell Brazil nuts. Aflatoxins, which are potent carcinogens produced by the mold *Aspergillus flavus*, may contaminate various kinds of foods, including tree nuts. Under this voluntary program, importers of in-shell Brazil nuts subject each lot of the product to USDA inspection prior to its introduction into United States commerce. USDA is responsible for sampling and testing each lot for aflatoxin in accordance with procedures prescribed by FDA. USDA then issues an analysis certificate for each lot, which FDA accepts and then allows entry of that lot into United States commerce provided the aflatoxin level does not exceed the current action level prescribed by FDA.

The two agencies believe it desirable from the standpoint of public interest to set forth in this Memorandum of Understanding the working arrangements that are being followed by each agency in carrying out this program.

I. It is mutually agreed that the USDA sampling and testing program will be conducted as follows:

A. *Application for Inspection.* It will be the importers' responsibility to contact the Fruit and Vegetable Division, Agricultural Marketing Service of USDA for inspection of in-shell Brazil nuts imported into the United States. Such contract will be in the form of a written application identifying the lots to be sampled and tested. The following items will be specified: location of lots, number of bags, size of bags, code marks, markings, and other pertinent information that may be necessary to positively identify the tender. Upon application, the importer shall state whether the sample is to be subject to analysis of the entire sample, including both the shells and kernels, or to kernel analysis only.

B. *Sampling.* Samples will be drawn in accordance with the following schedule:

Number of bags in lot	Number of bags sampled	Total pounds in sample	Approximate number of nuts
200 or less	20	20	1,000
201 to 800	40	40	2,000
801 to 2,000	60	60	3,000

C. *Aflatoxin Assay*—1. *Shell and kernel analysis.* The entire sample of shells and kernels will be ground in a Hobart Vertical Cutter mixer. A well-mixed portion of the ground composite will be assayed chemically for aflatoxin, using the BF method as described in the Book of Official Methods of Analysis of the Association of Official Analytical Chemists, 12th ed., Secs. 26.020-26.024. The aflatoxin level will be calculated on the basis of the nut kernel, assuming the kernel constitutes half the weight of the total in-shell nut.

2. *Kernel analysis.* The entire sample is individually shelled. Those kernels that have an obviously inedible appearance will be discarded. The remaining kernels will be composited and ground with the addition of an inert grinding aid. A well-mixed portion of the ground composite will be assayed as described in paragraph 1 above.

D. *Reporting.* A separate analysis certificate will be issued for each lot. Appropriate identification marks will be shown on each certificate so that the report can be related to the specific lot sampled. In showing the results of the assay, the following procedure will be used:

1. Lots containing aflatoxin at or less than the current action level prescribed by FDA will be reported as negative.

2. When shell and kernels are analyzed, and the lot contains aflatoxin above the action level, the importer may have the lot reanalyzed in accordance with kernel analysis requirements. Personnel from the Fruit and Vegetable Division, Agriculture Marketing Service, will phone or wire the proper inspection office to request a second sample for this purpose. If the kernel assay is at the action level or lower than the action level, a negative certificate is issued. If the assay is higher than the action level, the appropriate FDA District Office will be notified.

II. Each agency will designate a person to serve as a central contact to whom communications dealing with this agreement or matters affected thereby may be first referred for attention.

III. Both agencies will maintain close working relations with each other, both in headquarters as well as in the field.

IV. Both agencies will work with industry toward greater efficiency in connection with improvement of the testing program.

V. Nothing in this agreement modifies other existing agreements, nor does it preclude entering into separate agreements setting forth procedures for special programs that can be handled more efficiently and expeditiously by such special agreement.

VI. The provisions of this memorandum may be modified at any time by mutual agreement.

Approved and accepted for the U.S. Department of Agriculture.

Dated: July 28, 1976.

IRVING W. THOMAS,
Acting Administrator, Agricultural Marketing Service.

Approved and accepted for the Food and Drug Administration.

Dated: August 17, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

Effective date. This Memorandum of Understanding became effective August 17, 1976.

Dated: August 17, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

DEVICE GOOD MANUFACTURING PRACTICE ADVISORY COMMITTEE

Establishment

Pursuant to the Federal Advisory Committee Act of October 6, 1972 (Pub. L. 92-463, 86 Stat. 770-776 (5 U.S.C. App. I)), the Food and Drug Administration announces the formal establishment by the Commissioner of Food and Drugs on August 12, 1976, of the Device Good Manufacturing Practice Advisory Committee specifically authorized by the Medical Device Amendments of 1976 (Pub. L. 94-295, 90 Stat. 539-583), which amended the Federal Food, Drug, and Cosmetic Act ("the act").

The function of this committee is to review regulations proposed for promulgation regarding good manufacturing practices governing the methods used in, and the facilities and controls used for, the manufacture, packing, storage, and installation of devices, and to make recommendation to the Commissioner concerning the feasibility and reasonableness of those proposed regulations. The committee will also advise the Commissioner regarding any petition submitted by a manufacturer for an exemption or variance from good manufacturing practice regulations that the Commissioner refers to the committee.

This committee is exempt from section 14 of the Federal Advisory Committee Act as stated in section 513(b)(1) of the act (21 U.S.C. 360c(b)(1)), and its charter will remain in effect until amended or terminated by the Commissioner.

Dated: August 23, 1976.

JOSEPH P. HILE,
Acting Associate Commissioner for Compliance.

Office of the Secretary

OFFICE OF EDUCATION

Statement of Organization, Functions, and Delegations of Authority

Part 2 (Office of Education), Section 2-B, Organization and Functions of the Statement of Organization, Functions, and Delegations of Authority for the Department of Health, Education, and Welfare is hereby amended to attain the purposes of the General Education Provisions Act (Title IV of P.L. 90-247 as amended by Section 503 of the Education Amendments of 1974). The statement published in the FEDERAL REGISTER of 11/21/73, at 38 FR 32154, as amended, is amended as follows. The following new statement, which describes the function of the ten Office of Education Regional Offices, is inserted immediately after the statement following the heading Office of the Commissioner.

Office of the Regional Commissioner. Provides leadership, directs and administers the educational affairs of an HEW region consistent with legislative intent. Carries out programmatic delegations of authority as assigned and in accordance with existing legislation. Serves as a center for dissemination of information and provides technical assistance to State and local education agencies, institutions of higher education, and other educational agencies, institutions, and organizations, and to individuals and other groups having an interest in federal education activities. Provides the overall management and administration of the regional office operations, personnel, programs, and resource utilization.

Office of Management and Administration. Provides all administrative functions assigned to the Regional Office including such areas as personnel management; S & E budget planning and execution; monitoring audit response, resolution, and settlement; and special management studies or analyses. Carries out contract and grant negotiation, award, monitoring, and close-out; application processing and control; liaison with RD personnel activities; liaison with RD accounting and fiscal activities; and liaison with RD general services activities.

Office of Planning and Special Programs. Provides technical assistance and dissemination services for legislated programs as directed by the Regional Commissioner. Develops and monitors Regional Office objectives established through the Operational Planning System and coordinates objectives interfacing with the regional HEW and headquarters system of objectives. Serves as the intra HEW and interagency coordinating division for the Regional Commissioner. Prepares special studies relative to the unique educational needs of the region as a basis for effective program administration and as a basis for policy recommendation at the national level. Serves as regional contact for program functions and activities assigned to the Immediate Office of the Commissioner, Office of Indian Education, and Bureau of Education for the Handicapped, by providing technical assistance and dissemination functions as directed by the Regional Commissioner. Provides the Regional Commissioner with input and recommendations for all aspects of forward planning such as program budget formulation, evaluation planning, and legislative planning. Monitors and evaluates the use of Office of Education program resources in the field and provides recommendations to enhance and improve the administration, utilization, and effectiveness of program and project activities.

Division of Elementary and Secondary Education. Plans and directs OE field operation of elementary and secondary educational and library programs in accordance with delegations of authority to the Regional Commissioner. Provides policy input to the Regional Commissioner, and serves as an instrument to test the feasibility of such policies in operation in the field. Provides technical assistance through: (a) the interpretation of regulations, guidelines, and manuals to State and local education agencies, other agencies and organizations, and individuals interested in Federally supported elementary and secondary programs; (b) the maintenance of administrative and technical contact with OE contractors, grantees, and award recipients in the field in an effort to maximize the utilization and benefit of OE sponsored programs and makes recommendations for the improved management of such programs as warranted; (c) the resolution of problems associated with the administration of such elementary and secondary education programs at the State and local levels; (d) the provision of advisory and informational services in the area of elementary and secondary education to State and local educational agencies, institutions of higher education, and other private and public agencies and organizations; (e) the identification of exemplary projects and programs in the area of elementary and secondary education and the dissemination of this information to others in the field; and (f) the encouragement and coordination of efforts in the field through meetings and workshops to resolve pressing educational problems and concerns.

Division of Occupational and Adult Education. Plans and directs OE field operation of Bureau of Occupational and Adult programs in accordance with delegations of authority from the Deputy Commissioner for Occupational and Adult Education. Provides policy input to the Regional Commissioner and serves as an instrument to test the feasibility and soundness of such policies for operation in the field. Reviews and recommends through the Regional Commissioner the approval or disapproval and necessary action on Vocational and Adult Education State Plans and requested reports. Provides technical assistance through: (a) the interpretation of regulations, guidelines, and manuals to State and local education agencies, institutions of higher education, other agencies and organizations, and individuals interested in federally supported vocational, occupational and adult education programs; (b) the maintenance of close contact with OE contractors, grantees, and award recipients in the field in an effort to maximize the utilization and benefit of OE sponsored programs and makes recommendations for the improved management of such programs as warranted; (c) the conduct of liaison between the

V41I168 AUG 27 76 UMI

interested groups, coordinating various elements and aspects of the occupational and adult education area; (d) the communication of pertinent information to a wide variety of recipients; and (e) the dissemination of information, counsel and materials to State and local educational agencies and public and private community agencies or organizations on programs not administered by OE regional offices.

Division of Postsecondary Education. Plans and directs OE field operation of postsecondary education programs in accordance with delegations of authority to the Regional Commissioner. Provides policy input to the Regional Commissioner and serves as an instrument to test the feasibility of such policies in operation in the field. Provides technical assistance through: (a) the interpretation of regulations, guidelines, and manuals to State and local education agencies, institutions of postsecondary education, other agencies and organizations and individuals interested in federally supported postsecondary education programs; (b) the maintenance of close contact with OE contractors, grantees, and award recipients in the field in an effort to maximize the utilization and benefit of OE sponsored programs and makes recommendations for the improved management of such programs as warranted; (c) the resolution of problems associated with the administration of such postsecondary education programs at the State and local level; (d) the identification of emerging trends in postsecondary education which have national policy implication; and (e) the dissemination of information to State and local education agencies, institutions of higher education and other public and private agencies, organizations on the benefit of other OE postsecondary programs administered directly by Headquarters Offices.

Division of Guaranteed Student Loans. Plans and directs OE field operation of the Guaranteed Student Loan Program in accordance with the delegation of authority to the Regional Commissioner. Provides policy input to the Regional Commissioner. Provides technical assistance through: (a) the interpretation of regulations, guidelines, and manuals to State and local agencies, lending institutions, institutions of postsecondary education, organizations servicing student loans, and interested individuals; (b) the provision of advisory services in the area of student loans to State agencies, financial and educational institutions, other private and public agencies and organizations, and individuals. Reviews the performance of such institutions to monitor compliance with applicable laws and regulations, and to maximize the utilization and benefits of the program, and makes recommendations for improved program management and compliance as warranted. Resolves problems associated with the administration of the program at the institution or State agency level. Carries out such business activities and processes, including approval of Federally insured student loans, and collection of defaulted loans, as shall be necessary for the execution of the regionally delegated authority. Encourages educational and financial institutions to participate in the Guaranteed Student Loan Program.

Dated: August 20, 1976.

JOHN OTTINA,
Assistant Secretary for Administration and Management.

SOCIAL SECURITY ADMINISTRATION

Statement of Organization, Functions and Delegations of Authority

Part 4 of the Statement of Organization, Functions and Delegations of Authority for the Department of Health, Education, and Welfare contains the Statement of Organization, Functions and Delegations of Authority for the Social Security Administration (SSA). Sections 4-02-00 through 4-02-20 of the SSA Statement (40 FR 4474-75, dated January 30, 1975) describe the Mission, Organization, Order of Succession and Functions for SSA's Office of Management and Administration (OMA). Sections 4-02-10 G. and 4-02-20 G. of the OMA Statement are devoted to OMA's Office of Human Resources (OHR). These sections for OHR are hereby modified and expanded to reflect a reorganization of OHR. The revised material for OHR reads as follows:

Sec. 4-02-10 *Office of Management and Administration*—(Organization).

G. Office of Human Resources:

1. Administrative Staff;
2. Systems Coordination and Operations Analysis Staff;
3. Division of Personnel and Training Operations;
4. Division of Classification;
5. Division of Labor Relations;
6. Division of Employee Health and Occupational Safety;
7. Division of Policy Management and Research;
8. Division of Employee Relations;
9. Management-Employee Communications Staff;
10. Evaluation Staff.

Sec. 4-02-20 *Office of Management and Administration*—(Functions).

G. *The Office of Human Resources* (OHR) provides direction to the development, implementation and maintenance of a totally integrated and coordinated program responsive to the needs of SSA's human resources. It represents SSA in dealings with DHEW, other Federal agencies and sources outside the Federal establishment with respect to matters concerning personnel and human resources management programs. OHR provides executive-level line direction and supervision to components functioning in the following area: personnel; training and career development; labor-management relations; employee health and occupational safety; management-employee communications; and employee relations. The Office includes the following components and functions:

1. *Administrative Staff* (AS)

a. Provides OHR components with a full range of administrative services including: forms management; records management; printing and distribution; procurement of equipment, supplies and facilities; and office service management.

b. Develops cost estimates; and establishes and maintains controls on budget expenditures, personnel ceilings, and travel plans and approvals.

c. Receives, controls and assigns correspondence to OHR components for reply; and conducts a quality review to assure that these replies are consistent with SSA policy in the areas of public and congressional relations.

2. *Systems Coordination and Operations Analysis Staff* (SCOAS):

a. Provides leadership and direction to the total OHR systems effort; develops design concepts and guidelines for all OHR systems activities; and serves as liaison with other SSA components, DHEW, CSC and other Federal agencies in matters relating to the total OHR systems effort.

b. Develops, publishes and maintains the master plan for the total OHR system; ensures the responsiveness of this system to changing needs for OHR information; and advises OHR components of changes in laws, policies and regulations as they affect the management of data systems.

c. Manages the OHR system data base; reviews and approves OHR systems and sub-systems proposals and/or changes for adherence to standards, compatibility with existing and planned OHR systems, and conformance with OHR systems objectives, manpower requirements and cost estimates; and assigns priorities among systems workloads of OHR components.

d. Conducts ongoing quality appraisal of all OHR data bases; analyzes frequency of data base usage; develops and implements formal systems evaluation procedures and analyzes systems accomplishments in terms of initial requirements, responsiveness to OHR and management needs and cost effectiveness; and ensures documentation of the total system, including a systems manual, operations handbook and users manual.

e. Conducts internal management studies to identify and recommend solutions to operational problems in OHR work processes, through application of advanced management concepts.

3. *Division of Personnel and Training Operations (DPTO):*

a. Directs the implementation of policies, programs and regulations pertaining to employee recruitment, placement and common training needs within SSA headquarters, and develops and publishes internal operating procedures, as necessary.

b. Provides SSA headquarters components with the necessary daily services in recruitment, placement and training, in accordance wth applicable CSC and DHEW regulations; directs the administration of all merit promotion plans applicable within Baltimore/Washington

headquarters components; directs a program to determine and anticipate changing needs in services provided to various components; and assures maintenance of appropriate coordination with other OHR components.

c. Establishes and maintains official personnel folders for all SSA headquarters employees; directs processing for entrance on duty and appointment actions; and establishes and operates applicant supply and other files necessary for effective and timely operations.

d. Plans, implements and directs SSA headquarters employee counseling and testing programs in accordance with SSA policy guidelines.

e. Directs implementation of training and career development programs designated as SSA-wide programs, within the framework of SSA policies; publishes internal operating procedures for these programs; and develops and carries out long and short-range plans for replacement of top SSA executive staff and filling of additional executive positions allocated to SSA.

4. *Division of Classification* (DC):

a. Develops and directs implementation of the position classification programs within SSA headquarters and position classification activities having SSA-wide significance.

b. Provides leadership and coordination in the formulation of SSA policies, directives and programs relating to the Fair Labor Standards Act and to salary and wage surveys.

c. Formulates and oversees implementation of SSA-wide policies, directives and programs pertaining to classification aspects of position management; serves as the central SSA reference point for inquiries, guidance and interpretations on classification matters; and acts as SSA liaison with CSC, DHEW and non-SSA entities and organizations with respect to classification aspects of SSA position management.

d. Conducts a continuing review of the applicability of classification standards and, as apprcpriate, negotiates with CSC for the revision of such standards or the development of single agency standards.

5. *Division of Labor Relations* (DLR):

a. Formulates SSA-wide policy regarding the development, implementation and evaluation of labor relations; serves as the central SSA reference point for inquiries, guidance and interpretations on labor relations matters; and provides SSA liaison with CSC, DHEW and non-SSA entities and organizations concerning labor relations in SSA.

b. Carries out an ongoing review and advises on the establishment and implementation of labor relations policies, programs and directives initiated by individual SSA components; provides a full range of advisory services to all SSA components; advises on and, as necessary, participates in the resolution of disputes or questions in the labor relations area; and advises on management positions during bargaining sessions.

c. Implements programs and policies pertinent to labor relations matters within SSA headquarters; participates in negotiation and implementation of negotiated procedures with SSA headquarters labor organizations; provides technical guidance and assistance to line managers, to ensure proper application of negotiated provisions; and directs monitoring of union-management consultations as required by negotiated agreements or Executive Orders.

d. Directs the development and implementation of a labor relations training program, in conjunction with other OHR components; and participates in the evaluation of labor relations activities SSA-wide.

6. *Division of Employee Health and Occupational Safety* (DEHOS):

a. Develops policies relating to establishment, implementation and evaluation of the SSA-wide employee health services program and occupational health and safety program, in conformance with appropriate laws, and CSC, DHEW and SSA policies, regulations and/or directives; ensures that these programs are responsive to the organizational and occupational needs of SSA; serves as the central SSA reference point for inquiries, guidance and interpretations on health and safety matters; and acts as liaison with CSC, DHEW and non-SSA entities and organizations with respect to health and safety matters.

b. Develops, interprets and directs implementation of SSA medical policy in employee health and safety matters; establishes and maintains employee health records and ensures that the privileged and confidential nature of such records is not compromised.

c. Ensures adequacy and quality of professional medical services provided to employees; and formulates and oversees implementation of training programs for professional medical and support staffs, in order to maintain a proper level of medical services.

d. Directs a program of systematic evaluation to determine the costs and judge the effectiveness of SSA employee health services and occupational health and safety programs, and reports to SSA management on a regularly scheduled basis.

e. Directs administration of SSA's program to comply with the Occupational Safety and Health Act and to implement Executive Orders and regulations.

7. *Division of Policy Management and Research* (DPMR):

a. Establishes SSA-wide policy concerning development, implementation and evalution of training, career development and staffing; reviews policies of SSA components in these areas, to assure conformance with OMB, CSC, DHEW and SSA regulations and/or directives; serves as a central SSA reference point for inquiries, guidance and interpretations on such matters; and provides SSA liaison with CSC, DHEW and non-SSA entities and organizations regarding personnel policies, issuances and research.

b. Formulates and issues SSA personnel management policies, directives and programs, and oversees their dissemination and implementation; and develops and maintains the SSA personnel manual system and reviews all issuances under this system.

c. Studies proposed legislation and SSA administrative plans to provide short and long-range projections of training, career development and staffing needs of SSA components, and identifies and proposes action programs and areas of special emphasis to meet current and projected needs in these areas.

d. Conducts a continuing review of the applicability of qualification standards; negotiates with CSC for the revision of such standards or development of single agency standards, as appropriate; participates with various SSA components in developing proposed CSC training agreements; prepares or approves the final contract document for proposed training agreements; and negotiates approval of such agreements with CSC.

e. Designs, carries out and analyzes a variety of research projects in the area of personnel management.

8. *Division of Employee Relations* (DER):

a. Formulates SSA-wide policy regarding development, implementation and evaluation of employee relations matters, including employee conduct; employee organizations other than unions; employee grievances and appeals under agency procedures; processing of adverse actions; employee alcohol and drug abuse matters; and general employee services, such as consumer and financial guidance, group health plans and related assistance; serves as the central SSA reference point for inquiries, guidance and interpretations on such matters; and provides SSA liaison with CSC, DHEW and non-SSA entities and organizations with respect to these matters.

b. Directs implementation and operation of the SSA program for adverse actions and appeals, in accordance with CSC, DHEW and SSA regulations, directives and procedures; assures SSA-wide equity in adverse actions; provides intermediary services for personnel investigations, including polices, courts and physicians; provides determinations on employment suitability; and participates, as appropriate, in the processing, under agency procedures, of grievances having DHEW-wide impact.

c. Directs development and operation of the SSA program for incentive and honor awards, and the employee suggestion program; develops SSA policy and guidelines on acceptable level of competence for within-grade increases; and establishes and implements policies and procedures for employee welfare and recreational groups, and provides liaison with such groups, other than unions.

d. Plans and develops an SSA-wide program for continuing assessment, improvement and effective coordination of employee relations policies, methods and techniques; and assures appropriate SSA-wide reporting on employee relations activities.

9. *Management-Employee Communications Staff* (MECS):

V41168
AUG 27 76
UMI

a. Directs the management-employee communications program in SSA.

b. Publishes a variety of informational materials, including a monthly employee magazine, a semi-monthly management newsletter and a weekly central office bulletin; and prepares and edits administrative reports and presentations.

c. Provides assistance to and appraises management-employee communication activities in the field; identifies weaknesses in management-employee communications SSA-wide; and recommends improvements.

10. *Evaluation Staff* (ES):

a. Formulates policy regarding SSA-wide development and implementation of human resources evaluation, and prepares periodic and evaluation reports for top SSA management DHEW, and CSC.

b. Plans, implements and directs an SSA-wide program for inspection and evaluation of SSA's personnel management program, including training and career development; employment and staffing; position management and classification; employee relations; equal employment opportunity; and occupational health and safety, and conducts administrative surveys and special studies to assure conformance with CSC, DHEW and SSA policies, regulations and/or directives.

c. Plans and assures the installation of self-evaluation programs regarding personnel management and training, at appropriate organizational levels, in accordance with CSC and DHEW regulations; and monitors and evaluates the effectiveness of such programs.

d. Provides OHR management with internal inspection and evaluation services by assessing personnel management; component relationships; communications; staffing; methods, procedures; organization; training; problems; conflicts, and other areas of concern in OHR; and assists the Director of OHR in the evaluation of OHR subject matter areas.

Dated: August 20, 1976.

JOHN OTTINA,
Assistant Secretary for Administration and Management.

SOCIAL SECURITY ADMINISTRATION

Statement of Organization, Functions and Delegations of Authority

Part 4 of the Statement of Organization, Functions and Delegations of Authority for the Department of Health, Education, and Welfare contains the Statement of Organization, Functions and Delegations of Authority for the Social Security Administration (SSA). Sections 4-02-00 through 4-02-20 of the SSA Statement (40 FR 4474-75, dated January 30, 1975) describe the Mission, Organization, Order of Succession and Functions for SSA's Office of Management and Administration (OMA). Sections 4-02-10 H. and 4-02-20 H. of the OMA Statement are hereby modified and expanded to reflect a change in the title of OMA's Office of Operating Facilities to the Office of Materiel Management (OMM) and a reorganization of this component. The reorganization is designed to improve the alignment of functions assigned to OMM; to strengthen its contracting and procurement functions; and to provide for an effective assimilation of office services functions recently transferred to OMM from the Bureau of Data Processing in SSA's Office of Program Operations. This revised material for OMM reads as follows:

Sec. 4-02-10 *Office of Management and Administration*—(Organization).

H. Office of Materiel Management:

1. Administrative Management and Analysis Staff.
2. Division of Contracting and Procurement.
3. Division of Property Management.
4. Division of Realty and Space Management.
5. Division of Communications and Records Management.
6. Division of Publications Management.
7. Division of Management Services.

Sec. 4-02-20 *Office of Management and Administration*—(Functions).

H. The Office of Materiel Management (OMM) directs the materiel management and management support programs of SSA and develops objectives, policies, standards and procedures for these programs. It directs SSA's activities in the areas of: contracting and procurement; real and personal property management; equipment management; supply operations; space acquisition, utilization and management; telephone systems; mail and distribution operations; records; publications; forms; printing; reprographics; facilities maintenance; protective security; civil defense; library services; audio-visual and graphics services; visitor reception and tours; and services to SSA Headquarters personnel, including: transportation, parking, commuter information, food services, and other concessions management and facilities. OMM provides SSA liaison with GSA; DHEW; other Federal agencies; and various other public and private organizations concerning matters pertaining to the mission of OMM. The Office includes the following components and functions:

1. *Administrative management and analysis staff* (AMAS):

a. Provides staff support to the Director of OMM concerning a wide range of administrative management functions, including: budget planning and execution; personnel and training; organizational development; administrative policies and procedures; and review of directives.

b. Conducts studies to evaluate the effectiveness of OMM operations; continually reviews and analyzes operational and activity reports; evaluates and recommends improvements in data collection, compilation, and information for management regarding the quantity and quality of services performed in OMM; and coordinates the development of OMM forward plans, including the establishment of operational objectives and systems development plans, and the monitoring of progress toward implementation of objectives.

c. Assists OMM components in establishing effective work measurement techniques and production standards; conducts both short-term and longer-range projects to effect improvements in OMM operations; coordinates inter-divisional projects and studies within OMM; and provides leadership in the performance of analyses associated with the development of operational support systems in OMM.

2. *Division of contracting and procurement* (DCP):

a. Establishes, develops and carries out a total procurement program for SSA, including the negotiation, award, administration and termination of contracts required in support of SSA program administration; ADP equipment acquisition; and procurement of major supply items and administrative supplies, materials and services.

b. Performs a continuous surveillance, review and evaluation of SSA procurement actions to ensure adherence to legal and regulatory requirements, including small business and minority business programs requirements.

c. Plans, develops, and implements comprehensive policies, procedures, regulations and directives for SSA procurement activities, and provides advice and assistance to SSA components in the conduct of procurement-related activities.

d. Performs all facets of cost/price analysis and evaluation required in conjunction with the award and administration of SSA contracts; evaluates procurement actions on a post-award basis; and compiles data and prepares reports for management on SSA contracting and procurement actions.

3. *Division of property management* (DPM):

a. Administers the SSA property management program, including the formulation of SSA-wide policies, procedures, and directives governing the program.

b. Directs the SSA equipment management program, and provides equipment maintenance and repair services to SSA Headquarters components.

c. Manages the operation of SSA warehousing facilities, including receipt, storage and issuance of forms, publications, supplies and equipment for SSA-wide use; controls the maintenance of stock; and provides general labor services for SSA Headquarters.

4. *Division of realty and space management* (DRSM):

a. Manages the SSA real property program, including: current and longer-range planning; design; construction; leasing; acquisition; project management; utilization; alteration; and repairs.

b. Responsible for the acquisition, utilization and management of space at SSA Headquarters; and directs a comprehensive space inventory and utilization system.

c. Provides technical guidance and advice on architectural design for SSA and the coordination of architectural matters; manages a technical drafting service and design support function; and provides an engineering resource to support alterations, repairs and improvements to SSA facilities.

5. *Division of communications and records management* (DCRM):

a. Directs and manages SSA telephone systems, including the planning, analysis and design of these systems.

b. Provides mail processing and messenger services for SSA Headquarters; conducts studies and analyses to improve mail service and to reduce SSA's mail costs; determines the most appropriate and least costly mailing methods for the dissemination of written communications to SSA components, beneficiaries and members of the general public; and represents SSA in negotiations with the Postal Service to secure waivers from postal regulations in the interest of more efficient administration of SSA programs.

c. Directs the SSA records management program, including the SSA vital records program; and develops, recommends and carries out SSA-wide policies, objectives, standards and procedures governing the retention and disposition of SSA records; files and filing equipment; and correspondence.

d. Implements records management aspects of the Privacy Act, including: development of necessary records safeguards; review of the accuracy of SSA notices of new and changed records systems; and provision of advice and assistance to SSA components regarding the effect of the Privacy Act on records management.

6. *Division of publications management* (DPM):

a. Provides SSA-wide leadership and direction for a comprehensive SSA publications management program, including: design, development, production, initial distribution and maintenance of publications and forms; and develops policies, standards and procedures governing SSA's printing, reprographics and distribution programs.

b. Assures the provision of printing and reprographic services and supplies for SSA; and manages SSA printing duplicating, reprographic and distribution services.

c. Provides SSA liaison with DHEW; the Government Printing Office; and the Joint Committee on Printing, concerning printing policy and acquisition of printing supplies and equipment.

7. *Division of Management Services* (DMS):

a. Provides SSA-wide leadership, policy and procedures, and conducts programs in the areas of employee and facilities protection; criminal investigation; library; and audio-visual and graphics services.

b. Conducts management support services programs for SSA Headquarters in the areas of: buildings management, food, transportation, commuter information, and other services for employees; and conducts studies of SSA needs and capabilities in these areas.

c. Establishes and maintains administrative and operational liaison with GSA; commercial contractors; cafeteria management and concessionaires; and local, county, State, union and public transportation officials, to ensure that SSA Headquarters buildings are properly equipped and serviced.

Dated: August 20, 1976.

JOHN OTTINA,
Assistant Secretary, for Administration and Management.

Public Health Service

PUBLIC HEALTH SERVICE REGIONAL OFFICES

Statement of Organization, Functions, and Delegations of Authority

Part 15, Chapter 15, of the Statement of Organization, Functions, and Delegations of Authority of the Department of Health, Education, and Welfare, entitled Public Health Service (PHS) Regional Offices (39 FR 1468, as amended) is amended to reflect the establishment of the Division of Alcoholism, Drug Abuse, and Mental Health (1N8951) in Region IX only.

In *Section 15-B, Organization and Functions*, insert the following statement after the Division of Prevention (1N8149):

Division of Alcoholism, Drug Abuse, and Mental Health (1N8951) Region IX): Directs and coordinates programs and activities designed to promote and provide for the planning, development, and delivery of quality mental health, drug abuse, and alcohol services within the region.

Administers programs of Federal support to mental health and mental health related service delivery systems, including interpretation of policies and guidelines to state and local officials and private nonprofit organizations, site assessments, project development and project monitoring.

Assists in mental health program development at state and local levels through the provision of professional consultation, guidance and technical assistance in the planning, production, and maintenance of mental health and mental health related service delivery systems.

Serves as regional focal point for promoting and directing efforts to integrate and coordinate mental health and related programs and activities with programs and activities in other areas of health and in the fields of social welfare, education, rehabilitation, and adult and juvenile corrections.

Monitors grants for compliance with applicable laws, regulations, policies, and guidelines.

Administers the Regional Public Health Employees Assistance Program, including the provision of orientation to supervisors and the provision of counseling and referral services to employees.

Dated: August 20, 1976.

JOHN OTTINA,
Assistant Secretary for Administration and Management.

Social Security Administration

SKILLED NURSING FACILITY (SNF) COSTS UNDER THE HEALTH INSURANCE PROGRAM

Cost-Reporting Periods Beginning After the Effective Date of a Final Schedule of Limits

Notice is hereby given, pursuant to the Administrative Procedure Act (5 U.S.C. 553), that a proposed Schedule of Limits on Skilled Nursing Facility Inpatient Routine Service Costs in the Medicare program is set forth in tentative form as proposed by the Commissioner of Social Security, with the approval of the Secretary of Health, Education, and Welfare. Section 1861(v)(1) of the Social Security Act permits the Secretary to set prospective limits on direct or indirect overall incurred costs or incurred costs for specific items or services, or groups of items or services furnished by a provider, to be recognized as reasonable based on estimates of costs necessary in the efficient delivery of needed health services.

The proposed schedule of limits on skilled nursing facility (SNF) inpatient routine service costs set forth below, when published in final, will be applicable to cost-reporting periods beginning after the effective date of the final schedule and before the effective date of a revised schedule. The proposed schedule of limits will apply to the entire cost-reporting period of a skilled nursing facility whose cost-reporting period begins during the effective period of this schedule. The proposed schedule will apply to the total of the cost of routine services as defined in 20 CFR 405.452(d)(2) (also see § 405.452(d)(7)). These limits will not apply to the cost of ancillary services.

To permit reasonable comparison between skilled nursing facilities in a group, a classification system has been developed to take into account the economic environment of the area in which the skilled nursing facility operates. Per capita income has been used as the basis to reflect differences in input costs such as wages and costs of construction, goods, and services between various geographical areas. We have used the Standard Metropolitan Statistical Areas (SMSA) as the major geographical factor for identifying and classifying urban areas. (A Standard Metropolitan Statistical Area, as defined by the Office of Management and Budget, is a county or group of contiguous counties which (1) includes at least one city of 50,000 inhabitants, or (2) otherwise meets the basic criteria specified by the Office of Management and Budget for defining such areas. The standard definition and a complete list

V 41 1 68
AUG 27 76
UMI

of SMSA's can be found in the Federal Information Processing Standards Publication (F.I.P.S. Pub. 8–4) which is available from the Superintendent of Documents, United States Government Printing Office, Washington, D.C. 20402.) A provider location within an SMSA is used as a basis for an urban location while providers not located in an SMSA are considered nonurban.

It should be noted that bed size is not used as a classifier, as was done in setting limits on hospital inpatient general routine services because analysis of skilled nursing facility cost data indicates there is a random distribution of routine service per diem costs for small, medium, and large bed size SNF's. Because the distribution does not indicate a significant cost relationship between bed size and cost, separate limits based on bed-size categories are inappropriate in the case of SNF's. Moreover, there are no data which demonstrate that SNF's furnish significantly more complex or intensive services as they become larger in size, as is generally the case with hospitals.

Two per capita income groups are used to classify SNF's located in non-SMSA areas as compared with 5 groups used to classify hospitals in such areas. The reduction is the result of an analysis which indicates that the median routine service per diem cost of SNF's located in non-SMSA areas are so similar that they can be consolidated into 2 groups. It thus appears that the cost of providing SNF care in nonurban areas is not as sensitive to economic environment as are the costs of hospitals similarly located.

Consideration has been given to providing separate limits for hospital-based SNF's and free-standing SNF's under the rationale that the higher costs of hospital-based SNF's result because these providers have more seriously ill patients. SNF care is, by law, the next lower level of care than the care provided in a hospital, and all SNF's are required to provide such care. Similarly, the Conditions of Participation (20 CFR 405.1101–405.1137) and Certification Procedures (20 CFR 405.1901–405.1913) are the same for all SNF's. Thus, it is reasonable to assume that all SNF's generally supply the level of care defined in regulations and that a premium reimbursement for hospital based-SNF's merely because their costs are higher is not warranted. Any comments on this issue will be carefully evaluated in regard to the issue of whether separate limits for hospital-based SNF's are appropriate.

The provisions of 20 CFR 405.460 (Regulations No. 5) providing that exceptions, exemptions, and classification adjustments may be made to the application of the limits where certain required conditions are present, apply to SNF's as well as to hospitals.

METHODOLOGY

To develop urban groups, the SMSA's were arrayed on the basis of their per capita income and classes were established. The nonurban groups were developed in the same manner, using per capita income of non-SMSA areas within a State. The classification system utilizes 7 classes—5 income groups for providers located in SMSA areas and 2 income groups for providers located in non-SMSA areas.

Under the proposed classification system, all SMSA's have been divided into the following five groups:

SMSA

GROUP I

Alaska: Anchorage.
California: Los Angeles-Long Beach; Salinas-Seaside-Monterey; San Francisco-Oakland.
Colorado: Denver-Boulder.
Connecticut: Bridgeport; Bristol; Danbury; Hartford; Meriden; New Britain; New Haven-West Haven; Norwalk; Stamford; Waterbury.
Delaware: Wilmington, DE–NJ–MD.
District of Columbia: Washington, DC–MD–VA.
Florida: Miami; West Palm Beach-Boca Raton.
Hawaii: Honolulu.
Illinois: Chicago; Decatur; Rockford; Springfield.
Massachusetts: Boston; Brockton; Lawrence-Haverhill, MA-NH; Lowell, MA-NH.
Michigan: Ann Arbor; Detroit; Flint.
Minnesota: Minneapolis-St. Paul, MN-WI.
Nevada: Las Vegas; Reno.
New Jersey: Jersey City; New Brunswick-Perth Amboy-Sayreville; Newark; Trenton.
New York: Nassau-Suffolk; New York, NY-NJ; Rochester.
Ohio: Cleveland.
Virginia: Richmond.
Wisconsin: Milwaukee.

GROUP II

Arizona: Phoenix.
California: Anaheim-Santa Ana-Garden Grove; San Diego; Santa Barbara-Santa Maria-Lompoc; San Jose.
Florida: Fort Lauderdale-Hollywood; Sarasota.
Georgia: Atlanta.
Idaho: Boise City.
Illinois: Bloomington-Normal; Peoria.
Indiana: Fort Wayne; Indianapolis.
Iowa: Cedar Rapids; Davenport-Rock Island-Moline, IA–IL; Des Moines.
Kansas: Topeka, Wichita.
Kentucky: Louisville, KY–IN.
Maryland: Baltimore.
Massachusetts: Fitchburg-Leominster; Pittsfield; Worcester.
Michigan: Grand Rapids; Jackson, Lansing-East Lansing; Saginaw.
Minnesota: Rochester.
Missouri: Kansas City, MO–KS; St. Louis, MO-IL.
New Jersey: Patterson-Clifton-Passaic.
New York: Albany-Schenectady-Troy; Buffalo; Poughkeepsie.
North Carolina: Charlotte-Gastonia.
Ohio: Akron; Cincinnati, OH–KY–IN; Dayton; Mansfield; Toledo, OH–MI; Youngstown-Warren.
Oregon: Portland, OR–WA.
Pennsylvania: Allentown-Bethlehem-Easton, PA–NJ; Philadelphia, PA–NJ; Pittsburgh; Reading.
Texas: Dallas-Fort Worth; Houston, Midland, Wichita Falls.
Washington: Seattle-Everett.
Wisconsin: Kenosha; Madison.

GROUP III

Arizona: Tucson.
Arkansas: Little Rock-North Little Rock.
California: Fresno; Modesto; Sacramento; Santa Cruz; Santa Rosa; Stockton; Vallejo-Fairfield-Napa.
Colorado: Colorado Springs.
Connecticut: New London-Norwich, CT–RI.
Florida: Jacksonville-Winter Haven; Orlando; Tampa-St. Petersburg.
Illinois: Champaign-Urbana-Rantoul.
Indiana: Anderson, Evansville, IN–KY; Gary-Hammond-East Chicago; Lafayette-West Lafayette; South Bend.
Iowa: Dubuque; Sioux City, IA–NE; Waterloo-Cedar Falls.
Kentucky: Lexington.
Louisiana: New Orleans.
Maine: Portland.
Massachusetts: Springfield-Chicopee-Holyoke, MA–CT.
Michigan: Battle Creek; Bay City; Kalamazoo-Portage.
Missouri: St. Joseph.
Montana: Billings; Great Falls.
Nebraska: Lincoln; Omaha, NE–IA.
New Hampshire: Manchester; Nashua.
New Jersey: Atlantic City; Long Branch-Asbury Park; Vineland-Millville-Bridgeton.
New York: Binghamton, NY–PA; Syracuse.
North Carolina: Greensboro-Winston-Salem-High Point; Daleigh-Durham.
Ohio: Canton; Columbus; Lima; Lorain-Elyria; Springfield; Steubenville-Weirton, OH–WV.
Oklahoma: Oklahoma City; Tulsa.
Pennsylvania: Erie; Harrisburg; Lancaster; York.
Rhode Island: Providence-Warwick-Pawtuckett, RI–MA.
Tennessee: Memphis, TN–AR–MS; Nashville-Davidson.
Texas: Amarillo; Beaumont-Port Arthur-Orange; Killeen-Temple.
Virginia: Newport News-Hampton; Norfolk-Virginia Beach-Portsmouth, VA-NC; Roanoke:
Washington: Richland-Kennewick; Spokane; Tacoma.
West Virginia: Charleston:
Wisconsin: Appleton-Oshkosh; Racine.

GROUP IV

Alabama: Birmingham; Montgomery.
California: Bakersfield; Oxnard-Simi Valley-Ventura; Riverside-San Bernardino-Ontario.
Colorado: Pueblo.
Florida: Daytona Beach; Fort Myers; Gainesville; Melbourne-Titusville-Cocoa; Pensacola.
Georgia: Augusta, GA-SC; Macon; Savannah.
Indiana: Muncie.
Kentucky: Owensboro.
Louisiana: Baton Rouge; Shreveport.
Massachusetts: Fall River, MA-RI; New Bedford.
Michigan: Muskegon-Muskegon Heights.
Minnesota: Duluth-Superior, MN-WI.
Mississippi: Jackson..
Missouri: Springfield.
New Mexico: Albuquerque.
New York: Utica-Rome.
North Carolina: Asheville; Burlington.
North Dakota: Fargo-Moorhead, ND-MN.
Ohio: Hamilton-Middletown.
Oregon: Eugene-Springfield; Salem.
South Carolina: Columbia; Greenville-Spartanburg.
South Dakota: Sioux Falls.
Tennessee: Chattanooga, TN-GA; Knoxville.
Texas: Abilene; Galveston-Texas City; San Angelo; San Antonio; Sherman-Denison; Tyler; Waco.
Utah: Salt Lake City-Ogden.
Virginia: Petersburg-Colonial Heights-Hopewell.
Washington: Yakima.
West Virginia: Parkersburg-Marietta, WV-OH; Wheeling, WV-OH.
Wisconsin: Green Bay; La Crosse.

GROUP V

Alabama: Anniston; Florence; Gadsden; Huntsville; Mobile; Tuscaloosa.
Arkansas: Fayetteville-Springdale; Fort Smith, AR–OK; Pine Bluff.
Florida: Tallahassee.
Georgia: Albany; Columbus, GA–AL.
Indiana: Terre Haute.
Louisiana: Alexandria; Lafayette; Lake Charles; Monroe.
Maine: Lewiston-Auburn.
Minnesota: St. Cloud.
Mississippi: Biloxi-Gulfport.
Missouri: Columbia.
New York: Elmira.
North Carolina: Fayetteville; Wilmington.
Oklahoma: Lawton.
Pennsylvania: Altoona; Johnstown; Northeast Pennsylvania; Williamsport.
Puerto Rico: Caguas; Mayaguez; Ponce; San Juan.
South Carolina: Charleston.
Tennessee: Clarksville-Hopkinsonville; TN–KY; Kingsport-Bristol, TN–VA.
Texas: Austin; Brownsville-Harlingen-San Benito; Bryan-College Station; Corpus Christi; El Paso; Laredo; Lubbock; McAllen-Pharr-Edinburg; Odessa; Texarkana, TX, Texarkana, AR.
Utah: Provo-Orem.
Virginia: Lynchburg.
West Virginia: Huntington-Ashland, WV–KY–OH.

The following are the two State groupings to be used for skilled nursing facilities located in non-SMSA counties in those States.

NON-SMSA

GROUP I

Alaska	Montana
Arizona	Nebraska
California	Nevada
Connecticut	New Hampshire
Delaware	New Jersey
Hawaii	New York
Illinois	Ohio
Indiana	Oregon
Iowa	Rhode Island
Kansas	Vermont
Maryland	Washington
Massachusetts	

GROUP II

Alabama	North Dakota
Arkansas	Oklahoma
Colorado	Pennsylvania
Florida	Puerto Rico
Georgia	South Carolina
Idaho	South Dakota
Kentucky	Tennessee
Louisiana	Texas
Maine	Utah
Michigan	Virginia
Minnesota	Virgin Islands
Mississippi	West Virginia
Missouri	Wisconsin
New Mexico	Wyoming
North Carolina	

The proposed limits were developed for each of the classification groups in the following manner:

1. Inpatient routine service cost data for each participating skilled nursing facility were obtained from the fiscal intermediaries.

2. The data for skilled nursing facilities in each class were arrayed in descending order of inpatient routine service costs.

3. The 90th percentile and median were computed for each class.

4. For each class, an amount equal to 10 percent of the median was added to the 90th percentile amount.

5. This sum was adjusted by a factor to reflect a 10 percent annual rate of estimated cost increases in per diem costs following the date of data collection.

6. The amount calculated in step 5 was rounded to the next highest dollar which establishes the limit for each class, subject to adjustment for reporting periods starting after January 1, 1976.

Under the authority of section 1861(v)(1) of the Social Security Act, it is proposed that the following cost limitations apply to the total of the skilled nursing facility inpatient routine service costs (excluding costs incurred for ancillary services), adjusted upward as provided for below. The proposed limits are applicable to cost-reporting periods beginning on or after the effective date of the final notice of these limits and will remain in effect until the effective date of a revised schedule. This schedule will apply to the entire cost-reporting period of a skilled nursing facility whose cost-reporting period begins during its effective period. Where a skilled nursing facility has a cost-reporting period beginning after January 1, 1976, the published limit will be adjusted upward by a factor of .833 percent for each elapsed month between January 1, 1976, and the first day of the month in which the skilled nursing facility's reporting period starts. The result of this calculation is not rounded and is to be given in dollars and cents.

Example. Skilled nursing facility A's cost-reporting period begins April 1, 1976, and ends March 31, 1977. The cost limit for skilled nursing facility A's group from the table below is $46.00.

COMPUTATION OF ADJUSTED COST LIMIT

Cost limit	$46.00
Plus adjustment for 3-mo period Jan. 1, 1976, to Apr. 1, 1976, 3 mo times 0.833 pct equals 2.50 pct; 2.50 pct times $46	1.15
Adjusted cost limit applicable to skilled nursing facility A for the Apr. 1, 1976, to Mar. 31, 1977, reporting period	47.15

SCHEDULE OF LIMITS ON SKILLED NURSING FACILITY INPATIENT ROUTINE SERVICE COSTS FOR SKILLED NURSING FACILITIES

SKILLED NURSING FACILITIES LOCATED WITHIN SMSA'S (URBAN)

SMSA group:	Dollar limit
I[1]	$53
II	46
III	46
IV	37
V	43

[1] Limits apply to all group I SMSA's except Anchorage, Alaska, and Honolulu, Hawaii, where cost-of-living adjustment was made. The limits for these areas are as follows:

Anchorage	$66
Honolulu	61

SKILLED NURSING FACILITIES LOCATED OUTSIDE SMSA'S (NONURBAN)

State group:	Dollar limit
I[2]	$47
II	40

[2] Limits apply to all group I States except Alaska and Hawaii. The limits for these areas are as follows:

Alaska	$58
Hawaii	54

Prior to the final adoption of the proposed schedule of limits on skilled nursing facility costs, consideration will be given to any data, views, and comments pertaining thereto which are submitted in triplicate to the Commissioner of Social Security, Department of Health, Education, and Welfare, P.O. Box 1585, Baltimore, Maryland 21203, on or before October 12, 1976.

Copies of all comments received in response to this notice will be available for public inspection during the regular business hours at the Washington Inquiries Section, Office of Information, Department of Health, Education, and Welfare, North Building, Room 4146, 330 Independence Avenue, SW., Washington, D.C. 20201.

[Docket No. NFD-359; FDAA-519-DR]

NEW JERSEY

Major Disaster and Related Determinations

Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on August 21, 1976, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of New Jersey resulting from severe storms, high winds, and flooding associated with Hurricane Belle beginning about August 9, 1976, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93-288. I therefore declare that such a major disaster exists in the State of New Jersey.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D-74-285, I hereby appoint Mr. Thomas R. Casey, FDAA Region II, to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following areas of the State of New Jersey to have been adversely affected by this declared major disaster:

The Counties of:

Atlantic	Monmouth
Cape May	Ocean

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance)

Dated: August 21, 1976.

Office of Interstate Land Sales Registration

[Docket No. N-76-578; OILSR No. 0-2072-12-18; Land Sales Enforcement Division No. 75-302 IS]

LAKE CREEK SUBDIVISION

ORDER OF SUSPENSION

Notice is hereby given that: On January 8, 1976, the Department published a Notice of Proceedings and Opportunity for Hearing in the FEDERAL REGISTER (41 FR 1507) pursuant to 44 U.S.C. 1508. The developer, Solman Syndicate Trust, whose last known address is P.O. Box 907, Phoenix, Arizona 85001, has failed to respond or to request a hearing pursuant to 1720.160 within 15 days of the service by publication of the said Notice of Proceedings and Opportunity for Hearing. Accordingly, an Order of Suspension is being issued, pursuant to 15 U.S.C. 1706(d) and 24 CFR 1710.45(b)(1), as follows:

ORDER OF SUSPENSION

1. The developer, having filed a Statement of Record for the named subdivision pursuant to the provisions of the Interstate Land Sales Full Disclosure Act, 15 U.S.C. 1701 *et. seq.* and the Rules and Regulations promulgated thereto pursuant to 15 U.S.C. 1718, had its Statement of Record become effective pursuant to 24 CFR 1710.21 of the Interstate Land Sales Regulations. Said Statement is still in effect.

2. As provided by 15 U.S.C. 1715, the authority and responsibility for administration of the Interstate Land Sales Full Disclosure Act has been delegated to the Assistant Secretary for Consumer Affairs and Regulatory Functions (41 FR 19365, May 12, 1976):

3. According to 15 U.S.C. 1706(d) and 24 CFR 1710.45(b)(1), if it should appear to the Assistant Secretary for Consumer Affairs and Regulatory Functions that an effective Statement of Record includes an untrue statement of a material fact or omits to state any material fact required to be stated therein or necessary to make the statement therein not misleading, the said Assistant Secretary is authorized, after notice, and after any opportunity for a hearing requested within 15 days after receipt of such notice, to issue an order suspending the Statement of Record.

4. On January 8, 1976, the Department of Housing and Urban Development, Office of Interstate Land Sales Registration, caused to be published in the FEDERAL REGISTER (41 FR 1507) a Notice of Proceedings and Opportunity for Hearing. The notice informed the developer of information obtained by the Office of Interstate Land Sales Registration showing a change occurred affecting a material fact contained in the Statement of Record and Property Report. The developer has failed to answer or to request a hearing pursuant to 24 CFR 1720.160 within 15 days of said publication.

Therefore, pursuant to the provisions of 15 U.S.C. 1706(d) and 24 CFR 1710.45(b)(1) the Statement of Record heretofore filed by the developer pertaining to said subdivision is hereby suspended, effective August 27, 1976. This Order of Suspension shall remain in effect until such time as the Statement of Record has been properly amended as required by the Interstate Land Sales Full Disclosure Act and implementing Regulations.

This Order shall be served upon the Respondent by publication in the FEDERAL REGISTER, pursuant to 44 U.S.C. 1508.

Any sales or offers to sell made by the developer or its agents, successors or assigns while this Order of Suspension is in effect will be in violation of the provisions of said Act.

Issued at Washington, D.C., this 24th day of August, 1976.

JUDITH A. HERMANSON,
Acting Assistant Secretary for Consumer Affairs and Regulatory Functions.

CIVIL AERONAUTICS BOARD

[Docket 29445]

LAS VEGAS-DALLAS/FORT WORTH NONSTOP SERVICE INVESTIGATION

Postponement of Prehearing Conference

Notice is hereby given that the prehearing conference in the above-entitled matter now assigned to be held on September 22, 1976 (41 FR 28578, July 12, 1976) is hereby postponed to October 27, 1976 at 9:30 a.m. (local time) in Room 1003, Hearing Room A, Universal Building North, 1875 Connecticut Avenue, NW., Washington, D.C.

Dated at Washington, D.C., August 23, 1976.

WILLIAM H. DAPPER,
Administrative Law Judge.

[FR Doc.76-25224 Filed 8-26-76;8:45 am]

[Docket 28961]

SACRAMENTO-DENVER NONSTOP PROCEEDING

Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that the above-entitled proceeding is assigned for hearing on September 28, 1976 at 9:30 a.m. (local time), in the Comstock Room at the Sacramento Inn, 1401 Arden Way, Sacramento, California 95815, before Administrative Law Judge Ralph L. Wiser.

Without limiting the scope of the issues to be considered, particular attention will be directed to the following matters:

(1) Do the public convenience and necessity require the certification of an air carrier or air carriers to engage in competitive nonstop air transportation between Sacramento, California, and Denver, Colorado?

(2) If the answer to (1) is in the affirmative, which air carrier(s) should be authorized to engage in such transportation?

(3) What conditions, if any should be placed upon the operations of such carrier(s)?

The statutory requirement of fitness, willingness, and ability is, of course, at issue for all applicants.

For further details with respect to the issues involved in this proceeding, interested persons are referred to the orders and notices entered in the proceeding, the documents filed by the parties, and the Judge's report of prehearing conference, served May 18, 1976, and the supplement thereto served June 1, 1976, all of which are on file with the Docket Section of the Civil Aeronautics Board.

Notice is further given that any person other than the parties of record desiring to be heard in this proceeding shall file with the Board on or before September 20, 1976, a statement setting forth the issues of fact or law raised by the proceeding which he desires to controvert.

Dated at Washington, D.C., August 23, 1976.

RALPH L. WISER,
Administrative Law Judge.

COMMISSION ON CIVIL RIGHTS

CONNECTICUT ADVISORY COMMITTEE

Meeting; Correction

Correction

Notice is hereby given, pursuant to the Rules and Regulations of the U.S. Commission on Civil Rights, that the meeting scheduled for September 27, 1976, of the Connecticut Advisory Committee (CAC) to the Commission published in the FEDERAL REGISTER on Tuesday, August 17, 1976, on page 34812 (FR Doc. 76-23932) is hereby amended to change meeting date to September 29, 1976. The time and place remain the same.

Dated at Washington, D.C., August 24, 1976.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

[FR Doc.76-25163 Filed 8-26-76;8:45 am]

LOUISIANA ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Louisiana Advisory Committee (SAC) to this Commission will convene at 10:00 a.m. and end at 4:00 p.m. on September 17, 1976, at the Hilton-Corporate Square (Feliciano Room) 5500 Hilton Avenue, Baton Rouge, Louisiana 70808.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Southwestern Regional Office of the Commission, New Moore Building, Room 231, 106 Broadway, San Antonio, Texas 78205.

The purpose of this meeting is distribution and followup to the Louisiana prison project report will be discussed as well as other project programming for the ensuing year.

The meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., August 24, 1976.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

[FR Doc.76-25167 Filed 8-26-76;8:45 am]

MICHIGAN ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Michigan Advisory Committee (SAC) to this Commission will convene at 9:00 a.m. and end at 5:00 p.m. on September 16, 1976, at the Feminist Women's City Club of Detroit, 2110 Park, Detroit, Michigan 48201.

Persons wishing to attend this meeting should contact the Committee Chairperson, or the Mid-Western Regional Office of the Commission, 230 South Dearborn Street, 32nd Floor, Chicago, Illinois.

The purpose of this meeting is to plan release of Sault Ste. Marie report. Continue planning community development and update the Benton Harbor situation.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., August 24, 1976.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

[FR Doc.76-25165 Filed 8-26-76;8:45 am]

WEST VIRGINIA ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the West Virginia Advisory Committee (SAC) to this Commission will convene at 1:00 p.m. and end at 4:00 p.m. on September 23, 1976, at the Professional Building, 1036 Quarrier Street, 2nd Floor, Charleston, West Virginia.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Mid-Atlantic Regional Office of the Commission, 2120 L Street, NW., Room 510, Washington, D.C. 20037.

The purpose of this meeting is to discuss the status of civil rights in West Virginia.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., August 24, 1976.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

[FR Doc.76-25166 Filed 8-26-76;8:45 am]

WYOMING ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Wyoming Advisory Committee (SAC) to this Commission will convene at 1:00 p.m. and end at 3:00 p.m. on September 18, 1976, at the Holiday Inn, 300 W. F Street, Casper, Wyoming 82601.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Mountain States Regional Office of the Commission, Executive Tower Inn, Suite 1700, 1405 Curtis Street, Denver, Colorado 80202.

The purpose of this meeting is to discuss the upcoming Mexican American education project and the sub-committee project on availability of abortion services in Wyoming.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., August 24, 1976.

ISAIAH T. CRESWELL, Jr.,
Advisory Committee Management Officer.

COMMITTEE FOR PURCHASE FROM THE BLIND AND OTHER SEVERELY HANDICAPPED

PROCUREMENT LIST 1976

Proposed Additions

Notice is hereby given pursuant to section 2(a)(2) of Pub. L. 92-28; 85 Stat. 77, of the proposed additions of the following commodities to Procurement List 1976, November 25, 1975 (40 FR 54742).

Class 1430

Circuit Card Assemblies, 1430-00-089-9251, 1430-00-187-5201, 1430-00-328-5477, 1430-00-403-5787, 1430-00-421-4036.

Class 6515

Case Ear Plug, 6515-00-299-8287.

Class 8470

Headband, Ground Troops, Helmet Liner, 8470-00-153-6671.

Comments and views regarding the proposed additions may be filed with the Committee on or before September 27, 1976. Communications should be addressed to the Executive Director, Committee for Purchase from the Blind and Other Severely Handicapped, 2009 Fourteenth Street North, Suite 610, Arlington, Virginia 22201.

This notice is automatically cancelled on or before February 27, 1976.

By the Committee.

C. W. FLETCHER,
Executive Director.

FOREST SERVICE

Draft

South Fourche Unit Plan, Quachita N.F., Saline, Yell, and Perry Counties, Arkansas, August 19: Proposed is a plan for the management of the 98,275 acre South Fourche Planning Unit, Quachita National Forest, from October 1, 1976 to September 30, 1986. Major actions include regenerating commercial timber stands on 11,945 acres, thinning timber on 19,000 acres, improving wildlife habitat, and constructing 23 miles and reconstructing 72 miles of road. The degree of negative impact varies according to the nature and location of the many activities. (96 pages) (ELR Order No. 61220.)

Mohawk Unit Plan, Plumas and Tahoe N.F., Plumas and Sierra Counties, California, August 18: This statement concerns six different land use plans located within portions of the Beckwourth, LaPorte and Quincy Ranger Districts (Plumas National Forest) and the Downieville Ranger District (Tahoe National Forest) in California. These land use plans apply to 120,620 acres of National Forest land. Approximately 1,365 acres of private land are planned for acquisition in Plumas County and approximately 1,135 in Sierra County. (198 pages) (ELR Order No. 61217.)

Rancheria Unit Plan, Sierra N.F., Fresno County, California, August 19: This statement concerns a proposed land use plan for the Rancheria Management Unit within Kings River Planning Unit, Sierra National Forest. Five alternative plans are discussed, emphasizing timber production, dispersed recreation, and wildlife habitat improvement on lands that are best suited for these uses. Adverse effects will vary according to the alternative selected. (92 pages) (ELR Order No. 61223.)

Elk River Unit Plan, St. Joe N.F., Clearwater County, Idaho, August 19: Proposed is the implementation of a land use plan for the 42,500 acre Elk River Planning Unit, St. Joe National Forest. The plan divides the planning unit into five management units which reflect differences in land capability and sensitivity. Adverse effect relate to timber harvest and access road construction and include decreased land productivity and environmental quality, loss of wildlife and fisheries values, and reduced economic and social benefits. (209 pages) (ELR Order No. 61221.)

Final

Prescott N.F. Timber Management Plan, Yavapai and Coconino Counties, Arizona, August 19: Proposed is a Ten-Year Plan for the Timber Management Program of the Prescott National Forest, located in Central Arizona. Ponderosa pine is the only commercial timber species. Of the total National Forest acreage, approximately 36% is classified as forested and 7% classified as commercial forest. Adverse effects include soil disturbance and erosion. (127 pages) Comments made by: USDA, DOC, DOI, EPA, State and local agencies, concerned citizens (ELR Order No. 61222).

Lakeview Unit Land Use Plan, Kaniksu N.F., Bonner County, Idaho, August 17: The proposal is to implement a land use plan for the Lakeview Planning Unit, Kaniksu National Forest. Approximately 63,063 acres are included in the planning unit, of which 57,120 acres are National Forest lands. This plan allocates resources and specifies land use prescriptions including management of high scenic quality, fisheries habitat recreation and wildlife habitat uses while providing timber, foliage and water uses. Unfavorable impacts include a reduced timber growth potential, alteration of the natural landscape in some areas, and reduced opportunities for solitude. Even with the proposed plan prescriptions there will be short-term reductions in quality. (250 pages) Comments made by: DOI, COE, FPC, USDA, EPA, State agencies, concerned citizens (ELR Order No. 61203).

West Kootenai Planning Unit, Kootenai N.F., Lincoln County, Montana, August 17: The action involves the implementation of a revised multiple use plan for the 68,976 acre West Kootenai Planning Unit, Kootenai National Forest. The plan emphasizes recreation, production of forest products, and an increased transportation system. Implementation of the program will result in development of natural areas, temporary acceleration of soil and vegetation disturbance, and noise and air pollution. (145 pages). Comments made by: USDA, EPA, State agencies and local groups, concerned citizens. (ELR Order No. 61201.)

Mt. Charleston Unit Plan, Toiyabe N.F., Clark County, Nevada, August 17: Proposed is a land use plan for the 58,000 acre Mount Charleston Planning Unit, Toiyabe National Forest. Plan objectives include the resolve management status of one inventoried roadless area, the provision of protection for sensitive environmental components, and the maintenance of aceptable levels of air and water quality. Adverse effects from project implementation are expected to be minimal. (317 pages) Comments made by: EPA, AHP, HEW, USDA, State and local agencies, concerned citizens. (ELR Order No. 61207.)

RURAL ELECTRIFICATION ADMINISTRATION

Draft

Burlington Station, Two 50MW Combustion Turbines, Kit Carson County, Colorado, August 17: This statement has been prepared in connection with a request from Tri-State Generation and Transmission Association, Inc. for the REA to guarantee a $16,731,000 loan to finance approximately 100 MW of combustion turbine capacity to be installed at a 43-acre site in Kit Carson County. The units will be designed to fire No. 2 distillate fuel oil, with provisions for future modifications of the system if necessary. Adverse impacts include the annual emission of about 224 tons of sulfur oxides, 504 tons of nitrogen oxides, and 32 tons of particulate matter, as well as an increase in noise levels. (32 pages) (ELR Order No. 61208.)

Wyodak to Antelope, 230 kV Transmission Line, Campbell and Converse Counties, Wyoming, August 18: Proposed is a loan from the Rural Electrification Administration to the Tri County Electric Association, Inc. (TCEA). The loan would finance 59 miles of 230 kV line from a bay owned by TCEA at the Wyodak substation south to a point at the Campbell-Converse County line. The environmental effect include minor soil and vegetation disturbances, and minor limitations on land use. (ELR Order No. 61211.)

Final

(50 MW) Combustion Turbine, Kansas 53 Central, Finney County, Kansas, August 18: Proposed is the addition of a 50-megawatt combustion turbine at Garden City, Kansas. Operation of the unit will result in the emission of nitrogen and sulfur oxides and an insignificant quantity of particulates. Water will be obtained from existing wells, and the unit will discharge approximately 5 gpm to the Arkansas River. Any biotic life associated with the immediate area proposed for the unit will be forced to move. (81 pages) Comments made by: DOI, NSDA, EPA, State and local agencies. (ELR Order No. 61213.)

Lignite Unit No. 1 & Associated Mine and Lines, Atascosa County, Texas, August 20: This action involves the request for guaranteed loan funds from the REA to finance a new 447 MW (gross) generating plant to be located 15 miles south of Jourdanton, Texas. The project also includes approximately 254 miles of 345 kV transmission lines, 195 miles of 138 kV transmission lines and 25 miles of 69 kV transmission lines. Adverse effects include the release to the atmosphere of some oxides of sulphur and nitrogen along with particulate matter. The environment will also be affected adversely by the lignite mining operations which will involve about [illegible] acres per year during the life of the project. (130 pages) Comments made by: DOI, EPA, DOT, COE, USDA, FPC, State agencies. (ELR Order No. 61226.)

SOIL CONSERVATION SERVICE

Draft

Central Madison Watershed Project, Madison County, Louisiana, August 16: The proposed project is for watershed protection, flood prevention, and drainage in Madison Parish, Louisiana. Approximately 52 miles of channel work with appurtenant measures will be installed. Land treatment measures will be applied on 38,700 acres of cropland and pastureland, and 16,200 acres will be managed for wildlife habitat. About 796 acres of forest land, 2 acres of wooded channel banks, and 285 acres of open land will be disturbed by construction. (180 pages) (ELR Order No. 61195.)

DEPARTMENT OF COMMERCE

Contact: Dr. Sidney R. Galler, Deputy Assistant Secretary for Environmental Affairs, Department of Commerce, Washington, D.C. 20230, 202–967–4335.

NAT'L OCEANIC AND ATMOSPHERIC ADMINISTRATION

Final

Interim Convention, N. Pacific Fur Seals Conservation, August 20: The statement refers to the renegotiation of the present Interim Convention on Conservation of North Pacific Fur Seals. The United States intends to negotiate a new convention which will essentially continue the present management arrangements and amend the management objectives as stated in the Convention, to provide for the maintenance of the health and stability of the marine ecosystem and in other ways bring the language of the Convention into conformity with the Marine Mammal Protection Act of 1972. (163 pages) Comments made by: DOI, STAT, EPA, state and local governments, concerned groups and individuals. (ELR Order No. 61224.)

ARMY CORPS

Contact: Dr. C. Grant Ash, Office of Environmental Policy Development, Attn: DAEN–CWR–P, Office of the Chief of Engineers, U.S. Army Corps of Engineers, 1000 Independence Avenue, SW., Washington, D.C. 20314, 202–693–6795.

Draft

Humboldt Bay Harbor Marina (Reg. Permit): Humboldt County, California, August 18: Proposed is the development, at Humboldt Bay Harbor, of the Eastern shore of Woodley Island and the Eureka Inner Reach Channel into a public marina with support facilities. This project would reduce the width of the open channel and decrease the flushing capability of the channel. Approximately ⅓ of the open apace/wildlife habitat, including 10 acres of salt marsh, would be replaced by marina development. (San Francisco District) (250 pages) (ELR Order No. 61215.)

Final

Beach Erosion, Hurricane Protection Proj., Dade Co., Dade County, Florida, August 20: The project involves the partial restoration of the 10.5 mile Dade County, Florida, Beach Erosion Control and Hurricane Protection Project to provide protective and recreational beach. Adverse impacts are temporary turbidity and siltation in the borrow and fill areas during construction, and the destruction of some marinelife. (Jacksonville District) (177 pages.) Comments made by: USDA, DOC, USCG, DOI, EPA, state and local agencies, concerned individuals. (ELR Order No. 61225.)

Supplement

Bonneville Lock and Dam, Columbia River (S–2), Oregon and Washington, August 16: This supplement is a Memorandum of Agreement with the Advisory Council on Historic Preservation concerning a final EIS filed with CEQ on August 6, 1976. The Agreement refers to the effects of the construction of the Second Powerhouse, Bonneville Lock and Dam, on archaeological site 45 SA11, in Skamania County, Washington. (6 pages) (ELR Order No. 61192.)

ENVIRONMENTAL PROTECTION AGENCY

Contact: Ms. Rebecca W. Hanmer, Director, Office of Federal Activities, Room WSMW 537, 401 M Street, SW., Washington D.C. 20460 202–755–0760 (stop 460).

Final

Livermore-Amador Valley Wastewater Management, Alameda County California, August 16: Proposed is the implementation of a Wastewater Management Plan for the Livermore-Amador Valley, California. This plan would: continue treatment at the existing Livermore Water Reclamation Plant (WRP) and Valley Community Services District (VCSD) treatment plants, require a pipeline from the Livermore WRP to VCSD, and require a force main along I–580 to Boehmer Summit. A gravity pipeline would then carry the flows to the Oro Loma-Castro Valley pumping station of the EBD Interceptor. Construction activities would adversely affect the surrounding areas. (207 pages) Comments made by: AHP, USDA, USA, COE, EPA, HEW, DOI, DOT, State and county agencies, concerned citizens. (ELR Order No. 61196.)

Water Quality Program (Phase I), San Francisco Bay, California, August 17: Proposed is a Water Quality Management Plan designed to eliminate six shallow shoreline discharges of treated, chlorinated sewage from the eastern shore of Lower and South San Francisco Bay. The existing Irvington and Newark sewage treatment plants will be abandoned and replaced by untreated sewage pump stations. New discharge locations will increase the transport and dispersion of pollutants from the Lower Bay to the Central Bay and Pacific Ocean. Adverse effects include damage to bottom organisms, and traffic disruption and other construction associated impacts. (1500 pages) Comments made by: HUD, AHP, USDA, EPA, DOT, DOC, DOI, state and local agencies, concerned citizens. (ELR Order No. 61204.)

Bay to Bay Sanitary District-Wastewater Systems, Lincoln County, Oregon, August 17: Proposed is the provision of a wastewater treatment and disposal program for the Bay to Bay Sanitary District, located between Yaquina Bay and Alsea Bay, Oregon. This statement identifies alternatives for providing the district with wastewater facilities designed to meet the needs of the district and maintenance of environmental quality. Short and long-term impacts will vary subject to the alternative chosen. (Region X) (253 pages) Comments made by: HEW, COE, USDA, HUD, DOI, AHP, state and local agencies, concerned citizens. (ELR Order No. 61209.)

SW Lincoln County Wastewater Systems, Lincoln County, Oregon, August 17: Proposed is the provision of a wastewater treatment and disposal program for the Southwest Lincoln County Sanitary District, located between the Cities of Waldport and Yachats, Oregon. This statement identifies alternatives for providing the district with wastewater facilities designed to meet the needs of the residents of the district and maintenance of environmental quality. Subject to the alternative chosen, long-term impacts include increases in energy consumption, possible disturbance of archaeological sites, and effects on land use patterns and state park operations. (Region X) (330 pages) Comments made by: HEW, COE, DOI, USDA, AHP, state and county agencies, concerned citizens and local groups. (ELR Order No. 61210.)

GENERAL SERVICES ADMINISTRATION

Contact: Mr. Andrew E. Kauders, Executive Director of Environmental Affairs, General Services Administration, 18th and F Streets, N.W., Washington, D.C. 20405. (202) 343–4161.

Supplement

Disposal of a portion of Fort Holabird (S–1), Baltimore County, Maryland, August 16: This statement supplements a final EIS filed with CEQ in November of 1975. Proposed is the disposal of 226.82 acres of Fort Holabird, Baltimore, Maryland. The land would be disposed of as follows: approximately 179.20 acres for general public purposes; approximately 37 acres for conveyance to the city of Baltimore for park and recreational purposes; approximately 4 acres for conveyance to Baltimore County for park and recreational purposes; and approximately 406.65 acres through Sealed Bid Sale. Some adverse effects would result from increases in noise, emission pollutants, sewage, water, and other utilities including solid waste disposal. (90 pages) (ELR Order No. 61198.)

DEPARTMENT OF HUD

Contact: Mr. Richard H. Broun, Director, Office of Environmental, Quality, Room 7258, 451 7th Street, S.W., Washington, D.C. 20410. (202) 755–6308.

Draft

1977 Block Grant Program, San Francisco, San Francisco County, California, August 16: This statement is for the 1977 block grant application as a whole for the San Francisco, California area. It describes the types of projects eligible for block grant funding, the criteria employed in project selection, the environmental impacts of the program, measures to reduce potential impacts, possible alternatives to the proposed program, and the funding and environmental review status of individual proposed projects. Effects of the various projects are discussed. (80 pages). (ELR Order No. 61193.)

Wimmerton Planned Unit Development, Westmoreland County, Pennsylvania, August 16: This statement deals with the residential portion of a planned unit development to be known as Wimmerton in Westmoreland County, Pennsylvania. The proposal was submitted to HUD to obtain approval for insured mortgages. Approximately 1,110 acres which were formerly in agricultural use are planned for development with 537 acres to be used for residential development. Ultimately, 2,800 dwelling units are expected to be built and most of these will be apartments and townhouses. (43 pages). (ELR Order No. 61194.)

Final

Stony Creek, A Planned Development, Jefferson County, Colorado, August 17: The statement concerns the development of Stony Creek Subdivision which consists of 1,875 single and multi-family units on 439 acres in an unincorporated section of Jefferson County. The development of Stony Creek will disrupt the existing plant and animal communities and result in an increase of auto generated pollutants. It will strain the existing educational, social, and impact on an historical site. (130 pages). Comments made by: FEA, EPA, DOT, COE, HEW, DOI, USDA, (ELR Order No. 61200.)

Pinehurst Harbour, Anne Arundel County, Maryland, August 17: proposed is the approval of Pinehurst Harbour under the Title X Mortgage Insurance Program, which in turn would facilitate the development of a 240 acre peninsula at Bodkin Point with residences, neighborhood shopping, and conference facilities. A marina providing berths for 300 to 500 boats would also be provided. Sixteen hundred dwelling units would be constructed in six phases. Adverse effects include the loss of wooded areas on Bodkin Point including the loss of some animal habitats. (100 pages).

Comments made by: AHP, DOC, EPA, DOI, DOT, state and local agencies. (ELR Order No. 61206.)

Princeton Park Subdivision, Dallas County, Texas, August 16: This statement concerns an application by Billy B. Williams and Associates for Federal mortgage insurance on a predominantly residential development of 1560 homes located in the community of Rowlett, approximately 23 miles northeast of Dallas. Acreage has also been allocated for apartments, small commercial enterprises, parks, schools, and office buildings. The proposed development would create greater demand for fossil fuels through heavy dependence on the automobile for transportation to jobs and various urban facilities (167 pages).

Comments made by: EPA, COE, USDA, AHP, DOT, DOI, HEW, state and local agencies. (ELR Order No. 61197.)

V41168 AUG 27 76 UMI

Section 104(h)

The following are Community Development Block Grant statements prepared and circulated directly by applicants pursuant to section 104(h) of the 1974 Housing and Community Development Act. Copies may be obtained from the office of the appropriate local chief executive. (Copies are not available from HUD.)

Final

Pickens County Water Systems, Pickens County, Alabama, August 17: The proposed project consists of a water supply system designed to serve the most heavily populated and developed rural area of North Pickens County, Alabama. This project forms the core of the northern component of the planned Pickens County Water System. Future expansions of the distribution system will permit it to serve all of the area included in the original proposal. Adverse effects include temporary increases in noise, dust, visual clutter and some additional soil erosion during periods of heavy rainfall. (35 pages). Comments made by: EPA2 county agencies. (ELR Order No. 61205.)

DEPARTMENT OF INTERIOR

Contact: Mr. Bruce Blanchard, Director, Environmental Project Review, Room 7260, Department of the Interior, Washington, D.C. 20240. (202) 343-3891.

Draft

BUREAU OF INDIAN AFFAIRS

Crow Ceded Area Coal Lease, Tracts I and III, Big Horn County, Montana, August 18: The statement concerns reconsideration of approval of existing coal leases between the Crow tribes and Westmoreland Resources. The leases involve stripmining of coal reserves located in Tracts I and III, Crow Ceded Area. Three levels of development are analyzed, 1) 19 million tons per year for transport by rail, 2) 26 million tons per year for transport by rail, and 3) 14 million tons per year for rail transport, plus 6.5 million tons per year for energy conversion at a hypothetical nearby facility. Adverse impacts include disruption of soil, vegetation and wildlife, the destruction of ground water aquifers and loss of surface lands from agricultural use. (440 pages). (ELR Order No. 61212.)

Final

Sherwood Uranium Project, Stevens County, Washington, August 19: Proposed is the approval of a lease allowing development of an open-pit uranium mine and processing facilities near the town of Willipinit on the Spokane Indian Reservation in Stevens County, Washington. The 10.6 year project involves a minimum of approximately 35 million bank cubic yards of overburden, removal, and processing of 7,950,000 tons of ore from which approximately 14,000,000 pounds of uranium oxide will be removed. Adverse effects include the emigration or death of most wildlife due to changes in project area. Mining and processing will affect approximately 320 acres. (610 pages). Comments made by: USDA, ERDA, EPA, HEW, COE, DLAB, DOI, state and local agencies, Spokane Indian Tribe. (ELR Order No. 61218.)

DEPARTMENT OF TRANSPORTATION

Contact: Mr. Martin Convisser, Director, Office of Environmental Affairs, U.S. Department of Transportation, 400 7th Street, SW., Washington, D.C. 20590. (202) 426-4357.

FEDERAL HIGHWAY ADMINISTRATION

Draft

U.S. Highway 24 Bypass, Colorado Springs, El Paso County, Colorado, August 18: Proposed is the upgrading and potential rerouting of U.S. Highway 24 in Colorado Springs, Colorado. The termini of this project are from a point near the present U.S. Highway 24 and State Highway 94 intersection to the present U.S. Highway 24 and Interstate 25 intersection (Cimarron Interchange). Project length varies from 7.4 miles to 10 miles subject to the alternate chosen. A 4(f) statement is included concerning Fountain Park. (225 pages). (ELR Order No. 61216.)

Gould Street Connection, Bannock County, Bannock County, Idaho, August 16: Proposed is the upgrading of the intercity loop of U.S. 30 in Pocatello City. The improvement would include the intersection, approach sections and the Gould Street viaduct which crosses the Union Pacific Railroad Tracks. Adverse impacts would include removal of 4 commercial structures and 13 residential structures, and loss of shade trees. (177 pages). (ELR Order No. 61214.)

Flamingo Road, I-15 to U.S. 93-95, Clark County, Nevada, August 19: Proposed is the Flamingo Road Project, which consists of upgrading an existing arterial roadway in the Las Vegas metropolitan area, south of the present limits of the City of Las Vegas. The western terminus of the project is I-15, and the eastern terminus is U.F. 93-95 (Boulder Highway). Total project length is 6 miles, with part of the roadway divided into four lanes and the remainder into 6 lanes. Adverse impacts include 8 residential and 3 business relocations, damage to several commercial properties, and increased noise levels in the area. (317 pages). (ELR Order No. 61219.)

U.S. 74, West of Hallsboro to East of Bolton, Columbus County, North Carolina, August 17: Proposed is the imporvement of the existing U.S. 74 highway in Columbus County from west of Hallsboro to east of Bolton. The improvement will be a divided four-lane facility with five-lane urbanized sections, and will extend a distance of approximately 17.0 to 18.6 miles. The project will require the taking of land for right-of-way and will displace 14 to 76 families, 2 to 33 businesses, and 1 to 3 churches depending on the alternative selected. (Region 4) (100 pages). (ELR Order No. 61199).

Final

Forest Highway Route 19, Ferry County, Washington, August 17: The statement refers to the reconstruction of a 4.7 mile section of Forest Highway Route 19, Tonasket-San Poil Highway, from the Okanogan-Ferry County Line easterly to the intersection of Sixth and Clark Streets in Republic FHA 19 is a portion of Washington State Routes 20 and 21. Adverse impacts are the loss of some agricultural land, displacement of a maximum of 5 dwellings, increased air and noise pollution, and the potential for temporary sediment pollution of Granite Creek. (95 pages). Comments made by: DOI, COE, EPA, SDA2, state and local agencies, private organizations. (ELR Order No. 61202).

GARY L. WIDMAN,
General Counsel.

[FR Doc.76-25178 Filed 8-26-76;8:45 am]

ENERGY RESEARCH AND DEVELOPMENT ADMINISTRATION

SPENT FUELS

Chemical Processing and Conversion

This notice amends a similarly entitled notice published January 3, 1968, 33 FR 30, and as amended in 33 FR 8715, June 8, 1970; and in 35 FR 18302, December 1, 1970; and in 40 FR 3031, January 17, 1975, which sets forth the essential terms of ERDA's policy with respect to the receipt of irradiated reactor fuels and making settlement therefor. This amendment revises pricing policy for uranium-aluminum alloy fuel and extends term of the same to December 31, 1982.

1. Delete the date "December 31, 1977" in paragraph 3.c. of said notice and substitute in lieu thereof the date "December 31, 1982".

2. Delete first sentence of paragraph 5.a. of said notice and substitute in lieu thereof the following sentence: "For those reactor materials, other than enriched uranium-aluminum (other than uranium-233) alloy fuels, which can be processed by an assumed chemical processing plant, the establishment of the firm charge by ERDA will be based on the costs estimated to be associated with that plant."

3. Add paragraph 5.c. to said notice as follows:

"For enriched uranium-aluminum (other than uranium-233) alloy fuel processable in currently operating ERDA plants, the chemical reprocessing charge will be based on full cost recovery with plants operating at 100% throughout (based on 300 days of operation per year). When the plants are operated at less than 100% throughput on a yearly basis, an equivalent 100% throughput cost will be utilized so that the customer is not penalized for idle plant capacity."

4. Renumber paragraph 6.c. to 6.d.

5. Add paragraph 6.c. to said notice as follows:

"ERDA has determined that as of June 1976, the cost for processing enriched uranium-aluminum alloy fuels to be $360/kg of total weight of uranium and aluminum metal contained in the processing batch. Of this total, $135 is capital related and $255 is related to operation costs. This charge covers receiving, chemical processing and waste management cost components, but not any special handling and/or storage requirements. A minimum charge of $30,000 (receiving and processing) plus $175/kg total weight of uranium and aluminum metal (waste management) will be applied to each processing batch."

6. Delete the words, "in accordance with the price indices for inorganic chemicals" from paragraph 6.d.(2) and substitute in lieu thereof, "in accordance with the Basic Inorganic Chemicals Index."

7. Add paragraph 6.d.(3) to said notice as follows:

"The operation related charges for enriched uranium-aluminum (other than uranium-233) alloy fuels shall be adjusted to reflect changes in price levels from the base date of June 1976 in accordance with the Official Monthly Construction Cost Indices, as appearing in 'Engineering News Record'."

8. Delete paragraph 10.a. (1) of said notice.

9. Renumber paragraphs 10.a. (2), (3) and (4) of said notice as paragraphs 10.a. (1), (2) and (3), respectively.

10. Delete paragraph 10.b. and substitute the folowing in lieu thereof: "The ERDA will periodically review the respective charges described in paragraphs 10.a. (1), (2) and (3) above to determine the extent, if any, to which they should be adjusted and publish such adjustments as deemed necessary."

This notice is effective August 27, 1976.

Dated at Germantown, Md., this 24th day of August 1976. For the U.S. Energy Research and Development Administration.

EDMUND F. O'CONNOR,
Deputy Assistant Administrator for Nuclear Energy.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 606-1]

AMBIENT AIR MONITORING REFERENCE AND EQUIVALENT METHODS

Reference and Equivalent Method Designations

Notice is hereby given that EPA in accordance with 40 CFR Part 53 (40 FR 7044, February 18, 1975), has designated another reference method for the measurement of ambient concentrations of carbon monoxide and another equivalent method for the measurement of ambient concentrations of sulfur dioxide. The new reference method is an automated method (analyzer) which utilizes a measurement principle based on non-dispersive infrared spectrometry. The new equivalent method is an automated method (analyzer) which utilizes a measurement principle based on flame photometry for the detection of sulfur dioxide. The methods are:

(1) RFCA-0876-012, "Beckman Model 866 Ambient CO Monitoring System" consisting of the following components:

Pump/Sample-Handling Module
Gas Control Panel
Model 865-17 Analyzer Unit
Automatic Zero/Span Standardizer

operated with a 0 to 50 ppm range, a 13 second electronic response time, and with or without any of the following options:

Current Output Feature
Linearizer Circuit
Bench Mounting Kit

This method is available from Beckman Instruments, Inc., Process Instruments Division, 2500 Harbor Boulevard, Fullerton, California 92634.

(2) EQSA-0876-013, "Monitor Labs Model 8450 Sulfur Monitor", operated with a 0 to 0.5 ppm range, a 5 second time constant, a model 8740 hydrogen sulfide scrubber in the sample line, with or without any of the following options:

(a) Option BP—Bipolar Signal Processor.
(b) Option V—Zero/Span Valves
(c) Option VT—Zero/Span Valves and Timer
(d) Option TF—TFE Sample Particulate Filter
(e) Option IZS—Internal Zero/Span Module
(f) Option CLO—Current Loop Output
(g) Option DO—Status Remote Interface

This method is available from Monitor Labs, Incorporated, 4202 Sorrento Valley Boulevard, San Diego, California 92121.

A test analyzer representative of each of these methods has been tested by its manufacturer, in accordance with the test procedures specified in 40 CFR Part 53. After reviewing the results of these tests and other information submitted by the respective applicants, EPA has determined, in accordance with Part 53, that these methods should be designated as reference and equivalent methods respectively. The information submitted by the applicants will be kept on file at the address shown below and will be available for inspection to the extent consistent with 40 CFR Part 2 (EPA's regulations implementing the Freedom of Information Act).

As reference or equivalent methods, these methods are acceptable for use by States and other control agencies for purposes of section 51.17(a) of 40 CFR Part 51 ("Requirements for Preparation, Adoption, and submittal of Implementation Plans") as amended on February 18, 1975 (40 FR 7042). For such use, each method must be used in strict accordance with the operation or instruction manual provided with the method and subject to any limitations (*e.g.*, operating range) specified in the applicable designation (see descriptions of the methods above). Vendor modifications of a designated method used for purposes of § 51.17(a) are permitted only with prior approval of EPA, as provided in Part 53. Provisions concerning modification of such methods by users were promulgated on March 17, 1976 (FEDERAL REGISTER, Vol. 41, page 11255).

In general, each designation applies to any analyzer which is identical to the analyzer described in the designation. In many cases, similar analyzers manufactured prior to the designation may be upgraded (*e.g.*, by minor modification or by substitution of a new operation or instruction manual) so as to be identical to the designated method and thus achieve designated status at modest cost. The manufacturer should be consulted to determine the feasibility of such upgrading.

Part 53 requires that sellers of designated methods comply with certain conditions are given in 40 CFR Part 53.9 and are summarized below:

(1) A copy of the approved operation or instruction manual must accompany the analyzer when it is delivered to the ultimate purchaser.

(2) The analyzer must not generate any unreasonable hazard to operators or to the environment.

(3) The analyzer must function within the limits of the performance specifications given in Table B-1 of Part 53 for at least 1 year after delivery when maintained and operated in accordance with the operation manual.

(4) Any analyzer offered for sale as a reference or equivalent method must bear a label or sticker indicating that it has been designated as a reference or equivalent method in accordance with Part 53.

(5) If such an analyzer has one or more selectable ranges, the label or sticker must be placed in close proximity to the range selector and indicate which range or ranges have been designated as reference or equivalent methods.

(6) An applicant who offers analyzers for sale as reference or equivalent methods is required to maintain a list of ultimate purchasers of such analyzers and to notify them with 30 days if a reference or equivalent method designation applicable to the analyzer has been cancelled or if adjustment of the analyzers is necessary under 40 CFR 53.11(b) to avoid a cancellation.

(7) An applicant who modifies an analyzer previously designated as a reference or equivalent method is not permitted to sell the analyzer (as modified) as a reference or equivalent method (although he may choose to sell it without such representations), nor to attach a label or sticker to the analyzer (as modified) under the provisions described above, until he has received notice under 40 CFR 53.14(c) that the original designation or a new designation applies to the method as modified or until he has applied for and received notice of a new reference or equivalent method determination for the analyzer as modified.

Aside from occasional breakdowns or malfunctions, consistent or repeated non-compliance with any of these conditions should be reported to: Director, Environmental Monitoring and Support Laboratory, Department E (MD-76), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.

Designation of these reference and equivalent methods will provide assistance to the States in establishing and operating their air quality surveillance systems under 40 CFR 51.17(a).

Additional information concerning this action may be obtained by writing to the address given above.

Dated: August 20, 1976.

WILSON K. TALLEY,
Assistant Administrator for Research and Development.

AMERICAN CYANAMID CO. ET AL.

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance

V41168 AUG 27 76 UMI

with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 241–EUP–81. American Cyanamid Company, Princeton, New Jersey 08540. This experimental use permit allows the use of 262 pounds of the herbicide N-(1-ethylpropyl)-3,4-dimethyl-2, 6-dinitrobenzenamine on potatoes to evaluate control of various weeds. A total of 150 acres is involved; the program is authorized only in the States of California, Colorado, Florida, Idaho, Maine, Maryland, Minnesota, New Jersey, New York, North Dakota, Oregon, Pennsylvania, Virginia, Washington, and Wisconsin. The experimental use permit is effective from July 30, 1976, to July 30, 1977. A temporary tolerance for residues of the active ingredient in or on potatoes has been established.

No. 6704–EUP–11. U.S. Fish and Wildlife Service, Washington, D.C. 20240. This experimental use permit allows the use of 10 pounds of the bird repellent 4-aminopyridine on sunflowers to evaluate control of red-winged blackbirds, yellow-headed blackbirds, common grackles, cowbirds, and starlings. A total of 200 acres is involved; the program is authorized only in the State of North Dakota. The experimental use permit is effective from July 28, 1976, to July 28, 1977. A permanent tolerance for residues of the active ingredient in or on sunflower seeds has been established (40 CFR 180.312).

No. 9518–EUP–1. Tower Chemical Company, Clermont, Florida 32711. This experimental use permit allows the use of 138 pounds of the fungicide copper salt of fatty and rosin acids on soybeans to evaluate control of frogeye leaf spot, and rod and stem blight. A total of 60 acres is involved; the program is authorized only in the States of Alabama and Arkansas. The experimental use permit is effective from July 29, 1976, to July 29, 1977. An exemption from the requirement of a tolerance for residues of the active ingredient in or on raw agricultural commodities when used as a fungicide has been established (40 CFR 180.1001(b)(1)).

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated: August 19, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

[FRL 607–3; OPP–50230]

CHEVRON CHEMICAL CO.

Issuance of Experimental Use Permit

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), an experimental use permit has been issued to Chevron Chemical Company, Richmond, California 94804. Such permit is in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

This experimental use permit (No. 239–EUP–71) allows the use of 7,500 pounds of the insecticide acephate on grapes to evaluate control of the Grape Leafhopper, the Orange Tortrix, the Saltmarsh Caterpillar, and the Omnivorous Leaf Roller. A total of 1,000 acres is involved; the program is authorized only in the States of Arkansas, Arizona, California, Michigan, New York, and Washington. The experimental use permit is effective from July 6, 1976, to July 6, 1977. A temporary tolerance for residues of the active ingredient in or on grapes has been established.

Interested parties wishing to review the experimental use permit are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visiting the EPA Headquarters Office, so that the appropriate permit may be made conveniently available for review purposes. This file will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated August 19, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

[FRL 606–4; OPP–50245]

ELANCO PRODUCTS CO. ET AL.

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 1471–EUP–53. Elanco Products Company, Indianapolis, Indiana 46206. This experimental use permit allows the use of 4,240 pounds of the herbicide oryzalin on soybeans to evaluate control of various annual and broadleaf weeds. A total of 7,420 acres is involved; the program is authorized only in the States of Alabama, Arkansas, Colorado, Florida, Georgia, Iowa, Illinois, Indiana, Kansas, Kentucky, Louisiana, Michigan, Minnesota, Missouri, Mississippi, Nebraska, North Carolina, North Dakota, New York, Ohio, Oklahoma, South Carolina, South Dakota, Tennessee, Texas, and Wisconsin. The experimental use permit is effective from July 9, 1976, to July 9, 1977. A permanent tolerance for residues of the active ingredient in or on soybeans has been established.

No. 10350–EUP–1. 3M Company, St. Paul, Minnesota 55101. This experimental use permit allows the use of 955 pounds of an insecticide which is a mixture of pyrethrins, piperonyl butoxide, N-octyl bicycloheptene dicarboximide, and petroleum distillate in food handling establishments, dairy and cattle barns, stables, and poultry houses to evaluate control of ants, flies, mosquitoes, fleas, ticks, and other insects. The program is authorized only in the States of California, Florida, Georgia, Illinois, Indiana, Minnesota, New Jersey, New York, North Carolina, Tennessee, Texas, and Washington. The experimental use permit is effective from July 9, 1976, to July 9, 1977.

No. 148–EUP–20. Thompson-Hayward Chemical Company, Kansas City, Kansas 66110. This experimental use permit allows the use of 193.48 pounds of the insecticide N[[(4-chlorophenyl)amino]carbonyl] - 2,6 - difluorobenzamide in temporarily flooded areas, drainage ditches, lagoons from dairy, poultry and swine housing and feeding areas, fresh water swamps and marshes and salt water marshes to evaluate control of mosquito larvae. A total of 1,300 acres is involved; the program is authorized only in the States of California, Colorado, Delaware, Georgia, Illinois, Louisiana, Minnesota, Mississippi, Montana, Nebraska, New Hampshire, Ohio, Oregon, Texas, Utah, Washington, and Wyoming. The experimental use permit is effective from July 13, 1976, to July 13, 1977.

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., S.W., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated August 19, 1976.

JOHN B. RITCH, JR.,
Director, Registration Division.

[FRL 606–8; OPP–50250]

MONSANTO CO. ET AL.

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 524–EUP–29. Monsanto Company, St. Louis, Missouri 63166. This experimental use permit allows the use of 2,452 pounds of the herbicide glyphosate in irrigation systems, drainage systems, and small water impoundments such as farm ponds, for nonselective weed control. A total of 613 acres is involved; the program is authorized only in the States of Arkansas, Arizona, California, Colorado, Idaho, Iowa, Hawaii, Kansas, Louisiana, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Texas, Utah, Washington, and Wyoming. The experimental use permit is effective from July 28, 1976, to July 28, 1977. Temporary tolerances for residues of the active ingredient in or on various

crop groupings, avocadoes, cottonseed, and hops have been established; in addition, a food additive tolerance for residues in potable water has been established. There can be no direct treatment to moving bodies of water such as streams and rivers.

No. 241–EUP–80. American Cyanamid Company, Princeton, New Jersey 08540. This experimental use permit allows the use of 560 pounds of the herbicide N-(1-ethylpropyl)-3,4-dimethyl-2,6-dinitrobenzenamine on peanuts to evaluate control of various annual grasses and broadleaf weeds. A total of 548 acres is involved; the program its authorized only in the States of Alabama, Florida, Georgia, New Mexico, North Carolina, Oklahoma, South Carolina, Texas, and Virginia. The experimental use permit is effective from July 28, 1976, to July 28, 1977. Temporary tolerances for residues of the active ingredient in or on peanuts, and peanut forage and hay have been established.

No. 241–EUP–82. American Cyanamid Company, Princeton, New Jersey 08540. This experimental use permit allows the use of 168 pounds of the herbicide N-(1-ethylpropyl)-3,4 - dimethyl - 2,6 - dinitrobenzenamine on beans to evaluate control of various weeds. A total of 188 acres is involved; the program is authorized only in the States of California, Colorado, Delaware, Idaho, Kansas, Maryland, Michigan, Minnesota, Montana, Nebraska, New York, North Dakota, Oregon, Pennsylvania, Tennessee, Utah, Washington, Wisconsin and Wyoming. The experimental use permit is effective from July 30, 1976, to July 30, 1977. A temporary tolerance for residues of the active ingredient in or on beans (dry, snap, and lima) has been established.

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St. S.W., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Dated August 19, 1976.

NORTH DAKOTA STATE UNIVERSITY ET AL.

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 35963–EUP–2. North Dakota State University, Department of Entomology, Fargo, North Dakota 58102. This experimental use permit allows the use of 22 pounds of the insecticide carbaryl, which will be incorporated into edible carriers (shredded newsprint) with grasshopper phagostimulant (diluted molasses), on rangeland to evaluate control of grasshoppers. A maximum of 100 acres is involved; the program is authorized only in the State of North Dakota. The experimental use permit is effective from July 15, 1976, to July 15, 1977. A permant tolerance for residues of the active ingredient in or on grass and grass hay has been established (40 CFR 180.169).

No. 769–EUP–5. Woolfolk Chemical Works, Fort Valley, Georgia 31030. This experimental use permit allows the use of 4,972.8 pounds of the fungicide calcium polysulphide on soybeans to evaluate control of frogeye leaf spot. A total of 414 acres is involved; the program is authorized only in the States of Alabama, Georgia, and South Carolina. The experimental use permit is effective from July 22, 1976, to July 22, 1977. An exemption from the requirement of a pesticide tolerance for residues of the active ingredient in soybeans has been established.

No. 6704–EUP–10. Fish and Wildlife Service, Washington, D.C. 20240. This experimental use permit allows the use of 15 pounds of bird repellent 4-aminopyridine to evaluate control of blackbirds in corn fields. A total of 3,000 acres is involved; the program is authorized only in the State of Ohio. The experimental use permit is effective from July 21, 1976, to July 21, 1977. A permanent tolerance for residues of the active ingredient in or on field corn has been established (40 CFR 180.312).

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., S.W., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visitng the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

PENNWALT CORP. ET AL.

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 12 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 4581–EUP–26. Pennwalt Corporation, Tacoma, Washington 98421. This experimental use permit allows the use of 13,200 pounds of the herbicide mono(N,N-dimethylalkylamine) salt of endothall in irrigation canals to evaluate control of various algae and aquatic weeds. A total of 19 irrigation canals will be treated; the program is authorized only in the States of Arizona, California, Colorado, Idaho, and Washington. The experimental use permit is effective from July 16, 1976, to July 16, 1977. Treated water will not be used for human or animal consumption or for irrigation of crops until endothall residues have been diluted to levels below 0.2 part per million.

No. 279–EUP–62. FMC Corporation, Middleport, New York 14105. This experimental use permit allows the use of 120 pounds of the insecticide carbofuran on the leatherleaf fern to evaluate control of fern borer nematodes. A total of 12 acres is involved; the program is authorized only in the State of Florida. The experimental use permit is effective from July 16, 1976, to July 16, 1977.

No. 7946–EUP–4. J. J. Mauget Company, Burbank, California 91504. This experimental use permit allows the use of 83 pounds of the insecticide S-[2-(ethylsulfinyl) ethyl] O,O-dimethyl phosphorothioate for injectiou into trees to evaluate control of various tree insects. A total of 55 acres containing 1,155 trees is involved; the program is authorized only in the States of Arizona, California, Florida, Kansas, Massachusetts, Maryland, New Jersey, New York, North Carolina, Ohio, Pennsylvania, and Texas. The experimental use permit is effective from July 16, 1976, to July 16, 1977.

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., SW., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. S. B. PENICK AND CO. ET AL.

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 432–EUP–31. S. B. Penick and Company, Orange, New Jersey 07050. This experimental use permit allows the use of 13 pounds of the insecticide (5-Benzyl-3-furyl) methyl 2, 2-dimethyl-3-(2-methylpropenyl) cyclopropanecarboxylate in residential and industrial business sites, food processing plants, and flour mills to evaluate control of various insects. The program is authorized only in the States of California, Florida, Georgia, New Jersey, and Pennsylvania. The experimental use permit is effective from July 22, 1976, to July 22, 1977.

V41168
AUG 27 76
UMI

No. 148–EUP–26. Thompson-Hayward Chemical Company, Kansas City, Kansas 66110. This experimental use permit allows the use of 12.5 pounds of the insecticide N-[[(4-chlorophenyl)amino] carbonyl]-2, 6-difluorobenzamide in the Lower Blue Lake, Lake County, California, to evaluate control of the Clear Water Gnat. A total of 46 acres is involved; the program is authorized only in the State of California. The experimental use permit is effective from July 28, 1976, to July 28, 1977. Treated water may not be used as a potable water source or for livestock watering crop irrigation, or commercial fishing.

No. 279–EUP–61. FMC Corporation, Middleport, New York 14105. This experimental use permit allows the use of 1,600 pounds of the insecticide carbofuran on corn to evaluate control of adult corn rootworm beetles. A total of 3,000 acres is involved; the program is authorized only in the States of Colorado, Illinois, Iowa, Kansas, Minnesota, Missouri, Nebraska, South Dakota, and Wisconsin. The experimental use permit is effective from July 29, 1976, to July 29, 1977. A permanent tolerance for residues of the active ingredient in or on corn has been established (40 CFR 180.254).

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., S.W., Washington, D.C. 20460. VELSICOL CHEMICAL CORP. ET AL.

Issuance of Experimental Use Permits

Pursuant to section 5 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), experimental use permits have been issued to the following applicants. Such permits are in accordance with, and subject to, the provisions of 40 CFR Part 172; Part 172 was published in the FEDERAL REGISTER on April 30, 1975 (40 FR 18780), and defines EPA procedures with respect to the use of pesticides for experimental purposes.

No. 876–EUP–31. Velsicol Chemical Corporation, Chicago, Illinois 60611. This experimental use permit allows the use of 2,250 pounds of the herbicide methazole on onions to evaluate control of various weeds. A total of 1,130 acres is involved; the program is authorized only in the States of Arizona, California, Colorado, Idaho, Michigan, Minnesota, New Jersey, New Mexico, New York, Oklahoma, Oregon, Pennsylvania, Texas, Washington, and Wisconsin. The experimental use permit is effective from August 2, 1976, to August 2, 1977. A temporary tolerance for residues of the active ingredient in or on onions has been established.

Nos. 4581–EUP–27. Pennwalt Corporation, King of Prussia, Pennsylvania 19406. This experimental use permit allows the use of 15.5 pounds of the herbicide Potassium 3,4-dichloroisothiazole-5-carboxylate on cotton to evaluate its use as a conditioner for cotton defoliation. A total of 66 acres is involved; the program is authorized only in the States of Alabama, Arizona, Mississippi, and Texas. The experimental use permit is effective from August 6, 1976, to August 6, 1977. This permit is issued for use on cotton grown for seed purposes only.

No. 11556–EUP–4. Bayvet Corporation, Shawnee Mission, Kansas 66201. This experimental use permit allows the use of 12.09 pounds of the insecticide fenthion on beef and non-lactating dairy cattle to evaluate control of horn flies. Approximately 1600 head of cattle will be treated; the program is authorized only in the States of Arkansas, Colorado, Florida, Idaho, Iowa, Kansas, Kentucky, Louisiana, New Mexico, South Dakota, and Virginia. The experimental use permit is effective from August 6, 1976, to August 6, 1977. A permanent tolerance for residues of the active ingredient in or on the meat, fat, and meat byproducts of cattle, goats, and poultry has been established (40 CFR 180.214).

Interested parties wishing to review the experimental use permits are referred to Room E–315, Registration Division (WH–567), Office of Pesticide Programs, EPA, 401 M St., S.W., Washington, D.C. 20460. It is suggested that such interested persons call 202/755–4851 before visiting the EPA Headquarters Office, so that the appropriate permits may be made conveniently available for review purposes. These files will be available for inspection from 8:30 a.m. to 4:00 p.m. Monday through Friday.

GREELEY REGION WASTEWATER MANAGEMENT PROGRAM

Availability of Draft Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Environmental Protection Agency has prepared a draft environmental impact statement (DEIS) for the Greeley Region Wastewater Management Program, Weld County, Colorado.

Proposed is the granting of funds to Greeley, Colorado, for the construction of wastewater treatment facilities. The City of Greeley has recommended the building of a regional wastewater treatment facility in the delta agricultural area east of the city near the confluence of the Cache La Poudre and South Platte Rivers.

To receive additional public comments, the Environmental Protection Agency, Region VIII, will hold an open public hearing on this DEIS September 20, at 7:00 p.m. at the 4H Building, Island Grove Park, Greeley, Colorado. All interested parties are invited to express their views at this hearing. To ensure the accuracy of the record, oral statements should be accompanied by a written statement. Oral statements should summarize extensive written materials to allow time for all interested persons to be heard.

The DEIS was transmitted to the Council on Environmental Quality (CEQ) August 20, 1976. In accordance with CEQ's notice of availability, comments are due October 4, 1976. Copies of the DEIS are available for review and comment from: Mr. William Geise, Environmental Protection Agency, Region VIII, Suite 900, 1860 Lincoln Street, Denver, Colorado 80203 (telephone: 303–837–4831 or FTS 327–4831).

Copies of the DEIS are available for public inspection at the following locations:

Environmental Protection Agency, Region VIII, Library, 1st Floor, 1860 Lincoln Street, Denver, Colorado 80203.

Environmental Protection Agency, Public Information Reference Unit, Room 2922, Waterside Mall, 401 M Street SW., Washington, DC 20460.

Information copies of the DEIS are available at cost from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, DC 20036.

Copies of the DEIS have been sent to various Federal, State, and local agencies, and interested individuals as outlined in the CEQ Guidelines.

Dated: August 20, 1976.

REBECCA W. HANMER,
Director, Office of Federal Activities.

[FRL 606–2]

METRO DENVER SLUDGE MANAGEMENT PLAN, COLORADO

Availability of Draft Environmental Impact Statement

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969, the Environmental Protection Agency has prepared a draft environmental impact statement (DEIS) for the Metro Denver Sludge Management Plan, Adams County, Colorado.

The Metropolitan Denver Sewer Disposal District No. 1 (Metro) proposes to construct the necessary facilities to transport sludge to a site in Adams County for air drying in earthen basins, stockpiling in above-ground windows and distributing to the farming community to be reused on land for growing crops.

To receive additional public comments, the Environmental Protection Agency, Region VIII, will hold open public hearings on this DEIS on September 8, at 9:00 a.m., in Room 269 of the U.S. Post Office in Denver and September 9, at 1:30 p.m., at the Adams County Regional Fairgrounds Annex Building, East 124th Avenue and Henderson Road, Denver. All interested persons are invited to express their views at these hearings. To ensure the accuracy of the record, oral statements should be accompanied by a written statement. Oral statements should summarize extensive written materials to allow time for all interested persons to be heard.

This DEIS was transmitted to the Council on Environmental Quality (CEQ) August 20, 1976. In accordance with CEQ's notice of availability, comments are due October 4, 1976. Copies of the DEIS are available for review and comment from: Mr. William Geise, Environmental Protection Agency, Region VIII, Suite 900, 1860 Lincoln Street, Denver, Colorado 80203 (telephone: 303–837–4831 or FTS 327–4831)

Copies of the DEIS are available for public inspection at the following locations:

Environmental Protection Agency, Region VIII, Library, 1st Floor, 1860 Lincoln Street, Denver, Colorado 80203.

Environmental Protection Agency, Public Information Reference Unit, Room 2922, Waterside Mall, 401 M Street, SW, Washington, DC 20460.

Information copies of the DEIS are available at cost from the Environmental Law Institute, 1346 Connecticut Avenue, Washington, D.C. 20036.

Copies of the DEIS have been sent to various Federal, State, and local agencies, and interested individuals as outlined in the CEQ Guidelines.

Dated: August 20, 1976.

REBECCA W. HANMER,
Director, Office of Federal Activities.

[FRL 605–7; OPP–42027]

DISTRICT OF COLUMBIA

Submission of Plan for Certification of Pesticide Applicators

In accordance with the provisions of section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136) and 40 CFR Part 171 [39 FR 36446 (October 9, 1974) and 40 FR 11698 (March 12, 1975)], the Honorable Walter E. Washington, Mayor of the District of Columbia has submitted a Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides to the Environmental Protection Agency (EPA) for approval on a contingency basis. Contingency approval is being requested pending enactment by the City Council of all necessary legislation and promulgation of regulations thereunder.

Notice is hereby given of the intention of the Regional Administrator, EPA Region III, to approve this plan on a contingency basis.

A summary of the plan follows. The entire plan, together with all attached appendices may be examined during normal business hours at the following locations:

Room 3323, Curtis Building, 6th & Walnut Streets, Philadelphia, Pennsylvania 19106, Pesticides Branch, U.S. Environmental Protection Agency, Region III. Phone: 215/597–9869

Room 711, Department of Environmental Services, 801 N. Capitol Street, N.E., Washington, D.C. 20002. Phone: 202/629–3113

Room 401, East Tower, 401 "M" Street, S.W., Washington, D.C. 20460, Office of Pesticide Programs, Federal Register Section. Phone: 202/755–4854

SUMMARY OF DISTRICT OF COLUMBIA STATE PLAN

The Department of Environmental Services has been designated as the lead agency for the administration of the pesticide certification program, including enforcement activities.

The Department of Environmental Services is solely responsible for the administration of the plan. However, the certification program will be coordinated with other Departments and Agencies.

The Department of Economic Development (DED) will be involved with the issuance, denial, suspension or revocation of licenses upon authorization of the lead agency. The Solid Waste Management Division (SWMD) will assist the lead agency in developing standards relating to storage and disposal of pesticides and pesticide containers. The State Cooperative Extension Service (SCES) of the District of Columbia will assist the lead agency in training and testing leading toward certification. Also, the Mayor may create a Pesticide Advisory Board to advise the lead agency on matters relating to the use and application of pesticides.

Legal authority for the program may be found in the proposed Pesticide Operations Act. Other authorities cited are: Commissioner's Order No. 71–255 of July 27, 1971; Commissioner's Order No. 73–178 of July 27, 1973; Pesticide Operations Regulation No. 72–25 of November 18, 1972; and, Commissioner's Order No. 72–96 of April 18, 1972.

The plan indicates that the lead agency and cooperating agencies will have sufficient qualified personnel and funds needed to carry out the proposed program. It is estimated that the funds necessary to conduct a minimum program will amount to $80,000. A request will be made for sufficient funds at the time of reorganization and again if necessary when City Council holds public hearings on the proposed Pesticide Operations Act.

The District estimates that 302 commercial applicators and only 20 private applicators will need to be certified.

When qualified, both commercial and private applicators will be issued a certificate and a license. The lead agency will also issue a wallet size ID card which will be presented at the time of purchase of restricted use pesticides.

The State lead agency will submit an annual report on or about August 15 of each year covering the activities of the previous fiscal year ending on June 30. Other reports will be submitted as required by the EPA Administrator.

The commercial applicator categories proposed are those which are listed in 40 CFR 171.3. However, it is anticipated that the District will not have need for the following categories:

(1) Agricultural Pest Control, (2) Forest Pest Control, and (3) Seed Treatment.

Subcategories proposed in the plan are:

A. Ornamental and Turf Pest Control.
(1) Ornamental Plants and Shade Trees.
(2) Turf and Lawn Pest Control.

B. Industrial, Institutional, Structural and Health Related Pest Control.
(1) General.
(2) Wood Destroying Organisms.
(3) Bird Control.
(4) Fumigation.
(5) Rodent Control.
(6) Industrial Weed Control.

To become certified as a commercial applicator, an individual will be required to pass a written and practical examination. Examinations will cover general information and also specific information in each category of service in which the individual seeks certification. Standards of competency reflected in the examinations will be based on the Federal standards presented in 40 CFR 171.4(b) and (c) and 171.6.

Private applicators (agricultural commodity producers) will be required to pass a written examination meeting the standards outlined in 40 CFR 171.5 and 171.6. Certified private applicators will be authorized to purchase only specific brand name products or similar products having the same active ingredient formulation for which competency has been demonstrated.

Application forms pertaining to certification and licensing will be made available through the lead agency and the DED. All qualified applicants will be notified of location and time of examinations.

Upon receiving a passing score, each applicant for certification will receive a Certificate of Qualification from the lead agency which he will need to become licensed by DED. Certificates of Qualification and licenses should be posted at the applicator's place of employment.

Applicants for certification who desire training will be able to attend formal training programs which will be conducted by the SCES. Training materials for both commercial and private applicators will be based upon EPA and North East Core Manuals and other supplementary material prepared by SCES.

After the initial training and certification is completed, continued training will be conducted on a scheduled basis as the need indicates.

Sample examinations and examination questions are exhibited in the plan.

At the present time, the District of Columbia has no need for special testing procedures.

The plan also indicates that within 60 days of the final approval of the Government Agency Plan (GAP) by EPA, a statement concerning acceptance of GAP qualified Federal employees will be submitted for inclusion in the plan.

Conditions for granting reciprocal certifications to residents of other states are addressed in the plan. Also, all reciprocal agreements formed between the District of Columbia and other states will be submitted to EPA as an amendment to the plan.

Other regulatory activities listed in the plan which will supplement the District's certification program are: the requirement that all dealers in restricted

V 41 168
AUG 27 76
UMI

use pesticides be licensed and maintain records; authority by the Mayor to restrict or prohibit the use of certain pesticides; the requirement that commercial applicators submit records of all pesticides used; also, the plan indicates that regulatory activities will be conducted for pesticide registration, label review, and product analysis.

With respect to the maintenance of the plan, it is proposed to provide full-time inspectional capabilities. Consumer Safety Officers will monitor licenses, examine pesticide use and sale records, inspect equipment and storage areas, check on safety standards and observe operational procedures.

To assure that certified applicators maintain a continued level of competence, the plan provides that they become recertified every three years. The recertification process may entail either reexamining or presenting documentation indicating satisfactory completion of educational courses, programs, seminars or workshops. Also, the lead agency in cooperation with SCES will publish a biannual newsletter dealing with new developments and techniques relating to the pesticide industry.

PUBLIC COMMENTS

Interested persons are invited to submit written comments on the proposed State Plan for the District of Columbia to the Chief, Pesticides Branch, Region III, U.S. Environmental Protection Agency, 6th & Walnut Streets, Room 3323, Philadelphia, Pennsylvania 19106. The comments must be received on or before September 26, 1976, and should bear the identifying notation OPP-42027. All written comments filed pursuant to this notice will be available for public inspection at the above mentioned locations from 8:30 a.m. to 3:30 p.m. Monday through Friday.

Dated: July 19, 1976.

DANIEL J. SNYDER III,
Regional Administrator, U.S. Environmental Protection Agency—Region III.

CALIFORNIA DEPARTMENT OF HEALTH

Amendment to Specific Exemption To Use DDT To Suppress Flea Vectors of Plague

On May 5, 1976, the California Department of Health (hereafter referred to as the "Applicant") promulgated a crisis exemption under the provisions of section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136). This crisis exemption involved the use of a ten (10) percent DDT dust to suppress populations of fleas which were vectoring plague on wild rodents and threatening human health on the Grizzly and Grasshopper Campgrounds, Lake Davis, Plumas County, California; this action was taken after repeated carbaryl applications failed to control the situation. Notice of this exemption was published in the Federal Register on June 8, 1976 (41 FR 22979). Forty-seven (47) pounds of a ten percent DDT dust were applied directly into rodent burrows on 80 acres of the affected campground. A comparison of pre- and post-treatment flea indices (No. fleas/No. rodents) indicated that plague vectoring flea populations were reduced on chipmunks, white-footed deer mice, and golden-mantled ground squirrels to a level which was adequate to protect the public health.

Subsequently, the Applicant requested a specific exemption for use of DDT to suppress flea population which were vectoring plague on wild rodents and threatening the public health in the foothills and mountains of California. After reviewing the application and other available information, and conferring with the Chief, Plague Branch, Center for Disease Control (CDC), the Applicant was authorized to use no more than fifty (50) pounds of actual DDT. Notice of the granting of this exemption was published in the Federal Register on August 4, 1976 (41 FR 32640).

However, the Applicant has requested an amendment to the specific exemption which would permit the use of DDT dust stations in situations where burrow dusting is impractical or the burrows inaccessible. The original specific exemption indicated that DDT would be applied directly to wild rodent burrows with hand-powered dusting equipment. After reviewing additional scientific information provided by the Applicant, and consulting with the Chief, Plague Branch, CDC, EPA has determined that the use of DDT dust bait stations to control flea populations vectoring plague on wild rodents in California is necessary to protect the public health. The other conditions pursuant to the original specific exemption remain in force.

Dated: August 20, 1976.

JAMES M. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.76-25267 Filed 8-26-76;8:45 am]

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Issuance of Specific Exemption To Use DDT To Suppress Flea Vectors of Plague

Pursuant to the provisions of section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), notice is hereby given that the Environmental Protection Agency (EPA) has granted a specific exemption to the Indian Health Service of the Department of Health, Education, and Welfare (hereafter referred to as "DHEW") to use ten (10) percent DDT dust in a program to suppress fleas vectoring plague on wild rodents and threatening the public health on Indian Reservations in Arizona, Colorado, New Mexico, and Utah. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, issued December 3, 1973 (38 FR 33303), which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, Environmental Protection Agency, 401 M St. SW, Rm. E-315, Washington, DC 20460.

According to DHEW, there is an unusually large and early incidence of plague-infected rodents on Indian Reservations located in the four States specified. Three human cases have been reported among Indian populations this year. The Chief of the Plague Branch, Center for Disease Control (CDC), DHEW, Fort Collins, Colorado, has predicted that a record number of plague incidents will occur in the affected States in 1976; he further recommended limited use of DDT for control of vector fleas in the high risk areas of these Indian lands. DHEW stated that whenever appropriate, carbaryl would be used rather than DDT to control the fleas.

DHEW defines high risk areas as those in which Rock Squirrels (*Spermophilus variegatus*) live in close proximity to human residences. Other animals which might be involved in a plague outbreak are the prairie dog species *Cynomys ludovicianus* and *C. gunnisoni*. Sylvatic plague is transmitted among rodent plague reservoirs by infected fleas. Flea control must be initiated promptly to protect human health since transmission to humans occurs primarily from May through September. Carbaryl, the only insecticide registered for flea control on wild rodents, is nonpersistent and would require one or more reapplications, according to DHEW; furthermore, DHEW indicated that due to a manpower shortage and the advanced plague season, it would not be possible to treat high risk areas with carbaryl more than once.

Teams of three to eight men will apply two (2) ounces of a ten (10) percent DDT dust with hand-powered dusting equipment to animal burrows located near villages and towns on Indian Reservations. A maximum of 2,000 pounds of ten percent DDT dust (20 pounds actual DDT) will be used for Indian Reservations in the four States. The teams will be supervised by Indian Health Service Sanitarians; the overall supervision of the program will be provided by the CDC, Fort Collins, Colorado. One DDT application will be made to each rodent burrow in high risk areas. The DHEW stated that, since the DDT dust will be applied directly into the rodent burrows, few adverse environmental effects are anticipated. The Chief of the Plague Branch, CDC, Fort Collins, Colorado, has advised EPA that widespread but localized plague epizootics are presently sweeping through wild rodent populations in Colorado and New Mexico. He stated that a potentially serious threat of a plague epizootic exists also in Arizona, California, and Utah. The CDC has reported that two (2) deaths have occurred.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of fleas vectoring plague has occurred; (b) there is no pesticide presently registered and available for use to control the flea populations on Indian Reservations located in Arizona, Colorado, New Mexico, and Utah; (c) there are not alternative means of control, taking into account the efficacy and hazard; (d) significant health problems may result if the fleas vectoring plague are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, DHEW has been granted a specific exemption to use the pesticide noted above until August 31, 1976, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. DDT treatment is limited to high risk areas where wild rodents live in close proximity to areas of human habitation;
2. DDT will be applied directly into wild rodent burrows with hand-powered dusting equipment;
3. Total actual DDT used will be two hundred (200) pounds;
4. Each rodent burrow will receive a single application of approximately two (2) ounces of a ten (10) percent DDT dust formulation; and
5. Personnel of the CDC and the Indian Health Service, DHEW, will supervise the pesticide applications.

Dated: August 20, 1976.

JAMES M. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.76-25266 Filed 8-26-76;8:45 am]

[FRL 607-6; OPP-180086]

IDAHO STATE DEPARTMENT OF AGRICULTURE

Issuance of a Specific Exemption To Use Ethyl Parathion To Control Pea Aphid, Bean Aphid, and Vetch Aphid on Lentils

Pursuant to the provisions of section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), notice is given that the Environmental Protection Agency (EPA) has granted a specific exemption to the Idaho State Department of Agriculture (hereafter referred to as the "Applicant") to use ethyl parathion to suppress populations of the pea aphid, the bean aphid, and the vetch aphid which are threatening the commercial lentil crop on 25,000 acres in ten (10) northern Idaho counties. This exemption was granted in accordance with, and is subject to, the provisions of 40 CFR Part 166, issued December 3, 1973 (38 FR 33303), which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the application on file with the Registration Division (WH-567), Office of Pesticide Programs, EPA, 401 M St., S.W., Room E-315, Washington, D.C. 20460.

According to the Applicant, approximately 25,000 acres of lentils in the counties of Benewah, Bonner, Boundary, Clearwater, Idaho, Kootenai, Latah, Lewis Nez Perce, and Shoshone in northern Idaho could suffer thirty (30) percent potential yield loss, valued at $1,125,000, due to infestations of pea aphid, bean aphid, and vetch aphid. Significant numbers of these pests can cause damage as long as the plants are green.

Malathion is the only insecticide registered for use on lentils. According to the Applicant, the population of pests are still at the economic threshold of forty aphids per sweep on some lentil fields, after two (2) applications of malathion. Ethyl parathion has proven efficacy against numerous species of aphids, and the Applicant believes it will be effective against the pea aphid, bean aphid, and vetch aphid. In addition, an experimental use permit has been issued for similar uses of ethyl parathion in the States of Idaho and Washington. This permit is covered by a temporary tolerance of one (1.0) ppm; the temporary tolerance expires on June 1, 1977.

The Applicant will use ethyl parathion at an application rate of one-half (0.5) pound avoirdupois actual ingredient per acre; application will be made both aerially and with ground equipment, with a ten (10) day preharvest interval. The applications will be terminated on August 15, 1976. Applications will be limited to State-licensed commercial applicators. A few growers might elect to apply ethyl parathion on their own property.

The Fish and Wildlife Service, U.S. Department of the Interior, has advised EPA that three endangered species—American Peregrine Falcon, Grizzly Bear, and Northern Rocky Mountain Wolf—and one proposed endangered species, the Northern Bald Eagle, are resident to one or more of the Idaho counties where ethyl parathion will be applied. However, it is anticipated that there will be no adverse effects to man or the environment as a result of this application.

After reviewing the application and other available information, EPA has determined that (a) a pest outbreak of pea aphid, bean aphid, and vetch aphid has occurred; (b) there is no pesticide presently registered and available for use to control these aphids in Idaho; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if these aphids are not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, the Applicant has been granted a specific exemption to use the pesticide noted above until August 15, 1976, to the extent and in the manner set forth in the application. The specific exemption is also subject to the following conditions:

1. A parathion EC formulation containing four (4) pounds of actual ethyl parathion per gallon and appropriately labeled for method of application (ground or air) will be used;
2. Rate of application will be one-half (0.5) pound of actual ethyl parathion per acre per application for a maximum of two (2) applications;
3. Lentil acreages to be treated are limited to those counties previously mentioned in this notice;
4. Lentil crop residues (forage) treated with ethyl parathion may not be used for food, feed, or fodder. Livestock may not graze in treated lentil fields;
5. Lentils with ethyl parathion residues not exceeding one (1.0) ppm will not pose a hazard to the public health and may be offered in interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this decision;
6. A ten (10) day preharvest interval will be observed;
7. The Applicant is responsible for supervising all ethyl parathion applications;
8. Efficacy and residue data will be collected pursuant to registering this use pattern under section 3 of the amended FIFRA;
9. Every precaution will be taken to avoid or minimize spray drift to nontarget areas;
10. Liaison will be established with the Idaho State Departments of Agriculture, Fisheries, and Game to minimize any adverse effects on fish and wildlife resources; and
11. Every precaution will be taken to assure the protection of all endangered species residing in or migrating through the treatment area.

Dated: August 23, 1976.

JAMES M. CONLON,
Acting Deputy Assistant Administrator for Pesticide Programs.

FEDERAL ENERGY ADMINISTRATION

ADVISORY COMMITTEES AND ADVISORY COMMITTEE CHARTERS

Renewal and Amendment

This notice is published in accordance with the provisions of section 7 of the Office of Management and Budget Circular No. A-63, as amended. Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act (FACA) and following consultation with the Office of Management and Budget, notice is hereby given that it is in the public interest, in connection with the performance of the duties imposed on the Federal Energy

V 41 168 AUG 27 76 UM

Administration by law, to renew the following advisory committees: Coal Industry Advisory Committee; Construction Advisory Committee; Consumer Affairs and Special Impact Advisory Committee; Electric Utilities Advisory Committee; Environmental Advisory Committee; Food Industry Advisory Committee; LP-Gas Industry Advisory Committee; Natural Gas Transmission and Distribution Advisory Committee; State Regulatory Advisory Committee; and the Transportation Advisory Committee.

In addition, following consultation with the Office of Management and Budget, notice is hereby given of revisions to the charters of the above-listed advisory committees. The amendments provide for the establishment of subcommittees to the committees, state the term of appointment for members, provide for the election of a Chairman and/or Vice Chairman, and revise, where necessary, the estimated annual operating costs. These renewals and revisions are effective on the date the charters are filed in accordance with section 14(b) of the FACA.

The amended charters are published below.

Issued in Washington, D.C., on August 23, 1976.

JOHN A. HILL,
Acting Administrator.

[FR Doc.76-25114 Filed 8-24-76;10:57 am]

ADVISORY COMMITTEES

Merger and Establishment

This notice is published in accordance with the provisions of section 9(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463). Following consultation with the Office of Management and Budget, notice is hereby given that it is in the public interest, in connection with the performance of the duties imposed on the Federal Energy Administration by law, to merge the three committees formerly known as the Northeast, Retail Dealers and Wholesale Petroleum Advisory Committees and redesignate them as the Fuel Oil Marketing Advisory Committee and the Gasoline Marketing Advisory Committee. The establishment of these two committees is made effective upon filing of the charters in accordance with Section 9 of the Federal Advisory Committee Act.

A description of the nature and purpose of these committees is contained in their Charters which are published below.

Issued in Washington, D.C. on August 23, 1976.

JOHN A. HILL,
Acting Administrator.

[FR Doc.76-25125 Filed 8-24-76;10:58 am]

COAL INDUSTRY ADVISORY COMMITTEE

Charter

A. ESTABLISHED

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the matters related to the coal industry and related objectives of FEA is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Coal Industry Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the Coal Industry Advisory Committee are to provide the Administrator, FEA, with assistance in encouraging the expansion of a readily-usable energy source—coal—and maintaining fair and reasonable consumer prices for such supplies. The Committee will also advise on technical and economic factors affecting the coal industry.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $31,200 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 4 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter pursuant to section 14(b) of Pub. L. 92-463.

9. *Subcommittee(s).* To facilitate functioning of the Committee, subcommittee(s) may be formed by the Administrator. The objectives of the subcommittee(s) are to make recommendations to the parent Committee with respect to matters concerning FEA plans and programs which are related to the responsibilities of the parent Committee. The subcommittee(s) shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the subcommittee(s) shall be consistent with the provisions of B-1 through B-11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

• Dated: August 23, 1976.

JOHN A. HILL,
Acting Administrator.

[FR Doc.76-25121 Filed 8-24-76;8:45 am]

CONSTRUCTION ADVISORY COMMITTEE

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the construction industry as it relates to accomplishment of established national energy objectives is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Construction Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the Construction Advisory Committee are to provide the Administrator, FEA, with advice concerning design and implementation of FEA policies and programs affecting the construction industry and its impact on national energy objectives.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $16,500 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 4 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate six months from the date ofr filing of this Charter pursuant to section 14(b) of Pub. L. 92-463.

9. *Subcommittees.* The Construction Advisory Committee shall have subcommittees as follows:

a. Energy Conservation Subcommittee.
b. Oil and Gas Regulation Subcommittee.
c. Construction Labor Availability Subcommittee.
d. Construction Materials Allocation Subcommittee.
e. Central Clearing House for Construction Projects Subcommittee.

The objective of these Subcommittees is to make recommendations to the parent Committee with respect to matters concerning construction aspects of FEA policies and programs.

The Subcommittees shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the Subcommittees shall be consistent with the provisions of B-1 through B-11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

JOHN A. HILL,
Acting Administrator.

[FR Doc.76-25120 Filed 8-24-76;10:53 am]

CONSUMER AFFAIRS/SPECIAL IMPACT ADVISORY COMMITTEE

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the impact of FEA policies and programs on consumers and special impact groups is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Consumer Affairs/Special Impact Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the Consumer Affairs/Special Impact Advisory Committee are to provide the Administrator, FEA, with the diversified expertise possessed by a wide range of highly qualified individuals who have been extensively involved in identifying and evaluating the impact of proposed or existing energy policies on the consumer, the poor, the elderly and the handicapped persons in rural and urban America, and planning, developing, and implementing policies and programs to remedy these problems.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $60,000 and will involve approximately 2 man-years of staff support.

7. *Meetings.* The Committee will meet approximately 12 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter pursuant to section 14(b) of Pub. L. 92-463.

9. *Subcommittees.* The Consumer Affairs/Special Impact Advisory Committee shall have Subcommittees as follows:

a. Subcommittee on Transportation Programs
b. Subcommittee on Home Energy Consumption Problems and Utilities
c. Subcommittee on Energy Legislation and Regulations
d. Subcommittee on Energy Efficiency Standards, Conservation, and Ecology
e. Subcommittee on Energy Consumption and the Disadvantaged
f. Subcommittee on Consumer Representation

The objective of these Subcommittees is to make recommendations to the parent Committee with respect to matters concerning consumer aspects of FEA policies and programs.

The Subcommittees shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the Subcommittees shall be consistent with the provisions of B-1 through B-11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

JOHN A. HILL,
Acting Administrator.

ELECTRIC UTILITIES ADVISORY COMMITTEE

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning electric utility interests is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Electric Utilities Advisory Committe pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectivs and scope.* The objectives of the Electric Utilitis Advisory Committee are to provide the Administrator, FEA, with advice with respect to the general electric utilities' aspects of interests and problems related to the policy and implementation of programs to meet the continuing national energy problem.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $30,000 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 4 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter pursuant to section 14(b) of Pub. L. 92-463.

9. *Subcommittee.* The Electric Utilities Advisory Committee shall have one subcommittee as follows:

a. The Executive Subcommittee. The objective of this Subcommittee is to make recommendations to the parent Committee with respect to matters concerning FEA plans and programs which are related to the responsibilities of the Electric Utilities Advisory Committee. The Subcommittee shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee. All actions of the Subcommittee shall be consistent with the provisions of B-1 through B-11.

V 41 168 AUG 27 76 UM

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

JOHN A. HILL,
Acting Administrator.

ENVIRONMENTAL ADVISORY COMMITTEE

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the environmental aspects of FEA policies and programs is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Environmental Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the Environmental Advisory Committee are to provide the Administrator, FEA, with advice and information concerning environmental aspects of FEA policies and programs.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $24,000 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 6 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter pursuant to section 14(b) of Pub. L. 92-463, will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $37,500 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 4 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is effective upon filing the Charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter pursuant to section 14(b) of Pub. L. 92-463.

9. *Subcommittees.* The Food Industry Advisory Committee shall have subcommittees as follows:

a. Distribution and Transportation Subcommittee
b. Equipment Efficiency Subcommittee
c. Retail Stores Subcommittee
d. Food Service Operations Subcommittee
e. Industrial Education Subcommittee
f. Government Regulations Subcommittee
g. Future Planning Subcommittee
h. Natural Gas Subcommittee
i. Energy Use Data Subcommittee
j. Energy Audit Programs Subcommittee
k. Federal Reporting Program (EPCA) Subcommittee
l. State Program/Contingency Plans Subcommittee
m. Agriculture Subcommittee
n. Financial Incentives Subcommittee

The objective of these subcommittees is to make recommendations to the parent committee with respect to matters concerning food industry aspects of FEA policies and programs.

The subcommittees shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the subcommittee shall be consistent with the provisions of B-1 through B-11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

JOHN A. HILL,
Acting Administrator.

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the trade of selling fuel oil is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Fuel Oil Marketing Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the Fuel Oil Marketing Advisory Committee are to provide the Administrator, FEA, with expert and technical advice concerning the trade of selling fuel oil.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $36,000 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 6 times a year.

8. *Effective date and duration.* The establishment of this Advisory Committee is effective upon filing the charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter.

9. *Subcommittee(s).* To facilitate functioning of the Committee, subcommittee(s) may be formed by the Administrator. The objectives of the subcommittee(s) are to make recommendations to the parent Committee with respect to matters concerning FEA plans and programs which are related to the responsibilities of the parent Committee. The subcommittee(s) shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the subcommittee(s) shall be consistent with the provisions of B-1 through B-11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

JOHN A. HILL,
Acting Administrator.

GASOLINE MARKETING ADVISORY COMMITTEE

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the wholesale and retail selling of gasoline is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Gasoline Marketing Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the Gasoline Marketing Advisory Committee are to provide the Administrator, FEA, with expert and technical advice concerning the wholesale and retail selling of gasoline.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee Reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $45,000 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 6 times a year.

8. *Effective date and duration.* The establishment of this Advisory Committee is effective upon filing the charter with the standing committees of Congress having legislative jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter.

9. *Subcommittee(s).* To facilitate functioning of the Committee, subcommittee(s) may be formed by the Administrator. The objectives of the subcommittee(s) are to make recomemndations to the parent Committee with respect to matters concerning FEA plans and programs which are related to the responsibilities of the parent Committee. The subcommittee(s) shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the subcommittee(s) shall be consistent with the provisions of B-1 through B-11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

JOHN A. HILL,
Acting Administrator.

LP-GAS INDUSTRY ADVISORY COMMITTEE

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning independent review on matters related to the policy and implementation of programs that affect the LP-Gas industry is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the LP-Gas Industry Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92-463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the LP-Gas Industry Advisory Committee are to provide the Administrator, FEA, with advice with respect to the implementation of programs that affect the LP-Gas industry.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $34,500 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 4 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is ef-

fective upon filing the charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter pursuant to section 14(b) of Pub. L. 92–463.

9. *Subcommittees.* The LP-Gas Industry Advisory Committee shall have subcommittees as follows:

a. LP-Gas Supply and Demand Subcommittee
b. Government Policies & Regulations Subcommittee
c. LP-Gas Transportation & Storage Subcommittee

The objective of these Subcommittees is to make recommendations to the parent Committee with respect to policy and implementation of programs that affect the LP-Gas industry.

The Subcommittees shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the Subcommittees shall be consistent with the provisions of B–1 through B–11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

JOHN A. HILL,
Acting Administrator.

NATURAL GAS TRANSMISSION & DISTRIBUTION ADVISORY COMMITTEE

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning natural gas transmission and distribution matters is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Natural Gas Transmission & Distribution Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92–463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the Natural Gas Transmission & Distribution Advisory Committee are to provide the Administrator, FEA, with advice with respect to the implementation of programs that affect gas transmission and distribution activities.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $48,000 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 4 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is effective upon filing the charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter pursuant to section 14(b) of Pub. L. 92–463.

9. *Subcommittee(s).* To facilitate functioning of the Committee, subcommittee(s) may be formed by the Administrator. The objectives of the subcommittee(s) are to make recommendations to the parent Committee with respect to matters concerning FEA plans and programs which are related to the responsibilities of the parent Committee. The subcommittee(s) shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the subcommittee(s) shall be consistent with the provisions of B–1 through B–11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

STATE REGULATORY ADVISORY COMMITTEE

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning State related matters is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the State Regulatory Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92–463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the State Regulatory Advisory Committee are to provide the Administrator, FEA, with advice and information concerning its plans and programs which are related to the responsibilities of State regulatory commissions.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $33,000 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 4 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is effective upon filing the charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter pursuant to section 14(b) of Pub. L. 92–463.

9. *Subcommittees.* The State Regulatory Advisory Committee shall have subcommittees as follows:

a. Executive Subcommittee
b. Subcommittee on Legislation
c. Subcommittee on FEA State Energy Grants

The objectives of these Subcommittees are to make recommendations to the parent Committee with respect to policy and implementation of programs related to the responsibilities of the State regulatory commissions.

The Subcommittees shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the Subcommittees shall be consistent with the provisions of B–1 through B–11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

TRANSPORTATION ADVISORY COMMITTEE

Charter

A. ESTABLISHMENT

The Administrator, Federal Energy Administration (FEA), having determined, after consultation with the Director, Office of Management and Budget, that the establishment of an advisory committee to provide FEA with advice concerning the energy impact of transportation policies and issues before the FEA is in the public interest in connection with duties imposed on the FEA by law, hereby establishes the Transportation Advisory Committee pursuant to the Federal Advisory Committee Act (Pub. L. 92–463).

B. DUTIES, FUNCTIONS, AND ADMINISTRATIVE PROVISIONS

1. *Objectives and scope.* The objectives of the Transportation Advisory Committee are to provide the Administrator, FEA, with advice with respect to general transportation aspects of interests and problems related to the policy and implementation of programs to meet continuing energy problems.

2. *Committee tenure.* In view of the goals and purposes of the Committee, it will be expected to continue for the duration of FEA.

3. *Official to whom Committee reports.* The Committee will report to the Administrator, FEA.

4. *Committee duties.* The duties of the Committee are solely advisory and are stated in Paragraph 1 above.

5. *Support activities.* Necessary support shall be furnished by the Federal Energy Administration.

6. *Estimated annual operating costs.* The estimated annual operating costs for the Committee are $30,000 and will involve approximately ½ man-years of staff support.

7. *Meetings.* The Committee will meet approximately 4 times a year.

8. *Effective date and duration.* The renewal of this Advisory Committee is effective upon filing the charter with the standing committees of Congress having jurisdiction of the FEA. The Committee will terminate one year from the date of filing of this Charter pursuant to section 14(b) of Pub. L. 92–463.

9. *Subcommittees.* The Transportation Advisory Committee shall have one subcommittee as follows:

a. The Executive Subcommittee

The objectives of this Subcommittee are to make recommendations to the parent Committee with respect to general transportation aspects of interests and problems related to the policy and implementation of programs to meet the continuing energy crisis.

The Subcommittee shall be comprised of such members of the parent Committee as may be determined by the Chairman of the parent Committee.

All actions of the Subcommittee shall be consistent with the provisions of B–1 through B–11.

10. *Members.* Committee members shall be appointed by the Administrator of the Agency and that appointment shall be subject to review every 365 days, unless earlier terminated. Members may be reappointed to an additional term following review.

11. *Election of Chairman and/or Vice Chairman.* The Chairman and/or Vice Chairman shall be annually appointed by the Administrator or, upon the Administrator's request to the Committee, elected by the Committee members, subject to the approval of the Administrator.

Dated: August 23, 1976.

JOHN A. HILL,
Acting Administrator.

ISSUANCE OF DECISIONS AND ORDERS BY OFFICE OF EXCEPTIONS AND APPEALS

Week of July 12 Through July 16, 1976

Notice is hereby given that during the week of July 12 through July 16, 1976, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Exceptions and Appeals of the Federal Energy Administration. The following summary also contains a list of submissions which were dismissed by the Office of Exceptions and Appeals and the basis for the dismissal.

APPEALS

Batzell, Nunn & Bode; Washington, D.C.; FEA 0861; Freedom of Information

Batzell, Nunn & Bode (Batzell) filed an Appeal from an Order issued to it by the Information Access Officer of the FEA. In the Order which was issued, the Information Access Officer granted in part a Request for Information which Batzell had filed under the Freedom of Information Act (the Act) and released 13 documents which related to the policy determination of the Administration to abolish the Oil Import Appeals Board and to transfer its functions to the FEA Office of Exceptions and Appeals. However, 18 additional documents which fell within the scope of Batzell's request were withheld on the grounds that the material involved was exempt from mandatory disclosure under section 552(b)(5) of the Act. In considering Batzell's Appeal, the FEA noted that the Federal courts had held that (1) interagency and intra-agency memorandum which are used in formulating policies and reflect an agency's group thinking process could be withheld; and (11) the factual material which is summarized in those types of memoranda could also be withheld. Since the documents involved in the present case consisted of publicly available materials that had been summarized for the information of the FEA's decision-makers, the conclusion was reached that the material was an integral part of the deliberative process and therefore exempt from disclosure under the Act. It was further determined that the material requested was so inextricably intertwined with the opinions, recommendations and deliberations which comprised the majority of the documents that could not be reasonably segregated. On the basis of these findings the FEA determined that the Information Access Officer correctly withheld the factual material in the 18 documents and the Batzell Appeal was denied.

Empire State Fuel, Inc.; Brooklyn, N.Y.; FEA–0887; No. 2 Heating Oil

Empire State Fuel, Inc. appealed from the requirements specified in a Remedial Order which the Regional Administrator of FEA Region II issued to the firm on June 11, 1976. In the Order Empire was directed to correct the manner in which it calculated the maximum permissible price which it could charge for No. 2 heating oil. The firm was also directed to refund $27,641 to account for previous overcharges to customers. In considering the Appeal the FEA concluded that the firm's submission failed to present any facts or legal arguments in support of its allegation that the Order was erroneous and should be reversed. The Appeal was therefore summarily denied in accordance with the provisions of 10 CFR 205.105(b)(1)(11).

Lewis County, Wash.; Chehalis, Wash.; FEA–0849; Refined Products

Lewis County, Washington (Lewis County) appealed from an Interpretation which had been issued to Texaco, Inc. (Texaco) by the Regional Counsel of FEA Region X. In the Interpretation the Regional Counsel held that Texaco was not Lewis County's base period supplier and that Texaco was therefore under no obligation to supply the County with certain covered products. The Lewis County Appeal, if granted, would result in a contrary determination and the finding that Texaco is the County's base period supplier and must furnish it with those products. The Decision which the FEA issued recognized that the County had entered into a direct supply contract with Texaco in December 1971 which required Texaco to deliver petroleum products to the County during every month of 1972. It was also recognized that during the base period, Texaco met its contractual obligation to the County by arranging for R. T. Todd, an independent business man who functioned as a Texaco consignee to actually supply and deliver the products involved. Since Todd exercised a significant degree of autonomy over his business operations, the FEA considered that Todd fell within the scope of the definition of "wholesale purchaser-reseller" and was as a result the base period supplier of the County. The FEA further held that it is immaterial to the determination of a base period supplier/purchaser relationship whether the prime supplier retains title to a product which is actually delivered by a consignee who is an independent wholesale purchaser-reseller. Since no showing had been made that the Interpretation was erroneous, the Appeal was denied.

Taft, Stettinius & Hollister; Cincinnati, Ohio; FEA–0860; Freedom of Information

Taft, Stettinius & Hollister (Taft) filed an Appeal from an Order issued to it by the Information Access Officer of the FEA. In the prior Order, the Information Access Officer granted in part a Request for Information which Taft had filed under the Freedom of Information Act (the Act) and released 56

V41168 AUG 27 76 UMI

documents relating to certain Assignment Applications which were filed with the FEA by the Rural Natural Gas Company (Rural). However, several additional documents which fell within the scope of Taft's request were withheld on the grounds that the material contained was exempt from Mandatory disclosure under Sections 552(b)(4) and (b)(5) of the Act. In considering the Appeal, the FEA noted that the federal courts had held that documents which contain commercial or financial information of a privileged and confidential nature were exempt from mandatory disclosure under the Act. The FEA found that certain documents which the Information Access Officer withheld consisted of customer lists, lists of the quantities of propane which Rural's customers used, the amount of natural gas which Rural purchased and a list of Rural's suppliers of propane. The FEA concluded that the documents which were withheld contained the type of information which could cause substantial economic harm to the market position of Rural if released to its competitors, and were therefore properly exempted from mandatory public disclosure under Section 552(b)(4). The FEA further determined that the provisions of Section 14(b)(2) of the Federal Energy Administration Act of 1974 do not require disclosure of the material involved since it is not of the type which would not be excluded from public annual reports filed with the Securities and Exchange Commission. The FEA also determined that other documents had been properly withheld from Taft pursuant to Section 552(b)(5) of the Act since they consisted of intra-agency memoranda prepared for the use in the resolution of cases by FEA decision-makers. Finally, the FEA concluded that the release of the documents which had been withheld from Taft would not be in the public interest. Taft's Appeal was therefore denied.

REQUESTS FOR EXCEPTION

Arizona Fuels Corp.; Salt Lake City, Utah; FEE-2708; Crude Oil

Arizona Fuels Corporation (Arizona Fuels) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements in any month beginning with April 1976. In support of its exception request, Arizona Fuels submitted projected financial statements for its current fiscal year ending October 31, 1976, and projections of its monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering Arizona Fuels' Application, the FEA determined that as a result the rescission of Special Rule No. 6 and Arizona Fuel's projected crude oil runs to stills and receipts of old oil during the firm's current fiscal year, Arizona Fuels would be required to purchase entitlements at a substantial cost commencing with the month of April 1976. The projected entitlements cost which Arizona Fuels would be required to bear during its current fiscal year would cause the firm's profit margin and return on invested capital to fall below historic levels. Under the criteria set forth in *Delta Ref. Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976), exception relief to Arizona Fuels was therefore warranted. Accordingly, the FEA approved exception relief which reduced by $93,167 per month the value of the entitlements which Arizona Fuels would otherwise be required to purchase during the period July through December 1976. However, in considering the portion of Arizona Fuels' application which sought retroactive exception relief applicable to the firm's crude oil receipts and runs during the month of April 1976, the FEA determined that with respect to the rescission of Special Rule No. 6 ample notice had been provided to firms such as Arizona Fuels to enable them to make timely applications for exception relief. Arizona Fuels nevertheless failed to submit its exception request until July 1, 1976. The FEA noted that Arizona Fuels had consistently failed to meet its filing deadlines and obligations under the Entitlements Program. *See Arizona Fuels Corp.*, 3 FEA Par. 85,035 (May 18, 1976). Consequently, the FEA concluded that Arizona Fuels must make a very strong showing that despite the firm's lack of diligence, it would incur a severe and irreparable injury in the absence of exception relief for the month of April 1976. The financial data which Arizona Fuels submitted indicated that the firm had adequate cash to make the entitlement purchases for April. Accordingly, Arizona Fuels' request for retroactive exception relief was denied.

Atlantic Richfield Co.; Dallas, Tex.; FEE-2617 (Covington); FEE-2618 (Crane); FEE-2619 (Dayton); FEE-2620 (Drumright); FEE-2621 (East Village Mills); FEE-2622 (Eldorado); FEE-2623 (Hull); FEE-2624 (Longview); FEE-2625 (Midland); FEE-2626 (Nueces River); FEE-2627 (Ojai Timber); FEE-2628 (Riverton Dome); FEE-2629 (Seminole); FEE-2630 (Silsbee); FEE-2631 (South Hampton); FEE-2632 (Stevens-Calidon); FEE-2633 (Taft); FEE-2634 (Price); Natural Gas Liquids

Atlantic Richfield Company (Arco) filed 18 Applications for Exception from the provisions of 10 CFR 212.165, which if granted, would permit Arco to increase the amount of nonproduct costs which it includes in the prices of the natural gas liquid products produced at certain of its gas processing plants. In 17 of the Applications, Arco requested extensions of the exception relief previously granted in a Decision and Order issued to it on April 16, 1976. *Atlantic Richfield Co.*, 3 FEA Par. 83,167 (April 16, 1976). Arco's remaining Application requested prospective exception relief from the provisions of § 212.165 for its Price plant. In the April 16 Order, the FEA had denied exception relief for Arco's Price plant. In considering Arco's requests, the FEA determined that Arco had experienced non-product cost increases during the first quarter of 1976 at 17 of its gas plants which substantially exceeded the $.005 per gallon passthrough permitted under the provisions of Section 212.165. Based on the criteria set forth in previous Decisions, the FEA determined that prospective exception relief for the Price plant and continued exception relief for 16 other gas plants was warranted. The FEA therefore granted relief with respect to those plants for the period August 1, 1976 through September 30, 1976. With respect to the Nueces River plant the FEA found that the adjusted non-product cost increases which Arco experienced were less than $.005 per gallon and therefore not material for purposes of the exceptions process. Under the standards established in previous FEA Decisions exception relief was therefore denied for the Nueces River Plant.

Austral Oil Co., Inc.; Houston, Tex.; Fee-2193; Crude Oil

Austral Oil Company, Inc. (Austral) filed an Application for Exception from the provisions of 10 CFR, Part 212 which if granted, would permit Austral to sell at upper tier ceiling prices the crude oil which the firm produces from the Ackerly Dean Sand Unit (Ackerly Unit). Austral requested exception relief to be able to charge higher prices for the crude oil which it produces in order to provide the firm sufficient economic incentive to undertake an expanded waterflood project at the Ackerly Unit. In considering Austral's Application, the FEA determined that a substantial additional amount of crude oil could be recovered from the Ackerly Unit over a 25 year period if the investment necessary to undertake an additional waterflood project were made. The FEA also determined that since Austral would be required to charge lower tier ceiling prices for the incremental crude oil produced from the project, the revenues generated as a result of the investment would provide a very low rate of return on the capital required to undertake the project. In view of the alternative investment opportunity available to Austral, the FEA determined that Austral had no economic incentive to make the investment. On the basis of previous precedents, the FEA concluded that exception relief should be granted to Austral to provide the firm sufficient economic incentive to undertake the project while at the same time avoiding the possibility that windfall profits would be obtained as a result of the exception relief. The FEA concluded that in this particular case these objectives would be achieved if Austral were permitted to sell at upper tier ceiling prices 100 percent of the incremental crude oil produced for the benefit of the working interest as a result of the project. Exception relief was therefore granted to Austral for the years 1976 and 1977 permitting the firm to sell the additional crude oil produced at upper tier ceiling prices.

Eddy Refining Co.; Houston, Tex.; Fee-2243; Diesel Fuel

The Eddy Refining Company (Eddy) filed an Application for Exception from the provisions of 10 CFR 212.83 which, if granted, would permit it to prospectively adjust its May 15, 1973 selling price and thereby increase its maximum allowable price for No. 2-Diesel fuel. The firm also requested that the relief be made retroactive to September 1973 and that it be permitted to retroactively pass through certain unrecovered non-product costs which it incurred during the period September 1973 through December 1974. The approval of retroactive exception relief would reduce or eliminate Eddy's liability to refund alleged overcharges made to its diesel fuel customers during the period September 1973 through June 1975. Eddy contended that certain anomalous events occurred during May 1973 which made that month unrepresentative of its historical operations as a seller of diesel fuel. The firm claimed that the application of the provisions of § 212.83 would require it to sell diesel fuel at a loss. Eddy claimed that it would experience a serious hardship if it were required to refund any overcharges which might have occurred as a result if its failure to adhere to the provisions of § 212.83. In considering the request for prospective relief, the FEA noted that since recent amendments to the Mandatory Petroleum Allocation and Price Regulations exempted middle distillates including No. 2-D diesel fuel from price controls, Eddy's request for prospective relief related to the pricing of those products was therefore moot. With respect to retroactive relief, the FEA determined that Eddy had failed to explain its lengthy delay in requesting exception relief. Moreover, the operating data which Eddy submitted indicated that it had sold diesel fuel at a loss during each month of 1972 and 1973 so that contrary to the firm's assertions, the month of May 1973 reasonably represented its operations prior to the promulgation of FEA Price Regulations. The FEA also determined that Eddy's profitable financial and operating posture in recent years contradicted the firm's claim that

it would experience a severe and irreparable injury if it were required to make refunds to its diesel fuel customers. Accordingly, Eddy's Application for Exception was denied.

Frank H. McGehee; Natchez, Miss.; FEE-2412; Crude Oil

Frank H. McGehee (McGehee) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, on behalf of himself and the legatees of Clyde W. Alexander (Alexander). The exception request, if granted, would permit McGehee and Alexander to sell crude oil produced from the Parker No. 3 well at upper-tier ceiling prices. In considering McGehee's Application, the FEA determined that the costs of producing crude oil from the Parker well have increased substantially and now exceed the lower tier ceiling prices which McGehee and Alexander are permitted to charge. Consequently, McGehee and Alexander have no economic incentive to continue to operate the Parker well. The FEA also found that if McGehee and Alexander were to abandon the Parker well, a substantial amount of otherwise recoverable crude oil would be lost. On the basis of previous precedents involving similar factual situations, the FEA concluded that the application to McGehee and Alexander of the lower-tier ceiling price rule resulted in a gross inequity and that exception relief should be granted. Based on an analysis of the specific financial and operating data which McGehee had submitted, the FEA determined that McGehee and Alexander should be permitted to sell 36.21523 percent of the crude oil produced for the benefit of the working interest owners at upper tier ceiling prices for a period of six months.

General Distributors, Inc., Snow Hill, Md.; FEE-2343; Propane

General Distributors, Inc. (General) filed an Application for Exception from the provisions of 10 CFR 212.93. The request, if granted, would permit General to increase its selling prices for propane to certain classes of purchaser to levels which exceed the maximum lawful prices permitted by § 212.93. General also requested that it be granted retroactive exception relief to permit it to retain revenues realized during the period December 28, 1973 through April 23, 1975 as a result of charging unlawful prices for propane. In its Application General stated that it had commenced selling propane on June 1, 1973 through its acquisition of the retail propane operations of the Eastern Shore Gas Company (Eastern Shore), a public utility. General claimed however that the propane selling prices which Eastern Shore had in effect on May 15, 1973 to certain classes of purchaser were insufficient to support the propane sales operations as a separate firm from the utility. General also stated that these May 15, 1973 selling prices were significantly lower than those which its competitors charged on that date. In considering General's Application, the FEA noted that despite its claims of financial hardship General's pre-tax profits had increased in every full fiscal year since its acquisition of the retail propane operations of Eastern Shore and that this trend was apparently continuing during the current fiscal year. The FEA also determined that the fact that propane resellers were charging higher prices on May 15, 1973 than those available to General did not form the basis for exception relief. The FEA therefore concluded that General had failed to demonstrate that the application of the provisions of § 212.93 were causing the firm to experience a serious hardship or a gross inequity and denied General's request for prospective exception relief. In considering General's request for retroactive relief, the FEA determined that the firm had not presented any compelling reasons why a denial of auch relief would cause it to incur a severe and irreparable injury and therefore denied the retroactive aspect of General's request.

George P. Rios; Los Angeles County; Calif.; FEE-2254; Motor Gasoline

George P. Rios (Rios), a gasoline retailer filed an Application for Exception which, if granted, would have resulted in the assignment of a new supplier to replace Rios' base period supplier, Ernst Distributing, Inc. (Ernst). In its submission, Rios alleged that in order to take advantage of a discount which Texaco offered to Rios Ernst had engaged in a cross-billing scheme whereby motor gasoline was purchased by Ernst but not delivered to Rios. In considering the exception application, the FEA noted that Rios' allegations of fraud have been raised in a civil action which the firm instituted against Ernst in a California State court, and a final judgment has not yet been entered in that litigation. The FEA therefore determined that exception relief was not appropriate under the precedent established in *Eagle Point School District No. 9*, 2 FEA Par. 80,622 (July 1, 1975). However, the FEA noted that even though a judicial determination has not been entered, it might nevertheless grant exception relief and terminate Rios' supplier/purchaser relationship with Ernst if substantial, uncontraverted evidence of fraud were presented and a persuasive showing had been made that Rios is currently incurring actual damages as a result of maintaining its base period supplier/purchaser relationship. The FEA found, however, that Rios had not made the requisite showing since the allegations of fraud were strongly contested by Ernst, and Rios did not contend that the fraud was continuing. In addition, Rios had not submitted evidence that it had incurred actual damages as a result of Ernst's alleged fraud. Consequently, the firm's request that it be assigned a new supplier to replace Ernst was denied.

Murphy Oil Corp.; El Dorado, Ark.; FEE-2386; Crude Oil

Murphy Oil Corporation (Murphy) filed an Application for Exception from the provisions of 10 CFR 214.31 (the Mandatory Canadian Crude Oil Allocation Program). Murphy's request, if granted would increase the quantity of Canadian crude oil which Murphy is entitled to purchase under the Program. In its Application, Murphy asserted that the volume of Canadian crude oil which it processed in its Superior, Wisconsin refinery during the base period was abnormally low. Murphy therefore contended that the base period did not represent a relatively normal period of business activity for that refinery. According to the Murphy submission, the firm reduced its level of Canadian crude oil puchases because of economic conditions which increased the cost of Canadian crude oil to domestic refiners during the base period. In considering Murphy's request, the FEA determined that the firm's reduced level of Canadian crude oil purchases during the base period resulted from economic conditions to which all refiners who were importing Canadian crude oil at that time were subject. The FEA further determined that the volume of Canadian crude oil which Murphy processed at the Superior refinery during the base period was not so far below its historical purchase levels as to constitute a gross inequity. In this regard, the FEA noted that the Canadian Program was not designed to ensure that a first priority refinery will be able to operate at a particular supply-to-capacity ratio. In view of objectives of the Program, the fact that Murphy's sources of supply may not enable it to operate its refinery at what the firm considers to be an advantageous supply-to-capacity ratio while it seeks additional sources of crude oil is not a basis for the approval of exception relief. With respect to Murphy's further claim that in the absence of exception relief the refinery would suffer a serious financial hardship which would force it to close in 1978, the FEA determined that Murphy's contention was too speculative to form a proper basis for the approval of exception relief. Finally, the FEA noted that since the exception relief which Murphy requested would necessarily reduce the amount of Canadian crude oil available to other priority users, the firm must make a particularly strong showing that exception relief is warranted. The FEA concluded that Murphy had not made the required showing. The Application for Exception was therefore denied.

Sabre Refining, Inc.; Bakersfield, Calif.; Fee-2689; Crude Oil

Sabre Refining Inc. (Sabre) filed an Application for Exception from the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) which, if granted, would relieve the firm of any obligation to purchase entitlements beginning with the month of May 1976. In support of its exception request, Sabre submitted projected financial statements for its current fiscal year ending October 31, 1976, and projections as to its monthly crude oil runs to stills and receipts of old, new and imported crude oil for the fiscal year. In considering Sabre's request, the FEA determined that as a result of the rescission of Special Rule No. 6 effective May 27, 1976, and Sabre's projected level of crude oil runs and receipts of old oil during the current fiscal year, the firm would be required to purchase entitlements at a substantial cost commencing with the month of May 1976. As a result of the projected entitlements cost which Sabre would incur during its current fiscal year, the firm's profit margin and return on invested capital would be below historic levels. Under the criteria set forth in *Delta Refining Co.*, 2 FEA Par. 83,275 (September 11, 1975) and *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976), exception relief was therefore warranted. Accordingly, the FEA granted Sabre's Application for Exception relieving the firm of any obligation to purchase entitlements during the six month period July through December 1976 to account for its crude oil runs to stills and old oil receipts during the period May through October 1976. However, the FEA noted in the Decision which it issued that the relief approved to Sabre would be reevaluated if the firm requested an extension of exception relief beyond December 1976 and, as is the case with all Entitlements Program Exception decisions, as a matter of course at the conclusion of the firm's current fiscal year. The Decision further noted that an adjustment will be made and Sabre will be required to purchase entitlements if it received excess benefits in the past because of a discrepancy between the financial projections it submitted and the actual financial results which it achieves.

Texas Asphalt and Refining Co., Houston, Tex.; FEE-2478; Crude Oil

The Texas Asphalt and Refining Company (Tarco) filed an Application for Exception from the provisions of 10 CFR 212.94(b)(1) which, if granted, would permit it to increase the handling fee which it is permitted to charge in connection with its sales of crude oil made pursuant to the Mandatory Crude Oil Allocation Program. Tarco requested that it be permitted to charge a handling fee of $.30 per barrel rather than the $.05 per barrel specified in the FEA regulations. After

V 41 168 AUG 27 76 UMI

considering Tarco's submission, the FEA found no basis upon which exception relief should be granted. The FEA noted that the handling fee permitted by § 212.94(b)(1) was not intended to afford refiner-sellers an opportunity to recover extraordinary costs or otherwise enhance their financial positions at the expense of refiner-buyers. It is designed only to compensate refiner-resellers of crude oil for administrative costs associated with the Buy-Sell Program, and Tarco had not demonstrated that it had experienced unusually high administrative costs. In its submission Tarco indicated that it would incur an expense of $.30 per barrel in purchasing crude oil in order to fulfill its sales obligation under the Buy-Sell Program. However, the FEA determined that this expense was the result of a prior agreement which Tarco had freely entered into with another firm. In addition, if Tarco were to receive the requested exception relief, it would be relieved of one of the consequences of its previous failure to comply with the requirements of the Buy-Sell Program. The FEA therefore determined that Tarco's Application for Exception should be denied.

REQUESTS FOR STAY

Gasco Gasoline Inc.; Oxnard, Calif.; FES–2686; Motor Gasoline

Gasco Gasoline, Inc. (Gasco) requested that the provisions of § 211.9 be stayed and the firm be immediately assigned a new supplier of motor gasoline to replace the Fletcher Oil and Refining Co. (Fletcher) pending a determination on the merits of an Application for Exception which Gasco had also filed. In considering Gasco's request, the FEA found that the data which Gasco provided indicated that Fletcher's prices for gasoline do not substantially exceed the prices charged by the suppliers of Gasco's competitors. Therefore, the FEA determined that Gasco had failed to show that any financial losses it may be incurring are directly attributable to the prices which it pays to Fletcher for gasoline. The FEA also determined that Gasco had failed to support its claim that it would be compelled to close 15 of its retail outlets unless a stay were granted. On the other hand, the FEA found that Fletcher, which strongly opposed approval of the stay, had submitted data which indicated that approval of the stay could produce a severe disruption in Fletcher's sales and marketing activities. Finally, the FEA determined that the record in the proceeding failed to contain sufficient financial data to justify a conclusion that Gasco would ultimately be successful on the merits of its exception application. The Application for Stay was therefore denied.

Guam Oil & Refining Co., Inc.; Washington, D.C.; FES–2696; Naphtha Base Jet Fuel; Marine Diesel Fuel

The Guam Oil & Refining Co., Inc. (Gorco) filed an Application for Stay of the provisions of 10 CFR, Part 212, pending a determination by the FEA on an Application for Exception which the firm filed. Gorco's Application for Stay, if granted, would permit it to increase its selling prices for the naphtha base jet fuel (JP–4) and marine diesel fuel which it markets. Gorco contended that it is unable to recover a substantial portion of the increased crude oil costs which it has incurred. It therefore requested that it be permitted to increase its prices for JP–4 and diesel fuel above the levels permitted under § 212.83. In considering Gorco's Application for Stay, the FEA determined that since the marine diesel fuel which it produces and sells recently became exempt from FEA Price Regulations, Gorco is not currently restricted by those Regulations in determining the prices which it may charge for that product. However, the financial material which Gorco submitted indicates that even if it charges prevailing market prices for marine diesel fuel, it will still incur losses on its total production and sales of refined petroleum products. The FEA also found that it is likely that if the firm's current level of losses continues through 1976, Gorco will incur a substantial pre-tax net loss during that period, which would represent a significant departure from the firm's historically profitable operations. The FEA concluded that Gorco's submission therefore makes a *prima facie* showing that there existed a significant possibility that it will succeed on the merits of its exception application. The FEA therefore granted Gorco temporary relief which permitted it to raise its prices for the JP–4 which it produces by an amount which is sufficient to eliminate the losses which it is currently experiencing.

Kern County Refinery, Inc.; Bakersfield, Calif.; FES–0872; Crude Oil

Kern County Refinery, Inc. (Kern) requested that the application to it of the provisions of 10 CFR 211.67 (the Old Oil Entitlements Program) be stayed pending a determination on an Appeal which the firm filed. The Stay request, if granted, would relieve Kern of the obligation to purchase 96,335 additional entitlements which resulted from certain retroactive adjustments to Kern's crude oil receipts and runs to stills for the months of February and March 1976. In considering Kern's request, the FEA determined that Kern made a *prima facie* showing that it would experience immediate financial hardship and irreparable injury if it were required to purchase the 96,335 additional entitlements. The FEA also found that Kern had demonstrated a substantial likelihood that its Appeal would be successful on the merits in view of the criteria for entitlement exception relief established in *Beacon Oil Co.*, 3 FEA Par. 83,209 (June 8, 1976). The Application for Stay was therefore granted.

Little America Refining Co., Houston, Tex.; FES–2709; Crude Oil; Refined Products

Little America Refining Company (Larco) requested that the application to it of certain provisions of the FEA Mandatory Petroleum Allocation and Price Regulations be stayed pending a determination of the firm's Application for Exception. Larco's submission relates to an acquisition by the Sinclair Oil Company, a newly established subsidiary of Larco, of the refining and marketing assets of Pasco, Inc. Under the FEA Regulations, Larco and Sinclair are regarded as a single firm. The stay request, if granted, would permit Larco and Sinclair to be treated as separate firms for purposes of the refiner price regulations, the Crude Oil Buy/Sell Program and the Old Oil Entitlements Program. Larco also requested that the FEA reassign Pasco's base period purchasers to Sinclair, and permit Sinclair to assume Pasco's bank of unrecovered increased costs which existed as of July 1, 1976, the date on which the assets were acquired by Sinclair. In considering the stay request, the FEA observed that the requirement that Larco and Sinclair jointly determine their maximum allowable prices would necessitate a number of changes in the accounting and administrative procedures of the firms and it would be extremely difficult to immediately accomplish those changes without seriously disrupting their respective ongoing business activities. The FEA determined that it was therefore appropriate to preserve the *status quo ante* by permitting Larco and Sinclair to maintain separate pricing procedures pending a determination of Larco's exception application. The FEA also determined that, in order to ensure stability in the prices paid by Pasco's former customers and to avoid pricing distortions in the markets in which Sinclair operates, stay relief should be approved which permits Sinclair to utilize Pasco's bank of unrecovered increased costs to the extent necessary to maintain Sinclair's maximum allowable prices at the same levels as Pasco's actual selling prices as of June 30, 1976. With regard to Larco's request that the base period customers of Pasco be reassigned to Sinclair, the FEA observed that similar requests had been approved in a number of previous cases involving refinery acquisitions and that, in view of the fact that Pasco had completely terminated its refining operations and Sinclair is functioning in its place, it is unlikely that the reassignment of Pasco's customers to Sinclair would be disapproved. In order to avert a situation in which Pasco's customers might experience dislocations in obtaining an assured supply of refined products, the FEA reassigned those customers to Sinclair pending a final determination of the Larco exception application. The FEA noted, however, that Larco might have obviated the need for the stay relief which was approved by filing its exception application sufficiently in advance of the actual transfer of assets from Pasco to Sinclair.

With respect to the request that Larco and Sinclair be treated as separate firms under the Buy/Sell Program and that Sinclair be permitted to succeed to Pasco's rights under the Program, the FEA found that the data submitted by Larco appeared to indicate that the Sinclair refinery is receiving sufficient crude oil to permit it to operate at normal levels. Since Larco made no showing that it needs to purchase crude oil for the Sinclair refinery under the Buy/Sell Program, the firm failed to establish a basis upon which this aspect of the stay application should be granted. Similarly, since Larco will not be required to purchase entitlements based on the crude oil runs to stills and old oil receipts of the Sinclair refinery until the month of September 1976 and its present status under the Entitlements Program will not be altered until that time, the FEA determined that no basis existed for the approval of separate entity treatment with respect to the Entitlements Program at the present time. The FEA therefore denied Larco's stay request with respect to the Buy/Sell Program and Entitlements Program.

Tenneco Oil Co. Houston, Tex.; FES–0043; Crude Oil

The Tenneco Oil Company (Tenneco) filed an Application for Stay of a Remedial Order issued to it by the Deputy Regional Administrator of FEA Region VI on June 8, 1976. The Remedial Order found that during the period January 1974 through June 1975 Tenneco had improperly charged upper-tier prices for portions of the crude oil produced and sold from its "Fee C" property located in Kern County, California. The FEA also concluded that Tenneco had improperly revised the base production control level (BYCL) for the Fee C property in July 1974 and retroactively billed the West Coast Oil Company (West Coast) at upper-tier prices for the Fee C crude oil which was sold to it during the period September 1973 through June 1974. The FEA also found that on November 22, 1974 Tenneco had terminated its supplier/purchaser relationship with West Coast in violation of 10 CFR 211.63. On the basis of these findings, the Remedial Order directed Tenneco to (i) make refunds for previous overcharges on sales of Fee C crude oil to

West Coast and Kern Country Refinery, Inc. (Kern); (ii) reinstate the supplier/purchaser relationship between Tenneco and West Coast required to be maintained pursuant to 10 CFR 211.63; (iii) recalculate the base production control levels for all Tenneco crude oil producing properties in accordance with the principles set forth in the Remedial Order and prospectively determine the prices of all the crude oil which it sells according to the recalculations made. The Remedial Order further required Tenneco to identify each purchaser to which it sold Fee C crude oil at prices which exceeded the lower-tier ceiling price during the period June 30, 1975 through the present time. Tenneco was also directed to specify the volumes and prices of crude oil sold to each such purchaser.

After considering the contention raised by Tenneco in support of its Application for Stay, the FEA concluded that there was some merit to the firm's assertion that it could incur an irreparable injury if it were required to immediately refund to West Coast and Kern overcharges attributable to the period October 1973 through June 1975, since Tenneco could experience difficulty recovering these funds in the event that it ultimately prevails in its Appeal of the Remedial Order. In accordance with the precedent established in *General Crude Oil Co.*, 3 FEA Par. 85,040 (June 25, 1976), the refund requirements were therefore stayed contingent on the establishment by Tenneco of an irrevocable escrow arrangement pursuant to which the disputed funds are placed in an interest bearing escrow account. To avoid possible supply disruptions, the requirement that Tenneco immediately reinstate its supplier/purchaser relationship for Fee C crude oil with West Coast was also stayed on the condition that Tenneco deposit into the escrow account the incremental per barrel cost to West Coast of the crude oil which it purchases to replace the Fee C crude oil during the pending of Tenneco's Appeal of the Remedial Order. In view of the significant impact of the requirement that Tenneco implement prospective price reductions for all of its crude oil production, and the possibility that Tenneco might be irreparably injured if it prevails on its Appeal but is unable to recover the funds involved from its crude oil customers, the FEA also determined that the requirement to implement prospective price reductions be stayed. However, the FEA also noted that if the Appeal is ultimately denied and the principles discussed in the Remedial Order are sustained, Tenneco will be expected to determine its base production control levels and crude oil prices accordingly. In order to determine the potential impact of these requirements at the present time, the FEA therefore denied Tenneco's request for a stay of the provisions of the Remedial Order which direct Tenneco to recalculate the BPCL for all of its crude oil producing properties. In all other respects the Application for Stay was denied.

SUPPLEMENTAL ORDER

Gulf Oil Corp.; Houston, Tex.; FEX–0056; No. 2 Fuel Oil

On January 26, 1976, the Regional Administrator of FEA Region III issued a Remedial Order to the Gulf Oil Corporation which directed Gulf to make refunds to the Virginia Electric Power Company (Vepco) and adjust its current and future selling prices for No. 2 fuel oil to Vepco to conform to the requirements of 10 CFR 212.82. On February 5, 1976, the FEA issued a Decision and Order to Gulf which granted a stay of the immediate refund requirements of the Remedial Order subject to Gulf nad Vepco entering into an appropriate escrow arrangement for the funds involved. *Gulf Oil Corp.*, 3 FEA Par. 85,013 (February 5, 1976). Similarly, the FEA determined that the requirement of the Remedial Order that Gulf immediately reduce its selling prices to Vepco should also be stayed provided that Gulf itemize on all billing statements sent to Vepco the price for No. 2 fuel oil as computed pursuant to the terms of the Remedial Order and the price which Gulf asserts is lawful. Vepco was in turn required to deposit the contested portion of its No. 2 fuel oil payments to Gulf into the escrow account. The requirements of the February 5, 1976 stay Order remain in effect at the present time. However, on June 15, 1976, the FEA proposed an amendment to its regulations to decontrol No. 2 fuel oil. 41 F.R. 24516 (June 18, 1976). Under the amendment which became effective July 1, 1976, No. 2 fuel oil is no longer subject to the FEA Mandatory Petroleum Allocation and Price Regulations. Consequently, the provisions of the January 26, 1976 Remedial Order which required Gulf to reduce its selling prices for No. 2 fuel oil to Vepco to lawful levels established pursuant to the FEA Price Regulations would no longer be effective following the date on which No. 2 fuel oil was decontrolled. On its own motion, the FEA therefore amended the February 5, 1976 Decision and Order to delete any requirement that further deposits be made to the escrow account which Gulf and Vepco have established with respect to sales of No. 2 fuel oil occurring between the parties on or after July 1, 1976.

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Mobil Oil Corp.; New York, N.Y.; FEE–2588; FEE–2599

The following submissions were dismissed after the applicants repeatedly failed to respond to requests for additional information:

Aminoil U.S.A., Inc.; Houston, Tex.; FEE–2465 through FEE–2471

The following submission was dismissed on the grounds that the request is now moot:

T. J. Fannin & Sons, Inc.; Washington, D.C.; FEA–0824

The following submission was dismissed on the grounds that the appeal to which the stay request was incident has been denied:

Lewis County, Wash.; Chehalis, Wash.; FES–0849

The following submission was dismissed on the grounds that it was untimely:

J & W Oil Refining, Inc.; Dallas, Tex.; FEE–2340

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Private Grievances and Redress, Room B–120, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except Federal holidays. They are also available in "Energy Management: Federal Energy Guidelines," a commercially published loose leaf reporter system.

MICHAEL F. BUTLER,
General Counsel.

AUGUST 24, 1976.

[FR Doc.76-25161 Filed 8-24-76;12:15 p.m.]

INDUSTRY ADVISORY BOARD TO THE INTERNATIONAL ENERGY AGENCY; SUBCOMMITTEE A

Meeting

In accordance with Section 252(c)(1)(A)(i) of the Energy Policy and Conservation Act (P.L. 94–163), notice is hereby provided of a meeting of Subcommittee A of the Industry Advisory Board (IAB) to the International Energy Agency (IEA) will be held on August 31 through September 3, 1976, at the offices of the IEA, 2 Rue Andre Pascal, Paris 16, France, beginning at 9:00 a.m. on August 31. The Agenda for the meeting is as follows:

1. Opening remarks.
2. IEA Allocation Systems Test, including:
   - A. Review status of tasks preparatory to test (as outlined in Subcommittee A paper of July 1, 1976) including:
     - (1) Data processing, including review of "Dry Run" results and interaction of June/July data test results on systems test.
     - (2) Data preparation, including development of non-reporting company and allocation monitoring input information.
     - (3) Control group.
     - (4) Distribution of Japanese data reporting instructions.
     - (5) IEA facilities, including examination of data processing and other physical facilities.
     - (6) Assess technical readiness of system for test to proceed.
   - B. Expansion/clarification of test guide data base and use section, including: A) reporting of U.S. imports, B) applicable Questionnaire A reporting instructions for test.
   - C. Discussion and development of test appraisal procedures.
   - D. Recordkeeping requirements.
   - E. Discussion of key test topics/material to be presented at September 14–15 reporting company meeting.
3. Next meeting date/location.

As provided in Section 252(c)(1)(A)(ii) of the Energy Policy and Conservation Act, this meeting will not be open to the public. As provided by Section 209.32 of FEA regulations, IEP requirements and unanticipated procedural delays in processing this notice require the usual seven day notice period to be shortened.

Issued in Washington, D.C., August 26, 1976.

MICHAEL F. BUTLER,
General Counsel,
Federal Energy Administration.

FEDERAL MARITIME COMMISSION

[Agreement Nos. 10247, 10248, 10250]

ATLANTRAFFIK EXPRESS CO.

Agreements Filed

Notice is hereby given that the following agreements have been filed with the Commission for approval pursuant to

V 41 I 168 AUG 27 76 UMI

section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreements at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreements at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearings, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 3, 1976. Any person desiring a hearing on the proposed agreements shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreements (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreements filed by:

Neal M. Mayer, Esq., Coles & Goertner, Attorneys and Counsellors at Law, 1000 Connecticut Avenue, NW., Washington, D.C. 20036.

Notice of the filing of Agreements Nos. 10247 and 10248 was published in the FEDERAL REGISTER of July 7, 1976, (Vol. 41, No. 131, Page 27872), and Agreement No. 10250 was noticed in the FEDERAL REGISTER of July 14, 1976 (Vol. 41, No. 136, Page 29025).

By letter dated August 16, 1976, the Commission has been advised that Atlantraffik Express Service has been added as a party to Agreements Nos. 10247, 10248 and 10250.

By Order of the Federal Maritime Commission.

Dated: August 24, 1976.

JOSEPH C. POLKING,
Assistant Secretary.

[No. 76-45]

EASTERN CEMENT CORP. V. PORT OF PALM BEACH DISTRICT

Filing of Complaint

Notice is hereby given that a complaint filed by Eastern Cement Corporation against Port of Palm Beach District was served August 23, 1976. The complaint alleges that respondent has violated sections 15, 16 First and 17 of the Shipping Act, 1916 with respect to providing terminal facilities to complainant vis-a-vis other users of facilities at respondent's port.

Hearing in this matter shall commence on or before February 23, 1977.

JOSEPH C. POLKING,
Assistant Secretary.

[FR Doc.76-25245 Filed 8-26-76;8:45 am]

PUERTO RICO MARINE MANAGEMENT, INC. AND SEA-LAND SERVICE, INC.

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before September 13, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Notice of agreement filed by:

Mario F. Escudero, Esquire, Morgan, Lewis & Bockius, 1800 M Street, NW., Washington, D.C. 20036.

By a successive series of orders, the Commission has been approving Agreement No. DC-75 for limited periods of time. The most recent of these orders was an order issued June 23, 1976, approving the agreement upon the condition that it be amended to expire by its own terms midnight, September 23, 1976.

The agreement, which is between Sea-Land Service, Inc., (Sea-Land) and Puerto Rico Marine Management, Inc., (PRMM), as approved by the Puerto Rico Maritime Shipping Authority (Authority), is an interim services and facilities subcontract wherein Sea-Land will provide PRMM with virtually any services it would require for the performance of its contract to manage the Authority's common carrier service between U.S. Atlantic and Gulf Coast ports and Puerto Rico. Included within the scope of Agreement No. DC-75 are facilities for providing berthing and terminal services, repair and maintenance services and A & G functions.

The parties have filed several long-range terminal agreements with this Commission which, when approved, would negate any further need for Agreement No. DC-75. Accordingly, the parties to the agreement have requested that the Commission approve an extension of the agreement's termination date to December 23, 1976, to allow continued operations by the Authority under the agreement pending approval of the long-term agreements which have been filed with the Commission.

By Order of the Federal Maritime Commission.

Dated: August 23, 1976.

JOSEPH C. POLKING,
Assistant Secretary.

FEDERAL POWER COMMISSION

[Docket No. ER76-854]

BOSTON EDISON CO.

Filing

AUGUST 20, 1976.

Take notice that Boston Edison Company ("Edison") on August 12, 1976, tendered for filing a rate schedule for Contract Demand service. The rate schedule is intended to permit customers to purchase a specified portion of their firm power requirements from the Company while obtaining the balance of their service requirements pursuant to other arrangements. The Contract Demand rate is intended to carry forward the same revenue level as the Company's existing S-4 rate.

Copies of the filing were served upon Edison's jurisdictional firm power customers and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 3, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25190 Filed 8-26-76;8:45 am]

[Docket No. ER76-856]

CANAL ELECTRIC CO.

Filing of Initial Rate Schedule

AUGUST 23, 1976.

Take notice that on August 13, 1976, pursuant to § 35.13 of the Commission's Regulations, Canal Electric Company ("Canal") tendered for filing a change in the currently effective Rate Schedules FPC Nos. 17, 18 and 19 governing its sales of unit power from Canal Unit No. 2 to:

(a) Cambridge Electric Light Company, New Bedford Gas and Edison Light Company (Rate Schedule FPC No. 17).

(b) Central Maine Power Company (Rate Schedule FPC No. 18).

(c) Vermont Electric Power Company, Inc. (Rate Schedule FPC No. 19).

By its filing, Canal proposes to reflect in the investment cost component of the cost of service provisions contained in the above-referenced unit power contracts the effect of the actual permanent capital structure and related investment return rate resulting from the permanent financing of Canal's 50% ownership share in Canal Unit No. 2. This permanent financing is scheduled to be completed on September 16, 1976.

Canal proposes an effective date of September 16, 1976 for the tendered rate filing in order to permit the change in investment return rate to become effective upon the same date that Canal will begin to incur the increased capital costs associated with the permanent financing of its 50% ownership share in Canal Unit No. 2. Canal alleges that based upon the test period ending September 30, 1977, the first full twelve months following completion of the permanent financing, its cost of service rates will increase by approximately $2,101,000 per year in accoradnce with the terms of the unit power contracts designated as Canal's Rate Schedules FPC Nos. 17, 18, and 19.

Canal states that the data submitted in support of the tendered filing are not in technical compliance with the requirements of § 35.13(b)(4)(iii) of the Commission's Regulations. Canal requests the Commission to waive the precise filing requirements of § 35.13(b)(4)(iii) of its Regulations to the extent necessary to permit acceptance of the tendered filing as submitted. If any waiver is considered necessary, Canal has petitioned for waiver of § 1.7(b) of the Commission's Regulations.

Copies of the tendered filing have been served upon all parties taking service under Canal's Rate Schedules FPC Nos. 17, 18, and 19 and additionally upon the Massachusetts Department of Public Utilities, the Maine Public Utilities Commission, and the Vermont Public Service Board, as required by § 35.2(d) of the Commission's Regulations.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426 in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 10, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. ER76-229 and ER76-633]

CENTRAL LOUISIANA ELECTRIC CO., INC.

Compliance Filing

AUGUST 20, 1976.

Take notice that on July 12, 1976, Central Louisiana Electric Company, Inc. submitted certain rate schedule supplements in Compliance with ordering paragraph (F) of the Commission's order issued in the above-entitled proceedings on May 28, 1976.

Any person wishing to do so may submit comments in writing concerning the above filing. Comments should be addressed to the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, and should be submitted on or before September 15, 1976. Copies of the company's filings are on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-122 (PGA 76-5)]

COLORADO INTERSTATE GAS CO.

Proposed Change in Rates Under Purchased Gas Adjustment Clause Provisions

AUGUST 20, 1976.

Take notice that Colorado Interstate Gas Company (CIG) on August 13, 1976, tendered for filing proposed changes in its FPC Gas Tariff, Second Revised Volume No. 1. The increased jurisdictional cost of purchased gas proposed to be recovered herein amounts to approximately $13.9 million. Such amount reflects the increased jurisdictional cost of gas in this application over the amount contained in CIG's general revenue increase in Docket No. RP76-76, reduced by the purchased gas cost contained in CIG's PGA Nos. 76-2, 76-3, and 76-4, effective May 1, 1976, June 1, 1976, and July 1, 1976, respectively. The purchased gas adjustment is reflected in both the demand and commodity rates as specified in Section 21.1 of CIG's FPC Gas Tariff, Second Revised Volume No. 1. CIG states that such adjustment reflects actual and estimated increased purchased gas costs as prescribed by the applicable FPC rate orders. CIG has not included in this filing the effects of FPC Opinion No. 770. The filing is made pursuant to the provisions of Section 21 of CIG's FPC Gas Tariff, Second Revised Volume No. 1, and is proposed to be effective October 1, 1976.

Copies of the filing have been served upon the Company's jurisdictional customers and other interested persons, including public bodies.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 7, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. CP73-5]

COLUMBIA GULF TRANSMISSION CO.

Petition To Amend

AUGUST 20, 1976.

Take notice that on August 16, 1976, Columbia Gulf Transmission Company (Petitioner), P.O. Box 683, Houston, Texas 77001, filed in Docket No. CP73-5 a petition to amend the order issuing a certificate of public convenience and necessity in said docket pursuant to section 7(c) of the Natural Gas Act, by which petition Petitioner requests authorization to transport additional gas for Texas Gas Transmission Corporation (Texas Gas) by means of the Blue Water Project, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Petitioner requests authorization to transport for Texas Gas an additional 30,000 Mcf of gas per day, for a total contract demand of 81,600 Mcf at 14.73 psia of gas per day, under Petitioner's Rate Schedule X-13. It is stated that the additional gas is from production in the Ship Shoal Area, South Addition, offshore Louisiana, and that the gas would be delivered to Petitioner in the Ship Shoal Area for transportation through the Blue Water Project.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before September 20, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-859]

DETROIT EDISON CO.

Amendment to Interconnection Agreement

AUGUST 20, 1976.

Take notice that on August 16, 1976, The Detroit Edison Company (DE) tendered for filing an Amendment No. 1 to the Interconnection Agreement between Consumers Power Company, DE, and Ontario Hydro, dated January 29, 1975, designated as The Detroit Edison Company Rate Schedule FPC No. 21, according to DE.

DE states that Amendment No. 1 provides for a new supplement, Supplement SR—Short Term Power—Specific Reservation, which is defined as power and associated energy which is reserved by Consumers Power Company or DE from Ontario Hydro for specific periods of five or more consecutive weeks and arranged at least one year in advance.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 7, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Secretary.

[FR Doc.76-25192 Filed 8-26-76;8:45 am]

[Docket No. CP76-475]

EL PASO NATURAL GAS CO.

Application

AUGUST 20, 1976.

Take notice that on August 11, 1976, El Paso Natural Gas Company (Applicant), P.O. Box 1492, El Paso, Texas 79978, filed in Docket No. CP76-475, an application pursuant to Section 7(c) of the Natural Gas Act and Section 157.7(c) of the Regulations thereunder (18 CFR 157.7(c)) for a certificate of public convenience and necessity authorizing the construction, from October 25, 1976, through December 31, 1977, and operation of facilities to make miscellaneous rearrangements on its system, all as more fully set forth in the application on file with the Commission and open to public inspection.

The stated purpose of this budget-type application is to augment Applicant's ability to act with reasonable dispatch in making miscellaneous rearrangements which would not result in any change in gas sales or transportation services presently rendered by Applicant. Applicant states that the proposed facilities would not exceed a total cost of $300,000 which would be financed with funds on hand.

Applicant requests a waiver of the provision of Section 157.7(c) which provides that budget-type authorization for construction is available for a 12-month period so that the requested authorization might extend through the calendar year 1977. Applicant states that its outstanding budget-type authorization under Section 157.7(c) extends to October 25, 1976, and for administrative convenience and to facilitate accounting and reporting procedures Applicant is desirous of receiving authorization on a calendar year basis.

Any person desiring to be heard or to make any protest with reference to said application should on or before Sept. 9, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25193 Filed 8-26-76;8:45 am]

[Docket No. ER76-816]

GULF STATES UTILITIES COMPANY

Proposed Changes in Rates and Charges

AUGUST 20, 1976.

Take notice that on July 29, 1976, Gulf States Utilities Company, Inc. (Gulf States) tendered for filing proposed changes in its rates and charges for wholesale service to the Town of Erath, Louisiana (Rate Schedule FPC No. 20 [1]), the Town of New Roads, Louisiana (Rate Schedule FPC No. 101 [1]), the Town of Rayne, Louisiana (Rate Schedule FPC No. 105), Kirbyville Light & Power Company, Kirbyville, Texas (Rate Schedule FPC No. 110), the Town of Gueydan, Louisiana (Rate Schedule FPC No. 111), the City of Caldwell, Texas (Rate Schedule FPC No. 112), the Town of Kaplan, Louisiana (Rate Schedule FPC No. 113), the Town of Welsh, Louisiana (Rate Schedule FPC No. 114), the City of Newton, Texas (Rate Schedule FPC No. 115), the Town of Abbeville, Louisiana (Rate Schedule FPC No. 117), the Town of St. Martinville, Louisiana (Rate Schedule FPC No. 118), the Mid-South Electric Cooperative (Rate Schedule FPC No. 76), the Houston County Electric Cooperative (Rate Schedule FPC No. 116) and the Cajun Electric Power Cooperative, Inc. (Rate Schedule FPC No. 104 [2]). Gulf States also tendered for filing proposed changes in its rates and charges for wholesale service to the Town of Vinton, Louisiana (Rate Schedule FPC No. 24), the City of Livingston, Texas (Rate Schedule FPC No. 86), the City of Jasper, Texas (Rate Schedule FPC No. 95), the City of Liberty, Texas (Rate Schedule FPC No. 96), the Sam Houston Electric Cooperative (Rate Schedule FPC No. 69) and the Jasper-Newton Electric Cooperative (Rate Schedule FPC No. 71). These customers are not presently purchasing power from Gulf States under these rate schedules, as they are members of the Sam Rayburn Dam Electric Cooperative (Sam Dam) and are receiving power from Gulf States through Sam Dam under Rate Schedule FPC No. 98.

Gulf States Utilities Company states that increased costs of operation prevent it from obtaining an adequate rate of return from these customers under its presently effective rates, which are those rates proposed and presently being collected subject to refund pending decision in FPC Docket No. E-8121. The purpose of this filing is to enable Gulf States to recover its costs to serve these customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 1, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any persons wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25197 Filed 8-26-76;8:45 am]

[1] Proposed contracts superseding Rate Schedules FPC Nos. 20 and 105 are currently on file with the Federal Power Commission.

[2] No power is contemplated to be sold under this schedule until 1978.

[Docket No. ER76-858]

GULF STATES UTILITIES CO.

Termination of Metering Point

AUGUST 20, 1976.

Take notice that on August 16, 1976, the Gulf States Utilities Company (Gulf States) tendered a notification of discontinuance of its temporary metering point to the City of Liberty, Texas. Gulf States states that the metering point was discontinued on July 19, 1976.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 1, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25196 Filed 8-26-76;8:45 am]

[Docket No. RP76-69]

MID-LOUISIANA GAS CO.

Certification of Proposed Stipulation and Agreement

AUGUST 20, 1976.

Take notice that on July 29, 1976, Presiding Administrative Law Judge Walter T. Southworth certified to the Commission for its consideration a Stipulation and Agreement of Settlement and attendant hearing record in Mid-Louisiana Gas Company (Mid-Louisiana), Docket No. RP76-69. The certification results from a motion made by Mid-Louisiana at the pre-hearing conference on July 27, 1976 and granted by the Presiding Administrative Law Judge.

The proposed settlement reflects modification of the tariff sheets filed by Mid-Louisiana on March 9, 1976, which would implement a curtailment plan for the pipeline system. The Stipulation states that the curtailment plan is based on the end use priorities established by the Commission in Order No. 467-B, except that firm industrial sales under 300 Mcf per day were included in Priority 2.

The first modification of the original tariff sheets revises subparagraph 13.6 to permit, during the summer period May through September, the balancing by buyers of daily volumes over the entire five month period. During the winter period, October through April, the balancing of daily volumes is permitted within each month.

The second modification establishes separate winter and summer Daily Base Requirements for Priorities 1 and 2 use and changes daily base requirements and temperature adjustment factors for several customers, based on revised data. The calculations of the revised Daily Base Requirements and temperature adjustment factors are shown on Schedules A and B, attached to the proposed settlement.

Mid-Louisiana states that the curtailment plan, if approved, shall continue in effect until December 31, 1979. However, Mid-Louisiana or any of its customers may seek revisions or earlier termination through appropriate proceedings.

All comments on the proposed stipulation and agreement shall be filed with the Commission on or before September 8, 1976. All responses to the Comments shall be filed before September 15, 1976.

KENNETH F. PLUMB,
Secretary.

[Docket No. ES76-65]

MONTANA-DAKOTA UTILITIES CO.

Application

AUGUST 20, 1976.

Take notice, that on July 30, 1976, Montana-Dakota Utilities Co. (Applicant), a corporation organized under the laws of the State of Delaware and qualified to do business in the States of Minnesota, Montana, North Dakota, South Dakota, and Wyoming, with its principal business office at Bismarck, North Dakota, filed an application with the Federal Power Commission, pursuant to section 204 of the Federal Power Act, seeking an order authorizing the issuance of $10,000,000 in principal amount of First Mortgage Bonds, —% Series due October 1, 2001 and $10,000,000 in principal amount of First Mortgage —% Sinking Fund Bonds due October 1, 1996.

The new Bonds are to be issued under and pursuant to Applicant's presently existing Indenture of Mortgage dated as of May 1, 1939, to Chemical Bank of New York and S. Lasher, as Trustees, as supplemented and proposed to be supplemented by a (Thirty-Fifth) Supplemental Indenture to be dated as of October 1, 1976. The new Bonds are to bear interest at a rate to be fixed by competitive bidding.

The net proceeds from the issuance and sale of the new Bonds are to be used to repay $18,000,000 of promissory notes, due not more than one year after the dates of their respective issue, which were issued in 1975 and 1976 to provide temporary financing for part of the cost of Applicant's 1975 and 1976 Construction Programs.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 13, 1976, file with the Federal Power Commission, Washington, D.C. 20426, petitions to intervene or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to be-

V 41 168 AUG 27 76 UMI

come parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

[Project No. 606]

PACIFIC GAS AND ELECTRIC CO.

Application for Major License for Constructed Project

AUGUST 23, 1976.

Public notice is hereby given that application for a major license was filed on March 30, 1976, under the Federal Power Act (16 U.S.C. 791a–825r) by Pacific Gas and Electric Company (correspondence to: W. M. Gallavan, Vice President, Rates and Valuation, Pacific Gas and Electric Company, 77 Beale Street, San Francisco, California 94106), for its constructed Kilarc-Cow Creek Project FPC No. 606, located in Shasta County, California, in the region of the communities of Whitmore and Millville, on Old Cow Creek, South Cow Creek and tributaries. The project affects lands of the United States. The original project minor-part license is scheduled to expire on March 28, 1977.

The Kilarc-Cow Creek Project has a total installed capacity of 4,400 kW and consists of two developments:

I. The Kilarc Development comprises a 1-foot high timber diversion dam on North Canyon Creek which diverts water into the .35-mile long North Canyon Canal that empties into South Canyon Creek, a 2.75-foot high concrete diversion dam on South Canyon Creek which diverts water into the .91-mile long South Canyon Creek Canal that empties into the 3.65-mile long Kilarc Main Canal; a 5.1-foot high concrete diversion dam on Old Cow Creek which diverts water into the Kilarc Main Canal that empties into Kilarc Forebay; Kilarc forebay with a surface area of 4.5 acres and a storage capacity of 30.4 acre-feet impounded by a 13-foot high earthfill dam; a 4801-foot long steel-wood penstock; a powerhouse located on Old Cow Creek containing two generating units aggregating 3,000 kilowatts operating under a maximum gross head of 1,192 feet; and a 60-kV transmission line extending 70 feet to the Applicant's interconnected transmission system.

II. The Cow Creek Development comprises a 2.6-foot high concrete diversion dam on Mill Creek which diverts water into the .17-mile long Mill Creek–South Cow Creek Canal that empties into South Cow Creek; a 12.5-foot high timber crib and rockfill diversion dam on South Cow Creek which diverts water into the 2.06-mile long South Cow Creek Main Canal that empties into Cow Creek Forebay; Cow Creek forebay with a surface area of 1 acre and a storage capacity of 5.4 acre-feet impounded by a 16-foot high earthfill dam; a steel-wood penstock 4,487 feet long; a powerhouse located in Hooten Gulch containing two generating units aggregating 1,440 kilowatts operating under a maximum gross head of 715 feet; a 60-kV transmission line extending 100 feet to the Applicant's interconnected transmission system; and other facilities and interests appurtenant to operation of the project.

Applicant estimates that the net project investment as of December 31, 1974 amounted to $466,221, and that it is currently paying property taxes of $65,065 per year on project properties in Shasta County. Applicant further asserts that taxes on income currently attributable to the project total approximately $22,644 per year, of which $18,777 is paid to the United States and $3,867 is paid to the State of California.

The power generated by this project is used for public utility purposes in northern and central California.

Kilarc-Cow Creek recreational facilities consist of an eight unit picnic area on the north side of Kilarc forebay. In cooperation with the United States Bureau of Outdoor Recreation the Applicant has developed plans to redesignate the current eight family units as four group picnic units, each capable of accommodating a party of ten. Five additional family picnic units will be constructed in an expansion area on the north side of Kilarc forebay.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 30, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 C.F.R. § 1.8 or § 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wshing to become a party to a proceeding or participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

Take further notice that, pursuant to the authority contained in and conferred upon the Federal Power Commission by sections 308 and 309 of the Federal Power Act (16 U.S.C. § 825f, § 825h) and the Commission's Rules of Practice and Procedure, specifically § 1.32(b) (18 C.F.R. § 132(b)), as amended by Order No. 518, a hearing may be held without further notice before the Commission on this application if no issue of substance is raised by any request to be heard, protest or petition filed subsequent to this notice within the time required herein and if the applicant or initial pleader requests that the shortened procedure of § 1.32(b) be used. If an issue of substance is so raised or applicant or initial pleader fails to request the shortened procedure, further notice of hearing will be given.

Under the shortened procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant or initial pleader to appear or be represented at the hearing before the Commission.

KENNETH F. PLUMB,
Secretary.

[Project No. 935]

PACIFIC POWER AND LIGHT CO.

Application for New Major License for Constructed Project

AUGUST 20, 1976.

Public notice is hereby given that application for a new major license was filed on April 26, 1976, under the Federal Power Act (16 U.S.C. 791a–825r) by Pacific Power and Light Company, (correspondence to: Mr. G. Eldon Drennan, Senior Vice President, Pacific Power and Light Company, 1500 Public Service Building, Portland, Oregon 97204; with copies to: Leighton and Sherline, 1701 K Street, NW., Washington, D.C. 20006; Mr. Howard Arnett, World Center Building, Suite 404, 918 16th Street, NW., Washington, D.C. 20006; and Rives, Bonyhadi & Drummond, Attention: Mr. Hugh Smith, Esq., 1400 Public Service Building, Portland, Oregon 97204), for its constructed Merwin Project FPC No. 935, located in Cowlitz and Clark Counties, Washington, near the town of Woodland, on the North Fork of the Lewis River. The project affects 138.18 acres of United States lands and navigable waters of the United States. The original project license will expire on December 11, 1979.

The constructed Merwin Project consists of: (1) a concrete arch dam 313 feet high, with an arch length of 728 feet; (2) a reservoir, 14.5 miles long, with a surface area of 4,040 acres at maximum operating pool elevation; (3) three penstocks 15½ feet in diameter and 150 feet long, (4) a powerhouse containing 4 generating units, three rated at 45,000-kW and a 1,000-kW station service generating unit; (5) 9 single-phase 13.8/115-kV transformers located on the upper powerhouse deck and an adjacent switchyard; (6) two transmission lines, one which extends to the Cardwell substation and the other, to the St. John switching station near Portland; and (7) appurtenant facilities. The net investment in the Project is estimated to be $18,100,000, and the Applicant further estimates that severance damages in the event of takeover would be $434,300,000. Applicant states that annual taxes paid to Washington State were as follows: property tax, $224,185.78; state income tax, $10,040.47.

Power produced by this project is used by the Applicant to meet its system load requirements and any excess is sold on a "when and if available" basis.

The principal recreational features of the project are: Merwin Park, which can accommodate 2,000 people for picnics and swimming; Speelyai Bay Park, located 10 miles upstream from the dam, which provides swimming, boating and picnic facilities; and Woodland Park, consisting of private residential homesites.

Any person desiring to be heard or to make any protest with reference to said application should on or before October 8, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR § 1.8 or § 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. The application is on file with the Commission and is available for public inspection.

Take further notice that, pursuant to the authority contained in and conferred upon the Federal Power Commission by sections 308 and 309 of the Federal Power Act (16 U.S.C. § 825g, § 825h) and the Commission's Rules of Practice and Procedure, specifically § 1.32(b) (18 CFR § 1.32(b)), as amended by Order No. 518, a hearing may be held without further notice before the Commission on this application if no issue of substance is raised by any request to be heard, protest or petition filed subsequent to this notice within the time required herein and if the applicant or initial pleader requests that the shortened procedure of § 1.32(b) be used. If an issue of substance is so raised or applicant or initial pleader fails to request the shortened procedure, further notice of hearing will be given.

Under the shortened procedure herein provided for, unless otherwise advised, it will be unnecessary for applicant or initial pleader to appear or be represented at the hearing before the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25201 Filed 8-26-76;8:45 am]

[Docket No. ER76-857]

PENNSYLVANIA ELECTRIC CO.

Change in Rates Pursuant to Imposition of Gross Receipts Tax

AUGUST 20, 1976.

Take notice that on August 16, 1976, Pennsylvania Electric Company (Penelec) tendered for filing notice of its intention to activate a clause in Rate RP, Resale Power Service, applicable to all-requirements wholesale service under FPC Electric Tariff, Original Volume No. 1. The billings to six municipal customers (Boroughs of Berlin, East Conemaugh, Girard, Hooversville, Smethport and Summerhill, Pennsylvania) are affected. Penelec states that the clause is designed to recover revenues needed to pay for the imposition of the Pennsylvania Gross Receipts Tax. The demand and energy charges and the Fuel Cost Adjustment Clause charges will be increased by 4.712%. Penelec states that the tax will be imposed pursuant to a settlement dated May 12, 1976, for 1973 tax amount of $17,487.82 (of which $16,719.15 represented the tax for sales to municipalities), signed by the Secretary of Revenue and approved by the Auditor General of the State of Pennsylvania.

The proposed effective date is September 16, 1976. The clause will be activated prospectively from such date. The Company requests that the instant filing be treated as a rate schedule revision.

Copies of the filing were sent to each of the municipal customers served under the tariff.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 3, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25202 Filed 8-26-76;8:45 am]

[Docket No. RP72-74 and RP74-6]

SOUTHERN NATURAL GAS CO.

Proposed Changes in FPC Gas Tariff

AUGUST 20, 1976.

Take notice that Southern Natural Gas Company (Southern), on August 2, 1976, filed in Docket Nos. RP72-74 and RP74-6, proposed changes in its FPC Gas Tariff, Sixth Revised Volume No. 1, in compliance with the Commission's Opinion No. 747-B, Opinion and Order Granting Rehearing in Part and Denying Rehearing in Part, issued on May 21, 1976, in the above noted docket proceedings. Southern indicates that the following revised tariff sheets to Sixth Revised Volume No. 1 have been filed:

Ninth Revised Sheet No. 40.
Fifth Revised Sheet No. 40-A.
Second Revised Sheet Nos. 61-67, 71-78, 82.
First Revised Sheet Nos. 68-70, 79-81.

Southern states that Ordering Paragraph (F) of the above order directed Southern to file by August 1, 1976, "appropriate tariff sheets to its FPC Gas Tariff reflecting the mandate of this order concerning the firm-interruptible distinction." The tariff sheets included in the filing are to comply with Ordering Paragraph (F) of that order. Southern states that the proposed tariff sheets comply with the Commission's order by adopting the priority-of-service categories as set forth by the Commission in its Order No. 747-B which priority-of-service categories reflect the elimination of the firm-interruptible distinction and reflect appropriate changes to the Index of Requirements to incorporate the proposed priority-of-service categories filed herewith. Additionally, the Audit Committee met on July 20–22, 1976, to examine and verify the requested changes to the Index of Requirements.

Southern proposes to make the effective date of the proposed tariff sheets on September 1, 1976.

Copies of Southern's filing were served upon all of Southern's jurisdictional customers, interested state commissions, and the parties in record in Docket Nos. RP72-74 and RP74-6.

Any person desiring to be heard or to protest the above-noted filing, should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before August 27, 1976. Such protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make such protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene or notice of intervention. Copies of this filing are on file with the Commission, and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25203 Filed 8-26-76;8:45 am]

[Docket No. CP76-462]

SOUTHERN UNION GAS CO.

Application

AUGUST 20, 1976.

Take notice that on August 2, 1976, Southern Union Gas Company, a division of Southern Union Gas Company (Applicant), First National Bank Building, Dallas, Texas 75270, filed in Docket No. CP76-462 an application pursuant to Section 7(a) of the Natural Gas Act for an order of the Commission directing Cities Service Gas Company (Respondent) to sell and deliver certain volumes of natural gas to Applicant for distribution and resale to Applicant's irrigation, residential, commercial, public authority, and industrial customers in Beaver and Texas Counties, Oklahoma, all as more fully set forth in the application which is on file with the Commission and open to public inspection.

Applicant states that during the first three years of service, Applicant would require from Respondent a maximum of 1,360 Mcf of gas per day and a maximum of 496,400 Mcf annually for its customers in Beaver and Texas Counties and that these maximum volumes are within its presently authorized supply from Respondent.

The application indicates that Applicant acquired the facilities in Texas

V 41 168 AUG 27 76 UMI

County from Peoples Natural Gas Division and that Respondent was authorized to continue service to Applicant for resale for irrigation and other incidental farm uses in and about Texas County. Applicant asserts that upon completion of the purchase of the Texas County facilities, its operating personnel rearranged certain of its facilities so that, in addition to providing service to the irrigation and other farm use customers, such gas could also be used to supply other similar customers in the same general area. Applicant states that soon afterward, however, the demand for gas for residential, commercial, public authority, and industrial purposes in the area reached a point where it exceeded the available supply, and Applicant's operating personnel, not realizing the restrictions on the use of gas bought from Respondent, then began diverting a portion of such gas to a number of small towns and communities in Beaver and Texas Counties, Oklahoma, commingling it with other gas so as to make it available for residential and other uses as well as the various farm usages for which it had originally been intended. It is indicated that as a result of these rearrangements, all of the gas for Applicant's said customers is transported from Respondent's pipeline to Applicant's distribution facilities by means of the East Line of Western Gas Interstate Company, a wholly owned subsidiary of Southern Union Company.

Applicant states that it is not requesting any gas from Respondent in excess of its contracted volumetric limitation, but is requesting only that the allowable usage of the gas be expanded from irrigation and incidental farm uses to include also residential, commercial, public authority, and industrial uses in Beaver and Texas Counties. Applicant asserts that without the requested expansion of service from Respondent, it would be unable to meet the needs of its residential and other customers in said counties.

Any person desiring to be heard or to make any protest with reference to said application should on or before September 13, 1976, file with the Federal Power Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 156.9). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25183 Filed 8-26-76;8:45 am]

[Docket Nos. RP72-156, (PGA76-3) (DCA76-2) and RP72-64]

TEXAS GAS TRANSMISSION CORP.

Filing

AUGUST 20, 1976.

Take notice that on August 13, 1976, the Texas Gas Transmission Corporation (Texas Gas) tendered for filing a revised tariff sheet reflecting the exclusion of costs associated with small producers in excess of the "130% formula" prescribed in Opinion No. 742 and costs associated with emergency purchases at rates in excess of those prescribed in Opinion No. 699-H, which costs were reflected in Texas Gas' filing of June 14, 1976. Texas Gas also filed a list of small producers from whom the company is purchasing gas at rates in excess of the "130% formula" in compliance with the Commission's order of July 30, 1976, whereby the Commission accepted the filing of June 14, 1976, and assigned it an effective date of August 2, 1976. Texas Gas requests that its revised tariff sheet becomes effective on August 1, 1976.

Texas Gas states that copies of the filing have been sent to all of its customers as well as interested State Commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 9, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. AR64-2, *et al.* and AR67-1, *et al.*]

TEXAS GULF COAST AREA RATE PROCEEDING ET AL.

Filing of Refund Distribution Plan

AUGUST 19, 1976.

Take notice that on July 30, 1976, Tennessee Gas Pipeline Company, a Division of Tenneco Inc. (Tennessee), filed its plan for distribution of refunds received from its producer-suppliers pursuant to the Commission orders of February 23, 1976, in these proceedings. Tennessee states that as of July 15, 1976, it had received total refunds (principal and interest) of $3,231,837.71.

Tennessee requests permission to flow-through to its customers $3,101,005.72 of the refunds by means of a credit to the Unrecovered Purchased Gas Cost Account maintained pursuant to its PGA clause. Tennessee states that it will retain the remaining $130,831.99 of refunds in accord with its Settlement Agreement in Docket Nos. G-11980, *et al.*, as interpreted by the Commission in *J. C. Trahan Drilling Contractor, Inc.*, 41 FPC 584 (1969).

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 30, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene; provided, however, that any person who has previously filed a petition to intervene in this proceeding is not required to file a further petition. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25218 Filed 8-26-76;8:45 am]

[Docket No. ER76-855]

UNION ELECTRIC CO.

Revised Service Schedule

AUGUST 20, 1976.

Take notice that on August 13, 1976, Union Electric Company (Union) tendered for filing Second Amendment, dated June 22, 1976, to the Interchange Agreement dated July 17, 1967 between Iowa Power and Light Company and Union. Union states that said Amendment provides for System Participation Power and revises the rate for Emergency Energy and the reservation charge for Short Term Power.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedures (18 CFR 1.8, 1.10). All such petitions or protest should be filed on or before September 7, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. G-9547 *et al.*, RP61-18, RP63-1, RP65-1, RP70-13 and RP71-41]

UNITED GAS PIPE LINE CO.

Proposed Plan of Refund

AUGUST 23, 1976.

Take notice that on August 2, 1976 United Gas Pipe Line Company (United) tendered for filing, in accordance with the Commission's order issued February 23, 1976 directing disbursement and flow through of refunds, its proposed plan of refund to flow through monies received from producers pursuant to Opinion Nos. 595 and 607. United proposes to flow through $1,297,086, incuding interest, as the jurisdictional portion of producer refunds to its jurisdictional customers.

United states a copy of the tendered refund report would be sent to all its jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before September 3, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25189 Filed 8-26-76;8:45 am]

[Project No. 2402]

UPPER PENINSULA POWER CO.

Request for Change In Minimum Flow Requirements

AUGUST 20, 1976.

Public notice is hereby given that a request was filed on February 13, 1976, by the State of Michigan, Department of Natural Resources (Correspondence to: Mr. Howard A. Tanner, Director, Department of Natural Resources, Stevens T. Mason Building, Lansing, Michigan 48926) for a change in the minimum flow requirements at Upper Peninsula Power Company's licensed Prickett Project, FPC No. 2402, located on the Sturgeon River in Houghton and Baraga Counties, Michigan.

Article 33 of the license for Project No. 2402 requires the licensee to discharge no less than 6 cfs from the project powerhouse into the Sturgeon River at all times. The State of Michigan, Department of Natural Resources submits that this minimum flow is insufficient to protect the downstream fish, acquatic, and wildlife resources, and that the licensee should be required to release continuously from the project powerhouse into the Sturgeon River a minimum flow of 70 cfs or the inflow into the project reservoir, whichever is the lesser amount.

The subject request was made pursuant to Articles 13 and 16 of the license for Project No. 2402. The Department of Natural Resources is supported in this request by the U.S. Department of the Interior, Fish and Wildlife Service.

Any person desiring to be heard or to make any protest with reference to said request should, on or before October 1, 1976, file with the Federal Power Commission, 825 N. Capitol St. N.E., Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 C.F.R. § 1.8 or § 1.10 (1976). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

The request is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-25186 Filed 8-26-76;8:45 am]

FEDERAL RESERVE SYSTEM

REPUBLIC OF TEXAS CORP.

Order Approving Acquisition of Bank

Republic of Texas Corporation, Dallas, Texas, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under section 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire all of the voting shares, less directors' qualifying shares, of First National Bank in Brownwood, Brownwood, Texas ("Bank").

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with section 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Applicant, the fourth largest banking organization in Texas, controls three subsidiary banks[1] with aggregate deposits of $2.9 billion, representing approximately 6.2 per cent of the total commercial bank deposits in the State.[2] The Board earlier approved Applicant's acquisition of three additional existing banks and one *de novo* bank.[3] The acquisitions of the existing banks have not yet been consummated, and the *de novo* bank has not yet opened for business. Consummation of this proposal would increase Applicant's share of State deposits by approximately 0.1 per cent and would not have a significant effect upon the conceneration of banking resources in the State.

Bank, presently a subsidiary of U.S. Bancshares, Inc., ("Bankshares") Brownwood, Texas, a registered bank holding company that is now in the process of liquidating its assets, is located in the city of Brownwood. Bank is the largest of four banks competing in the relevant banking market[4] and holds approximately $43.8 million in deposits, representing about 52.7 per cent of the total deposits in commercial banks in the market. Applicant's banking subsidiary closest to Bank is located in Dallas, which is part of a separate banking market approximately 150 miles northeast of Bank's market. Accordingly, no meaningful competition presently exists between Bank and any of Applicant's subsidiary banks, and it is unlikely that significant competition between these institutions would develop in the future in view of the distances involved and the State's restrictive branching law. In addition, the ratio of population to banking offices for the relevant market and the per capita deposits in the market are significantly below the State averages, and the market is viewed, at best, as only marginally attractive for *de novo* entry. Thus, consummation of this proposal would have only a slightly adverse effect on potential competition. In view of the foregoing, the Board concludes that the proposed acquisition would have no adverse effect on existing or future competition, and that its effect on potential competition would be slightly adverse but outweighed by considerations relating to the convenience and needs of the community to be served.

The Board has previously denied several applications by Texas' largest bank holding companies to acquire the leading banks in various banking markets in Texas.[5] Although the instant proposal involves Applicant's acquisition of the largest bank in the Brown County banking market, the Board notes that this proposal differs materially from those previously denied in that Bank and the

[1] In addition to its three subsidiary banks, Applicant indirectly controls interests of less than 25 per cent in each of fourteen banks.

[2] All banking and market data are as of December 31, 1975.

[3] On February 20, 1976, the Board approved Applicant's acquisitions of First National Bank of Henderson, Texas, and First Bank in Groveton, Texas, 62 Federal Reserve Bulletin 269 (1976); on March 23, 1976, the Board approved Applicant's acquisition of First Bank and Trust, Lufkin, Texas, 62 Federal Reserve Bulletin 378 (1976); and on October 31, 1975, the Federal Reserve Bank of Dallas, pursuant to delegated authority, approved Applicant's acquisition of Braes Bayou National Bank, Houston, Texas, a *de novo* bank.

[4] The relevant banking market is approximated by Brown County.

[5] For example, see the Board's Orders of December 28, 1973, denying the application of First International Bancshares, Inc., to acquire Citizens First National Bank of Tyler, Texas, 60 Federal Reserve Bulletin 43 (1974); March 1, 1974, denying the application of First International Bancshares, Inc., to acquire The First National Bank of Waco, Texas, 60 Federal Reserve Bulletin 290 (1974); and May 1, 1974, denying the application of First City Bancorporation of Texas, Inc., to acquire The Lufkin National Bank, Lufkin, Texas, 60 Federal Reserve Bulletin 450 (1974).

V41168 AUG 27 76 UMI

Brown County banking market are substantially smaller than the banks and markets involved in the denied proposals.

The financial and managerial resources and future prospects of Applicant, its subsidiary banks, and Bank are regarded as satisfactory. Considerations relating to the banking factors are consistent with approval of the application. Consummation of the proposed affiliation is likely to result in the expansion and improvement of the range of services offered by Bank and in an increased availability of credit. It appears from the facts of record that the economic base of the Brownwood community has been shifting in recent years from agricultural and extractive activities to manufacturing activities. As a result, the community now has industries which require more sophisticated banking services and technical advice. Bank, through affiliation with Applicant, would be better able to meet these requirements. Accordingly, considerations relating to the convenience and needs of the community to be served lend weight toward approval of the application and outweigh the slightly adverse competitive effect of the acquisition. It is the Board's judgment that the proposed acquisition would be in the public interest and that the application should be approved.

On the basis of the record, the application is approved for the reasons summarized above. The transaction shall not be made, (a) before the thirtieth calendar day following the effective date of this order or (b) later than three months after the effective date of this order, unless such period is extended for good cause by the Board, or by the Federal Reserve Bank of Dallas pursuant to delegated authority.

By order of the Board of Governors,* effective August 23, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-25217 Filed 8-26-76;8:45 am]

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

NATIONAL COUNCIL ON THE ARTS

Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub-L. 92-463), notice is hereby given that a meeting of the National Council on the Arts wil be held on September 16, 1976 from 2 p.m.-5 p.m., on September 17 from 9 a.m.-6 p.m., on September 18 from 9:30 a.m.-5:30 p.m., and on September 19 from 9 a.m.-1 p.m. at the Fairmont Colony Square Hotel in Atlanta, Georgia.

A portion of this meeting will be open to the public on September 17 from 9 a.m.-6 p.m. and on September 18 from 9:30 a.m.-11:30 a.m. on a space available basis. Accommodations are limited. The agenda for September 17 will include: (1) State of the Arts Presentations, (2) Presentations by and discussions with SAA representatives and with the International Council on Fine Arts Deans, and (3) Program Guidelines. The September 18 agenda will include: (1) Challenge Grant Guidelines, and (2) Non-Federal support of the arts.

The remaining sessions of this meeting on September 16 from 2 p.m.-5 p.m., on September 18 from 11:30 p.m.-5:30 p.m., and on September 19 from 9 a.m.-1 p.m. are for the purpose of Council review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the FEDERAL REGISTER of June 16, 1975, these sessions, which involve matters exempt from the requirements of public disclosure under the provisions of the Freedom of Information Act (5 U.S.C. 552(b), (4), (5), and (6)) will not be open to the public.

Further information with reference to this meeting can be obtained from Mr. Robert M. Sims, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634-6377.

ROBERT M. SIMS,
Administrative Officer, National Endowment for the Arts, National Foundation on the Arts and the Humanities.

NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE

MEETING ADDENDUM

AUGUST 24, 1976.

The agenda for the meeting previously announced for September 14, 1976, in the FEDERAL REGISTER of August 12, 1976 (41 FR 34119), has been changed by the substitution of a preliminary report on the current Law of the Sea session for the presentation of Executvie Comments on NACOA's 5th Annual Report. The amended agenda is as follows:

0900-0915, Opening Remarks, Dr. William J. Hargis, Jr.
0915-1000, Preliminary Report on Current Law of the Sea Session, Dr. Donald L. McKernan and Mr. Marne A. Dubs NACOA.
1000-1115, Discussion of Draft NACOA Report on National Sea Grant Program, Dr. William C. Ackermann NACOA.
1115-1330, Discussion of NACOA Work Plan, Dr. William J. Hargis, Jr.

Adjournment at approximately 1:30 p.m.

The public is welcome at this session and will be admitted to the extent of the seating available. Persons wishing to make formal statements should notify the Chairman in advance of the meeting. The Chairman retains the perogative to place limits on the duration of oral statements and discussions. Written statements may be submitted before or after each session.

Additional information concerning this meeting may be obtained through the Committee's Executive Director, Dr. Douglas L. Brooks, whose mailing address is: National Advisory Committee on Oceans and Atmosphere, Department of Commerce Building, Room 5225, Washington, D.C. 20230. The telephone number is 377-3343.

DAVID A. KATCHER,
Acting Executive Director.

PRIVACY PROTECTION STUDY COMMISSION

EMPLOYMENT AND PERSONNEL RECORDS

Inquiry

The Privacy Protection Study Commission, established by Pub. L. 93-579, is required to:

Make a study of the data banks, automated data processing programs, and information systems of governmental, regional, and private organizations, in order to determine the standards and procedures in force for the protection of personal information;

Recommend to the President and the Congress the extent, if any, to which the requirements and principles of the Privacy Act of 1974 should be applied to the information practices of those organizations by legislation, administrative action, or voluntary adoption; and

Report on such other legislative recommendations as it may determine to be necessary to protect the privacy of individuals while meeting the legitimate needs of government and society for information.

One of the areas suggested in the Privacy Act for study by the Commission is employment and personnel record-keeping. The Commission feels that this record-keeping area warrants scrutiny for at least two reasons. First, most individuals are, at one time or another, the subject of a personnel record. Second, most of the organizations not currently subject to the Privacy Act of 1974 maintain employment and personnel records and, for many of these organizations, the bulk of the records about individuals they maintain concern individuals in their capacity as potential, current, or past employees.

Although this notice is addressed primarily to organizations in the private sector, the Commission's study of employment and personnel record-keeping practices will encompass public-sector organizations as well. A notice announcing Commission hearings on both public and private-sector practices will be issued at a later date.

The Commission encourages employers, employees, employee organizations (including labor unions), and employment service agencies and organizations engaged in the preparation of background investigative reports (including executive search services) to submit information concerning the employment and personnel record-keeping practices of private-sector organizations. All submissions should be made in writing no later than October 15, 1976, to:

Ms. Carole W. Parsons, Executive Director, Privacy Protection Study Commission, 2120 L Street NW., Suite 424, Washington, D.C. 20506.

The Commission's inquiry will include an examination of manual *and* computerized records, as well as record-keeping about *potential* employees (including individuals who have not applied for employment but who may be considered for recruitment), *applicants* for employment, employees, and *former* employees.

As a framework for analyzing the extent to which record-keeping practices are fair to both the data subject and the record-keeper in these contexts, the Commission initially wishes to use the five "fair information practice principles" of the [DHEW] Secretary's Advisory Committee on Automated Personal Data Systems as a yardstick against which to measure current practices. These five principles are:

There must be no personal data record-keeping system whose very existence is secret;

There must be a way for an individual to find out what information about him is in a record and how it is used;

There must be a way for an individual to prevent information about him that was obtained for one purpose from being used or made available for other purposes without his consent;

There must be a way for an individual to correct or amend a record of identifiable information about him; and

Any organization creating, maintaining, using or disseminating records of identifiable personal data must assure the reliability (i.e., accuracy, relevance, timeliness, and completeness) of the data for their intended use and must take precautions to prevent misuse of the data.

With these principles in mind, then, the objectives of the Commission's project on employment and personnel records can be described, as follows:

(1) To document the extent to which the existing employment and personnel record-keeping practices of private organizations already conform to the aforementioned principles. In making this assessment, one must bear in mind that there are many different ways of adhering to a fair information practice principle, and that the Commission is interested in learning about as many of them as possible. For example, practices constituting adherence to the "no secret systems" principle might range from the type of public notice required by the Privacy Act of 1974 to a policy of responding to inquiries about what record systems an organization maintains;

(2) To explore the reasons why practices that conform to these principles have been adopted. The Commission is particularly interested in learning whether and to what extent incentives and requirements other than laws or regulations specifically mandating the adoption of fair information practice safeguards have led private-sector organizations to adopt practices that are consistent with the five fair information practice principles. (For example, have laws barring discrimination in employment fostered the development of record-keeping practices that resemble those commonly required by fair information practices legislation?).

(3) To identify the areas in which existing record-keeping practices do not conform to one or more of the principles and, in each case, to understand why and what the consequences are or may be for the individual data subject. For example, an organization may disclose a record about an employee without his consent for a purpose unrelated to that for which the record was originally compiled in response to a request from a law enforcement agency. In such a case, the Commission would like to know not only if the disclosure is made without the consent of the record subject but under what conditions (e.g., in response to a subpoena) and the extent to which the individual is afforded an opportunity to participate in the process (e.g., whether he is notified of the subpoena before or after the information is disclosed, if at all).

(4) To assess the cost and feasibility of alternative means of adhering to the fair information practices principles (including, but not limited to, complying with one or more requirements of the Privacy Act of 1974) in areas where the principles are not now being adhered to.

There are two other employment and personnel record-keeping issues the Commission wishes to explore but which are not subsumed under any of the above stated objectives:

(1) To what extent is the Social Security number used as an identifier in record systems containing information about employees, applicants, and former employees? For what purposes is the SSN used? In which cases is its use required by law? And what other identifiers are used by private organizations in their employment and personnel record systems?

(2) To what extent do Federal and State laws and regulations (such as those governing equal employment opportunity, occupational safety and health, and employee pension plans), internal organization policies, and collective bargaining agreements mandate or prohibit the collection, or manner of collection, of certain information about employees or applicants for employment? In cases in which Federal and State laws and regulations mandate the collection of information, to what extent is the information collected relevant to employment and personnel decisions? In cases in which the collection of certain information is prohibited, are there compelling reasons why an organization would collect it if it were not prohibited from doing so? In particular, the Commission would like to learn about the impact of the Fair Credit Reporting Act on employment and personnel record-keeping practices and decision-making about applicants, employees, and former employees.

Although submissions providing information on the seven points of interest outlined above will necessarily contain references to the content of employment and personnel records maintained by an organization, the Commission would also welcome submissions containing summary information regarding:

(1) The type of information about potential, current, and former employees (e.g., work history; medical and psychological information; letters of recommendation; supervisors' evaluations; sex; race; ethnicity; criminal history records; military discharge evaluations) that is collected, maintained, and used by private-sector organizations;

(2) Whether information about a single individual is contained in more than one system of records and, if so, whether different policies and practices apply to the different record systems; and

(3) Whether different policies and practices apply to records about: (a) Individuals who are recruitment prospects; (b) applicants for employment; (c) current employees; and (d) former employees.

Finally, although the Commission is concerned primarily with the collection, maintenance, and use of information about employees and applicants for employment, it would also like to learn about the practices of private-sector organizations that maintain records about shareholders and vendors.

Although the Commission would prefer to have all submissions organized around the principles and questions outlined above, it also encourages organizations to bring to its attention record-keeping practices and problems that do not appear to fit within the suggested framework. The Commission also wishes to emphasize that it welcomes suggestions for ways in which the "fair information practice principles" might be reworded, modified, or supplemented in ways that would facilitate achievement of the policy objectives they embody.

Dated: August 24, 1976.

DAVID F. LINOWES,
Chairman.
CAROLE W. PARSONS,
Executive Director.

SECURITIES AND EXCHANGE COMMISSION

[811-2103]

AMERICARE GROWTH FUND, INC.

Application for an Order Declaring That Applicant Has Ceased To Be an Investment Company

AUGUST 20, 1976.

Notice is hereby given that Americare Growth Fund, Inc. ("Applicant"), 601 Sixth Avenue, Des Moines, Iowa 50334, registered under the Investment Company Act of 1940 ("Act") as an open-end, diversified management company,

*Voting for this action: Vice Chairman Gardner and Governors Wallich, Coldwell, Jackson, Partee and Lilly. Absent and not voting: Chairman Burns.

V41I168 AUG 27 76 UMI

filed an application on April 1, 1976, and an amendment thereto on July 19, 1976, pursuant to section 8(f) of the Act for an order of the Commission declaring that Applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application, as amended, on file with the Commission for a statement of the representations contained therein, which are summarized below.

Applicant represents that it was incorporated under the laws of the State of Delaware on July 24, 1970, and registered under the Act on August 20, 1970. It states that it publicly offered its shares between June 30, 1971 and July 30, 1971 pursuant to a registration statement filed under the Securities Act of 1933.

Applicant further represents that on February 5, 1976, it was merged into Eaton & Howard Growth Fund, Inc. ("Growth") pursuant to an Agreement and Plan of Merger dated April 11, 1975 between Applicant and Growth, also an open-end, diversified management company registered under the Act, and that this transaction was approved by the Board of Directors of Applicant and Growth and was approved by the stockholders of Applicant on January 27, 1976 at a special meeting of stockholders. Pursuant to the Agreement and Plan of Merger, all of the outstanding shares of capital stock of Applicant were converted into a number of shares of Growth determined on the basis of the relative net asset values of Applicant and Growth. Applicant also represents that it filed a certificate of dissolution with the Secretary of State of the State of Delaware, which was approved on March 1, 1976; and that since February 15, 1976 it has remained in existence solely for the purpose of deregistering with the Commission and winding-up its activities.

Section 8(f) of the Act provides, in pertinent part, that whenever the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, and upon the taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than September 15, 1976, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a stateemnt as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney at law, by certificate) shall be filed contemporaneously with the request. As provided by Rule O–5 of the rules and regulations promulgated under the Act, an order disposing of the matter will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

CHICAGO BOARD OPTIONS EXCHANGE, INC.

Self-Regulatory Organizations; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1) as amended by Pub. L. No. 94–29, 16 (June 4, 1975), notice is hereby given that on August 9, 1976 the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Brackets indicate deletions; italics, new material.

STATEMENT OF THE TERMS OF SUBSTANCE OF THE PROPOSED RULE CHANGE

ANNUAL ELECTION MEETING

SEC. 3.2. An annual election meeting of members shall be held on the 2nd Monday in December of each year unless such day is a legal holiday, in which case on the next succeeding business day which is not a legal holiday, at such time as may be designated by the Board prior to the giving of notice of the meeting for the [sole] purpose of electing a Chairman and Vice-Chairman of the Board, electing directors to fill expiring terms and any vacancies in unexpired terms and electing members of the Nominating Committee *and Appeals Committee* to fill expiring terms and any vacancies in unexpired terms.

NOMINATING COMMITTEE

Sec. 4.1. The Nominating Committee shall be composed of seven individuals, six of whom shall be members or executive officers of member organizations of the Exchange and shall be elected by the membership, and one of whom shall be a member or executive officer of a member organization appointed by the Chairman of the Board with the approval of the Board. At least two of the elected members of the Committee shall be members who individually own or directly control their memberships on the Exchange and are primarily engaged in business on the Exchange floor (floor individuals), and at least two of the elected members of the Committee shall be executive officers of member organizations and shall individually not be primarily engaged in business activities on the Exchange floor (off-floor individuals). The remaining two of the elected members of the Committee shall be members who function in any recognized capacity either individually or on behalf of a member organization. At the annual election meeting, next occurring subsequent to the effective date of the Constitutional amendment changing the structure of the Nominating Committee, a total of two individuals, exclusive of vacancies, shall be elected, one of whom shall serve for a one year term, and one of whom shall serve for a two year term. At each subsequent annual election meeting, three members of the Committee shall be elected, at least one of whom shall be a floor individual and at least one of whom shall be an off-floor individual. All of such elected members of the Committee shall succeed those members of the Committee whose terms expire and shall serve for two years. The one member of the Committee appointed by the Board at the first regular meeting of the Board following the annual election meeting shall serve for one year. A member of the Nominating Committee shall be ineligible for election or appointment to the Committee for a period of two years after his term expires.

[SEC. 4.1. There shall be a Nominating Committee composed of seven members, and except for the members of the initial Nominating Committee each of the members shall be a member of the Exchange. The initial Nominating Committee, which shall select the nominees to be voted upon at the initial annual election meeting, shall be appointed by the Board. Thereafter, there shall be six elected members of the Nominating Committee chosen by the membership of the Exchange, and one member of the Nominating Committee appointed by the Chairman of the Board. At the first annual election meeting, the six elected members of the Nominating Committee shall be elected, two for a term expiring at the annual election meeting following the initial annual election meeting, two for a term expiring at the second annual election meeting following the initial annual election meeting, and two for a term expiring at the third annual election meeting following the initial annual election meeting. At each subsequent annual election meeting, two Committee members shall be elected to succeed those whose terms expire, to serve for a term expiring at the third succeeding annual election meeting. One Committee member shall be appointed each year, for a term of one year, at the regular Board meeting immediately following the annual election meeting. A member of the Nominating Committee shall be ineligible for election or appointment to the Committee for a period of three years after his term expires.]

NOMINATING PROCEDURE

SEC. 4.3. During October of each year the Nominating Committee shall hold at least three meetings, at least two of which shall be open to the membership for the purpose of selecting not less than one nominee for each of the following offices to be voted on at the following annual election meeting:

(a) (no change)
(b) (no change)
(c) (no change)
(d) (no change)
(e) *Appeals Committee members to fill expiring terms and vacancies.*

The Nominating Committee shall select nominees to fulfill the requirement of sections 6.1, *4.1,* and 2.3 of the Constitution with an obligation to have the various interests of the membership represented on the Board, [and] the Nominating Committee *and the Appeals Committee, respectively.* Notice of each of these metings shall be posted on the bulletin board on the floor of the Exchange.

COUNTING OF BALLOTS

SEC. 5.3. When all of the ballots properly submitted at the election have been placed in the ballot box, the election Committee shall open the ballot box and the sealed ballot envelope and shall count the ballots. A majority of all votes cast shall elect the Chairman of the Board and the Vice Chairman. A plurality of votes shall elect the Directors: *Provided however,* That where a plurality of votes cast do not elect at least 2 directors who shall be off-floor directors, as defined in Section 6.1, of which at least 1 shall be a member and at least 1 shall be a nonresident and at least 2 directors who shall be floor directors, as defined in Section 6.1, then the appropriate number of candidates from each of the above categories who receive the highest votes among all those candidates in each such category shall be elected in lieu of those candidates with the lowest winning pluralities. A plurality of votes shall elect members of the Nominating Committee: *Provided however, That where a plurality of votes cast do not elect at least 1 member of the Committee who shall be an off-floor individual, as defined in Section 4.1 and at least one member of the Committee who shall be a floor individual as defined in Section 4.1, then the appropriate number of candidates from each of the above categories who receive the highest votes among all of those candidates in each such category shall be elected in lieu of those candidates with the lowest winning pluralities. A plurality of votes shall elect the members of the Appeals Committee: Provided however, that where a plurality of votes cast do not elect at least 1 member of the Committee who shall be an off-floor individual as defined in Section 7.3 and at least 1 member of the Committee who shall be a floor individual as defined in Section 7.3 then the appropriate number of candidates from each of the above categories who receive the highest votes among all of those candidates in each category shall be elected in lieu of those candidates with the lowest winning pluralities.* If no candidate receives a majority vote for Chairman of the Board or for Vice Chairman, the annual election meeting shall be adjourned for a period of 10 business days. At such adjourned meeting, another vote of the members shall be taken on the offices not decided at the original meeting, in accordance with the procedures set forth in this Article for the conduct of elections. If again there shall be a failure to elect, the meeting shall be adjourned for a second period of 10 business days, and at the second adjourned meeting, a plurality of all votes cast shall elect the offices voted upon. The Election Committee shall cause election results to be posted on the bulletin board on the floor of the Exchange.

THE APPEALS COMMITTEE

Sec. 7.3. The Appeals Committee shall be composed of 10 individuals, 9 of whom shall be members or executive officers of member organizations of the Exchange and shall be elected by the membership of the Exchange, and 1 of whom shall be appointed from among the members of the Board of Directors by the Chairman of the Board with the approval of the Board to act as Chairman of the Appeals Committee. The Appeals Committee shall conduct all hearings and reviews applied for by members of the Exchange in accordance with the provisions of Chapter XIX of the Rules. The members of the Appeals Committee shall not serve on any other Exchange committee during their term of service on the Committee. At least 3 of the 9 elected members of the Committee shall be members who individually either own or directly control their memberships on the Exchange and are primarily engaged in business on the Exchange floor (floor individuals), and at least 3 of the 9 elected members of the Committee shall be executive officers of member organizations and shall individually not be primarily engaged in business activities on the Exchange floor (off-floor individuals). The remaining 3 of the elected members of the Committee shall be members who function in any recognized capacity either individually or on behalf of a member organization. At the annual election meeting, next occurring subsequent to the effective date of the Constitutional amendment establishing the Committee as an elected body, a total of 9 members of the Committee shall be elected of which 3 shall serve a term of 1 year, 3 shall serve a term of 2 years, and 3 shall serve a term of 3 years. At each subsequent annual election meeting, 3 members of the Committee shall be elected to succeed those members of the Committee whose terms expire and shall serve a term of 3 years. The member appointed as Chairman of the Committee by the Chairman of the Board at the first regular meeting of Directors following the annual election meeting shall serve for a term of 1 year.

APPEALS COMMITTEE VACANCIES

Sec. 7.4. Any vacancy occurring among the members of the Appeals Committee may be filled by the Chairman of the Board with the approval of the Board until the next annual election meeting, at which time a successor shall be elected to serve the unexpired term, if any, of his elected predecessor in office.

OTHER COMMITTEES

SEC. [7.3] 7.5. (no change)

CONDUCT OF PROCEEDINGS

SEC. [7.4] 7.6. (no change)

[APPEALS COMMITTEE]

[Rule 2.9. The Appeals Committee shall consist of at least seven members of the Exchange. The presence of a majority of the members of the Committee shall constitute a quorum for the transaction of business. The members of the Appeals Committee shall not serve on any other Exchange Committee during the term of their service on the Appeals Committee.]

EXCHANGE'S STATEMENT OF BASIS AND PURPOSE

The purpose of the proposed Constitutional revisions is (1) to broaden the number of issues which may be considered at the Annual Election Meeting of the Membership, and (2) to ensure more balanced representation from among all Exchange members on the Nominating and Appeals Committees.

With respect to section 3.2 of the Constitution, a literal reading of the provisions of that section indicates that the Membership of the Exchange shall only consider the election of directors and the members of the Nominating Committee at the Annual Election Meeting. With a membership body which presently exceeds 1300, it is not administratively expedient to conduct an Annual Meeting of Members and be restricted from considering any business other than the election of certain officials. Therefore, in addition to some small word changes necessary to reflect the provisions of new section 7.3, the proposed revisions to section 3.2 will enable the Exchange to consider any other lawful business at its Annual Election Meeting.

The proposed revisions to section 4.1 would mandate that individuals with a number of different perspectives be elected to the Nominating Committee. Through the expansion of the categories of people required to be elected to the Nominating Committee, it is believed that the Committee's candidate selection process will result in the nomination of balanced slates of candidates for the Board, the Nominating Committee and, as proposed, the Appeals Committee. Furthermore, the proposed reduction in the term of office and the resultant higher rate of turnover will provide an opportunity for a greater number of people to serve on that Committee.

The proposed new section 7.3, dealing with the Appeals Committee, further reflects the Exchange's desire to ensure balanced representation on Exchange Committees. Since the Appeals Committee scope is so broad, i.e., hearing grievances resulting from all Exchange Committee and departmental actions, save only the Business Conduct and Arbitration Committees, it is important that members of the Appeals Committee reflect a fair representation of all Exchange members. Furthermore, since the jurisdiction of the Committee is so extensive, it was concluded that all Appeals Committee members, except the Chairman, should be elected by the membership. The Chairman of the Appeals Committee would, under the proposal, be chosen from among the members of the Board so as to provide a liaison capability between the Board and the Committee.

The remaining proposed changes to Constitutional section 3.2, 4.3, 5.3, 7.3, 7.4, Rule 2.9 and the introduction of new Section 7.4 reflect technical revisions required by the changes in the rules discussed above. It is proposed that section 3.2, Annual Election Meeting, be revised to add that expiring terms and vacancies in unexpired terms on the Appeals Committee would be filled at the annual election meeting. Section 4.3, Nominating Procedure, would be revised to require the nomination of persons to fill expiring terms and vacancies in unexpired terms on the Appeals Committee. In addition, the proposed section 4.3 revisions would require the nomination of persons to the Nominating and Appeals Committees which meet the requirements of section 4.1, as amended, and new section 7.3, respectively. It is proposed that section 5.3, Counting of Ballots, include the manner in which ballots would be counted with respect to the election of the members of the Nominating and Appeals Committees. Section 7.3, Other Committees, and section 7.4, Conduct of Proceedings, would be respectively renumbered as sections 7.5 and 7.6 and would otherwise remain unchanged. Rule 2.9 would be deleted, since the subject matter covered there is proposed to

V 41 168
AUG 27 76
UMI

be replaced by new section 7.3. New Appeals Committee Vacancies, as proposed, would enable the Chairman of the Board to designate new members of the Appeals Committee when vacancies occurred.

The expansion of the number of issues which may be lawfully presented at an Annual Election Meeting of Members is consistent with section 6(b)(5) of the Securities Exchange Act of 1934, as amended, which, in part, requires that an exchange's rules relate not only to the administration of the Exchange but also to the provisions of the Act.

Section 6(b)(3) of the Act which requires that the Exchange assure a fair representation of its members in the selection of its directors and administration of its affairs provides the basis for the proposed changes in the composition of the members of the Nominating and Appeals Committees.

The proposed Constitutional changes will be submitted to the vote of the Membership on September 13, 1976.

The proposed rule change will not impose any burden upon competition.

On or before October 1, 1976, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the abovementioned self-regulatory organization consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 17, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

AUGUST 23, 1976.

[File Nos. 7-4867—7-4870]

COLT INDUSTRIES, INC. ET AL.

Applications for Unlisted Trading Privileges and of Opportunity for Hearing

AUGUST 23, 1976.

In the matter of applications of the Philadelphia Stock Exchange, for unlisted trading privileges in certain securities, Securities Exchange Act of 1934.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the securities of the companies as set forth below, which securities are listed and registered on one or more other national securities exchanges:

Colt Industries, Inc., Common Stock, $1 Par Value, File No. 7-4867.
Gould, Inc., Common Stock, $4 Par Value, File No. 7-4868.
Inmont Corporation, Common Stock, $5 Par Value, File No. 7-4869.
McDermott (J. Ray) & Co., Incorporated, Common Stock, $1 Par Value, File No. 7-4870.

Upon receipt of a request, on or before September 8, 1976 from any interested person, the Commission will determine whether the application with respect to any of the companies named shall be set down for hearing. Any such request should state briefly the title of the security in which he is interested, the nature of the interest of the person making the request, and the position he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on any of the said applications by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549 not later than the date specified. If no one requests a hearing with respect to any particular application, such application will be determined by order of the Commission on the basis of the facts stated therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

DEPOSITORY TRUST CO.

Self-Regulatory Organization; Proposed Rule Change

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on August 9, 1976 the abovementioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Statement of the Terms of Substance of the Proposed Rule Change.

The following legend which is to be stamped on the coupon form of interchangeable corporate debt securities deposited at The Depository Trust Company (DTC) has been changed by addition of the italicized words.

This security is the property of The Depository Trust Company of 55 Water Street New York, New York *for deposit only with the bond/debenture registrar for exchange into fully registered bonds/debentures.*

STATEMENT OF BASIS AND PURPOSE

The basis and purpose of the foregoing proposed rule change is as follows:

3. *Purpose of proposed rule change.* The purpose of the proposed rule change is to comply with the recommendation of authenticating trustees, transfer agents and registrars for interchangeable corporate debt securities with respect to the legend to be stamped on the coupon form of such securities deposited at DTC. The addition to the legend strengthens the existing notice of adverse claim.

4. *Basis under the act for proposed rule change.* (a) Not Applicable.

(b) The proposed rule change relates to DTC's carrying out the purposes of section 17A of the Securities Exchange Act of 1934 (the Act) by increasing DTC's capacity to facilitate the prompt and accurate clearance and settlement of securities transactions in that the proposed rule change will encourage immobilization of interchangeable corporate debt securities.

(c) Not Applicable.

5. *Comments received from members, participants or others on proposed rule change.* DTC changed the legend to be stamped on the coupon form of interchangeable corporate debt securities deposited at DTC on the recommendation of authenticating trustees, transfer agents and registrars for such securities who had reviewed draft procedures for DTC's coupon bond deposit service.

6. *Burden on competition.* None.

The foregoing rule change has become effective, pursuant to section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submission should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the public reference room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should be submitted on or before September 17, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 19, 1976.

[812-3690]

LAFITTE COMPANY, INC.

Filing of Application for Exemption From All Provisions of the Act

Notice is hereby given that The Lafitte Company, Inc. ("Lafitte"), 6100 Dutchmans Lane, Louisville, Kentucky 40205, a Delaware corporation, filed an application on December 22, 1975, and amendments thereto on February 9, 1976, April 28, 1976, May 26, 1976, and July 20, 1976, pursuant to section 6(c) of the Investment Company Act of 1940 (the "Act"), for an order of the Commission exempting Lafitte, subject to certain conditions, from all provisions of the Act and the Rules and Regulations promulgated thereunder for a period of one year. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein, which are summarized below.

Lafitte was incorporated in Delaware in 1946 and has, to date, been primarily engaged in the business of exploring for and extracting oil and gas in Louisiana and Kentucky. Lafitte also owns a significant portfolio of investment securities.

Shortly after its organization, Lafitte issued shares of its common stock for certain assets of Louisville Refining Company. These assets consisted primarily of working interests in certain oil and gas properties located in Louisiana and fee interests in certain oil and gas properties located in Kentucky.

Lafitte directly explored for and extracted oil and gas from its Louisiana properties until April of 1947 when it entered into a unitization agreement with Texaco, Inc. Lafitte's primary activity in connection with the agreement, which is still in effect, is the monitoring of Texaco's field operations. The Louisiana properties have been the major source of Lafitte's income. The current fair market value of these properties is estimated to be between $1.6 million and $2.1 million. Lafitte estimates that these properties will be depleted in five to ten years.

Lafitte began developing certain of its Kentucky properties in 1952 and continued to operate portions of these properties until June 1, 1975, when it sold all of its producing working interests. Lafitte continues to own approximately 29,000 acres of oil and gas properties in Kentucky. Its income from these properties consists of rentals and oil royalties. Lafitte also owns approximately 23,000 acres of gas producing properties in Kentucky. These properties are being operated by unaffiliated gas companies, and Lafitte's income from these properties consists, primarily, of gas royalties. The current fair market value of Lafitte's Kentucky properties is approximately $250,000.

Lafitte's oil and gas operations have been consistently profitable and have generated substantial amounts of cash income which has been invested in securities. The curetailment of drilling and exploration activity in Kentucky during the late 1960's and early 1970's resulted in further capital accumulation and investment in securities.

Lafitte's stock is owned by 113 stockholders. It has never made, is not making, and does not propose to make a public offering of its securities.

Section 3(a)(3) of the Act, in pertinent part, defines an investment company to mean any issuer which is engaged in the business of investing, reinvesting, owning, holding, or trading in securities, and owns investment securities having a value exceeding 40 percent of the value of such issuer's total assets, exclusive of Government securities and cash items, on an unconsolidated basis.

As of December 31, 1975, Lafitte owned investment securities having a market value of approximately $5.9 million. These securities represent approximately 70 percent of the value of Lafitte's total assets, exclusive of Government securities and cash items, on an unconsolidated basis. Lafitte therefore comes within the definition of an investment company set forth in section 3(a)(3) of the Act.

Lafitte contends that it is a private company; rather than a public company, and, thus, the type of company intended to be exempted from the Act. It therefore has requested an order of the Commission, pursuant to section 6(c) of the Act, exempting it, subject to certain conditions, from all provisions of the Act and the rules and regulations promulgated thereunder for a period of one year. Section 6(c) of the Act, as here pertinent, provides that the Commission may, by order upon application, conditionally or unconditionally exempt any person from any provision or provisions of the Act or from any rule or regulation thereunder, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

Lafitte asserts that private investment companies were not intended to be within the purview of the Act and further asserts that section 3(c)(1) of the Act was designed to exclude such private investment companies from the definition of an investment company. Section 3(c)(1) of the Act, in pertinent part, provides that, notwithstanding the definition of an investment company set forth in section 3(a) of the Act, any issuer whose outstanding securities are beneficially owned by not more than one hundred persons and which is not making and does not presently propose to make a public offering of its securities is not an investment company within the meaning of the Act.

Lafitte is not making and does not presently propose to make a public offering of its securities, but its common stock is beneficially owned by 113 persons. Lafitte asserts that, even though it has 113 shareholders, it is a private company to which the exception provided by section 3(c)(1) was directed. Lafitte states that the 100 shareholder limitation is section 3(c)(1) of the Act is an arbitrary figure and that additional factors are to be weighed in determining whether an issuer is a public or a private company.

In support of its contention that it is a private company, Lafitte states that no public exchange or over-the-counter market exists, or has ever existed, in its common stock, and that disposal of shares by sale is rare with only 29 such transactions in the period from 1946 to 1975.

Lafitte further asserts that it has never made a public offering of its common stock and that all of its original shareholders were founders of Lafitte, their personal or business friends, or employees, or principals of small businesses which were acquired and subsequently operated by Lafitte. Lafitte represents that, while a total of 93 persons acquired shares directly from Lafitte during the period 1946 to 1975, only 29 of its present shareholders so acquired their shares and that 79 of its present shareholders acquired their shares as the result of intra-family devises and bequests. Lafitte states that only 6 of its present shareholders acquired their shares solely as a result of purchases from existing shareholders and that these transactions involved less than 1 percent of Lafitte's outstanding securities.

Lafitte states that 75 percent of its stock is closely held by members of three founding families and that a member or representative of each family is currently active in the conduct of Lafitte's business.

Lafitte asserts that the requested exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and purposes of the Act.

Lafitte consents and agrees that any order issued by the Commission pursuant to this Application shall be effective for a period of one year, subject to the conditions that Lafitte's securities are not beneficially owned by more than 135 persons and that no registered broker-dealer initiates a regular trading market in its securities.

At the end of the one-year period, Lafitte expects either to have less than 100 shareholders, to be primarily engaged in a non-investment company business, or to have taken substantial steps toward implementing a plan of liquidation, distribution and dissolution. If, at the end of the one year period, Lafitte is still an investment company within the meaning of the Act, Lafitte states that it will promptly register as such with the Commission.

Lafitte further represents that it is presently negotiating with Sabine Royalty Corporation ("Sabine") of Dallas, Texas concerning the sale of substantially all of Lafitte's assets to Sabine. If the proposed sale is consummated, Lafitte will be liquidated and all of Lafitte's assets, less those assets retained to meet claims, will be distributed in complete liquidation within a twelve month pe-

V 41 1168
AUG 27 76
UMI

riod beginning on the date of the adoption of Lafitte's plan of complete liquidation.

Notice is further given that any interested person may, not later than September 13, 1976, at 5:30 p.m., submit to the Commission in writing a request for a hearing on this matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 600 miles from the point of mailing) upon Lafitte at the address stated above. Proof of such service (by affidavit, or in the case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0–5 of the rules and regulations promulgated under the Act, an order disposing of the application will be issued as of course following September 13, 1976, unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

MIDDLE SOUTH UTILITIES, INC. ET AL.

In the matter of Middle South Utilities, Inc., 280 Park Avenue, New York, New York 10017; System Fuels, Inc., 225 Baronne Street, New Orleans, Louisiana 70112; Arkansas Power & Light Company, Ninth and Louisiana Streets, Little Rock, Arkansas 72203; Louisiana Power & Light Company, 142 Delaronde Street, New Orleans, Louisiana 70174; Middle South Energy, Inc., 225 Baronne Street, New Orleans, Louisiana 70112; Middle South Services, Inc., 225 Baronne Street, New Orleans, Louisiana 70112; Mississippi Power & Light Company, P.O. Box 1640, Jackson, Mississippi 39205; New Orleans Public Service, Inc., P.O. Box 80340, New Orleans, Louisiana 70160.

Nuclear Fuel Procurement Program

Notice is hereby given that Arkansas Power & Light Company ("AP&L"), Louisiana Power & Light Company ("LP&L"), Mississippi Power & Light Company ("MP&L") and New Orleans Public Services, Inc. ("NOPSI") (collectively referred to as "System Companies"), all public utility subsidiary companies of Middle South Utilities, Inc. ("MSU"), a registered holding company, have filed with this Commission an application pursuant to Sections 12(b), 12(f) and 15 of the Public Utility Holding Company Act of 1935 ("Act") and Rules 87(b)(4), 90 and 91 promulgated thereunder regarding the following proposed transactions. All interested persons are referred to said application, which is summarized below for a complete statement of the proposed transactions.

System Fuels, Inc. ("SFI") is a jointly owned, nonutility, fuel supply subsidiary company of the System Companies. Pursuant to HCAR No. 17400 (December 17, 1971) SFI has carried out, during the period since its organization in 1972, an extensive program for the centralized procurement, storage and transportation of fuel for the system companies of MSU.

To date, SFI primarily has been engaged in programs related to fossil fuels. SFI now proposes to initiate a plan to extend the benefits of centralized procurement to nuclear fuel in order to accommodate MSU's increased commitment to nuclear power.

In effectuating the nuclear fuel procurement program, SFI will undertake the responsibility of contracting for the acquisition, conversion and enrichment of those nuclear materials required for the fabrication of nuclear fuel which may be utilized for any of the present or proposed system nuclear units. The System Companies have one nuclear unit that was placed in commercial operation in December of 1974 (Unit No. 1 of AP&L's Arkansas Nuclear One). Expenditures for nuclear fuel and related services are currently being made for four other nuclear units presently under construction.

SFI will establish an inventory of materials during their various stages of processing. Such components include U_3O_8 concentrates or yellowcake produced by the mining and milling of uranium ore, unenriched UF_6 produced by the conversion of yellowcake and enriched UF_6. It is proposed that SFI would inventory and sell to the System Companies enriched UF_6. Sales between SFI and the System Companies will be made at cost in accordance with Rules 90 and 91 of the Act. Each System Company will contract for the fabrication of its own nuclear fuel and continue to own (or sell and lease back) the nuclear fuel during its use. When shipped to a fabrication facility, enriched UF_6 is changed into UO_2, made into pellets and inserted into rods for a fuel assembly—which would typically be appropriate for use only in a specific unit.

Two alternatives have been proposed as to the use of the spent fuel residuals. Either SFI will purchase the spent fuel residuals from System Companies or one System Company may sell spent fuel residual to another System Company.

Should SFI purchase the spent fuel residuals, SFI may either sell the spent fuel residuals or dispose of nuclear waste to third parties. Any funds received by SFI from such sales would be used by SFI for its acquisition of other nuclear materials and would accordingly reduce the cost of nuclear materials sold by SFI to the system companies. Subsequent transfers of nuclear materials and spent fuel within the system by system companies will be at cost in accordance with Rule 87(b)(4). Such transfer sales will be reported to the Commission by a Rule 24 certificate filed on a quarterly basis.

In connection with the initiation of SFI's nuclear fuel procurement program, SFI will acquire certain nuclear materials and services from certain system companies.

AP&L has sufficient commitments for a supply of U_3O_8 and UF_6 through 1989. SFI proposes to purchase from AP&L, approximately 105,000 pounds of U_3O_8 ("yellowcake") and approximately 339,500 kilograms of unenriched UF_6, which are in excess of AP&L's requirements through 1989. SFI will pay AP&L an amount equal to the actual costs incurred by AP&L for this yellowcake, plus applicable allowance for funds used during construction ("AFDC"). As of May 31, 1976, this amounted to $835,382. The UF_6 is to be delivered by the Kerr McGee Corporation ("Kerr McGee") under a sales agreement between AP&L and Kerr McGee dated July 14, 1970. The estimated delivery schedule and the presently estimated cost associated with each delivery of UF_6 is as follows:

Estimated delivery date	Approximate quantity to be delivered (Kg U as UF_6)	Estimated cost (in thousands)
September 1976	119,000	$3,426
April 1977	36,000	1,037
August 1977	34,500	994
September 1977	150,000	4,320
Total	339,500	9,777

SFI will pay AP&L an amount equal to actual costs as incurred by AP&L for this UF_6. In addition, SFI proposes to acquire by assignment from LP&L an enrichment contract between LP&L and the United States of America ("USA") dated December 31, 1973, and to acquire from Middle South Energy, Inc. ("MSE"), a subsidiary of MSU two enrichment contracts with the USA dated May 24, 1974. These three enrichment contracts were originally intended to cover the enrichment requirements of LP&L's Waterford Unit Three and Unit One and Unit Two of MSE's Grand Gulf Generating Station, respectively. However, the separative work units (the units of enrichment services) to be provided under these three contracts may be used in connection with the supply of fuel for any nuclear reactor in the System.

SFI will pay LP&L $3,804,900 (plus AFDC amounting to $392,380 at May 31, 1976) as a refund of down payments made under the contract to be assigned by LP&L. Also, SFI will pay MSE a total of $8,593,200 (plus AFDC amounting to $701,167 at May 31, 1976) as a refund of down payments made under the two enrichment contracts to be assigned by MSE.

SFI also proposes to acquire by assignment an enrichment contract between AP&L and the USA dated April 12, 1971 and a conversion contract between AP&L and Eldorado Nuclear Limited, dated September 20, 1971. In addition, SFI proposes to acquire by assignment from Middle South Services, Inc. ("MSS") a yellowcake supply contract with an affiliated company of the Rio Tinto-Zinc Corporation, dated September 11, 1975, and a conversion contract with Allied Chemical Corporation, dated August 22, 1975.

In order to assure any party contracting with SFI that SFI will perform, the System Companies propose to take such action as may be appropriate to keep SFI in a sound financial condition. Any such indemnification will be based on the System Companies ownership of the common stock of SFI. Where the above assurances of the System Companies are inadequate, MSU will guarantee the performance of SFI. Any such assurances of the System Companies and/or MSU will be subject to the provisions of sections 12(b) and 12(f) of the Act.

Under its current program for the procurement of fuel for the System Companies SFI has a loan agreement with the System Companies which provides for the borrowing of up to $130,000,000 in 1976 (HCAR No. 19314, December 24, 1975). SFI also proposes to fund its 1976 expenditures for the nuclear fuel procurement program through loans from the system companies under the loan agreement. Estimated expenditures will be approximately $17,753,029 through calendar year 1976.

SFI proposes to utilize the expertise of the System Companies on a cost basis as and when requested in specialized areas. This is to avoid duplicated services within the system and to facilitate more efficient and economical nuclear fuel procurement activities for the system.

The Nuclear Regulatory Commission has jurisdiction over the ownership and possession of certain nuclear materials. It will be necessary for the Energy Research and Development Administration to consent to the assignment of the enrichment contracts. No other State commission and no Federal commission, other than this Commission, have jurisdiction over the proposed transaction. No fees and expenses are anticipated to be incurred in connection with this transaction.

Notice is further given that any interested person may, not later than September 13, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by said application which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the applicants at the above-stated addresses, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the application, as filed or as it may be amended, may be granted as provided in Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

NICOR, INC. AND MGIC INVESTMENT CORP. (WISCONSIN)

Applications for Unlisted Trading Privileges and of Opportunity for Hearing

AUGUST 23, 1976.

In the matter of applications of the Philadelphia Stock Exchange, for unlisted trading privileges in certain securities, Securities Exchange Act of 1934.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f–1 thereunder, for unlisted trading privileges in the securities of the companies as set forth below, which securities are listed and registered on one or more other national securities exchanges:

NICOR, Inc., Common Stock, $5 Par Value, File No. 7–4871.
MGIC Investment Corporation (Wisconsin), Common Stock, $1 Par Value, File No. 7–4872.

Upon receipt of a request, on or before September 8, 1976 from any interested person, the Commission will determine whether the application with respect to any of the companies named shall be set down for hearing. Any such request should state briefly the title of the security in which he is interested, the nature of the interest of the person making the request, and the position he proposes to take at the hearing, if ordered. In addition, any interested person may submit his views or any additional facts bearing on any of the said applications by means of a letter addressed to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549 not later than the date specified. If no one requests a hearing with respect to any particular application, such application will be determined by order of the Commission on the basis of the facts stated therein and other information contained in the official files of the Commission pertaining thereto.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

SHIRLEY E. HOLLIS,
Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[License No. 06/10–0152]

BRITTANY CAPITAL CORP.

Voidance of Approval of Transfer of Control of Licensed Small Business Investment Company

On June 9, 1976, the Small Business Administration (SBA) approved the transfer of control of Brittany Capital Corporation (Brittany), 4325 Republic Bank Tower, Dallas, Texas 75201, a Federal Licensee under the Small Business Investment Act of 1958, as amended, to Rambin Financial Corporation.

On August 10, 1976, SBA was notified that the proposed transaction was never consummated. Therefore, this notice will void the aforementioned approval.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies).

Dated: August 20, 1976.

GERALD L. FEIGEN,
Acting Deputy Associate Administrator for Investment.

[License No. 01/01–0031]

SCI-TRONICS FUND, INC.

Filing of Application for Approval of Conflict of Interest Transaction Between Associates

Notice is hereby given that Sci-Tronics Fund, Inc. (SBIC), 142 Main Street, Nashua, New Hampshire 03060, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), has filed an application pursuant to § 107.1004 of the regulations governing small business investment companies (13 CFR 107.1004 (1976)), for approval of a conflict of interest transaction.

SBIC is wholly owned by Messrs. Carl H. Novotny and Robert P. Walker, Messrs. Novotny and Walker also own American Program Bureau (APB), a business located at 850 Boylston Street, Boston, Massachusetts, which is engaged in the business of management of speaking engagements and personal appearances. Mr. Alan Jacobs is an employee (clerk) of APB and is under the indirect control of Messrs. Novotny and Walker and is deemed an Associate of the SBIC pursuant to § 107.3 of the regulations.

Messrs. Alan Jacobs, Eugene Perkins and Sheldon Feinstein are equal partners in Tripart Associates (Tripart), a Massachusetts partnership located at 655 Boylston Street, Boston, Massachusetts. Tripartis comprised of Entertainment Resources, Inc., Franchise Management Corporation of America, Inc., and Advertising and Design Services, Inc., and is engaged in the business of providing marketing and sales consulting services which include engaging and booking talents in the entertainment business, locating people for buying franchises and fast food operations, and promoting credit cards. Tripart is being financed by the SBIC in the amount of $70,000.

V 41 168 AUG 27 76 UMI

Since Mr. Jacobs is a general partner in Tripart Associates, Tripart Associates is also an Associate of the SBIC, and the financing falls within the purview of § 107.1004(b) (1) of the Regulations and requires the written approval of SBA.

Notice is further given that any person may, not later than fifteen days from the date of the publication of this notice, submit to SBA, in writing, comments on the proposed transaction. Any such comments should be addressed to: Associate Administrator for Finance and Investment, Small Business Administration, 1441 "L" Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published by SBIC in newspapers of general circulation in Nashua, New Hampshire, and Boston, Massachusetts.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies).

Dated: August 18, 1976.

GERALD L. FEIGEN,
Acting Deputy Associate Administrator for Investment.

[License No. 09/09-5176]

SPACE VENTURES, INC.

Application for Approval of a Conflict of Interest Transaction

The Notice is hereby given that Space Ventures, Incorporated (Space), 500 East Carson Drive, Suite 214, Carson, California 90745, a Federal Licensee under the Small Business Investment Act of 1958, as amended (Act), has filed an application pursuant to 13 CFR 107.1004 (1976) for approval of a conflict of interest transaction.

It is proposed that Space provide $50,000 in financing to Space Spin-Offs, Inc. (Spin-Off), Security Bank Building, 110 Pine Avenue, Suite 1216, Long Beach, California 90802, of which $40,000 will be in the form of a subordinated long-term loan and $10,000 for no more than 10 percent of the common stock of the small concern. The financing is part of a $360,000 package.

Spin-Offs obtained an exclusive license from the Rocketdyne Division (Rocketdyne) of Rockwell International Corporation (Rockwell) to manufacture and commercially introduce a Rocketdyne-patented water turbine called the "Hydrotool". Spin-Off agreed to pay Rocketdyne a license fee and royalties based on sales. Rocketdyne is a division of Rockwell and Space is a wholly-owned subsidiary of Rockwell.

Pursuant to the definition of Associate in § 107.3 of the regulations, Rocketdyne is considered to be an associate of Space. Consequently, the transaction falls within the purview of § 107.1004(b) (4) and (5) of the regulation requiring prior written approval of the Small Business Administration (SBA).

Notice is further given that any person may, on or before September 13, 1976, submit to SBA, in writing, relevant comments on the proposed transaction. Any such communications should be addressed to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in the Los Angeles, California area.

PRIVACY ACT 1974

Systems of Records

Pursuant to the provisions of the Privacy Act of 1974 Pub. Law 93-579, 5 U.S.C. 552a, the Harry S. Truman Scholarship Foundation hereby publishes for comment those systems of records subject to the Privacy Act of 1974 which are maintained by the Foundation. Any person interested in commenting on the routine use portions of the system notices may do so by submitting comments in writing to the Executive Secretary, Harry S. Truman Scholarship Foundation, 712 Jackson Place, N.W., Washington, D.C. 20006. Comments should be submitted on or before September 27, 1976. The Foundation procedures for access to records in the systems are contained in 45 CFR Part 1800, as published in this issue of the FEDERAL REGISTER on page 36222.

Dated: August 24, 1976.

ROBERT E. CLEARY,
Executive Secretary.

TSF-1

System name: Payroll Records—Harry S Truman Scholarship Foundation.

System location: General Services Administration, Region 3 Office; copies held by the Foundation. (GSA holds records for the Foundation under contract.)

Categories of individuals covered by the system: Past and present Foundation employees.

Categories of records maintained in the system: Varied payroll records, including, among other documents, time and attendance cards; payment vouchers; comprehensive listing of employees; health benefits records; requests for deductions; tax forms; W2 forms; overtime requests; leave data; retirement records. Records are used by Foundation and GSA employees to maintain adequate payroll information for Foundation employees, and otherwise by Foundation and GSA employees who have a need for the record in the performance of their duties.

Authority for the system: 31 U.S.C., generally.

Routine use of records: See appendix. Records also are disclosed to GAO for audits; to the Internal Revenue Service for investigation; and to private attorneys, pursuant to a power of attorney.

Records are also disclosed by providing a copy of an employee's Federal Treasury Form W-2, "Wage and Tax Statement" to the State, city, or other local jurisdiction which is authorized to tax the employee's compensation. The record will be provided in accordance with a withholding agreement between the State, city, or other local jurisdiction and the Department of the Treasury pursuant to 5 U.S.C. 5516, 5517, and 5520 or in the absence thereof, in response to a written request for an appropriate official of the taxing jurisdiction to the Executive Secretary, Harry S. Truman Scholarship Foundation, 712 Jackson Place, N.W., Washington, D.C. 20006. In the latter case, the request must include a copy of the applicable statute or ordinance authorizing the taxation of compensation and the solicitation of the Social Security number, and should indicate whether the authority of the jurisdiction to tax the employee is based on place of residence, place of employment, or both.

Pursuant to a withholding agreement between a city and the Department of the Treasury (5 U.S.C. 5520) copies of executed city tax withholding certificates shall be furnished the city in response to a written request from an appropriate city official to the Executive Secretary, Harry S. Truman Scholarship Foundation, 712 Jackson Place, N.W., Washington, D.C. 20006.

Policies and practices for storing and retrieving, accessing, retaining and disposing of records in the system:

(1) *Storage:* Paper and microfilm.

(2) *Retrievability and accessing:* Social Security Number.

(3) *Safeguards:* Stored in guarded building; released only to authorized personnel.

(4) *Retention and disposal:* Disposition of records shall be in accordance with the HB GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager: Executive Secretary, Harry S. Truman Scholarship Foundation, 712 Jackson Place, N.W., Washington, DC 20006.

Notification procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Record access procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Contesting records procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Categories of sources of records in the system: The subject individual; the Foundation.

TSF-2

System name: General Financial Records—Harry S. Truman Scholarship Foundation.

System location: General Services Administration, Central Office; copies held by the Foundation. (GSA holds records for the Foundation under contract.)

Categories of individuals covered by the system: Employees of the Foundation and members of its Board of Trustees.

Categories of records maintained in the system: SF-1038, Application and account for advance of funds; Vendor register and vendor payment tape. Information is used by accounting technicians to maintain adequate financial information and by other officers and employees of GSA and the Foundation who have a need for the record in the performance of their duties.

Authority for the system: 31 U.S.C., generally; also, the Foundation's authorizing legislation, Pub. L. 93-642 (20 U.S.C. 2001).

Routine use of records: See appendix. Records also are released to GAO for audits; to the IRS for investigation; and to private attorneys, pursuant to power of attorney.

Policies and practices for storing and retrieving, accessing, retaining and disposing of records in the system:

(1) *Storage:* Paper and tape.

(2) *Retrievability and accessing:* Manual and automated by name.

(3) *Safeguards:* Stored in guarded building; released only to authorized personnel.

(4) *Retention and disposal:* Disposition of records shall be in accordance with the HB GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager: Executive Secretary, Harry S. Truman Scholarship Foundation, 712 Jackson Place, N.W., Washington, DC 20006.

Notification procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Record access procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Contesting records procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Categories of sources of records in the system: The subject individual; the Foundation.

TSF-3

System name: General Informational Files—Harry S. Truman Scholarship Foundation.

System location: Harry S. Truman Scholarship Foundation, 712 Jackson Place, N.W., Washington, DC 20006.

Categories of individuals covered by the system: Foundation employees and members of its Board of Trustees.

Categories of records maintained in the system: General personnel information, including, among other data, copies of training and travel records, applications, suggestions, position descriptions, request for and notification of personnel action, employee performance ratings and promotion appraisals, time and attendance records, security clearances, titles, date of birth, grade, salary, employment history, home address, age, marital status, Social Security Number, home telephone number, resumes, general correspondence, and letters of recommendation. System also contains copies of official Civil Service Commission and Foundation personnel forms.

Authority for the system: 5 U.S.C., generally; also, the Foundation's authorizing legislation, Pub. L. 93-642 (20 U.S.C. 2001).

Routine use of records: See appendix. Completion of agency forms for requests for personnel actions, security clearances, training authorizations, travel authorizations, time and attendance records, reports, etc. Also used for issuing passes, motor pool ID, etc. Information is used "in house" for personnel evaluation and management. Information is disclosed to persons outside the agency for verifying employment/salary, preparing letters of reference at the request of the employee, making travel and training arrangements, and furnishing copies of performance appraisals to other government agencies when employees have applied for jobs elsewhere.

Policies and practices for storing and retrieving, accessing, retaining and disposing of records in the system:

(1) *Storage:* Paper files.

(2) *Retrievability and accessing:* Manual; by name.

(3) *Safeguards:* Stored in guarded building; released only to authorized personnel.

(4) *Retention and disposal:* Disposition of records shall be in accordance with the HB GSA Records Maintenance and Disposition System (OAD P 1820.2).

System manager: Executive Secretary, Harry S. Truman Scholarship Foundation, 712 Jackson Place, N.W., Washington, DC 20006.

Notification procedures: Refer to Foundation access regulation contained in 45 CFR 1800.

Record access procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Contesting records procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Categories of sources of records in the system: Official personnel records, GSA Personnel and Finance Offices, Supervisors, letters of reference or recommendation furnished by agency officials or persons from private industry, educational information supplied by colleges and universities, the subject individual.

TSF-4

System name: Applicant's Records—Harry S. Truman Scholarship Foundation.

System location: Harry S. Truman Scholarship Foundation, 712 Jackson Place, N.W., Washington, DC 20006, and Educational Testing Service, Princeton, NJ.

Categories of individuals covered by the system: Persons nominated by colleges and universities in the United States, for consideration as potential Truman Scholars.

Categories of records maintained in the system: Documents and certifications to assist Foundation staff in evaluating a person's application for a Truman Scholarship, including, among other documents, a listing of leadership positions held in high school and college; and of public service activities; letters of recommendation; test results; personal essay on the applicant's interest in entering public service; a statement of intent to enter the public service; certifications as to U.S. citizenship and academic standings; test scores.

Authority for the system: The Foundation's authorizing legislation, Pub. L. 93-642 (20 U.S.C. 2001).

Routine use of records: See appendix. Records also are released to experts and consultants hired by the Foundation or its administrative agent, Educational Testing Service, for evaluation and recommendation with respect to applicants' qualifications for a Truman Scholarship.

Policies and practices for storing and retrieving, accessing, retaining and disposing of records in the system:

(1) *Storage:* Paper.

(2) *Retrievability and accessing:* Manual and automated by name.

(3) *Safeguards:* Stored in a guarded building; released only to authorized personnel.

(4) *Retention and disposal:* Foundation retains records only of those chosen as finalists in competition (Truman Scholars and alternates); all others are destroyed.

System manager: Executive Secretary, Harry S. Truman Scholarship Founda-

tion, 712 Jackson Place, N.W., Washington, D.C. 20006.

Notification procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Record access procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Contesting records procedures: Refer to Foundation access regulations contained in 45 CFR 1800.

Categories of sources of records in the system: The subject individual; the nominating institution; reference supplied by the subject individual.

Appendix—Harry S. Truman Scholarship Foundation

In the event that a system of records maintained by this agency to carry out its functions indicates a violation or protential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, State, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

A record from this system of records may be disclosed as a "routine use" to a Federal, State or local agency maintaining civil, criminal or other relevant enforcement information or other pertinent information, such as current licenses, if necessary to obtain information relevant to an agency decision concerning the hiring or retention of any employee, the issuance of a security clearance, the letting of a contract or the issuance of a license, grant or other benefit.

A record from this system of records may be disclosed to a Federal agency, in response to its request, in connection with the hiring or retention of an employee, the issuance of a security clearance, the reporting of an investigation of an employee, the letting of a contract, or the issuance of a license, grant or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision in the matter.

A record from this system of records may be disclosed to an authorized appeal grievance examiner, formal complaints examiner, equal employment opportunity investigator, arbitrator or other duly authorized official engaged in investigation or settlement of a grievance, complaint, or appeal filed by an employee. A record from this system of records may be disclosed to the United States Civil Service Commission in accordance with the agency's responsibility for evaluation and oversight of Federal personnel management.

A record from this system of records may be disclosed to officers and employees of a Federal agency for purposes of audit.

A record from this system of records may be disclosed as a routine use to a Member of Congress or to a congressional staff member in response to an inquiry of the congressional office made at the request of the individual about whom the record is maintained.

VETERANS ADMINISTRATION

ADMINISTRATOR'S EDUCATION AND REHABILITATION ADVISORY COMMITTEE

Meeting

The Veterans Administration gives notice that a meeting of the Administrator's Education and Rehabilitation Advisory Committee, authorized by section 1792, title 38, United States Code, will be held at the Veterans Administration Central Office, 810 Vermont Avenue, NW., Washington, D.C., on September 28, 1976, at 9:30 a.m. The meeting will be for the purposes of reviewing the Veterans Administration's educational program and actions taken to eliminate program abuse.

The meeting will be open to the public up to the seating capacity of the conference room. Because of the limited seating capacity and the need for building security, it will be necessary for those wishing to attend to contact Mr. C. L. Dollarhide, Deputy Director, Education and Rehabilitation Service, Veterans Administration Central Office (phone 202-389-2152), prior to September 23.

Any interested person may attend, appear before, or file statements with the committee—which statements, if in written form, may be filed before or after the meeting, or, if oral, at 2:30 p.m. on September 28, 1976.

Dated: August 24, 1976.

By direction of the Administrator.

A. J. SCHULTZ, Jr.,
Associate Deputy Administrator.

DEPARTMENT OF LABOR

Employment and Training Administration

EMPLOYMENT TRANSFER AND BUSINESS COMPETITION DETERMINATIONS UNDER THE RURAL DEVELOPMENT ACT

Applications

The organizations listed in the attachment have applied to the Secretary of Agriculture for financial assistance in the form of grants, loans, or loan guarantees in order to establish or improve facilities at the locations listed for the purposes given in the attached list below. The financial assistance would be authorized by the Consolidated Farm and Rural Development Act, as amended, 7 U.S.C. 1924 (b), 1932, or 1942 (b).

The Act requires the Secretary of Labor to determine whether such Federal assistance is calculated to or is likely to result in the transfer from one area to another of any employment or business activity provided by operations of the applicant. It is permissible to assist the establishment of a new branch, affiliate or subsidiary, only if this will not result in increased unemployment in the place of present operations and there is no reason to believe the new facility is being established with the intention of closing down an operating facility.

The Act also prohibits such assistance if the Secretary of Labor determines that it is calculated to or is likely to result in an increase in the production of goods, materials, or commodities, or the availability of services or facilities in the area, when there is not sufficient demand for such goods, materials, commodities, services, or facilities to employ the efficient capacity of existing competitive commercial or industrial enterprises, unless such financial or other assistance will not have an adverse effect upon existing competitive enterprises in the area.

The Secretary of Labor's review and certification procedures are set forth at 29 CFR Part 75, published January 29, 1975 (40 FR 4393). In determining whether the applications should be approved or denied, the Secretary will take into consideration the following factors:

1. The overall employment and unemployment situation in the local area in which the proposed facility will be located.

2. Employment trends in the same industry in the local area.

3. The potential effect of the new facility upon the local labor market, with particular emphasis upon its potential impact upon competitive enterprises in the same area.

4. The competitive effect upon other facilities in the same industry located in other areas (where such competition is a factor).

5. In the case of applications involving the establishment of branch plants or facilities, the potential effect of such new facilities on other existing plants or facilities operated by the applicant.

All persons wishing to bring to the attention of the Secretary of Labor any information pertinent to the determinations which must be made regarding these applications are invited to submit such information in writing within two weeks of publication of this notice to: Deputy Assistant Secretary for Employment and Training, 601 D St., NW, Washington, D.C. 20213.

Signed at Washington, D.C., this 23d day of August 1976.

BEN BURDETSKY,
Deputy Assistant Secretary for Employment and Training.

Applications received during the week ending Aug. 20, 1976

Name of applicant	Location of enterprise	Principal product or activity
Farm Fresh Meats, Inc	Robertsdale, Ala	Custom meat processing.
Sport-Craft, Inc	Perry, Fla	Boat building and repairing.
Hanover Development Corp	Blackville, S.C	Textile plant.
Ira Higdon Grocery Co. (tenant of city of Cairo).	Cairo, Ga	Wholesale grocer.
Samnel Sales and Morris N. Stein	Seneca, S.C	Leasing of textile warehouse.
Tri-County Paving Co., Inc	Dickson, Tenn	Asphalt surfacing.
Albert Francis Harris, trading as Intermediate Care Facilities.	Stokesdale, N.C	Intermediate nursing care.
Yorde Machine Products Co	Nelsonville, Ohio	Manufacture of cylinder components.
Universal Sanitary Equipment Manufacturing Co., Inc.	Tomah, Wis	Manufacture of sewage pump stations and water booster plants.
Hollytex (tenant of Watonga Public Works Authority).	Watonga, Okla	Manufacture of carpet yarn.
Kruger Chemical Co	Firebaugh, Calif	Sales and application of agricultural chemicals
Tam Ply, Inc	Gold Beach, Oreg	Manufacture of box shook and wood chips.
Stein Bros., Inc	Rathdrum, Idaho	Sale of groceries.
Lyle H. Peterson	Big Springs, Idaho	Motel, restaurant, and grocery store.
G.I.W., Inc	Milroy, Pa	Manufacture and sale of electric wire, cable, and cordsets.

[FR Doc.76-25158 Filed 8-26-76;8:45 am]

FEDERAL SUPPLEMENTAL BENEFITS (EMERGENCY UNEMPLOYMENT COMPENSATION)

Ending of Federal Supplemental Benefit Period in Montana

This notice announces the ending of the Federal Supplemental Benefit Period in the State of Montana effective August 28, 1976.

BACKGROUND

The Emergency Unemployment Compensation Act of 1974 (Pub. L. 93-572, enacted December 31, 1974) (the Act) created a temporary program of supplementary unemployment benefits (referred to as Federal Supplemental Benefits) for unemployed individuals who have exhausted their rights to regular and extended benefits under State and Federal unemployment compensation laws. Federal Supplemental Benefits are payable during a Federal Supplemental Benefit Period in a State which has entered into an Agreement under the Act with the United States Secretary of Labor. A Federal Supplemental Benefit Period is triggered on in a State when unemployment in the State or in the State and the nation reaches the high levels set in the Act. During a Federal Supplemental Benefit Period the maximum amount of Federal Supplemental Benefits which are payable to eligible individuals is up to 13 weeks or 26 weeks, depending upon the level of the rate of insured unemployment in the State. A Federal Supplemental Benefit Period commenced in the State of Montana on January 26, 1975.

The Act also provides that a Federal Supplemental Benefit Period in a State will trigger off when the rate of insured unemployment in the State averages less than 5.0 percent over a period of thirteen consecutive calendar weeks. The benefit period actually terminates at the end of the third week after the week for which there is an "off" indicator, if the benefit period will have been in effect for a minimum duration of 26 weeks.

DETERMINATION OF "OFF" INDICATOR

The employment security agency of the State of Montana has determined under the Act and 20 CFR 618.19(b) (published in the FEDERAL REGISTER on March 23, 1976, at 41 FR 12151, 12157) that the average rate of insured unemployment in the State for the period consisting of the week ending on August 7, 1976, and the immediately preceding twelve weeks, was less than 5.0 percent.

Therefore, I have determined in accordance with the Act and 20 CFR 618.19 (b), and as authorized by the Secretary of Labor's Order 4-75, dated April 16, 1975 (published in the FEDERAL REGISTER on April 28, 1975, at 40 FR 18515), that there was a Federal Supplemental Benefit "off" indicator in the State of Montana for the week ending on August 7, 1976, and that the Federal Supplemental Benefit Period in that State terminates on August 28, 1976.

INFORMATION FOR CLAIMANTS

Any individual to whom Federal Supplemental Benefits or Federal-State Extended Benefits were payable in the State (whether or not any payment actually was made), for any portion of the last week of the Federal Supplemental Benefit Period, will have an additional eligibility period beginning immediately following the end of the Federal Supplemental Benefit Period. During the additional eligibility period the individual will be entitled to Federal Supplemental Benefits to the same extent as if the Federal Supplemental Benefit Period continued to be in effect. The additional eligibility period will have a duration of 13 weeks, unless it is terminated sooner by reason of the beginning of a new Federal Supplemental Benefit Period in the State.

Individuals currently filing claims for Federal Supplemental Benefits will receive written notices from the Montana Division of Employment Security, Department of Labor, of the end of the Federal Supplemental Benefit Period in that State and its effect on their entitlement to Federal Supplemental Benefits. The notice to any individual who will have an additional eligibility period following the Federal Supplemental Benefit Period will include information concerning potential entitlement to Federal Supplemental Benefits during the additional eligibility period.

Although the Federal Supplemental Benefit Period has terminated, an Extended Benefit Period will continue in effect in the State due to the National "on" indicator for the Federal-State Extended Benefit Program, as announced in a notice published in the FEDERAL REGISTER on February 21, 1975, at 40 FR 4722. Therefore, Federal-State Extended Benefits will continue to be payable to eligible individuals in the State.

Persons who wish information about their rights to Federal Supplemental Benefits or Federal-State Extended Benefits in the State of Montana should contact the nearest Employment Service Office of the Montana Employment Security Division in their locality.

Signed at Washington, D.C., on August 23, 1976.

WILLIAM H. KOLBERG,
Assistant Secretary for Employment and Training.

Office of Employee Benefits Security

EMPLOYEE BENEFIT PLANS

Advisory Opinion Procedure

It is the practice of the Department of Labor (the Department) to answer inquiries of individuals or organizations affected, directly or indirectly, by the Employee Retirement Income Security Act of 1974 (Pub. L. 93-406, hereinafter "the Act") as to their status under the Act and as to the effect of certain acts and transactions. The answers to such inquiries are categorized as "information letters" and "advisory opinions." This "ERISA Procedure" (ERISA Proc. 76-1) describes the general procedures of the Department in issuing information letters and advisory opinions under the Act, and is designed to promote efficient handling of inquiries and to facilitate prompt responses.

Section 7 of this procedure (instructions to individuals and organizations requesting advisory opinions relating to prohibited transactions and common definitions) is reserved. This section will set forth the procedures to be followed to obtain an advisory opinion relating to prohibited transactions and common definitions, such as whether a person is a party in interest and a disqualified person. In general, this section will incorporate a revenue procedure to be published by the Internal Revenue Service.

This advisory opinion procedure consists of rules of agency procedure and practice, and is therefore excepted under 5 U.S.C. 552(b)(3)(A) of the Administrative Procedure Act from the ordinary notice and comment provisions for agency rulemaking. Accordingly, the procedure is effective August 27, 1976.

SECTION 1. *Purpose.* The purpose of this ERISA Procedure is to describe the general procedures of the Department of Labor (the Department) in issuing information letters and advisory opinions to individuals and organizations under

V 41 168 AUG 27 76 UMI

the Employee Retirement Income Security Act of 1974 (Pub. L. 93–406), hereinafter referred to as "the Act". This ERISA Procedure also informs individuals and organizations, and their authorized representatives, where they may direct requests for information letters and advisory opinions, and outlines procedures to be followed in order to promote efficient handling of their inquiries.

SEC. 2. *General practice.* It is the practice of the Department to answer inquiries of individuals and organizations, whenever appropriate, and in the interest of sound administration of the Act, as to their status under the Act and as to the effects of their acts or transactions. One of the functions of the Department is to issue information letters and advisory opinions in such matters.

SEC. 3. *Definitions.* .01 An "information letter" is a written statement issued either by the Pension and Welfare Benefit Programs (Office of Employee Benefits Security), U.S. Department of Labor, Washington, D.C. or a Regional Office or an Area Office of the Labor-Management Services Administration, U.S. Department of Labor, that does no more than call attention to a well-established interpretation or principle of the Act, without applying it to a specific factual situation. An information letter may be issued to any individual or organization when the nature of the request from the individual or the organization suggests that it is seeking general information, or where the request does not meet all the requirements of section 6 or 7 of this procedure, and it is believed that such general information will assist the individual or organization.

.02 An "advisory opinion" is a written statement issued to an individual or organization, or to the authorized representative of such individual or organization, by the Administrator of Pension and Welfare Benefit Programs or his delegate, that interprets and applies the Act to a specific factual situation. Advisory opinions are issued only by the Administrator of Pension and Welfare Benefit Programs or his delegate.

.03 Individuals and organizations are those persons described in section 4 of this procedure.

SEC. 4. *Individuals and organizations who may request advisory opinions or information letters.* .01 Any individual or organization affected directly or indirectly, by the Act may request an information letter or an advisory opinion from the Department.

.02 A request by or for an individual or organization must be signed by the individual or organization, or by the authorized representative of such individual or organization. See section 7.03 of this procedure.

SEC. 5. *Discretionary Authority to Render Advisory Opinions.* .01 The Department will issue advisory opinions involving the interpretation of the application of one or more sections of the Act, regulations promulgated under the Act, interpretive bulletins, or exemptions issued by the Department to a specific factual situation. Generally, advisory opinions will be issued by the Department only with respect to prospective transactions (i.e., a transaction which will be entered into). Moreover, there are certain areas where, because of the inherently factual nature of the problem involved, or because the subject of the request for opinion is under investigation for a violation of the Act, the Department ordinarily will not issue advisory opinions. Generally, an advisory opinion will not be issued on alternative courses of proposed transactions, or on hypothetical situations, or where all parties involved are not sufficiently identified and described, or where material facts or details of the transaction are omitted.

.02 The Department ordinarily will not issue advisory opinions relating to the following sections of the Act:

.02(a) Section 3(18), relating to whether certain consideration constitutes adequate consideration;

.02(b) Section 3(26), relating to whether the valuation of any asset is at current value;

.02(c) Section 3(27), relating to whether the valuation of any asset is at present value;

.02(d) Section 102(a)(1), relating to whether a summary plan description is written in a manner calculated to be understood by the average participant.

.02(e) Section 103(a)(3)(A), relating to whether the financial statements and schedules required to be included in the Annual Report are presented fairly in conformity with generally accepted accounting principles applied on a consistent basis;

.02(f) Section 103(b)(1), relating to whether a matter must be included in a financial statement in order to fully and fairly present the financial statement of the plan;

.02(g) Section 202 (other than section 202(a)(3) and (b)(1)) relating to minimum participation standards;

.02(h) Section 203 (other than sections 202(a)(3)(B), (b)(1) (flush language), (b)(2), (b)(3)(A);

.02(i) Section 204 of the Act (other than sections 204(b)(1)(B), (b)(1)(A), (C), (D), (E)), relating to benefit accrual requirements;

.02(j) Section 205(e), relating to the period during which a participant may elect in writing not to receive a joint and survivor annuity;

.02(k) Section 208, relating to mergers and consolidation of plans or transfer of plan assets;

.02(l) Section 209(a)(1), relating to whether the report required by section 209(a)(1) is sufficient to inform the employee of his accrued benefits under the plan, etc.

.02(m) Sections 302 through 305, relating to minimum funding standards;

.02(n) Section 403(c)(1), relating to the purposes for which plan assets must be held;

.02(o) Section 404(a), relating to fiduciary duties as applied to particular conduct; and,

.02(p) Section 407(a)(2) and (3) and (c)(1), relating to fair market value, as applied to whether the value of any particular security or real property constitutes fair market value.

This list is not all inclusive and the Department may decline to issue advisory opinions relating to other sections of the Act whenever warranted by the facts and circumstances of a particular case. The Department may, when it is deemed appropriate and in the best interest of sound administration of the Act, issue information letters calling attention to established principles under the Act, even though the request that was submitted was for an advisory opinion.

.03 Pending the adoption of regulations (either temporary or final) involving the interpretation of the application of a provision of the Act, consideration will be given to the issuance of advisory opinions relating to such provisions of the Act only under the following conditions:

.03(a) If an inquiry presents an issue on which the answer seems to be clear from the application of the provisions of the Act to the facts described, the advisory opinion will be issued in accordance with the procedures contained herein.

.03(b) If an inquiry presents an issue on which the answer seems reasonably certain but not entirely free from doubt, an advisory opinion will be issued only if it is established to the satisfaction of the Department, that a business emergency requires an advisory opinion or that unusual hardship to the plan or its participants and beneficiaries will result from failure to obtain an advisory opinion. In any case in which the individual or organization believes that a business emergency exists or that an unusual hardship to the plan or its participants and beneficiaries will result from the failure to obtain an advisory opinion, the individual or organization should submit with the request a separate letter setting forth the facts necessary for the Department to make a determination in this regard. In this connection, the Department will not deem a "business emergency" to result from circumstances within the control of the individual or organization such as, for example, scheduling within an inordinately short time the closing date of a transaction or a meeting of the Board of Directors or the shareholders of a corporation.

.03(c) If an inquiry presents an issue that cannot be reasonably resolved prior to the issuance of a regulation, an advisory opinion will not be issued.

.04 The Department ordinarily will not issue advisory opinions on the form or effect in operation of a plan, fund, or program (or a particular provision or provisions thereof) subject to Title I of the Act. For example, the Department will not issue an advisory opinion on whether a plan satisfies the requirements of Parts 2 and 3 of Title I of the Act.

SEC. 6. *Instructions to individuals and organizations requesting advisory opinions from the Department.* .01 If an advisory opinion is desired, a request should be submitted to: Advisory Opinion, Office of Regulatory Standards and Exceptions, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C. 20216.

.02 A request for an advisory opinion must contain the following information:

.02(a) The name and type of plan or plans (e.g., pension, profit-sharing, or welfare plan); the Employer Identification Number (EIN); the Plan Number (PN) used by the plan in reporting to the Department of Labor on Form EBS–1; or a copy of the first two pages of the most recent Form EBS–1 filed with the Department.

.02(b) A detailed description of the act or acts or transaction or transactions with respect to which an advisory opinion is requested. Where the request pertains to only one step of a larger integrated act or transaction, the facts, circumstances, etc., must be submitted with respect to the entire transaction. In addition, a copy of all documents submitted must be included in the individual's or organization's statement and not merely incorporated by reference, and must be accompanied by an analysis of their bearing on the issue or issues, specifying the pertinent provisions.

.02(c) A discussion of the issue or issues presented by the act or acts or transaction or transactions which should be addressed in the advisory opinion.

.02(d) If the individual or organization is requesting a particular advisory opinion, the requesting party must furnish an explanation of the grounds for the request, together with a statement of relevant supporting authority. Even though the individual or organization is urging no particular determination with regard to a proposed or prospective act or acts or transaction or transactions, the party requesting the ruling must state such party's views as to the results of the proposed act or acts or transaction or transactions and furnish a statement of relevant authority to support such views.

.03 A request for an advisory opinion by or for an individual or organization must be signed by the individual or organization or by the individual's or organization's authorized representative. If the request is signed by a representative of an individual or organization, or the representative may appear before the Department in connection with the request, the request must include a statement that the representative is authorized to represent the individual or organization.

.04 A request for an advisory opinion that does not comply with all the provisions of this procedure will be acknowledged, and the requirements that have not been met will be noted. Alternatively, at the discretion of the Department, the Department will issue an information letter to the individual or organization.

.05 If the individual or organization, or the authorized representative, desires a conference in the event the Department contemplates issuing an adverse advisory opinion, such desire should be stated in writing when filing the request or soon thereafter in order that the Department may evaluate whether in the sole discretion of the Department, a conference should be arranged and at what stage of the consideration a conference would be most helpful.

.06 It is the practice of the Department to process requests for information letters and advisory opinions in regular order and as expeditiously as possible. Compliance with a request for consideration of a particular matter ahead of its regular order, or by a specified time, tends to delay the disposition of other matters. Requests for processing ahead of the regular order, made in writing (submitted with the request or subsequent thereto) and showing clear need for such treatment, will be given consideration as the particular circumstances warrant. However, no assurance can be given that any letter will be processed by the time requested. The Department will not consider a need for expedited handling to arise if the request shows such need has resulted from circumstances within the control of the person making the request.

.07 An individual or organization, or the authorized representative desiring to obtain information relating to the status of his or her request for an advisory opinion may do so by contacting the Office of Regulatory Standards and Exceptions, Pension and Welfare Benefit Programs, U.S. Department of Labor, Washington, D.C.

SEC. 7. *Instructions to individuals and organizations requesting advisory opinions relating to prohibited transactions and common definitions.* .01 [Reserved]

.02 [Reserved]

.03 [Reserved]

SEC. 8. *Conferences at the Department of Labor.* If a conference has been requested, and the Department determines that a conference is necessary or appropriate, the individual or organization or the authorized representative will be notified of the time and place of the conference. A conference will normally be scheduled only when the Department in its sole discretion deems it will be necessary or appropriate in deciding the case. If conferences are being arranged with respect to more than one request for an opinion letter involving the same individual or organization, they will be so scheduled as to cause the least inconvenience to the individual or organization.

SEC. 9. *Withdrawal of requests.* The individual or organization's request for an advisory opinion may be withdrawn at any time prior to receipt of notice that the Department intends to issue an adverse opinion, or the issuance of an opinion. Even though a request is withdrawn, all correspondence and exhibits will be retained by the Department and will not be returned to the individual or organization.

SEC. 10. *Effect of Advisory Opinion.* An advisory opinion is an opinion of the Department as to the application of one or more sections of the Act, regulations promulgated under the Act, interpretive bulletins, or exemptions. The opinion assumes that all material facts and representations set forth in the request are accurate, and applies only to the situation described therein. Only the parties described in the request for opinion may rely on the opinion, and they may rely on the opinion only to the extent that the request fully and accurately contains all the material facts and representations necessary to issuance of the opinion and the situation conforms to the situation described in the request for opinion.

SEC. 11. *Effect of Information Letters.* An information letter issued by the Department is informational only and is not binding on the Department with respect to any particular factual situation.

SEC. 12. *Public inspection.* .01 Advisory opinions shall be open to public inspection at the Public Disclosure Room, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, D.C. 20216.

.02 Background files (including the request for an advisory opinion, correspondence between the Department and the individual or organization requesting the advisory opinion) shall be available upon written request. Background files may be destroyed after three years from the date of issuance.

.03 Advisory opinions will be modified to delete references to proprietary information prior to disclosure. Any information considered to be proprietary should be so specified in a separate letter at the time of request. Other than proprietary information, all materials contained in the public files shall be available for inspection pursuant to section 12.02.

.04 The cost of search, copying and deletion of any references to proprietary information will be borne by the person requesting the advisory opinion or the background file.

SEC. 13. *Effective date.* This procedure is effective August 27, 1976, the date of its publication in the FEDERAL REGISTER.

Signed at Washington, D.C., this 24th day of August 1976.

JAMES D. HUTCHINSON,
Administrator of Pension and Welfare Benefit Programs, U.S. Department of Labor.

Occupational Safety and Health Administration

[V-76-10]

AMERICAN TOBACCO CO.

Application for Variance and Interim Order; Grant of Interim Order

I. *Notice of Application.* Notice is hereby given that the American Tobacco Company, 245 Park Avenue, New York, New York 10017 has made application pursuant to section 6(d) of the Occupational Safety and Health Act of 1970 (84

V 41 168
AUG 27 76
UMI

Stat. 1596; 29 U.S.C. 655) and 29 CFR 1905.11 for a variance, and interim order pending a decision on the application for a variance from the standards prescribed in 29 CFR 1910.159(e)(2) Automatic Sprinkler Systems—Sprinkler Head Clearance—Type II Storage.

The address of the places of employment that will be affected by the application are as follows:

Richmond Leaf Department, The American Tobacco Company, Lucky Strike Storage, 14th and Ingram Street, Richmond, Virginia 23224.
Richmond Leaf Department, The American Tobacco Company, Tom Walker Storage, 800 Jefferson Davis Highway, Richmond, Virginia 23260.
Reidsville Leaf Department, The American Tobacco Company, Lucky Strike Storage, U.S. Route 29 North, Reidsville, North Carolina 27320.
Durham Leaf Department, The American Tobacco Company, Lucky Strike Storage, Ellis Road, Durham, North Carolina 27702.
Lexington Leaf Department, The American Tobacco Company, Lexington Storage, Leestown Pike, Lexington, Kentucky 40501.

The applicant certifies that employees who would be affected by the variance have been notified of the application by giving a copy of it to their authorized employee representative, and by posting a copy at all places where notices to employees are normally posted. Employees have been informed of their right to petition the Assistant Secretary for a hearing.

In accordance with the regulation published in the FEDERAL REGISTER on June 6, 1976 (40 FR 25448–50) concerning Federal and State Variances from Identical Standards, the variance application was submitted to the States of Kentucky and North Carolina for their review. Both States concur with the granting of an interim order.

Regarding the merits of the application, the applicant contends that a variance is needed from the requirements of 29 CFR 1910.159(e)(2) which requires a clearance of at least 18 inches be maintained between sprinkler deflectors and top of storage to reduce the possibility of obstruction to the distribution of water. The applicant contends that it is providing a place of employment as safe as the standard by maintaining a clearance of 8 inches between the sprinkler deflectors and top of storage.

The applicant states that it operates 72 warehouses in Richmond, Virginia; 62 warehouses in Reidsville, North Carolina; 57 warehouses in Durham, North Carolina; and 26 warehouses in Lexington, Kentucky, which are used for the storage of tobacco hogsheads. They are constructed of wood, approximately 194' long, and two sliding doors (8'8" wide by 9'6" high and 8'9" wide and 7'6" high) are located at each end of the 9' center aisle. The entrance doors are left open whenever the warehouses are occupied. There is no employee occupancy except when the tobacco is brought into or removed from storage. When work is being performed, a maximum of two employees occupy any one of the warehouses; one operates an industrial truck while the other records the hogsheads being moved for inventory purposes. When the clerical work is completed, the second man operates an additional truck.

The applicant further states that there is little wiring in the warehouses, housekeeping is excellent with no debris or foreign material. "No Smoking" signs are posted, the employees have ample clearance on either side of the industrial trucks to use the aisles as exitways, and a freestanding four hour fire resistant brick wall separates adjacent warehouses.

The applicant asserts that the hogsheads are arranged 4 rows to a bay vertically and 15 rows horizontally with 8" x 8" wood columns separating each bay. The vertical spacing permits only two hogsheads to be stacked in the outer bays where the roof is sloped to allow drainage into eave troughs in approximately one-third of the warehouses where the sprinklers clear the hogsheads by 18 inches. In the remaining bays, where the roof comes to a high point in the center, three hogsheads are stacked and the distance (8 inches) between the sprinkler deflectors and the tobacco hogsheads are determined at that point.

The applicant further states that full clearance from the floor to the sprinkler head would exist in any area that an employee would be located because the hogshead pattern does not permit penetration of the storage area.

The applicant contends that the spacing and location of its sprinkler provides a better coverage than that required by the NFPA Standards. Its protection area per sprinkler is 97.5 sq. ft. and the storage heights never exceeds 13½ feet. The NFPA Standard permits a protection area per sprinkler not exceeding 130 sq. ft. for storage heights not in excess of 15 feet. The distance between its sprinkler branch lines is 10 feet and between sprinklers on a branch line is 9 feet 9 inches, thus providing complete coverage by the sprinkler. The NFPA Standard permits a maximum distance of 15 feet between sprinkler branch lines and sprinkler on a branch line.

The applicant's fire protection system is supplied with water from two connections to a 10 inch public water pipe; a 100,000 gallon water storage tank 150 feet above ground (for fire protection only) and a 200,000 gallon ground level water storage tank which provides suction for 100 psi, 1000 gpm fire pumps.

The NFPA Standard requires that a minimum of 750 gpm of water be distributed over an area of 3,750 sq. ft. with water available for a duration of two hours and a density of .20. The applicant contends that its sprinklers distribute water at 750 gpm over a 3,750 sq. ft. area for a duration of three and one-half hours with an average available density of .24, which is 20 percent greater than that required by the standards.

Data obtained from the fire tests conducted by Factory Mutual Laboratories at one of the applicant's facilities indicate that a fire in tobacco warehouses can be adequately controlled with a system designed and installed in the manner that the applicant has done.

The applicant uses dry pipe sprinkler systems that are filled with compressed air which releases when a sprinkler head opens, reducing the pressure at the control valve and allowing water to enter the sprinkler. The applicant states that it normally takes at least a minute before water reaches the open sprinkler head which activates the water flow alarm. The applicant contends that because of the long delay between ignition of a fire and operation of a sprinkler the existence or absence of a sprinkler has no real bearing on the safety and health of the employees from an escape standpoint. In the event of a fire, the two employees could safely evacuate the warehouse prior to any fusing of a sprinkler.

A copy of the application will be made available for inspection and copying upon request at the Office of Compliance Programming, Occupational Safety and Health Administration U.S. Department of Labor, 200 Constitution Avenue, N.W. Room N3603, Washington, DC 20210, and at the following Regional and Area Offices:

U.S. Department of Labor, OSHA, Gateway Building, Suite 15220, 3535 Market Street, Philadelphia, Pennsylvania 19104.
U.S. Department of Labor, OSHA, Federal Building, Room 8018, 400 North 8th Street, Richmond, Virginia 23240.
U.S. Department of Labor, OSHA, 1375 Peachtree Street, N.E.—Suite 587, Atlanta, Georgia 30309.
U.S. Department of Labor, OSHA, Federal Office Building—Room 406, 310 New Bern Avenue, Raleigh, North Carolina 27601.
U.S. Department of Labor, OSHA, 600 Federal Place, Suite 554–E, Louisville, Kentucky 40202.

All interested persons, including employers and employees, who believe they would be affected by the grant or denial of the application for a variance are invited to submit written data, views and arguments relating to the pertinent application no later than September 27, 1976. In addition employers and employees who believe they would be affected by a grant or denial of the variance may request a hearing on the application no later than September 27, 1976, in conformance with the requirements of 29 CFR 1905.15. Submission of written comments and request for a hearing should be in quadruplicate, and must be addressed to the Office of Compliance Programming at the above address.

II. *Interim Order.* It appears from the the application for a variance and interim order, from the supporting data filed by the American Tobacco Company, and the results of a variance inspection performed by the Kentucky Department of Labor that, as required by section 6(d) of the Act, the use of the applicant's sprinkler system with 8" clearance above the hogsheads will provide to the affected employees a place of employment as safe as that which would be provided if the applicant complied with 29 CFR 1910.159(e)(2). It further apears that an interim order is necessary to prevent undue hardship to the applicant and its employees pending a decision on the variance. Therefore, it is ordered, pursuant to the authority in section 6(d) of the Occupational Safety and Health Act of 1970, and in 29 CFR 1905.11(c), and in Secretary's Order No. 8–76 (41 FR 25059) that the American Tobacco Company be and it is hereby authorized to maintain at all of the warehouses listed in the application, a clearance of approximately 18 inches in one-third of the warehouses where the roof slopes to allow drainage into eave troughs and a clearance of 8 inches in the remaining area, provided that the following conditions are met:

(1) The sprinkler system shall be maintained to provide 750 gallons per minute of water flow over a 3,750 square foot area for a duration of three and one-half hours with an average denisty of .24.

(2) Employees occupying any of the listed warehouses shall be instructed to immediately evacuate the warehouse upon the detection of a fire. They shall also be instructed that re-entry into the warehouse is not permitted for any reason other than rescue. New employees shall receive orientation on the evacuation procedures at the time of employment.

(3) The conditions within the warehouses, particularly the storage of tobacco hogsheads and housekeeping, shall be maintained at all times as stated in the application.

The American Tobacco Company shall give notice of this interim order to employees affected thereby by the same means required to be used to inform them of the application for a variance.

Effective date. This interim order shall be effective as of August 27, 1976, and shall remain in effect until a decision is rendered on the application for variance.

Signed at Washington, D.C. this 23rd day of August, 1976.

MORTON CORN,
Assistant Secretary of Labor.

[FR Doc.76–25233 Filed 8–26–76;8:45 am]

The notice of investigation was published in the FEDERAL REGISTER on June 18, 1976 (41 FR 24804). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Armco Steel Corporation, its customers, the American Iron and Steel Institute, the Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that although the first three criteria have been met, the fourth criterion has not been met.

Significant total or partial separations.

The average number of production workers declined 41 percent in 1975 compared to 1974 and further declined 48 percent in the first quarter of 1976 compared to the first quarter of 1975.

Sales or production, or both, have decreased absolutely.

Sales declined 42 percent in 1975 compared to 1974 and further declined 45 percent in the first quarter of 1976 compared to the first quarter of 1975.

Increased imports.

U.S. imports of silicon steel sheet and strip declined from 60.0 thousand net tons in 1973 to 35.8 thousand net tons in 1974 before increasing to 41.9 thousand net tons in 1975. The ratio of imports to domestic consumption declined from 8.5 percent in 1972 to 4.2 percent in 1974 before increasing to 7.4 percent in 1975.

Contributed importantly.

Armco's Zanesville plant processed silicon steel produced by the Butler, Pennsylvania plant. Processing capacity became available at the Butler plant and in June 1975, Armco shifted some of this processing from Zanesville to Butler.

Customers of Armco indicated that they did not increase purchases of imported silicon steel sheet and strip in 1975. The customers felt that reduced construction of electric generating plants, lower levels of production of electric equipment and the substitution of domestically produced carbon steel for silicon in some product designs contributed to reduce demand for silicon steel sheet and strip.

Conclusion.

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with silicon steel sheet and strip produced by Armco Steel Corporation at the Zanesville, Ohio plant did not contribute importantly to the total or partial separations of the workers at that plant.

Signed at Washington, D.C. this 12th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[FR Doc.76–25237 Filed 8–26–76;8:45 am]

[TA–W–894]

BABCOCK AND WILCOX CO.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA–W–894: investigation regarding certification of eligibility to apply for adjustment assistance as prescribed in Section 222 of the Act.

The investigation was initiated on May 19, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing seamless steel tubes and fittings at the Beaver Falls, Pennsylvania plant, Tubular Products Division of Babcock and Wilcox Company.

The Notice of Investigation was published in the FEDERAL REGISTER on June 15, 1976 (41 FR 24232). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Babcock and Wilcox Company, its customers, the American Iron and Steel Institute, the American Pipe Fittings Association, the Department of Commerce, the International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

Office of the Secretary

[TA–W–888]

ARMCO STEEL CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, the Department of Labor herein presents the results of TA–W–888: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 19, 1976 in response to a worker petition received on May 19, 1976 which was filed by the Zanesville Armco Independent Organization, Incorporated on behalf of workers and former workers producing silicon steel sheet and strip at the Zanesville, Ohio plant of Armco Steel Corporation.

V 41 1168 AUG 27 76 UMI

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

Significant total or partial separations.

Employment of production workers at the Beaver Falls plant decreased 7.9 percent the first quarter of 1976 compared to the same quarter the previous year.

Sales or production, or both, have decreased absolutely.

Sales at the Beaver Falls plant declined 7.0 percent in 1975 compared to 1974 and 18.8 percent in the first half of 1976 compared to the first half of 1975.

Increased imports.

Imports of stainless steel pipe and tubing were 12.8 thousand net tons in 1971. These imports decreased every year during the next two years to 5.3 thousand net tons in 1973 before increasing each year for the next two years to 10.9 thousand net tons in 1975. Imports of alloy steel pipe and tubing increased in every year from 34.4 thousand net tons in 1971 to 81.0 thousand net tons in 1975. Imports of carbon steel forged flanges and butt welding fittings increased to 67.1 thousand pounds in 1972 from 66.8 thousand pounds recorded in 1971. These imports declined to 50.0 thousand pounds in 1973 before increasing in both of the next two years to 153.4 thousand pounds in 1975. Imports of carbon steel pipe and tubing relative to domestic shipments increased from 27.6 percent in 1971 to 28.6 percent in 1972, decreased to 20.3 percent in 1973 and increased for the next two years to 22.8 percent in 1975.

Contributed importantly.

Customers of Babcock and Wilcox Company's Beaver Falls, Pennsylvania plant that are distributors of steel tubing indicated that they now stock more imported steel tubes and fittings primarily because of customer demand for lower prices. Other customers reported that they were losing business to distributors who deal in imports.

Conclusion.

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with seamless steel tubing and fittings produced at the Beaver Falls, Pennsylvania plant of Babcock and Wilcox contributed importantly to the total or partial separation of the workers of that plant. In accordance with the provisions of the Act, I make the following certification:

All workers at the Beaver Falls, Pennsylvania plant of Babcock and Wilcox Company who became totally or partially separated from employment on or after January 1, 1976 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 20th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[FR Doc.76-25240 Filed 8-26-76;8:45 am]

[TA-W-891]

BEAUNIT CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-891; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 19, 1976 in response to a worker petition received on May 19, 1976 which was filed by three employees on behalf of workers and former workers producing nylon and acetate tricot knit fabric at the Humacao, Puerto Rico plant of Beaunit Corporation, Raleigh, North Carolina.

The notice of investigation was published in the FEDERAL REGISTER (41 FR 24225) on June 15, 1976. No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Beaunit Corporation, its customers, the U.S. International Trade Commission, the U.S. Department of Commerce, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that although the first three criteria have been met, the fourth criterion has not been met.

Significant Total or Partial Separations.

The average number of production workers declined 4 percent in 1974 compared to 1973. The average number of production workers declined 18 percent in the first six months of 1975 compared to the same period of 1974. All production workers were laid off at the end of June 1975.

Sales or Production, or Both, Have Decreased Absolutely.

Sales at the Puerto Rico plant declined 35 percent in 1974 compared to 1973. In the first seven months of 1975 sales declined 6 percent compared to the same period one year earlier. No sales took place after July 1975.

Production declined 32 percent in 1974 compared to 1973 and further declined 48 percent in the first six months of 1975 compared to the same period in 1974. No production took place after June 1975.

Increased Imports.

Imports of acetate and nylon tricot knit fabric increased from approximately 1.5 million pounds in 1971 to 2.9 million pounds in 1972 before declining to 1.4 million pounds in 1973 and 0.9 million pounds in 1974. In 1975 imports increased to 1.2 million pounds. The ratio of imports to domestic production increased from 0.45 percent in 1971 to 1.01 percent in 1972 before declining to 0.49 percent in 1973 and 0.33 percent in 1974. In 1975 the ratio of imports to domestic production increased to 0.41 percent.

Contributed Importantly.

Customers of Beaunit are primarily lingerie manufacturers. Customers who reduced purchases of tricot knit fabric from Beaunit reported that this was due to a decline in their own sales. These customers reported that they do not purchase imported tricot knit fabric. Some customers indicated that they had reduced purchases of tricot knits because of style changes that favored other types of knits. These customers did not purchase any imported knit fabric.

Conclusion.

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with tricot knit fabric produced at the Humacao, Puerto Rico plant of Beaunit Corporation did not contribute importantly to the total or partial separations of the workers at such plant.

Signed at Washington, D.C., this 20th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[FR Doc.76-25238 Filed 8-26-76;8:45 am]

[TA-W-867]

BETHLEHEM STEEL CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-867: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 30, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing industrial fasteners at the Lebanon, Pennsylvania plant of the Bethlehem Steel Corporation.

The notice of investigation was published in the FEDERAL REGISTER on May 21, 1976 (41 FR 20942). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Bethlehem Steel Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of the firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

The investigation has revealed that all four of the above criteria have been met.

Significant Total or Partial Separations.

Employment of production workers at the Lebanon plant of the Bethlehem Steel Corporation decreased 39 percent in 1975 from 1974 and decreased 45 percent in the first quarter of 1976 compared to the first quarter in 1975.

Sales or Production, or Both, Have Decreased Absolutely.

Sales of industrial fasteners declined 44 percent in 1975 from 1974 and declined 60 percent in the first quarter of 1976 compared to the first quarter of 1975.

Production of industrial fasteners declined 52 percent in 1975 from 1974 and declined 73 percent in the first quarter of 1976 compared to the first quarter of 1975.

Increased Imports.

Domestic manufacturers of standard ferrous fasteners have experienced a steady erosion of their market in recent years as a result of increased import competition. Imports of ferrous bolts, ferrous screws, and ferrous nuts increased absolutely and relatively in each year from 1971 through 1974. Imports of ferrous bolts as a percentage of U.S. production increased from 13.8 percent in 1971 to 19.3 percent in 1975. Imports of ferrous nuts as a percentage of U.S. production increased from 62.0 percent in 1971 to 91.0 percent in 1975. Imports of ferrous screws as a percentage of U.S. production increased from 19.6 percent in 1971 to 38.2 percent in 1975.

Contributed Importantly.

Customers of the Lebanon, Pennsylvania plant of the Bethlehem Steel Corporation, who are buying from foreign sources, are reducing purchases of industrial fasteners from Bethlehem Steel while increasing purchases of imported industrial fasteners. The customers are able to purchase industrial fasteners from foreign sources at a lower cost.

Conclusion

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with the industrial fasteners produced at the Lebanon, Pennsylvania plant of the Bethlehem Steel Corporation contributed importantly to the total or partial separations of the workers at that firm. In accordance with the provisions of the Act, I make the following certification:

All workers of the Lebanon, Pennsylvania plant of the Bethlehem Steel Corporation who became totally or partially separated from employment on or after April 15, 1975 are certified eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C. this 18th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[FR Doc.76-25235 Filed 8-26-76;8:45 am]

[TA-W-892]

CORPLEX INTERNATIONAL CORP.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-892: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 19, 1976 in response to a worker petition received on May 19, 1976 which was filed on behalf of workers and former workers of the Hillside, Illinois plant of the Corplex International Corporation.

The notice of investigation was published in the FEDERAL REGISTER on June 18, 1976 (41 FR 24795). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Corplex International Corporation and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

If any one of the above criteria is not satisfied, a negative determination must be made.

The basic question in this case is whether the Hillside, Illinois plant of Corplex International Corporation is engaged in the production of "articles" within the meaning of Section 222(3) of the Act.

Corplex International Corporation buys and installs video cameras, video tape recorders, telephones and antenna equipment. Corplex International does not produce any equipment used in its operations. It provides a service to its customers by purchasing and installing equipment according to their particular needs.

In order for there to be coverage by the adjustment assistance program, the workers' firm must be engaged in the production of an article. The Department of Labor has alreday determined that the performance of services is not covered by the program. See Notice of Negative Determination in Pan American World Airways, Incorporated (TA-W-153, 40 FR 54639).

After careful review of the issues I have determined that services of the kind provided by the Corplex International Corporation, Hillside, Illinois are not

V 41 168
AUG 27 76
UMI

"articles" within the meaning of Section 222(3) of the Trade Act of 1974.

Signed at Washington, D.C., this 20th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[TA-W-927]

H. P. SNYDER MANUFACTURING CO.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-927: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on June 7, 1976 in response to a worker petition received on June 7, 1976 which was filed by the International Association of Machinists on behalf of workers and former workers producing bicycles at the Little Falls, New York plant of the H. P. Snyder Manufacturing Company.

The notice of investigation was published in the FEDERAL REGISTER on June 18, 1976 (41 FR 24796). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of H. P. Snyder Manufacturing Company, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in the workers' firm, or an appropriate subdivision thereof, have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (3) has not been met.

The H. P. Snyder Company, Little Falls, New York has one plant and is a subsidiary of O. F. Mossberg & Sons, North Haven, Connecticut. The Little Falls, New York plant closed on May 8, 1976. The H. P. Snyder Manufacturing Company produced only bicycles for men and women. Lightweight bikes, those with narrow tires 1¼ inches in cross-sectional diameter, and middleweight bikes, those with tires 1¾ inches in cross-sectional diameter, each accounted for 50 percent of H. P. Snyder's production.

Company officials indicated that the plant closed because of the new consumer product regulations concerning bicycles which went into effect on May 11, 1976. The additional money required to purchase new testing equipment and machinery and the additional labor costs of operating the new machinery would make production prohibitively expensive.

U.S. imports of bicycles have declined in each year from 1972 through 1975, both absolutely and relative to domestic production and consumption. Imports of bicycles were 5,156.1 thousand units in 1972, declining to 5,154.9 units and 4,018.9 thousand units respectively, in 1973 and 1974. Imports declined to 1,721.9 thousand units in 1975, a decline of 57.2 percent compared to the previous year.

The ratio of imports of bicycles to domestic production and consumption declined in each year from 1972, when the ratios were 58.9 percent and 37.1 percent, respectively, through 1975, when the ratios were 30.7 percent and 23.6 percent, respectively.

Conclusion.

After careful review of the facts obtained in the investigation, I conclude that increased imports of bicycles like or directly competitive with those produced by the Little Falls, New York plant of H. P. Snyder Manufacturing Company have not contributed importantly to the total or partial separation of workers at that plant, as required in section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 17th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[FR Doc.76-25241 Filed 8-26-76;8:45 am]

[TA-W-878]

TEXTRON INC.

Negative Determination Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-878: investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on May 1, 1976 in response to a worker petition received on that date which was filed by the International Association of Machinists and Aerospace Workers, on behalf of workers and former workers producing slide fasteners for the Meadville, Pennsylvania plants of the Talon Division of Textron, Incorporated.

The notice of investigation was published in the FEDERAL REGISTER on June 15, 1976 (41 FR 24236). No public hearing wase requested and none was held.

The information upon which the determination was made was obtained principally from officials of the Talon Division of Textron, Incorporated, its customers, U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause.

Without regard to whether any of the other criteria have been met, criterion (3) has not been met.

The evidence developed in the Department's investigation reveals that imports of slide fasteners declined absolutely and relatively in 1975 compared to 1974. Imports declined 29 percent from 146.6 million units in 1974 to 104.0 million units in 1975 and declined in value 24 percent from 23.8 million dollars in 1974 to 18.0 million dollars in 1975. The imports to production ratio declined from 8.5 percent in 1974 to 6.5 percent in 1976. The imports to consumption ratio declined from 8.2 percent in 1974 to 6.4 percent in 1976.

Conclusion.

After careful review of the facts obtained in the investigation, I conclude that slide fasteners like or directly competitive with those produced by the Meadville, Pennsylvania plants of the Talon Division of Textron, Inc., are not being imported in increasing quantities, either actual or relative to domestic production as required in section 222 of the Trade Act of 1974.

Signed at Washington, D.C., this 17th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

[TA-W-862]

VULCAN RIVET AND BOLT CORP.

Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974 the Department of Labor herein presents the results of TA-W-862; investigation regarding certification of eligibility to apply for worker adjustment assistance as prescribed in section 222 of the Act.

The investigation was initiated on April 30, 1976 in response to a worker petition received on that date which was filed by the United Steelworkers of America on behalf of workers and former workers producing standard and specialty steel fasteners at Vulcan Rivet and Bolt Corporation, Birmingham, Alabama.

The notice of investigation was published in the FEDERAL REGISTER on May 21, 1976 (41 FR 20969). No public hearing was requested and none was held.

The information upon which the determination was made was obtained principally from officials of Vulcan Rivet and Bolt Corporation, its customers, the U.S. Department of Commerce, the U.S. International Trade Commission, industry analysts, and Department files.

In order to make an affirmative determination and issue a certification of eligibility to apply for adjustment assistance, each of the group eligibility requirements of Section 222 of the Trade Act of 1974 must be met:

(1) That a significant number or proportion of the workers in such workers' firm or an appropriate subdivision of the firm have become totally or partially separated or are threatened to become totally or partially separated;

(2) That sales or production, or both, of such firm or subdivision have decreased absolutely;

(3) That articles like or directly competitive with those produced by the firm or subdivision are being imported in increased quantities, either actual or relative to domestic production; and

(4) That such increased imports have contributed importantly to the separations, or threat thereof, and to the decrease in sales or production.

The term "contributed importantly" means a cause which is important but not necessarily more important than any other cause

The investigation revealed that all four of the above criteria have been met.

Significant total or partial separations.

Employment at the Vulcan Rivet and Bolt Corporation declined 36 percent from 1974 to 1975 and decreased 49 percent during the first quarter of 1976 compared to the first quarter of 1975.

Sales or production, or both, have decreased absolutely.

Sales by the Vulcan Rivet and Bolt Corporation declined 51 percent from 1974 to 1975. Company production decreased 56 percent from 1974 to 1975 and declined 49 percent during the first quarter of 1976 compared to the first quarter of 1975. Standard fasteners account for approximately 87 percent of company sales while specialty fasteners account for approximately 13 percent of sales.

Increased imports.

Imports of ferrous bolts, nuts, and screws increased absolutely in quantity from 1971 through 1974. Imports of bolts as a percentage of U.S. production increased from 13.8 percent in 1971 to 19.3 percent in 1975. Imports of nuts as a percentage of U.S. production increased from 62.0 percent in 1971 to 91.0 percent in 1975. Imports of screws as a percentage of U.S. production increased from 19.6 percent in 1971 to 38.2 percent in 1975.

Contributed importantly.

Customers of Vulcan Rivet and Bolt Corporation who purchase imported fasteners indicate that their purchases of imports from 1974 to 1975 either remained the same or increased relative to their purchases of fasteners from Vulcan during the same period. A significant price differential exists between imported and domestically produced fasteners. Reduced sales by Vulcan Rivet and Bolt Corporation due to increased import competition resulted in employment and production declines at the Vulcan plant beginning early in 1975.

Conclusion.

After careful review of the facts obtained in the investigation, I conclude that increases of imports like or directly competitive with standard fasteners produced at Vulcan Rivet and Bolt Corporation contributed importantly to the total or partial separation of the workers of that firm. In accordance with the provisions of the Trade Act of 1974, I make the following certification:

All workers of Vulcan Rivet and Bolt Corporation, Birmingham, Alabama who became or will become totally or partially separated from employment on or after April 15, 1975 are eligible to apply for adjustment assistance under Title II, Chapter 2 of the Trade Act of 1974.

Signed at Washington, D.C., this 13th day of August 1976.

JAMES D. HOOVER,
Acting Executive Assistant to the Deputy Under Secretary.

INTERSTATE COMMERCE COMMISSION

[Notice No. 130]

ASSIGNMENT OF HEARINGS

AUGUST 24, 1976.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

MC 141701, D & P Trucking, Inc. now being assigned December 6, 1976 (1 day) at New York, New York in a hearing room to be later designated.

MC 135684 (Sub 19), Bass Transportation Co., Inc. now being assigned December 7, 1976 (2 days) at New York, New York in a hearing room to be later designated.

MC 116763 (Sub 342), Carl Subler Trucking, Inc. now being assigned November 2, 1976 (1 day) at New York, New York in a hearing room to be later designated.

MC 141675 (Sub-No. 1), Economy Trucking Service, Inc., now assigned October 4, 1976, at New York, N.Y. is postponed to December 9, 1976, (2 days), at New York, N.Y., location of hearing room to be later designated.

MC 113528 (Sub 26), Mercury Freight Lines, Inc. now being assigned November 16, 1976 (7 days) at Atlanta, Georgia and will be held at the Federal Building, Interagency Conference Room 556, 275 Peachtree Street N.E.

MC 109533 (Sub 67), Overnite Transportation Company now being assigned November 16, 1976 (7 days) at Atlanta, Georgia and will be held in the Federal Building, Interagency Conference Room 556, 275 Peachtree Street N.E.

MC 105881 (Sub 50), M.R. & R. Trucking Company now being assigned November 16, 1976 (7 days) at Atlanta, Georgia and will be held in the Federal Building, Interagency Conference Room 556, 275 Peachtree Street N.E.

MC 136786 (Sub 91), Robco Transportation, Inc., now being assigned November 1, 1976 (1 day), at Omaha, Nebr., in a hearing room to be later designated.

MC 108207 Sub 435, Frozen Food Express, now being assigned November 2, 1976 (3 days), at Omaha, Nebr., in a hearing room to be later designated.

MC 141243 (Sub 1), Jaymar Trucking Corp. now assigned September 13, 1976 at New York, New York is now cancelled, application dismissed.

MC 128155 (Sub-No. 4), R. C. Van Lines, Inc., now assigned November 4, 1976, at Washington, D.C. is postponed indefinitely.

MC 117831 (Sub-No. 4), S. Siskind & Sons, Inc., now being assigned November 15, 1976 (3 days) at New York, New York, in a hearing room to be later designated.

MC-FC-74866, Stadium Transportation Co., Inc., Manville, New Jersey, Transferee and Sisser Bros., Inc., New Brunswick, New Jersey, Transferor and MC-FC-75923, Edward D. Pohutsky, d/b/a Edward Pohutsky Movers, Eynon, Pennsylvania, Transferee Stadium Transportation Co., Manville, New Jersey, Transferor, now assigned November 2, 1976 at New York, New York, has been canceled and reassigned November 16, 1976 (1 day) at Philadelphia, Pennsylvania; in a hearing room to be later designated.

ROBERT L. OSWALD,
Secretary.

[Notice No. 110]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 24, 1976.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the ICC Field Office to which protests are to be transmitted.

[1] This notice corrects the type of hearing to be held.

MOTOR CARRIERS OF PROPERTY

No. MC 200 (Sub-No. 283 TA), filed August 16, 1976. Applicant: RISS INTERNATIONAL CORPORATION, 903 Grand Ave., P.O. Box 2809, Kansas City, Mo. 64142. Applicant's representative: Ivan E. Moody (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, in vehicles equipped with mechanical refrigeration (except commodities in bulk), from the plantsite and/or warehouse facilities of Kraftco Corp., at Champaign, Ill., to points in Maine, New Hampshire, Vermont, New York, Massachusetts, Rhode Island, Connecticut, Pennsylvania, New Jersey, Delaware, Virginia, Maryland and the District of Columbia, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Kraftco Corporation, 500 Peshtigo Ct., Chicago, Ill. 60690. Send protests to: Vernon V. Coble, District Supervisor, Interstate Commerce Commission, 600 Federal Bldg., 911 Walnut St., Kansas City, Mo. 64106.

No. MC 52657 (Sub-No. 736 TA), filed August 13, 1976. Applicant: ARCO AUTO CARRIERS, INC., 2140 W. 79th St., Chicago, Ill. 60620. Applicant's representative: James Bouril (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foreign-made vehicles*, in secondary movements, in truckaway service, from the automobile unloading locations of the Armstrong Yard and the Muncie Station of the Union Pacific Railroad at Kansas City, Kans., to points in Iowa, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Toyota Motor Sales, U.S.A. Inc., Robert D. Walker, National Vehicle Traffic and Marine Claims Manager, 2055 W. 190th St., Torrance, Calif. 90504. Send protests to: Patricia A. Roscoe, Transportation Assistant, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1386, Chicago, Ill. 60604.

No. MC 107452 (Sub-No. 6TA) filed August 12, 1976. Applicant: R. D. BROWN, doing business as DAN BROWN TRUCKING, Greybull Heights, Greybull, Wyo. 82426. Applicant's representative: James B. Hovland, 425 Gate City Bldg., Fargo, N. Dak. 58102. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Machinery, equipment, materials and supplies* used in or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission and distribution of natural gas and petroleum and their products and by-products and *machinery, equipment, materials and supplies* used in, or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof (except the stringing and picking up of pipe in connection with main pipelines), between Worland, Wyo., and points in Wyoming, within 75 miles of Worland, on the one hand, and, on the other, points in Wyoming beyond 75 miles from Worland and points in Colorado, Montana and Utah; (2) *Machinery, equipment, materials and supplies* used in or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission and distribution of natural gas and petroleum and their products and by-products, and *machinery, equipment, materials and supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof (except the stringing and picking up of pipe in connection with main pipelines) between points in Wyoming;

(3) *Machinery, equipment, materials and supplies* used in or in connection with the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and pet petroleum and their products and by-products, and *machinery, equipment, materials and supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up of pipe in connection with main or trunk pipelines, between points in that part of North Dakota on and west of a line beginning at the United States-Canada Boundary line and extending along North Dakota Highway 30 through St John, York and Medina to Lehr, thence along unnumbered highway (formerly North Dakota Highway 30) to Ashley, and thence along North Dakota Highway 3 to the North Dakota-South Dakota State line; those in that part of South Dakota west of the Missouri River and on and north of U.S. Highway 12; and those in that part of Montana on and east of a line beginning at the Montana-Wyoming State line at or near Alzada, and extending along U.S. Highway 212 to Miles City, thence along Montana Highway 22 to Jordan, thence northwesterly in a straight line to Malta, and thence along unnumbered highway (formerly Montana Highway 19) to the United States-Canada Boundary line; (4) *Machinery, equipment, materials and supplies* used in or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum, and their products and by-products, and *machinery, equipment, materials and supplies* used in or in connection with the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof (except the stringing and picking up of pipe in connection with main or trunk pipelines), between points in those specified portions of North Dakota and South Dakota in part (3) above, on the one hand, and, on the other,

points within 75 miles of Worland, Wyo., including Worland.

(5) *Machinery, equipment, materials and supplies* used in or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, and *machinery, equipment and supplies* used in or in connection with, the construction, operation, repair, servicing, maintenance, and dismantling of pipelines, including the stringing and picking up thereof (except the stringing and picking up of pipe in connection with main pipelines, between points in Nevada, on the one hand, and, on the other, points in Wyoming, Colorado, Montana and Utah. Applicant seeks by this application to tack parts (1) through (5), one to the other, in any combination and with existing authority to provide through service, for 180 days. Supporting shippers: There are approximately 10 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: Paul A. Naughton, District Supervisor, Interstate Commerce Commission, Room 1006 Federal Bldg., & Post Office, 100 East B St., Casper, Wyo. 82601.

No. MC 117639 (Sub-No. 7TA), filed August 16, 1976. Applicant: PICK'S PACK HAULER, doing business as PICK'S PACK HAULER, INC., 1214 East South St., Hastings, Nebr. 68901. Applicant's representative: Frederick J. Coffman, 521 South 14th St., P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Brick* from Pueblo and Trinidad, Colo., to North Plate, Nebr., under a continuing contract with Lumbermen's Brick and Supply Co., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Dale Funk, President, Lumbermen's Brick and Supply Co., 900 S. 15th St., Omaha, Nebr. 68108. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 N. 14th St., Omaha, Nebr. 68102.

No. MC 118989 (Sub-No. 142TA), filed August 16, 1976. Applicant: CONTAINER TRANSIT, INC., 5223 South 9th St., Milwaukee, Wis. 53221. Applicant's representative: Albert A. Andrin, 180 N. LaSalle St., Chicago, Ill. 60601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Containers, container components and ends, container closures, and materials, equipment and supplies* used in the manufacture and distribution of containers, ends and closures, from Worthington, Ohio, to LeRoy, Albany, Syracuse, Cicero, Buffalo and Rochester, N.Y., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: The Continental Group, Inc., 150 S. Wacker Drive, Chicago, Ill. 60606. Send protests to: Gail Daugherty, Transportation Assistant, Interstate Commerce Commission, Bureau of Operations, 135 West Wells St., Room 807, Milwaukee, Wis. 53203.

No. MC 125533 (Sub-No. 14TA), filed August 13, 1976. Applicant: GEORGE W. KUGLER, INC., 2800 East Waterloo Road, P.O. Box 6064, Ellet Station, Akron, Ohio 44312. Applicant's representative: John P. McMahon, 100 East Broad St., 18th Floor, Columbus, Ohio 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel conduit and metallic tubing, and fittings* for iron and steel conduit and metallic tubing (except pipe used in, or in connection with, the construction, operations, maintenance, servicing or dismantling of pipelines), from Carnegie, Pa., to points in Indiana, Illinois, New Jersey, Michigan, Ohio, New York, West Virginia, and Virginia, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Carnegie Conduit Company, P.O. Box 166, Carnegie, Pa. 15106. Send protests to: James Johnson, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 181 Federal Office Bldg., 1240 East Ninth St., Cleveland, Ohio 44199.

No. MC 125950 (Sub-No. 10TA), filed August 16, 1976. Applicant: C. B. S. TRANSPORTATION, INC., 1207 Columbus Circle, Wilmington, N.C. 28401. Applicant's representative: Francis J. Ortman, 7101 Wisconsin Ave., Suite 605, Washington, D.C. 20014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Fruit and vegetable containers*, from the facilities of Corbett Package Company, Wilmington, N.C., and Pierpont-Corbett Box Company, Savannah, Ga., to points in Tennessee on and east of U.S. Highway 231 (except Hamilton County, Tenn.), for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shippers: Corbett Package Company, P.O. Box 210, Wilmington, N.C. 28401. Pierpont-Corbett Box Company, Savannah, Ga. Send protests to: Archie W. Andrews, District Supervisor, 624 Federal Bldg., 310 New Bern Ave., P.O. Box 26896, Raleigh, N.C. 27611.

No. MC 128555 (Sub-No. 13TA), filed August 13, 1976. Applicant: MEAT DISPATCH, INC., 2103 17th St., East, Palmetto, Fla. 33561. Applicant's representative: S. Michael Richards, P.O. Box 225, Webster, N.Y. 14580. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Unfrozen foodstuffs* (except in bulk), from Owensboro and Henderson, Ky.; Austin, Ind. (not to exceed 5,000 lbs. per shipment), to points in Connecticut, Delaware, the District of Columbia, Maine, Maryland, Massachusetts, New Hampshire, Ohio, Rhode Island and Vermont; *and unfrozen foodstuffs* (except in bulk), from Henderson, Ky.; Austin, Ind. (not to exceed 5,000 lbs. per shipment), to points in Alabama, Arkansas, Colorado, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Kansas, Louisiana, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Jersey, New York, North Carolina, Oklahoma, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, West Virginia and Wisconsin; and (2) *Materials, supplies and equipment* used in the manufacture of the commodities in (1) above; from points in Alabama, Arkansas, Colorado, Connecticut, Delaware, Florida, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Louisiana, Maine, Maryland, Massachusetts, Michigan, Minnesota, Mississippi, Missouri, Nebraska, New Hampshire, New Jersey, New York, North Carolina, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Vermont, Virginia, West Virginia, Wisconsin, and the District of Columbia, to Owensboro and Henderson, Ky.; Austin, Ind. (not to exceed 5,000 lbs. per shipment), (except as presently authorized). Restriction: The authority listed in (1) and (2) above is restricted to traffic originating at or destined to the plantsites or warehouse facilities of Ragu Foods, Inc., under a continuing contract with Ragu Foods, Inc., for 180 days. Supporting shipper: Ragu Foods, Inc., 1680 Lyell Ave., Rochester, N.Y. 14606. Send protests to: Joseph B. Teichert, District Supervisor, Interstate Commerce Commission, Monterey Bldg., Suite 101, 8410 N.W. 53rd Terrace, Miami, Fla. 33166.

No. MC 128988 (Sub-No. 84TA), filed August 16, 1976. Applicant: JO/KEL, INC., 159 South Seventh Ave., P.O. Box 1249, City of Industry, Calif. 91749. Applicant's representative: Patrick E. Quinn, P.O. Box 82028, Lincoln, Nebr. 68501. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel and iron and steel articles*, from Los Angeles, Calif., to points in the United States in and east of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma and Texas, under a continuing contract with Earl M. Jorgensen Co., for 180 days. Supporting shipper: Earl M. Jorgensen Co., 8531 East Marginal Way South, Seattle, Wash. 98124. Send protests to: Mary A. Francy, Interstate Commerce Commission, Bureau of Operations, Room 1321 Federal Bldg., 300 North Los Angeles St., Los Angeles, Calif. 90012.

No. MC 134387 (Sub-No. 35TA), filed August 16, 1976. Applicant: BLACKBURN TRUCK LINES, INC., 4998 Branyon Ave., South Gate, Calif. 90280. Applicant's representative: Warren N. Grossman, 606 South Olive St., #825, Los Angeles, Calif. 90014. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Paper towels, paper napkins and toilet tissue*, from Halsey, Oreg.,

V 41 168 AUG 27 76 UMI

to Pacoima, Commerce and Corona, Calif., for 180 days. Supporting shippers: American Can Co., 355 Gellert Blvd., Daly City, Calif. 94015. Certified Grocers of Calif., Ltd., 2601 South Eastern Ave., Commerce, Calif. 90040. Send protests to: Mary A. Francy, Interstate Commerce Commission, Bureau of Operations, Room 1321 Federal Bldg., 300 N. Los Angeles St., Los Angeles, Calif. 90012.

No. MC 134922 (Sub-No. 190 TA), filed August 16, 1976. Applicant: B. J. McADAMS, INC., Route 6, Box 15, North Little Rock, Ark. 72118. Applicant's representative: Bob McAdams (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Hand and power lawn mowers and parts, garden cultivators and parts, black boards and bulletin boards*, from the plantsites and storage facilities of Great States Corporation, at or near Shelbyville and Muncie, Ind., to points in California, Oregon, Washington, Utah, Colorado, New Mexico, Arizona and Nevada, for 180 days. Supporting shipper: Great States Corporation, 818 Webster St., Shelbyville, Ind. 46176. Send protests to: William H. Land, Jr., District Supervisor, 3108 Federal Office Bldg., 700 West Capitol, Little Rock, Ark. 72201.

No. MC 139754 (Sub-No. 2 TA), filed August 12, 1976. Applicant: SOFT DRINK CARRIERS, INC., 5820 Centre Ave., Pittsburgh, Pa. 15206. Applicant's representative: Robert R. Wertz, 2310 Grant Bldg., Pittsburgh, Pa. 15206. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: (1) *Soft drinks* (except in bulk); (2) *Materials, equipment and supplies* used in the production, sale, and distribution of soft drinks (except commodities in bulk); (1) from Youngstown, Ohio, the commodities named in (1) above, to points in Pennsylvania in and west of McKean, Cameron, Clearfield, Blair, Cambria and Somerset Counties, Pa., and from points in such destination territory the commodities named in (2) above, to Youngstown, Ohio; (2) from Twinsburgh, Cleveland, Akron and Youngstown, Ohio, the commodities named in (1) above, to points in and west of Orleans, Genesee, Wyo. and Allegany Countyes, N.Y., and from points in such destination territory the commodities named in (2) above, to the above named origin points; (3) from Twinsburg, Cleveland, Akron and Youngstown, Ohio the commodities named in (1) above, to points in the lower peninsula of Michigan and from points in such destination territory the commodities named in (2) above to the above named origin points; and (4) from Twinsburg, Cleveland, Akron and Youngstown, Ohio the commodities named in (1) Above to points in and west of Monongalia, Marion, Harrison, Doddridge, Ritchie, Wirt, Jackson, Kanawah, Putnam, Cabell and Wayne Counties, W. Va., and from points in such destination territory the commodities named in (2) above to the above named origin points, under a continuing contract with Quaker State Coca-Cola Bottling Co.; The Youngstown Coca-Cola Bottling Co., Inc.; Great Lakes Canning, Inc.; The Akron Coca-Cola Bottling Company, The Cleveland Coca-Cola Bottling Co., Inc., and Summit Supply Company, Inc., for 180 days. Supporting shippers: There are approximately 6 statements of support attached to the application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: John J. England, District Supervisor, Interstate Commerce Commission, 2111 Federal Bldg., 1000 Liberty Ave., Pittsburgh, Pa. 15222.

No. MC 140435 (Sub-No. 3 TA), filed August 3, 1976. Applicant: DENNIS CHUTZ AND WAYNE CHUTZ, doing business as D & W TRUCKING COMPANY, P.O. Box 116, Slippery Rock, Pa. 16057. Applicant's representative: Donald E. Cross, 700 World Center Bldg., 918 Sixteenth St., N.W., Washington, D.C. 20006. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Coal*, in dump vehicles, from points in Butler and Mercer Counties, Pa., to the plantsites of Cleveland Electric Illuminating Company, in Ashtabula and Cuyahoga Counties, Ohio, under a continuing contract with Pengrove Coal Company, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper. Pengrove Coal Company, R.D. 3, P.O. Box 3629, Grove City, Pa. 16127. Send protests to: John J. England, District Supervisor, Interstate Commerce Commission, 2111 Federal Bldg., 1000 Liberty Ave., Pittsburgh, Pa. 15222.

No. MC 140539 (Sub-No. 1 TA), filed August 16, 1976. Applicant: TENNESSEE EXPRESS, INC., 22 Stanley St., Nashville, Tenn. 37210. Applicant's representative: George M. Catlett, 703–706 McClure Bldg., Frankfort, Ky. 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except Classes A and B explosives, household goods as defined by the Commission, commodities in bulk those requiring special equipment, and telephone equipment, materials and supplies), between the facilities of the Tennessee Valley Authority Hartsville Nuclear Plant in Trousdale County, Tenn., on the one hand, and, on the other, points in Davidson County, Tenn. Applicant intends to interline with other carriers at Nashville, Tenn., and points within its commercial zone, for 180 days. Supporting shipper: Tennessee Valley Authority, 620 Commerce Union Bank Bldg., Chattanooga, Tenn. 37401. Send protests to: Joe J. Tate, District Supervisor, Bureau of Operations, Interstate Commerce Commission, Suite A–422 U.S. Courthouse, 801 Broadway, Nashville, Tenn. 37203.

No. MC 140693 (Sub-No. 9 TA), filed August 18, 1976. Applicant: BEER TRANSPORTATION COMPANY, 1120 Germantown Ave., Philadelphia, Pa. 19123. Applicant's representative: Edward J. Kiley, 1730 M St. NW., Suite 501, Washington, D.C. 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers*, from the plantsite and storage facilities of Midland Glass Co., Inc., located at or near Cliffwood, N.J., to points in New York, for 180 days. Supporting shipper: Midland Glass Co., Inc., P.O. Box 557, Cliffwood, N.J. 07721. Send protests to: Monica A. Blodgett, Transportation Assistant, Interstate Commerce Commission, 600 Arch St., Room 3238, Philadelphia, Pa. 19106.

No. MC 142348 TA, filed August 10, 1976. Applicant: FULTON TRUCKING CO., INC., 1195 Milton Terrace, Atlanta, Ga. 30315. Applicant's representative: Richard M. Tettelbaum, 3379 Peachtree Road NE., Suite 375, Atlanta, Ga. 30326. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Plastic industrial contatners*, from the plantsite and warehouse facilities of Roper Plastics, Inc., Forest Park, Ga., to points in Alabama, Florida, Louisiana, Mississippi, North Carolina, South Carolina and Tennessee, under a continuing contract with Roper Plastics, Inc., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Roper Plastics, Inc., 175 Lake Mirror Road, Forest Park, Ga. 30050. Send protests to: Sara K. Davis, Transportation Assistant, Bureau of Operations, Interstate Commerce Commission, 1252 W. Peachtree St. NW., Room 546, Atlanta, Ga. 30309.

No. MC 142349 TA, filed August 12, 1976. Applicant: SE–BE TRUCK LINE, INC., 4101 Center St., Cedar Falls, Iowa 50613. Applicant's representative: Grant J. Merritt, 730 Second Ave., South, Minneapolis, Minn. 55402. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel products*, from the Service Center of Jones & Laughlin Steel Co Corporation, located in Chicago, Ill., to points in Iowa, for 180 days. Supporting shipper: Jones & Laughlin Steel Corp., Chicago S.S.C., 2250 W. 47th St., Chicago, Ill. 60609. Send protests to: Herbert W. Allen, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 518 Federal Bldg., Des Moines, Iowa 50309.

No, MC 142352 TA, filed August 17, 1976. Applicant: HAUSMAN TRUCKING, INC., 912 Cutler St., Waterloo, Iowa 50703. Applicant's representative: Larry D. Knox, 900 Hubbell Bldg., Des Moines, Iowa 50309. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from Waterloo, Iowa, to points in Illinois and Missouri, for 180 days. Supporting shipper: The Rath Packing Company, Sycamore & Elm St., Waterloo, Iowa 50704. Send protests to: Herbert W. Allen, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 518 Federal Bldg., Des Moines, Iowa 50309.

By the Commission.

ROBERT L. OSWALD,
Secretary.

[Finance Docket No. 28207]

SOUTHERN RAILWAY CO.

Discontinuance of Trains No. 5 and 6, "The Piedmont", Between Washington, D.C., and Charlotte, North Carolina

AUGUST 24, 1976.

The Interstate Commerce Commission hereby gives notice that its Environmental Affairs Staff has concluded that the proposed discontinuance by the Southern Railway Company of Trains 5 and 6 "The Piedmont," between Washington, D.C. and Charlotte, North Carolina, a distance of 375 miles, if approved by the Commission, does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (NEPA), 42 U.S.C. §§ 4321, *et seq.*, and that preparation of a detailed environmental impact statement will not be required under section 4332(2)(C) of the NEPA.

It was concluded, among other things, that passenger traffic handled by the affected trains is low and diversion to alternative modes would not significantly affect the environment. Most of the affected communities would continue to have rail passenger service from either Amtrak or applicant's "Southern Crescent." Moreover, alternative transportation is available by bus, automobile, and airplane. Several interstate highways also serve the region. Although the subject discontinuance and time schedules of alternative transportation may create some inconvenience, the action would not be expected to influence development within the affected corridor. An environmental benefit could be accrued by the savings of 459,000 gallons of fuel consumed annually by the subject trains.

This conclusion is contained in a staff-prepared environmental threshold assessment survey, which is available on request to the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423; telephone 202–275–7011.[1]

Interested persons may comment on this matter by filing their statements in writing with the Interstate Commerce Commission, Office of Proceedings, Washington, D.C. 20423, on or before September 10, 1976.

It should be emphasized that the environmental threshold assessment survey represents an evaluation of the environmental issues in the proceeding and does not purport to resolve the issue of whether the present or future public convenience and necessity permit discontinuance of this passenger train service. Consequently, comments on the environmental study should be limited to discussion of the presence or absence of environmental impacts and reasonable alternatives.

ROBERT L. OSWALD,
Secretary.

[1] A copy of the survey is filed with the Office of the Federal Register as part of the original document.

[Ex Parte No. MC–43]

WHITFIELD TANK LINES, INC., ET AL.

Denial of Petition

AUGUST 24, 1976.

At a Session of the INTERSTATE COMMERCE COMMISSION, Motor Carrier Leasing Board, held at its office in Washington, D.C., on the 16th day of August, 1976.

It appearing, That a petition has been filed by Whitfield Tank Lines, Inc. (MC–114897 and numerous subs) and E. B. Law & Son, Inc. (MC–106278 and MC–106278 Sub-No. 35), under common control, for waiver of paragraph (e) of section 1057.5 of the Lease and Interchange of Vehicles Regulations (49 CFR 1057), concerning equipment leased between petitioners;

It further appearing, That the public interest requires motor carriers to identify the equipment operated by them;

It further appearing, That the reasons advanced by petitioners for relief from the vehicle identification requirements are insufficient to justify a diminution of the public benefit resulting from such identification requirements;

It is ordered, That waiver of paragraph (e) of section 1057.5 be, and it is hereby denied.

By the Commission, Motor Carrier Leasing Board, Board members Teeple and Sibbald.

ROBERT L. OSWALD,
Secretary.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

NATIONAL DIRECT STUDENT LOAN PROGRAM, COLLEGE WORK–STUDY PROGRAM, SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANTS PROGRAM

V 41 168 AUG 27 76 UMI

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 176—SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANTS PROGRAM

Amendments With Regard to Indian Students Eligible for BIA Grants-In-Aid and Financial Assistance From the Commissioner of Education

Notice of proposed rulemaking was published in the FEDERAL REGISTER on Friday, March 7, 1975 (40 FR 10686) setting forth the manner in which financial aid packages will be administered for Indian students also eligible to receive educational grants-in-aid from the Bureau of Indian Affairs (BIA).

The proposed rule required that Indian students eligible for assistance under OE administered programs be considered on an equal basis with other students, that BIA grants-in-aid supplement financial aid provided from other sources so long as the total amount of such aid does not exceed the student's financial need, and that if the combined amount of aid exceeded the level of need as determined by the institution, the following sequence of deductions was set forth: loans, work-study and grants except Basic Educational Opportunity Grants.

It had become apparent that, in the absence of the above regulation, the practices of institutions of higher education were not consistent, and in some cases, failed to carry out the purpose of the BIA supported program. Because of the special trust relationship which the United States has maintained with Indians and because of special consideration for Indians which Congress has expressed, particularly in the Snyder Act, (25 U.S.C. 13) from which the BIA grants-in-aid derive, it was proposed that BIA grants-in-aid be treated as entirely supplementary to awards made under the Supplemental Educational Opportunity Grants program (SEOG), the Basic Educational Opportunity Grant program (BEOG), and other programs administered by the institution, such as the College Work-Study (CWS) and the National Direct Student Loan (NDSL) programs, provided that the total amount of assistance thus made available to the student did not exceed his level of need for financial assistance. It was the Commissioner's intent that nothing contained in the regulation would affect the rights of Indians or Native Americans, by reason of their tribal membership or under Federal law, to any benefit which results from their status as Indians or Native Americans.

Interested parties were invited to comment on the proposed rule. Below is a summary of the comments made on the proposed rule and the responses of the Office of Education.

Comment. Numerous comments were received both pro and con, regarding the wisdom of treating BIA grants as supplementary to the other federal programs of student financial aid. On the pro side, commenters felt that the proposed regulation placed Indian students on an equal footing with other students when applying for Supplemental Educational Opportunity Grants, since, in the past, some financial aid officers had either not awarded Indian students Supplemental Grants because they anticipated that the student would get a BIA grant, or they deducted from the Indian student's Supplemental Grant, the amount he received or would receive from the BIA. On the con side, commenters felt that the regulation gave preferential treatment to Indian Students since they would receive a greater percentage of grant assistance than other equally needy students.

Response. The Commissioner of Education recognizes merit in the arguments on both sides of this question. However, the Commissioner is still of the view that, because of the special trust relationship which exists between the United States Government and the Indians and the special consideration for Indians which Congress has expressed in the Snyder Act, that the Office of Education should continue the policy expressed in the proposed rule.

Comment. A commenter questioned the Commissioner's authority for issuing this regulation.

Response. We have been advised by our Office of the General Counsel that the provisions contained in the proposed regulation are authorized under the Supplemental Educational Opportunity Grants Program.

Comment. Several commenters suggested that some flexibility be provided in the sequence of deductions provided in the proposed rule since there may be circumstances when it would be more beneficial for a student to receive a loan rather than work-study employment.

Response. We believe this comment is well taken and have amended the regulation accordingly.

Comment. One commenter asked whether the sequence of deductions apply if a student were potentially eligible for a Supplemental Grant but in fact, did not receive one or any other Federal financial assistance.

Response. Under the circumstances described above, the regulation would not apply.

Comment. One commenter asked whether BIA funds that were received by a student for an academic year before the institution prepared its package of financial aid for that student should be included by the institution in its package.

Response. The regulation provides in § 176.15(a)(1) that "in preparing such a package [of financial aid] *the institution shall not take into consideration any BIA grant-in-aid* which the student *has received* or is expected to receive . . ." (Emphasis added)

Comment. One commenter expressed the view that "the mandatory loan and work-study components forced on Indian postsecondary students is highly inadvisable."

Response. This commenter has misconstrued the proposed regulation. There is no requirement that Indian students be provided with work or loans. The regulation requires the financial aid officer to prepare a package of financial aid for an Indian student which is consistent, as to type and amount, with packages prepared for students who are not eligible for BIA grants-in-aid, who have similar levels of financial need and who are similar with respect to any other general characteristics used by the institution in preparing such packages. Furthermore, the regulation has been amended to encourage student financial aid officers to consult with BIA officials, who are responsible for administering BIA postsecondary financial assistance programs and who are familiar with the needs of Indian students, in determining an Indian student's need and the makeup of his package of financial assistance.

Comment. A commenter noted that if the BIA offers grant assistance to Indian students and such grant assistance replaces already packaged work-study and loan awards, the Supplemental Grant may no longer be matched.

Response. Indian students receiving BIA grants are probably eligible for Basic Educational Opportunity Grants in amounts sufficient to "match" Supplemental Grants.

Comment. A commenter stated that if BIA funds replace already packaged loan or work-study assistance, it may be too late to award those funds to other students, e.g., entering freshman who decided not to attend that institution because of the unavailability of student assistance.

Response. As we understand it, BIA grant-in-aid funds are not appropriated on a forward funded basis. However, since the amount appropriated for such grants is generally consistent over the years, BIA area officials can generally estimate which upperclass students will receive renewal grants and the amount of such grants at the time the student financial aid officers are preparing financial aid packages. Anticipating the grants for freshmen is a more difficult situation. However, the problem mentioned by the commenter can be alleviated if proper coordination is made with the appropriate BIA regional officials.

Other comments were received concerning the role and function of the BIA in the area of providing financial assistance to Indians in postsecondary education. These comments were referred to the Bureau of Indian Affairs.

Several comments were also received about a matter not covered by the proposed regulation. These comments concerned the treatment of the assets of Indians and Native Americans and specifically the treatment of funds received pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601, et seq.) and the Indian Claims Commission Act (25 U.S.C. 1401, et seq.). It was the view of these commenters that funds received as settlements pursuant to that Act should not be considered as part of the assets of the student and his parents for the purpose of determining a student's financial need.

The treatment of this issue was not included in this final regulation because the subject matter of the comments was not included as part of the proposed rule; consequently the public was not invited to comment on a position proposed by the Office of Education with regard to this issue. Furthermore, how Indian assets are to be counted affects the Basic Educational Opportunity Grant, College Work-Study, National Direct Student Loan and Guaranteed Student Loan Programs as well as the Supplemental Educational Opportunity Grants Program. Accordingly a separate notice of proposed rulemaking concerning the treatment of the assets of Native Americans will be published.

In the FEDERAL REGISTER of October 14, 1975 there were published Notices of Proposed Rulemaking setting forth proposed regulations for the National Direct Student Loan (40 FR 48252–48264) and the College Work-Study (40 FR 48266–48277) Programs. Sections 114.10 (45 CFR 114.-10) of the proposed National Direct Student Loan Program Regulations and § 175.15 (45 CFR 175.15) of the College Work-Study Program Regulations contain language similar to the language proposed on March 7, 1975 for § 175.15. It is the intention of the Office of Education when these proposed regulations are republished in final form to amend those sections to correspond with § 176.15 as set forth below.

In light of the foregoing, § 176.15 of Part 176 of Title 45 of the Code of Federal Regulations is amended as set forth below.

Effective date. Pursuant to section 431 (d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), this regulation has been transmitted to the Congress concurrently with the publication of this document in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

(Catalog of Federal Domestic Assistance Number 13.418, Supplemental Educational Opportunity Grants)

Dated: March 31, 1976.

T. H. BELL,
U.S. Commissioner of Education.

Approved: August 13, 1976.

MARJORIE LYNCH
Acting Secretary of Health, Education, and Welfare.

Part 176 of Title 45 of the Code of Federal Regulations is amended by adding § 176.15 as follows:

§ 176.15 Coordination with Bureau of Indian Affairs grants-in-aid.

(a) In determining the amount, if any, of a Supplemental Grant to be awarded to a student who is eligible for such a grant and, in addition, is eligible for an educational grant-in-aid under a program administered by the Bureau of Indian Affairs (BIA), the institution shall observe the following practice:

(1) A "package" of student assistance will be prepared in accordance with § 176.14 for each such student from resources other than BIA grants-in-aid. In preparing such a package, the institution shall not take into consideration any BIA grant-in-aid which the student has received or is expected to receive and such package shall be consistent, as to the types and amounts of the respective awards included therein, with packages prepared for students who are not eligible for BIA grants-in-aid, who have similar levels of financial need and who are similar with respect to any other general characteristics used by the institution in preparing such packages.

(2) The amount of any BIA grant-in-aid, whether received by the student prior to the preparation of the package described in paragraph (a)(1) of this section or subsequent thereto, shall be supplementary to the package of aid from other resources, and no adjustment shall be made to such package so long as the total of such package and the BIA grant-in-aid does not exceed the institution's determination of the student's need (i.e., the difference between the student's cost of education at the institution and his expected family contribution).

(3) If the total amount of the BIA grant-in-aid, when combined with the package of other assistance prepared in accordance with paragraph (a)(1) of this section exceeds the institution's determination of the student's need, the amount of such excess only shall be deducted from the package of other assistance. Except as provided for paragraph (a)(4) of this section, such deduction shall be done in sequence, so that such excess is first deducted from any awards, or proposed awards, in the form of loans; if an excess still remains after all such loan awards have been adjusted, deductions shall next be made from any awards, or proposed awards, in the form of work-study; if an excess still remains after all such work-study awards have been adjusted, deductions shall be made from any award, or proposed award, in the form of a grant, other than a grant under the Basic Educational Opportunity Grants Program.

(4) If requested by an eligible recipient, the sequence of deductions provided in paragraph (a)(3) of this section may be altered if such an alteration more adequately meets the need of that student.

(b) In determining the amount of financial need of students eligible for BIA grants-in-aid, the institution's student financial aid officer is encouraged to consult with BIA area officials who are responsible for administering BIA postsecondary financial assistance programs and are familiar with the individual financial circumstances of such students.

(c) Educational grants-in-aid made to students at an institution under a program administered by the Bureau of Indian Affairs shall be considered to be financial aid made available through such institution, for purposes of § 176.16, if:

(1) The institution reviews the applications for such grants; and

(2) The institution selects the recipients for, and determines the amounts of, such grants.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Parts 144, 175 and 176]

NATIONAL DIRECT STUDENT LOAN PROGRAM, COLLEGE WORK-STUDY PROGRAM, SUPPLEMENTAL EDUCATIONAL OPPORTUNITY GRANTS PROGRAM

Determination of Financial Need

Notice is hereby given that, pursuant to the authority contained in Sections 464, 444, 413B, and 413C of the Higher Education Act of 1965 as amended (20 U.S.C. 1087dd, 42 U.S.C. 2754, and 20 U.S.C. 1070b–1 and 1070b–2), the Commissioner of Education with the approval of the Secretary of Health, Education, and Welfare, proposes to amend Parts 144, 175, and 176 of Title 45 of the Code of Federal Regulations governing the operation of the National Direct Student Loan (NDSL) Program, College Work-Study (CWS) Program and Supplemental Educational Opportunity Grants (SEOG) Program, respectively.

Under the above programs a student receives financial assistance on the basis of financial need. Such need is generally defined as the difference between a student's costs of education and his expected family contribution, the latter being the amount the student and, where relevant, the student's parents are expected to contribute toward the student's educational costs. In determining a student's expected family contribution, both the income and assets of the student and, where relevant, the student's parents are taken into consideration. The proposed amendment, as set forth below, would exempt from consideration as either assets or income funds received by Indians and Native Americans under the Distribution of Judgment Funds Act (25 U.S.C. 1401, et seq.) of the Alaska Native Claims Settlement Act (43 U.S.C. 1601, et seq.). Furthermore, Indian or tribal property that may not be sold or encumbered without the consent of the Secretary of the Interior or any Indian property held in trust for the student or his family by the United States Government would not be considered in determining the assets of the Indian or Native American student or his parents.

One of the goals of the Office of Education is to improve the educational opportunities of Indian and Alaska Native students by providing financial assistance to enable them to attend institutions of higher education. Among the causes which contribute to the proportionately small number of Indian and Alaska Native students attending such institutions has been limited financial resources of those students. Part of the limited resources of Indians is property that is owned by individual Indians or Indian tribes but which is either held in trust by the United States Government or is property which may not be sold without the express approval of the Secretary of the Interior. It has been the policy of the Office of Education not to consider such property to be an asset of the Indian student or his parent for purposes of determining that student's expected contribution since that property cannot be used by the student or his family to pay the student's educational costs. However this policy has never been established by regulation. Furthermore it is the policy of the Department of Health, Education, and Welfare to disregard funds received under the Distribution of Judgment Funds Act and the Alaska Native Settlement Claims Act with respect to determinations of eligibility for benefits under the Supplemental Security Income Act (42 U.S.C. 1382, et seq.) and the Aid to Families with Dependent Children Act (42 U.S.C. 601, et seq.). Consistent with this Department policy the proposed rule provides that funds received by Indians and other Native Americans under those two acts will be similarly disregarded as income and assets when calculating a student's expected family contribution under the above noted programs.

Under the Basic Educational Opportunity Grants Program, need is determined in a matter similar to that done in the programs described above. However, section 411(a)(3)(A)(i) and (ii) of Title IV require that the system used for determining the expected family contribution under the Basic Grant Program must be reviewed by the Congress before such system can become effective for each academic year. In order to alleviate the above stated concerns about the funds received under the Judgment Funds Act and the Alaska Settlement Claims Act, the Office of Education will propose a change in the need determination system for the Basic Grant Program, to become effective during the 1977–78 academic year.

Interested persons are invited to submit written comments, suggestions, or objections to this proposed rule to the Bureau of Postsecondary Education, Office of Education, Seventh and D Streets SW., Washington, D.C. 20202. All relevant comments must be received not later than September 27, 1976.

These comments will be available for public inspection in the above office between the hours of 8:30 a.m. and 4:00 p.m. Monday through Friday of each week.

(Catalog of Federal Domestic Assistance; No. 13.418, Supplemental Educational Opportunity Grants Program; No. 13.463, Higher Education Work-Study; No. 13.471, National Direct Student Loans)

Dated: May 10, 1976.

T. H. BELL,
U.S. Commissioner of Education.

Approved: August 13, 1976.

MARJORIE LYNCH,
Acting Secretary of Health, Education, and Welfare.

The proposed rule which would amend 45 CFR Parts 144, 175, and 176 reads as follows:

In determining the expected family contribution of eligible Indian or Native American students the institution shall not consider (1) funds received pursuant to an award under the Distribution of Judgment Funds Act (25 U.S.C. 1401, et seq.) or the Alaska Native Claims Settlement Act (43 U.S.C. 1601, et seq.) as income or as an asset of the student or his family; and (2) property which may not be sold or encumbered without the consent of the Secretary of Interior or any other property held in trust for the student or the student's family by the United States Government as an asset of the student or his family.

PART III:

ENVIRONMENTAL PROTECTION AGENCY

SULFUR DIOXIDE PLAN

Ohio

V 41 1 68 AUG 27 76 UMI

Title 40—Protection of the Environment

[FRL 605-8]

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

SUBCHAPTER C—AIR PROGRAMS

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Ohio-Sulfur Dioxide Plan

On January 30, 1972, the Governor of Ohio submitted the "Implementation Plan for the Control of Suspended Particulate, Sulfur Dioxide, Carbon Monoxide, Hydrocarbons, Nitrogen Dioxide, and Photochemical Oxidents in the State of Ohio" to the Administrator of the Environmental Protection Agency. The plan was adopted by the Ohio Air Pollution Control Board following public hearings held on January 18, 1972, in Columbus, Ohio. This plan was submitted pursuant to Section 110 of the Clean Air Act, as amended, which requires States to adopt implementation plans to achieve and maintain the national ambient air quality standards (40 CFR Part 60). On May 31, 1972 (37 FR 10842), the Administrator approved the Ohio plan with specific exceptions. Subsequently, amendments were submitted which permitted full approval of the plan on September 22, 1972 (37 FR 19806).

On June 28, 1973, the United States Court of Appeals for the Sixth Circuit decided the case of Buckeye Power Company, et al. v. EPA, 481 F.2d 162. The court vacated the Administrator's approval of the Ohio plan and remanded the case to the Agency for compliance with Section 553 of the Administrative Procedure Act, as articulated in the court's opinion, viz., to take comments, data or other evidence from interested parties, and to express the basis for ensuing administrative actions.

On August 27, 1973, the Governor of Ohio withdrew from the proposed Ohio plan the control strategy and regulations for control of sulfur dioxide. The remainder of the plan was proposed on November 15, 1973 (38 FR 31543) and was approved on April 15, 1974 (39 FR 13530), with specific exceptions. Because the Governor of Ohio withdrew the originally submitted control strategy and regulations for control of sulfur dioxide, the plan was disapproved in that respect.

On May 30, 1974, the Governor of Ohio submitted a proposed sulfur dioxide strategy and regulations to the Administrator to cure the defects in the Ohio Implementation Plan noted in the April 15, 1974, FEDERAL REGISTER, cited above. However, on September 13, 1974, the Ohio Environmental Board of Review overturned a portion of these regulations, thereby rendering same unenforceable. Since the plan for control of sulfur oxides could no longer be effectuated as designed by the State, the Administrator deemed it an ineffective submission and no further rulemaking action was taken. The Governor of Ohio formally withdrew the proposed regulations on July 16, 1975.

Where the Administrator determines that a State plan or portions thereof do not meet the requirements of the Clean Air Act as amended, and 40 CFR Part 51, he is directed by Section 110(c) of the Act to propose and subsequently promulgate regulations setting forth a substitute implementation plan or portion thereof. Accordingly, on November 10, 1975, the Administrator proposed such an alternate plan for the control of emissions of sulfur dioxide in the State of Ohio (40 FR 52410 *et seq*). Hearings on the proposed rules were conducted by the Environmental Protection Agency in Cincinnati (December 18, 1975), Cleveland (January 6, 1976), Steubenville (January 8, 1976), and Columbus (January 13 and 14, 1976). Interested parties presented their comments at these hearings and through the mail. Each comment was carefully considered. In several cases, being responsive to comments necessitated a modification of the proposed regulation. The final rules as published herein are, however, completely in character with the original scheme. Each deviation from the proposed regulation resulted directly from public comment and/or a more precise, sophisticated method of analyzing the data.

Set forth below are the substitute sulfur dioxide control regulations designed to attain and maintain the ambient standards for sulfur dioxide in Ohio thereby correcting the deficiency in the Ohio Implementation Plan listed above. The maintenance portion of the plan is based on projected growth over the next ten years and the degree of control required of existing sources reflects the projected emission increase.

Because of the exceptional circumstances that surround this rulemaking, i.e., the vacation of the Administrator's original plan approval and the inability of the State to thereafter submit an approvable sulfur dioxide strategy, the rulemaking contemplated herein effectively constitutes the first federally operative plan for controlling sulfur dioxide within the State. Consistent, therefore, with the Clean Air Act's injunction that primary ambient standards be attained within three years of plan approval (or such earlier time as may be practicable), the attainment date promulgated herein is three years from this effective date of these regulations. Not all sources will require a full three years in order to achieve compliance; in given cases "expeditious as practicable" compliance may require compliance far in advance of the attainment date.

CONTROL STRATEGY DESCRIPTION

The control strategy promulgated today to attain and maintain the sulfur dioxide ambient air quality standards in Ohio was developed through both county-by-county and facility-specific analyses of air quality to determine the existence and severity of any sulfur dioxide problems. Where air quality problems were identified, appropriate regulations were developed for specific counties, groups of sources, or individual sources as necessitated by the extent of the air quality problem.

Growth projections were made for all areas through 1985, with the projected impact of such growth included in the developed control strategy. Within the eighty-eight counties comprising the state, approximately 150 individual facilities have been specifically identified for control. In addition, thirty-three counties were identified as possessing no existing or potential sulfur dioxide air quality problems from existing sources inasmuch as existing sources in those counties do not adversely affect air quality standards. No controls are being promulgated for sources located in these counties. However, it should be noted that, where applicable, sources in these counties will still be subject to state new source review requirements, federal new source performance standards, and non-significant deterioration requirements.

In response to public comments received regarding the application of county-wide emission limitations, which were derived from the analysis of a single isolated facility or group of facilities in that county, individual facilities in counties are now being specifically identified for control. No controls are being promulgated for the remaining sources in those counties for the same reasoning applied to the thirty-three uncontrolled counties referenced above. For the remaining counties, the promulgated control strategy establishes specific industrial process limitations for identified industry categories and/or a general industrial process requirement. In addition, fuel combustion sources are required to meet specified emission limitations as a function of the rated capacity and location. Certain sources have made representations to close down within the next 3 years—for these sources a zero emission rate was used in the dispersion modeling and is promulgated in the following rules. Should the present or any subsequent owner or operator desire to continue in operation any such source, the Administrator will consider a petition to establish an appropriate emission limitation.

INDUSTRIAL PROCESS REGULATIONS

In the development of the proposed regulations, the Administrator proposed to utilize a general industrial process emission limitation expressed in pounds of SO_2 per hour. The proposed limitation was standardized for application throughout the state (with the exception of the 32 unregulated counties). However, a substantial amount of concern was expressed regarding the application of preselected emission limitations. Instead, it was suggested that, in order to minimize the potential for controlling source emissions to a greater extent than may be necessary to assure the attainment and maintenance of the ambient air quality standards throughout the various counties in Ohio, the emission limits should vary according to the individual needs of each county.

In response to these concerns, the Administrator applied a revised methodology for control strategy development.

Under the new approach, a general industrial process emission limitation was applied only to those specific areas in which such a limitation was clearly shown to be necessary. Furthermore, the revised industrial process emission limitation now varies from county to county as a function of the air pollution problem, the existing emission rate of the contributing sources, and the overall emission reduction needed. The general industrial process limitation is now being expressed as pounds of SO_2 per ton of process weight in response to concerns expressed regarding the proposed regulation which was expressed in pounds of SO_2 per hour. The regulation is being applied both generally and/or specifically to identified sources depending upon the particular county.

Several specific industrial process emission limitations are being promulgated for certain industry categories. The industrial process regulations in this final rulemaking include sulfuric acid manufacturing plant regulations (expressed as pounds of sulfuric acid per ton of 100% acid produced); sulfur recovery plant regulations (expressed as pounds of SO_2 per 1000 pounds of sulfur processed); coke oven regulations (expressed as grains of sulfurous gases per dry standard 100 cubic feet of coke oven gas); and a zinc smelter regulation identical to the originally proposed regulation. The emission limitations for the industrial process operations vary from county to county.

In addition to the above industrial process regulations, regulations applicable to petroleum refineries are also included which are more specific than the proposed emission limitation. As a result of public comments received on the proposed regulation, the petroleum refinery regulations include emission limitations applicable to catalytic cracking units (expressed in pounds of SO_2 per 1000 pounds of charging stock); treating operations (expressed as an exhaust gas concentration in parts per million); and off-gas combustion (expressed in grains of sulfurous gases per dry standard 100 cubic feet of oil refining gas).

FUEL COMBUSTION REGULATIONS

In developing the final fuel combustion emission limitations, the Administrator reexamined the major fuel burning installations within each county in the state to reassess the degree of control required, if any, in light of public comments received. The final regulations are expressed in terms of pounds of SO_2 emitted per million BTU of heat input. Again, as with the industrial process regulations, the emission limitations vary from county to county and are both general and facility-specific depending upon the particular pollution problems, the size and distribution of the facilities, and the required overall emission reductions.

Several refinements were made to the methodologies applied to the various urban areas in Ohio, in arriving at the final emission limitations. For the Youngstown (Mahoning and Trumbull Counties), Cincinnati (Hamilton County), and Steubenville (Jefferson County) areas, the methodology utilized in the development of the proposed regulations (i.e., the "linear rollback" concept) was modified to more accurately assess air quality impacts by source category. Individual major facilities were also examined separately with computer dispersion models to arrive at the final facility-specific emission limitations. However, dispersion model techniques could not be applied on a broad basis in these areas due to the effects of the surrounding terrain.

In the Cleveland (Cuyahoga, Lake and Lorain Counties), Akron (Summit County), Toledo (Lucas County), Dayton (Montgomery County), Columbus (Franklin County) and Canton (Stark County) areas, refined, more sophisticated modelling techniques were applied to develop the final emission limitations. The revised methodologies were utilized to provide a more accurate assessment of the impact of source emissions on both the annual and short term air quality standards. No emission limitations are being promulgated for sources with capacities less than 10 million BTU per hour of heat input as these sources were found to have an insignificant impact upon air quality.

For all major isolated fuel combustion facilities in Ohio where no pollutant/plume interaction could be found between a particular facility and any surrounding facilities, control options are being included in the final emission limitations. These options are such that the source owner or operator may choose (within a specified period of time) between a uniform emission limitation applicable to all stacks at that facility or a series of stack-specific emission limitations. The latter choice provides for maximum flexibility of emission control sufficient to assure the attainment and maintenance of the air quality standards, coupled with the potential for minimum economic impact on a particular facility. Choosing an option will not relieve a source of the duty to comply with applicable emission limits as expeditiously as practicable but no later than the attainment date.

PUBLIC COMMENTS RECEIVED

The Agency believes that its responsibility following the public hearings and the period for comment is to consider seriously each and every piece of information and in certain justifiable instances, modify the regulations in reliance thereon. The Agency carried out that duty. Each modification to the proposed rule making has been made as the direct result of a specific comment thereon, as the result of a more detailed data base or as a result of a more exact, sophisticated modeling technique than was used in the proposal. None of these modifications, however, has substantively altered the character of the original regulatory scheme, and the Administrtor has therefore determined that the need for further hearings or comments is obviated. As the U.S. Court of Appeals for the first Circuit stated in *South Terminal Corp. v. EPA*, 504 F2d 646(1974): "A hearing is intended to educate an agency to approaches different from its own and in shaping the final rule it may and should draw on the comments tendered. . . . Parties have no right to insist that a rule remain frozen in its vestigial form." The Court of Appeals for the District of Columbia recently said: "The requirement of submission of a proposed rule for comment does not automatically generate a new opportunity for comment merely because the rule promulgated by the Agency differs from the rule it proposed, partly at least, in response to submissions. A contrary rule would lead to the absurdity that in rulemaking under the APA the Agency can learn from the comments on its proposals only at the peril of starting a new procedural round of commentary" (*International Harvester v. Ruckelshaus*, 478 F2d 615(1973)).

Set forth below in summary form is a discussion of the action taken by the agency in response to the knowledge gained by the agency as a result of public participation in the rulemaking process. A more detailed description of the difference between the proposal and the promulgation is set forth in the Executive Summary to the Technical Support Document.

The proposal was criticized for failure to use all available air quality data and for use of invalid or erroneous air quality data in developing the regulations. Therefore, the Agency reassessed all state, local and private industry data including data submitted during the public comment period in order to secure the most complete air quality data base possible in the circumstances.

The proposal was also criticized for use of erroneous emission data for both point and area sources in determining necessary controls. Accordingly, the Environmental Protection Agency reexamined all state and local agency data previously used and reviewed any new data submitted during the public comment period. Additionally, many facilities were specifically contacted to obtain the most accurate, up-to-date emission data. These tasks were undertaken to secure the most complete and accurate emission data available at this time.

The proposal was criticized for using "pre-designed" regulations since they resulted in substantial over-control in some instances. EPA modified the "Control Strategy Forecast Program" and developed the analytical tools mentioned below so that control requirements could be tailored to the source's contribution to ambient air quality and considerations of facility size in order to minimize overcontrol to the maximum extent possible.

The proposal was criticized for use of a proportional modeling technique (a/k/a "rollback") in some urban areas to determine necessary controls therein. With considerable effort, the Agency was able to identify and utilize more sophis-

V 41 168 AUG 27 76 UMI

ticated analytical tools in developing urban strategies, such as an urban short-term model (RAM) and a modified "roll-back" technique which is used in conjunction with source-specific dispersion modeling. This investigation was commenced so that EPA would use the most sophisticated analytical tools available in determining needed controls in the state's urban areas.

The proposal was criticized for use of a single SO_2 ambient air background value (concentration resulting from natural and/or area sources) throughout Ohio in developing the control strategy. The Agency responded to this comment by developing county-specific background values where possible and extrapolating SO_2 isopleths in areas where ambient air concentrations of SO_2 had not been measured, in order to assign the most pertinent background values possible to the various areas of the state, given the available information.

The proposal was criticized for using "value-added" source parameters in estimating industrial emissions growth to determine the need for controls in maintaining air quality standards. EPA and Ohio examined other methods of estimating emissions growth and reconfirmed the superiority of the "value added" approach. The Agency attempted to refine the results of this technique by collecting additional data from various State and major urban planning agencies in Ohio. These refinements were sought to assure maintenance of standards by the most reliable method available at this time.

Several local agencies criticized the proposed regulations because they would permit certain sources to emit greater amounts of SO_2 than would local regulations covering the same sources. The Administrator recognizes and respects the rights of any State or political subdivision thereof to adopt or enforce emission standards stricter than those required to achieve national ambient air quality standards. Whether adopted to allow for greater growth or as additional safeguards to the public health and welfare, the Administrator encourages continued enforcement of those local regulations. Nonetheless in formulating the regulations herewith promulgated, the Administrator was required to adhere to the standards set forth at § 110 of the Act.

Malfunctions

The proposed regulations did not include a section dealing with malfunctions, and the preamble requested comments on how the problem of malfunctions could be addressed. Several commentators offered sample regulations or suggested regulations presently utilized in other states as a means of dealing with the malfunction problem. After reviewing the comments, the Administrator has concluded that to penalize a prudent operator for emissions that are beyond his control is unreasonable. The issuance of an administrative order or the initiation of judicial action following a period of excess emission caused by circumstances beyond the control of the operator is not appropriate. However, automatic exemption for these periods of unavoidable excess emissions are also not appropriate.

The Administrator recognizes that some relief should be afforded during certain upset conditions, but the promulgation of an upset regulation could serve as a disincentive to develop better operating and maintenance procedures. The Administrator has concluded that malfunctions and upsets beyond the reasonable control of an operator can be raised in the context of a Section 113 enforcement proceeding and prior to the issuance of an administrative order. When a Notice of Violation is issued to an operator for a violation resulting from a malfunction or upset condition, the Administrator will consider any information developed by the source which more fully explains the circumstances of the violation, its seriousness, and efforts of the operator to comply. If the Administrator determines that the subject equipment was well maintained and operated, was repaired expeditiously, and that excess emissions were minimized, no further action would be warranted. In the Administrator's view this approach both encourages good operating practice and provides a forum for mitigating evidence in the context of the Agency's enforcement process.

Compliance Schedules

The regulations include categorical compliance schedules to be utilized by sources to attain compliance. Because this promulgation allows certain sources an "optional emission limitation" a provision has been added requiring notice to the Administrator of the option selected within eight weeks of promulgation. Alternate schedules may be submitted at the same time for approval by sources desiring to adjust the increments of progress within the promulgated schedules. Any source owner or operator failing to notify the Administrator of his selection within the allowed eight weeks will be subject to the specific emission limitation identified in the regulations. The Agency reserves the right to specify shorter schedules for those sources which can comply more expeditiously than the three year time frame.

The final regulations delete the requirement that sources sign contracts for fuel supplies for a minimum period of ten years. This change flows from a number of comments strongly questioning the propriety of requiring firm contracts for ten year supplies of coal. The above requirement relieves smaller fuel users of the necessity of committing resources for a long period. However, sources electing to comply by fuel changes must demonstrate that sufficient complying fuel can realistically be expected to be available. In cases of large coal users (generally utilities and utility size fuel users), the required demonstration may include a contract document. This distinction is consistent with the practice of utility and large industrial users of contracting for fuel supplies at least 10 years in advance of their needs.

Technical And Economic Feasibility

The proposal was criticized for failure to consider technological and economic feasibility in developing the proposed regulations. Although these factors were considered in developing this proposal, the Agency responded to this criticism by providing for site visits to twenty industrial or utility facilities. The bulk of this work was performed by a contractor pursuant to EPA specifications. The studies provide a basis for determining the feasibility of the final regulations and indicate that most site specific difficulties can be overcome. A detailed assessment of the technical feasibility of these regulations is included in the technical support document.

Consistent with the recent Sixth Circuit decision (*Big Rivers Electric Corp. et al.* v. *EPA*, 523 F. 2d 16 (1975), cert denied, —— U.S. ——, April 19, 1976), the proposed plan prohibits the operation of a source of pollutant emissions beyond three years from promulgation "without the application of one or more systems which control the kind and amounts' of its air contaminant emissions." The Sixth Circuit Court of Appeals reasoned that, absent a showing that measures which qualify as emission limitations (see *Train* v. *NRDC*, 43 L. Ed. 2d 731, 745, 1975, defining emission limitations as "regulation of the composition of substances emitted into the ambient air") are unavailable, the Administrator cannot approve (or, therefore, promulgate) measures other than emission limitations. Cf. *Big Rivers* v. *EPA*, 523 F. 2d at 22. Consistent with the Court's opinion, this rulemaking contains only emission limitations since, in the Administrator's judgment, such limitations are not only capable of attaining national standards but are also achievable through application of available technology.

Review of the record developed in this action reveals that all affected sources will be able to meet the established requirements. However, it may be, in exceptional circumstances, that available technology when applied to a given source will not achieve the applicable emission limitation. In such cases, the Administrator will consider a petition for a plan revision to those sources qualifying under the Agency policy set fourth at 41 FR 7450 on February 18, 1976. Such petitions should be submitted no later than 60 days after promulgation, should be adequately documented and will, under no circumstances, permit extension of the final compliance date.

Inflation Impact Statement

The Agency was criticized for failure to propose an inflation impact statement in connection with the proposed rules. The Agency's position in response to the President's order came out about the same time the proposal did and it was not possible to prepare a statement for the proposed regulations. In connection with determinations on the final rulemaking, EPA collected various types of information from the State of Ohio which have been used in conjunction with information gathered from the site visits to prepare an inflation impact statement which will be available for public inspection at (1) the Air Programs Branch, Air and Hazardous Materials Division, EPA Region V, 230 South Dearborn, Chicago, Illinois 60604; (2) the U.S. EPA Public Information Reference Unit, Room 2922, 401 M Street, S.W., Washington, D.C. 20460; and (3) the Council on Wage and Price Stability, Washington, D.C. 20503.

It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with OMB Circular A–107.

The Technical Support Document will be available at the following locations: (1) Cincinnati Division of Air Pollution Control, 2400 Beekman Street, Cincinnati, Ohio 45214; (2) Cleveland Division of Air Pollution Control, 2735 Broadway Avenue, Cleveland, Ohio 44115; (3) Akron Air Pollution Control Agency, 177 South Broadway, Akron, Ohio 44308; (4) Canton Air Pollution Control Division, City Hall, Canton, Ohio 44702; (5) Northeast District Office, Ohio Environmental Protection Agency, 2110 East Aurora Road, Twinsburg, Ohio 44087; (6) Ohio Environmental Protection Agency, 361 East Broad Street, Columbus, Ohio 43216; (7) Montgomery County Health Department Regional Air Pollution Control Agency, 451 West Third Street, Dayton, Ohio 45402; (8) Southwest District Office, Ohio Environmental Protection Agency, 7 East Fourth Street, Dayton, Ohio 45402; (9) Mansfield-Richland County Health Department, 600 West Third Street, Mansfield, Ohio 44906; (10) Marietta City Health Department, 304 Putnam Street, Marietta, Ohio 45750; (11) Southeast District Office, Ohio Environmental Protection Agency, RR No. 3 Box 603, Logan, Ohio 43138; (12) Allen County Health Department, 405 East Market Street, Lima, Ohio 45802; (13) Portsmouth City Health Department, 740 Second Street, Portsmouth, Ohio 45662; (14) Sandusky-Erie County Health Department, Municipal Building, East Meigs Street, Sandusky, Ohio 44870; (15) North Ohio Valley Air Authority, 314 Adams Street, Steubenville, Ohio 43952; (16) Toledo Pollution Control Agency, 26 Main Street, Toledo, Ohio 43605; (17) Northwest District Office, Ohio Environmental Protection Agency, 1035 Devlac Grove Drive, Bowling Green, Ohio 43402; (18) Ross County Health Department, Health Center-University East, 50 Pohlman Road, P.O. f, 3 years from the date of promulgation
g, Notwithstanding the above, the following Ohio counties have already met the primary and secondary standards: Ashland, Brown, Carroll, Champaign, Clinton, Darke, Defiance, Fayette, Fulton, Geauga, Guernsey, Hardin, Harrison, Highland, Hocking Holmes, Jackson, Knox, Logan, Madison, Monroe, Morrow, Noble, Perry, Portage, Preble, Putnam, Shelby, Union, Van Wert, Warren, Williams, Wyandot.

2. Section 52.1881 is amended by adding a new paragraph (b) as follows:

§ 52.1881 Control strategy: Sulfur dioxide.

• • • • •

(b) Regulations for the control of sulfur dioxide in the State of Ohio.

(1) *Definitions*—All terms used in this paragraph but not specifically defined below shall have the meaning given them in the Clean Air Act or Parts 51, 52, or 60 of this Chapter.

(i) "By-product coke oven gas" means the gas produced during the production of metallurgical coke in slot-type, by-product coke batteries.

(ii) "Flue gas desulfurization" means any pollution control process which treats stationary source combustion flue gas to remove sulfur oxides.

(iii) "Fossil fuel" means natural gas, coke oven gas, petroleum, coal and any form of solid, liquid, or gaseous fuel derived from such materials.

(iv) "Fossil fuel-fired steam generating unit" means a furnace or boiler used in the process of burning fossil fuel for the purpose of producing steam by heat transfer.

(v) "Heat input" means the total gross calorific value (where gross calorific value is measured by ASTM Method D2015–66, D240–64, or D1826–64) of all fossil and non-fossil fuels burned. Where two or more fossil fuel-fired steam generating units are vented to the same stack the heat input shall be the aggregate of all units vented to the stack.

(vi) "Owner or operator" means any person who owns, leases, operates, controls, or supervises a facility, building, structure, or installation which directly or indirectly results or may result in emissions of any air pollutant for which a national standard is in effect.

(vii) "Primary zinc smelter" means any installation engaged in the production, or any intermediate process in the production, of zinc or zinc oxide from the zinc sulfide ore concentrates through the use of pyrometallurgical techniques.

(viii) "Process" means any source operation including any equipment, devices, or contrivances and all appurtenances thereto, for changing any material whatever or for storage or handling of any materials, the use of which may cause the discharge of an air contaminant into the open air, but not including that equipment defined as fossil fuel fired steam generating units in these regulations. Duplicate or similar parallel operations within a structure, building, or shop shall be considered as a single process for purposes of this regulation.

(ix) "Process weight" means the total weight of all materials and solid fuels introduced into any specific process. Liquid and gaseous fuels and combustion air will not be considered as part of the process weight unless they become part of the product. For a cyclical or batch operation, the process weight per hour will be derived by dividing the total process weight by the number of hours from the beginning of any given process to the completion thereof, excluding any time during which the equipment is idle. For a continuous operation, the process weight per hour will be derived by dividing the process weight for the number of hours in a given period of time by the number of hours in that period. For fluid catalytic cracking units, process weight shall mean the total weight of material introduced as fresh feed to the cracking unit. For sulfuric acid production units, the nitrogen in the air feed shall not be included in the calculation of process weight.

(x) "Run" means the net period of time during which an emission sample is collected. Unless otherwise specified, a run may be either intermittent or continuous within the limits of good engineering practice as determined by the Administrator.

(xi) "Source operation" means the last operation preceding the emission of an air contaminant, which operation (a) results in the separation of the air contaminant from process materials or in the conversion of the process materials into air contaminants, as in the case of combustion of fuel; and (b) is not primarily an air pollution abatement operation.

(xii) "Stack" means any chimney, flue, vent, roof monitor, conduit or duct arranged to vent emissions to the ambient air.

(xiii) "Sulfur recovery plant" means any plant that recovers elemental sulfur from any gas stream.

(xiv) "Sulfuric acid production unit" means any facility producing sulfuric acid by the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, organic sulfides and mercaptans, or acid sludge.

(xv) "Total rated capacity" means the sum of the rated capacities of all fuel-burning equipment connected to a common stack. The rated capacity shall be the maximum guaranteed by the equipment manufacturer or the maximum normally achieved during use as determined by the Administrator, whichever is greater.

(2) *Test Methods and Procedures*—Unless specified below, the test methods and procedures used for determining compliance with the applicable subparagraphs of § 52.1881(b) shall be those prescribed in Part 60 of this chapter. Compliance tests shall be conducted under such conditions as the Administrator shall specify based on representative performance of the affected facility. Notification and recordkeeping procedures shall be those prescribed in § 60.7 of this chapter. The owner or operator shall make available to the Administrator such records as may be necessary to determine the conditions of the performance tests. A compliance test shall consist of at least three runs.

(i) The test methods and procedures used for determining compliance for any sulfur recovery plant subject to applicable subparagraph, of § 52.1881(b) shall be those prescribed in § 60.46 of this chapter with the exception that the maximum amount of sulfur dioxide sampled by Method 6 shall not exceed 50 percent of the stoichiometric amount of hydrogen peroxide absorbent.

(ii) The test methods and procedures used for determining compliance for any sulfuric acid production unit, or any primary zinc smelter subject to the applicable subparagraphs of § 52.1881(b) shall be those prescribed in § 60.85 of this chapter.

(iii) The test methods and procedures used to determine the compliance of any stack venting any fossil fuel-fired steam generating units subject to the applicable subparagraphs of § 52.1881(b) shall be those prescribed in § 60.46 of this chapter. The test methods for determining the sulfur content of fuels shall be those specified in § 60.45 of this chapter.

(3) *Severability*—If any provision of these regulations or the application thereof to any person or circumstances is held to be invalid, such invalidity shall not affect other provisions or application of any other part of these regulations which can be given effect without the invalid provisions or application, and to this end the provisions of these regulations and the various applications thereof are declared to be severable.

(4) *Submission of Information*—The submission of any information required under § 52.1882 shall be made to the Director, Enforcement Division, U.S. Environmental Protection Agency, Region V, 230 South Dearborn, Chicago, Illinois, 60604, Attention Air Compliance Section.

(5) For purposes of this regulation, stack and boiler identification numbers used in this paragraph were derived from correspondence submitted to the U.S. EPA by the affected owners or operators, and may be found in the record supporting this rulemaking.

(6) This paragraph contains no applicable provisions in the following counties of Ohio: Ashland, Brown, Carroll, Champaign, Clinton, Darke, Defiance, Fayette, Fulton, Geauga, Guernsey, Hardin, Harrison, Highland, Hocking, Holmes, Jackson, Knox, Logan, Madison, Monroe, Morrow, Noble, Perry, Portage, Preble, Putnam, Shelby, Union, Van Wert, Warren, Williams and Wyandot, nor does it apply to facilities equal to or less than 10 million BTU per hour total aggregate rated capacity of all units at a facility.

(7)–(10) Reserved.

(11) In Adams County:

(i) The Dayton Power and Light Company or any subsequent owner or operator of the Stuart Power Plant in Adams County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Stuart Plant in excess of 3.16 pounds of sulfur dioxide per million BTU actual heat input.

(ii) In lieu of meeting subparagraph (11)(i), the Dayton Power and Light Company may elect, in accordance with the compliance schedule provisions of § 52.1882, to comply with the emission limitations which will satisfy the following equation:

(A) $0.0791\ (EL_1+EL_2+EL_3+EL_4 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation, each stack is identified as follows:

Stack No.:	Boiler identification
1	1
2	2
3	3
4	4

(12) In Allen County:

(i) The Ford Motor Company or any subsequent owner or operator of the Ford Motor Company facilities at Allen County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 3.40 pounds of sulfur dioxide per million BTU actual heat input.

(ii) The present or any subsequent owner or operator of the Lima State Hospital at Allen County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 5.39 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The Vistron Corporation or any subsequent owner or operator of the Vistron Corporation facilities at Allen County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 1.27 pounds of sulfur dioxide per million BTU actual heat input.

(iv) The Standard Oil Company or any subsequent owner or operator of the Standard Oil Company facilities at Allen County, Ohio shall not cause or permit the emission of sulfur dioxide in excess of the rates specified below:

(A) 100 pounds of sulfur dioxide per 1000 pounds of sulfur processed at the Claus unit.

(B) 0.30 pounds of sulfur dioxide per 1000 pounds of petroleum products at the Fluid Catalytic Cracker/Carbon Monoxide Boiler.

(C) 11.00 pounds of sulfur dioxide per ton of production at the Trolumen unit.

(D) 0.71 pounds of sulfur dioxide per million BTU actual heat input at the Iso Stabilizer and Split Heaters—B002.

(E) 0.21 pounds of sulfur dioxide per million BTU actual heat input at the Vac I Heater—B012.

(F) 0.13 pounds of sulfur dioxide per million BTU actual heat input from all remaining process heaters and fossil fuel-fired steam generators.

(13) In Ashtabula County:

(i) The Cleveland Electric Illumination Company or any subsequent owner or operator of the Ashtabula Power Plant in Ashtabula County, Ohio shall not cause or permit the emission of sulfur dioxide from any of the stacks 1, 2, and 3 at the Ashtabula Plant in excess of 2.40 pounds of sulfur dioxide per million BTU actual heat input. Emissions of sulfur dioxide from stack 4 at the Ashtabula Plant shall not exceed 9.10 pounds of sulfur dioxide per million BTU actual heat input. Emissions of sulfur dioxide from stack 5 at the Ashtabula plant shall not exceed 8.20 pounds of sulfur dioxide per million BTU actual heat input.

(ii) The RMI Corporation, or any subsequent owner or operator of the RMI Corporation metal reduction plant in Ashtabula County, Ohio shall not cause or permit emissions of sulfur dioxide in excess of 4.80 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The RMI Corporation, or any subsequent owner or operator of the RMI Corporation sodium plant at Ashtabula County, Ohio shall not cause or permit the emissions of sulfur dioxide in excess of 2.70 pounds of sulfur dioxide per million BTU actual heat input.

(iv) The General Tire and Rubber Company, or any subsequent owner or operator of the General Tire and Rubber Company Plant at Ashtabula County, Ohio shall not cause or permit the emissions of sulfur dioxide in excess of 1.30 pounds of sulfur dioxide per million BTU actual heat input.

(v) The New Jersey Zinc Company or any subsequent owner or operator of New Jersey Zinc Company Plant at Ashtabula County, Ohio shall not cause or permit the emission of sulfur dioxide in excess of 1.50 pounds of sulfur dioxide per million BTU actual heat input at any oil burning unit.

(14) In Athens County:

(i) No owner or operator of any fossil fuel-fired steam generating unit, unless otherwise specified below, shall cause or permit the emission of sulfur dioxide from any stack in excess of 7.50 pounds of sulfur dioxide per million BTU actual heat input.

(ii) The Columbus and Southern Ohio Power Company or any subsequent owner or operator of the Poston Power Plant in Athens County, Ohio shall not cause or permit the emission of sulfur dioxide from stacks 1 and 2 at the Poston Plant in excess of 3.94 pounds of sulfur dioxide per million BTU actual heat input. Stack number three is subject to New Source Performance Standards and is limited to 1.2 pounds of sulfur dioxide per million BTU of actual heat input.

(iii) In lieu of meeting subparagraph (14)(ii), the Columbus and Southern Ohio Power Company may elect in accordance with the compliance schedule provisions of § 52.1882, to comply with the emission limitations which will satisfy all of the following equations:

(A) $0.1607\ EL_1+0.0757\ EL_2 \leq 1$
(B) $0.1315\ EL_1+0.1219\ EL_3 \leq 1$
(C) $0.1067\ EL_2+0.1220\ EL_3 \leq 1$

where EL_i is the emission limitation (in pounds of sulfur dioxide per million BTU of actual heat input) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1, 2
2	3, 4
3	5, 6

(15) In Auglaize County, the Goodyear Tire and Rubber Company, or any subsequent owner or operator of the Goodyear Tire and Rubber Company facilities in Auglaize County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 4.20 pounds of sulfur dioxide per million BTU actual heat input.

(16) In Belmont County:

(i) The Wheeling Pittsburgh Steel Company or any subsequent owner or operator of the Martins Ferry Steel Plant in Belmont County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Martins Ferry facility in excess of 2.60 pounds of sulfur dioxide per million BTU actual heat input.

(17) In Butler County, Ohio:

(i) No present or subsequent owner or operator of any fossil fuel-fired steam generating unit(s) located in Butler County, Ohio shall cause or permit sulfur dioxide emissions from any stack in excess of 1.40 pounds of sulfur dioxide per million BTU actual heat input.

(ii) No present or any subsequent owner or operator of a by-product coke oven located in Butler County, Ohio, shall cause or permit the combustion of by-product coke oven gas containing a total sulfur content expressed as hydrogen sulfide in excess of 100 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas or the emission of sulfur dioxide from any stack at this facility in excess of 0.50 pounds of sulfur dioxide per million BTU actual heat input.

(18) In Clark County:

(i) The Ohio Edison Company or any subsequent owner or operator of the Mad River Power Plant in Clark County, Ohio, shall not cause or permit the emission of sulfur dioxide from any of the stacks 1, 2, and 3 at the Mad River Plant in excess of 4.62 pounds of sulfur dioxide per million BTU actual heat input. Emissions of sulfur dioxide from stacks 4 and 5 at the Mad River Plant shall not be in excess of 1.00 pounds of sulfur dioxide per million BTU actual heat input.

(ii) In lieu of meeting subparagraph (18)(i), the Ohio Edison Company may elect for stacks 1, 2, and 3 only, in accordance with the compliance schedule provisions of § 52.1882, to comply with

V 41 1 68
AUG 27 76
UMI

the emission limitations which will satisfy all of the following equations:

(A) $0.0995\ (EL_1+EL_2)+0.0173\ EL_3 \leq 1$
(B) $0.0498\ (EL_1+EL_2)+0.0516\ EL_3 \leq 1$
(C) $0.0735\ (EL_1+EL_2)+0.0190\ EL_3 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1
2	2
3	3
4	A (Turbine)
5	B (Turbine)

(19) In Clermont County:

(i) The Cincinnati Gas & Electric Company or any subsequent owner or operator of the Beckjord Power Plant in Clermont County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at the Beckjord plant in excess of 2.02 pounds of sulfur dioxide per million BTU actual heat input.

(ii) In lieu of subparagraph (19) (i) the Cincinnati Gas and Electric Company may elect, in accordance with the compliance schedule provisions of § 52.1882, to comply with the emission limitations which will satisfy all of the following equations:

(A) $0.1426\ EL_1+0.1629\ EL_2+0.0667\ EL_3+0.0823\ EL_4+0.0122\ EL_5 \leq 1$
(B) $0.1252\ EL_1+0.1349\ EL_2+0.1003\ EL_3+0.1192\ EL_4+0.0155\ EL_5 \leq 1$
(C) $0.0337\ EL_1+0.0353\ EL_2+0.0382\ EL_3+0.0451\ EL_4+0.0709\ EL_5 \leq 1$
(D) $0.1334\ EL_1+0.1492\ EL_2+0.0740\ EL_3+0.0904\ EL_4+0.0247\ EL_5 \leq 1$
(E) $0.0249\ EL_1+0.0257\ EL_2+0.0283\ EL_3+0.0332\ EL_4+0.0841\ EL_5 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler Identification
1	1
2	2
3	3
4	4
5	5, 6

(20) In Columbiana County, no present or any subsequent owner or operator of any fossil fuel-fired steam generating unit(s) operating in Columbiana County, Ohio shall cause or permit emission of sulfur dioxide from any stack in excess of 4.40 pounds of sulfur dioxide per million BTU actual heat input.

(21) In Coshocton County:

(i) The Columbus and Southern Ohio Power Company or any subsequent owner or operator of the Conesville Plant in Coshocton County, Ohio shall not cause or permit the emission of sulfur dioxide from any of the stacks 1, 2, and 3 at the Conesville Plant in excess of 3.78 pounds of sulfur dioxide per million BTU actual heat input. Stack 4 at the Conesville Plant is subject to New Source Performance Standards and is limited to 1.2 pounds of sulfur dioxide per million BTU actual heat input.

(ii) In lieu of meeting subparagraph (21) (i), the Columbus and Southern Ohio Power Company may elect for stacks 1, 2, and 3 only, in accordance with the compliance schedule provision of § 52.1882, to comply with the emission limitations which will satisfy all of the following equations:

(A) $0.1219\ EL_1+0.0906\ EL_2+0.0524\ EL_3 \leq 1$
(B) $0.0547\ EL_1+0.0327\ EL_2+0.0838\ EL_3 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1, 2
2	3
3	4
4	5, 6

(22) In Crawford County, no present or any subsequent owner or operator of any fossil fuel-fired steam generating unit(s) operating in Crawford County, Ohio, shall cause or permit emissions of sulfur dioxide from any stack in excess of 9.60 pounds of sulfur dioxide per million BTU actual heat input.

(23) In Cuyahoga County, no owner or operator, unless otherwise specified in this subparagraph, shall cause or permit emission of sulfur dioxide from any stack in excess of the rates specified below:

(i) For fossil fuel-fired steam generating units between 10.0 and 350×10^6 BTU's per hour total rated capacity of heat input, the emission rate in pounds of sulfur dioxide per million BTU actual heat input shall be calculated by the following equation:

$$EL=7.014\ Q_m^{-0.3014}$$

where Q_m is the total rated capacity of heat input in million BTU per hour and EL is the allowable emission rate in pounds of sulfur dioxide per million BTU actual heat input.

(ii) For fossil fuel-fired units equal to or greater than 350 million BTU per hour total rated capacity, 1.20 pounds of sulfur dioxide per million BTU of actual heat input.

(iii) (A) The Republic Steel Corporation or any subsequent owner or operator of Republic Steel facilities located in Cuyahoga County, Ohio shall not cause or permit the combustion of by-product coke oven gas at the basic oxygen furnace shop, open hearth shop, blast furnaces 1, 4 and 5, foundry, P-Anneals 1–4, and car thaw 1–1 through 1–4, containing a total sulfur content expressed as hydrogen sulfide in excess of 240 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas or the emission of sulfur dioxide from any stack at the above facilities in excess of 1.20 pounds of sulfur dioxide per million BTU actual heat input.

(B) The Republic Steel Corporation or any subsequent owner or operator of the Republic Steel facilities located in Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack attached to the Open Hearth precipitator units 111 and 112, 98-inch slab furnace units 1, 2, 3, 4, and 5, 84-inch slab furnace units 1 and 2, and the sinter plant at this facility in excess of 0.00 pounds of sulfur dioxide per million BTU actual heat input.

(iv) The Cleveland Electric Illuminating Company or any subsequent owner or operator of the Lake Shore Power Plant located in Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Lake Shore Plant in excess of the following rates:

(A) 1.30 pounds of sulfur dioxide per million BTU of actual heat input from unit no. 18.

(B) 1.90 pounds of sulfur dioxide per million BTU of actual heat input for units 91 through 94.

(v) The City of Cleveland or any subsequent owner or operator of the Division Pumping Station located at Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Division Pumping Station in excess of 4.20 pounds of sulfur dioxide per million BTU of actual heat input.

(vi) No present or subsequent owner or operator of the fossil fuel-fired steam generating units listed herein shall cause or permit the emission of sulfur dioxide from any stack attached to the identified boilers in excess of 1.00 pounds of sulfur dioxide per million BTU of actual heat input:

Company	Boiler identification
(A) Cleveland Electric Illuminating Co., Hamilton Ave. Steam Plant	All boilers.
(B) Republic Steel	234, 1, 2, A, B, and C.
(C) Addressograph	1, 2, and 3.
(D) General Electric Co.	1 and 2.
(E) Jones and Laughlin Steel	30.

(vii) No present or subsequent owner or operator of the fossil fuel-fired steam generating units listed herein shall cause or permit the emission of sulfur dioxide from any stack attached to the identified boilers in excess of 0.50 pounds of sulfur dioxide per million BTU of actual heat input:

Company	Boiler identification
(A) Jones & Laughlin Steel	22, 24, 25, 26, 27, 28, 29, 31, 32, 33, 34, and 35.
(B) U.S. Steel, Cuyahoga-Lorain works	1, 2, 3, 4, 5, and 6.
(C) DuPont	18.
(D) Harshaw Chemical	7 and 8.
(E) Standard Oil of Ohio	7, 9, and 10.

(viii) The United States Steel Corporation, Cuyahoga Works or any subsequent owner or operator of the Cuyahoga Works in Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack attached to boilers 3 through 7 at the Cuyahoga Works in excess of 1.30 pounds of sulfur dioxide per million BTU of actual heat input.

(ix) The Hupp Company or any subsequent owner or operator of Hupp facilities in Cuyahoga County, Ohio shall not cause or permit emission of sulfur dioxide from any stack attached to boilers 1 through 3 at this facility in excess of 3.50 pounds of sulfur dioxide per million BTU of actual heat input.

(x) The Chase Bag Company or any subsequent owner or operator of Chase Bag facilities in Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack attached to boilers 1 & 2 at this facility in excess of 4.20 pounds of sulfur dioxide per million BTU of actual heat input.

(xi) The General Electric Company or any subsequent owner or operator of General Electric facilities in Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack attached to boilers 3 and 5 at this facility in excess of 3.10 pounds of sulfur dioxide per million BTU of actual heat input.

(xii) The General Motors Corporation or any subsequent owner or operator of the Fisher Body plant at Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack attached to boilers 7, 8, and 9 at this facility in excess of 2.10 pounds of sulfur dioxide per million BTU of actual heat input.

(xiii) No present or subsequent owner or operator of the Medical Center located in Cuyahoga County, Ohio shall cause or permit the emission of sulfur dioxide from any stack attached to boilers 3 through 8 at the Medical Center in excess of 4.60 pounds of sulfur dioxide per million BTU of actual heat input.

(xiv) The Ford Motor Company or any subsequent owner or operator of the Ford Motor Company facilities located at Cuyahoga County, Ohio shall not cause or permit emissions of sulfur dioxide from any stack at these facilities in excess of the rates specified below:

(A) 1.20 pounds of sulfur dioxide per million BTU actual heat input for boilers 1, 2, and 3 at the Stamping Plant.

(B) 4.20 pounds of sulfur dioxide per million BTU actual heat input for boilers 1, 2, 3, 4, and 5 at the Engine Plant #2.

(xv) No present or subsequent owner or operator of the Highland View Hospital shall cause or permit the emission of sulfur dioxide from any stack at the Highland View Hospital in excess of the rates specified below:

(A) 2.90 pounds of sulfur dioxide per million BTU of heat input for boilers 3 and 4.

(B) 1.50 pounds of sulfur dioxide per million BTU of heat input for boilers and 1 and 2.

(xvi) The Allied Chemical Company or any subsequent owner or operator of the Allied Chemical Company sulfuric acid production units at Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any unit in excess of 4.8 pounds of sulfur dioxide per ton of 100% sulfuric acid produced.

(xvii) No owner or operator, unless otherwise specified in this subparagraph, shall cause or permit the combustion of byproduct coke oven gas from any stack containing a total sulfur content expressed as hydrogen sulfide in excess of 170 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas.

(xviii) No owner or operator of any process equipment, unless otherwise specified in this subparagraph, shall cause or permit the emission of sulfur dioxide from any stack in excess of 6.00 pounds of sulfur dioxide per ton of actual process weight input.

(xix) The Harshaw Chemical Company or any subsequent owner or operator of the Harshaw Chemical Company facilities at Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 1.90 pounds of sulfur dioxide per ton of actual process weight input.

(xx) The Dupont Company or any subsequent owner or operator of the Dupont Company sulfuric acid production units at Cuyahoga County, Ohio shall not cause or permit the emission of sulfur dioxide in excess of 10.0 pounds of sulfur dioxide per ton of 100% sulfuric acid production.

(24) In Delaware County, no present or subsequent owner or operator of any fossil fuel-fired steam generating unit(s) operating in Delaware County, Ohio, shall cause or permit emission of sulfur dioxide from any stack in excess of 4.00 pounds of sulfur dioxide per million BTU actual heat input.

(25) In Erie County:

(i) No present or any subsequent owner or operator of any fossil fuel-fired steam generating unit(s) shall cause or permit emission of sulfur dioxide from any stack in excess of 1.60 pounds of sulfur dioxide per million BTU actual heat input.

(ii) No present or any subsequent owner or operator of any process equipment, shall cause or permit the emission from any stack into the atmosphere of any process gas stream containing sulfur dioxide in excess of 9.50 pounds of sulfur dioxide per ton of actual process weight input.

(26) In Fairfield County:

(i) The Diamond Power Speciality Company or any subsequent owner or operator of the Diamond Power facility in Fairfield County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Diamond Power facility in excess of 6.90 pounds of sulfur dioxide per million BTU actual heat input.

(ii) The Crown-Zellerbach Corporation or any subsequent owner or operator of the Crown-Zellerbach facility in Fairfield County, Ohio shall not cause or permit the emission of sulfur dioxide from the stack attached to #2 boiler at the Crown-Zellerbach facility in excess of 7.00 pounds of sulfur dioxide per million BTU actual heat input.

(27) In Franklin County, no owner or operator of the following types of facilities unless otherwise specified in this subparagraph, shall cause or permit emission of sulfur dioxide from any stack in excess of the rates specified below:

(i) For fossil fuel-fired steam generating unit between 10.0 and 50.0 x 10^6 BTU per hour total rated capacity of heat input, the emission rate in pounds of sulfur dioxide per million BTU actual heat input shall be calculated by the following equation:

$$EL=8.088Q_m^{-0.4307}$$

where Q_m is the total rated capacity of heat input in million BTU per hour and EL is the allowable emission rate in pounds of sulfur dioxide per million BTU actual heat input.

(ii) For fossil fuel-fired steam generating unit(s) equal to or greater than 50.0×10^6 BTU per hour total rated capacity of heat input, the emission limitation shall be 1.50 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The present or any subsequent owner or operator of the Columbus State Institution in Franklin County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 3.80 pounds of sulfur dioxide per million BTU actual heat input.

(iv) The present or any subsequent owner or operator of the Columbus State Hospital in Franklin County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 4.10 pounds of sulfur dioxide per million BTU actual heat input.

(v) The present or any subsequent owner or operator of Ross Laboratory in Franklin County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 4.80 pounds of sulfur dioxide per million BTU actual heat input.

(vi) The present or any subsequent owner or operator of the Rickenbacker Air Force Base in Franklin County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 2.20 pounds of sulfur dioxide per million BTU actual heat input.

(vii) The present or any subsequent owner or operator of the Capital City Products facility in Franklin County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 3.10 pounds of sulfur dioxide per million BTU actual heat input.

(viii) The present or any subsequent owner or operator of the Westinghouse Electric facility in Franklin County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 2.20 pounds of sulfur dioxide per million BTU actual heat input.

(ix) The present or any subsequent owner or operator of the Naval Weapons Industrial Reserve facility in Franklin County shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 1.06 pounds of sulfur dioxide per million BTU actual heat input.

(x) No owner or operator of any primary zinc smelter shall cause or permit the emission of sulfur dioxide from the plant in excess of the amount prescribed by the following equation:

$$Y=0.564X^{0.85}$$

V 41 168 AUG 27 76 UMI

where X is the total sulfur feed expressed as elemental sulfur in the smelter input stream in lbs/hour and Y is the allowable sulfur dioxide emission rate in lbs/hour from all stacks combined.

(xi) Except as provided in subparagraph (27)(x) of this paragraph, no owner or operator of any process equipment shall cause or permit the emission from any stack into the atmosphere of any process gas stream containing sulfur dioxide in excess of 2.40 pounds of sulfur dioxide per ton of actual process weight input.

(28) In Gallia County:

(i) The Ohio Power Company or any subsequent owner or operator of the Gavin Power Plant in Gallia County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Gavin facility in excess of 9.50 pounds per million BTU actual heat input.

(ii) The Ohio Valley Electric Company or any subsequent owner or operator of the Kyger Creek Power Plant in Gallia County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Kyger Creek facility in excess of 8.20 pounds of sulfur dioxide per million BTU actual heat input.

(29) In Greene County:

(i) No owner or operator of any process equipment shall cause or permit the emission of sulfur dioxide from any stack in excess of that permitted by the following equation:

$$EL = 563.3P^{-0.9327}$$

where EL is the allowable emission rate in pounds of sulfur dioxide per hour and P is the actual process weight input rate in tons per hour.

(ii) The present or any subsequent owner of the Wright Patterson Air Force Base in Greene County, Ohio shall not cause or permit emissions of sulfur dioxide in excess of 0.38 pounds of sulfur dioxide per million BTU actual heat input from all stacks at building 271; emissions of sulfur dioxide in excess of 0.81 pounds of sulfur dioxide per million BTU actual heat input from all stacks at building 6770; emissions of sulfur dioxide in excess of 0.33 pounds of sulfur dioxide per million BTU actual heat input from all stacks at building 666; emissions of sulfur dioxide in excess of 0.79 pounds of sulfur dioxide per million BTU actual heat input from all stacks at building 1240; emissions of sulfur dioxide in excess of 0.93 pounds of sulfur dioxide per million BTU actual heat input from all stacks at building 170.

(iii) No present or any subsequent owner of the Antioch College at Greene County, Ohio shall cause or permit the emissions of sulfur dioxide from any stack at Antioch College in excess of the rates specified below:

(A) 6.20 pounds of sulfur dioxide per million BTU actual heat input for any fossil fuel-fired steam generating unit burning coal.

(B) 1.40 pounds of sulfur dioxide per million BTU actual heat input for any fossil fuel-fired steam generating unit burning oil.

(iv) No present or any subsequent owner of Central State University at Greene County, Ohio shall cause or permit emissions of sulfur dioxide from any stack at Central State University in excess of the rates specified below:

(A) 4.30 pounds of sulfur dioxide per million BTU actual heat input from Stack 1.

(B) 0.30 pounds of sulfur dioxide per million BTU actual heat input from Stack 2.

(30) In Hamilton County:

(i) No owner or operator of any fossil fuel-fired steam generating unit(s) located in Hamilton County, Ohio, unless otherwise specified in this subparagraph, shall cause or permit sulfur dioxide emissions from any stack in excess of 2.00 pounds of sulfur dioxide per million BTU actual heat input.

(ii) The Cincinnati Gas and Electric Company or any subsequent owner or operator of the Miami Fort Power Plant in Hamilton County, Ohio shall not cause or permit the emissions of sulfur dioxide, from stack number 2 at the Miami Fort Plant in excess of 0.30 pounds of sulfur dioxide per million BTU actual heat input, from stacks 3 and 4 at the Miami Fort Plant in excess of 3.30 pounds of sulfur dioxide per million BTU actual heat input, from stack 5 at the Miami Fort Plant in excess of 5.50 pounds of sulfur dioxide per million BTU actual heat input. Stack number 6 is subject to Federal New Source Performance Standards and is limited to 1.20 pounds of sulfur dioxide per million BTU of actual heat input. Stacks at the Miami Fort Power Plant are identified as follows:

Stack No.	Boiler No.
2	3
3	4 & 5
4	6
5	7
6	8

(iii) No owner or operator of a sulfur acid production unit(s) shall cause or permit the emissions of sulfur dioxide from the unit(s) in excess of 21.0 pounds of sulfur dioxide per ton of 100% sulfuric acid produced.

(iv) No owner or operator of any fluidized catalytic cracking unit located in Hamilton County, Ohio shall cause or permit sulfur dioxide emissions from any unit in excess of 0.2 pounds of sulfur dioxide per thousand pounds of charging feed stock.

(31) In Hancock County:

(i) No owner or operator of any fossil fuel-fired steam generating unit(s) located in Hancock County, Ohio, unless otherwise specified in the subparagraph, shall cause or permit sulfur dioxide emissions from any stack in excess of 5.20 pounds of sulfur dioxide per million BTU actual heat input.

(ii) The Northern Ohio Sugar Company, or any subsequent owner or operator of the Northern Ohio Sugar Company facilities in Hancock County, Ohio shall not cause or permit sulfur dioxide emissions from any stack in excess of 2.50 pounds of sulfur dioxide per million BTU actual heat input.

(32) In Henry County:

(i) No owner or operator of any oil-fired fossil fuel steam generating unit, unless otherwise specified shall cause or permit emission of sulfur dioxide from any stack in excess of 2.10 pounds per million BTU actual heat input.

(ii) The present or subsequent owner or operator of the City of Napoleon Power Plant in Henry County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Napoleon Power Plant in excess of 0.0 pounds of sulfur dioxide per million BTU actual heat input.

(33) In Huron County, no owner or operator of any fossil fuel-fired steam generating unit shall cause or permit emission of sulfur dioxide from any stack in excess of 8.00 pounds of sulfur dioxide per million BTU actual heat input.

(34) In Jefferson County, no owner or operator, unless otherwise specified in this subparagraph, shall cause or permit sulfur dioxide emissions from any stack in excess of the rates specified below:

(i) For fossil fuel-fired steam generating unit(s) burning coal: 1.80 pounds of sulfur dioxide per million BTU actual heat input.

(ii) For fossil fuel-fired steam generating unit(s) burning oil: 0.80 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The Kaul Clay Company or any subsequent owner or operator of the Kaul Clay Plant facilities in Jefferson County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack of this facility in excess of 2.82 pounds of sulfur dioxide per million BTU actual heat input.

(iv) The Toronto Paper Board Company or any subsequent owner or operator of the Toronto Paper Board Company plant facilities in Jefferson County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 5.96 pounds of sulfur dioxide per million BTU actual heat input.

(v) The Ohio Edison Company or any subsequent owner or operator of the Toronto Power Plant in Jefferson County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Toronto Plant in excess of 8.10 pounds of sulfur dioxide per million BTU actual heat input.

(vi) The Ohio Edison Power Company or any subsequent owner or operator of the Sammis Power Plant in Jefferson County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Sammis Plant in excess of 2.91 pounds of sulfur dioxide per million BTU actual heat input.

(vii) In lieu of meeting subparagraph (34)(vi), the Ohio Edison Company may elect, in accordance with the compliance schedule provision of § 52.1882, to comply with the emission limitations which simultaneously satisfy all of the following equations:

(A) $0.1673\ EL_1+0.1670\ EL_2+0.0072\ EL_3+0.0022\ EL_4 \leq 1$

(B) $0.0557\ (EL_1+EL_3)+0.1106\ EL_4+0.0734\ EL_5 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1, 2
2	3, 4
3	5, 6
4	7

(viii) The owner or operator of the Cardinal Power Plant in Jefferson County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Cardinal Plant in excess of 4.76 pounds of sulfur dioxide per million BTU actual heat input.

(ix) In lieu of meeting subparagraph (24)(vii), the owner or operator of the Cardinal Power Plant may elect, in accordance with the compliance schedule provision of § 52.1882, to comply with the emission limitations which satisfy the following equation.

(A) $0.0668\ (EL_1+EL_2)+0.0763\ EL_3 \leq 1$

where EL_i is the emission limitations (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1
2	2
3	3

(x) The Ohio Power Company or any subsequent owner or operator of the Tidd Power Plant in Jefferson County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at the Tidd Plant in excess of 1.58 pounds of sulfur dioxide per million BTU actual heat input.

(xi) In lieu of meeting subparagraph (24)(viii), the Ohio Power Company may elect, in accordance with the compliance schedule provision of § 52.1882, to comply with the emission limitations which will simultaneously satisfy all of the following equations:

(A) $.1521(EL_1+EL_2)+.3267\ EL_3 \leq 1$
(B) $.1443(EL_1+EL_2)+.3338\ EL_3 \leq 1$
(C) $.1568(EL_1+EL_2)+.3169\ EL_3 \leq 1$
(D) $.1591(EL_1+EL_2)+.3143\ EL_3 \leq 1$

where EL_i is the emission limitations (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	11
2	12
3	21

(xii) No owner or operator of a by-product coke oven shall cause or permit the combustion of by-product coke oven gas containing a total sulfur content expressed as hydrogen sulfide in excess of 50 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas.

(xiii) The Wheeling Pittsburg Steel Company or any subsequent owner or operator of the Yorkville Steel Plant facility in Jefferson County, Ohio shall not cause or permit the emission of sulfur dioxide from any fossil fuel-fired steam generating unit stack at the Yorkville facility in excess of 4.20 pounds of sulfur dioxide per million BTU actual heat input.

(35) In Lake County, no owner or operator of the following types of facilities, unless otherwise specified in this subparagraph, shall cause or permit emissions from stack in excess of the rates specified below:

(i) For fossil fuel-fired steam generating units between 10.0 and 1000×10^6 BTU per hour total rated capacity of heat input, the emission rate in pounds of sulfur dioxide per million BTU actual heat input shall be calculated by the following equation:

$$EL = 14.976Q_m^{-0.2431}$$

where Q_m is the total rated capacity of heat input in million BTU per hour and EL is the allowable emission rate in pounds of sulfur dioxide per million BTU actual heat input.

(ii) For fossil fuel-fired steam generating unit(s) equal to or greater than 1000×10^6 BTU per hour total rated capacity of heat input, 1.40 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The present or any subsequent owner or operator of the Ohio Rubber Company facility in Lake County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the facility in excess of 6.00 pounds of sulfur dioxide per million BTU actual heat input.

(iv) The present or any subsequent owner or operator of the Painesville Municipal Power Plant in Lake County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of the rates specified below:

(A) For boilers 1 through 4: 5.20 pounds of sulfur dioxide per million BTU actual heat input.

(B) Boiler number 5 is subject to New Source Performance Standards and is limited to 1.20 pounds of sulfur dioxide per million BTU actual heat input.

(v) The present or any subsequent owner or operator of the Diamond Shamrock facility in Lake County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 0.00 pounds of sulfur dioxide per million BTU actual heat input or 0.00 pounds of sulfur dioxide from any process.

(vi) The Cleveland Electric Illuminating Co. or any subsequent owner or operator of the East Lake Plant in Lake County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the East Lake Plant in excess of 1.43 pounds of sulfur dioxide per million BTU actual heat input.

(vii) In lieu of meeting subparagraph (25)(vi), the Cleveland Electric Illuminating Company may elect, in accordance with the compliance schedule provision of § 52.1882, to comply with the emission limitations which satisfy all of the following equations:

(A) $0.143(EL_1+EL_2+EL_3)+0.192\ EL_4+0.078\ EL_5 \leq 1.0$

(B) $0.174(EL_1+EL_2+EL_3)+0.108\ EL_4+0.078\ EL_5 \leq 1.0$

(C) $0.113(EL_1+EL_2+EL_3)+0.187\ EL_4+0.025\ EL_5 \leq 1.0$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.	Boiler identification
1	1
2	2
3	3
4	4
5	5

(viii) The Lubrizol Corporation, or any subsequent owner or operator of the Lubrizol facilities located in Lake County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at Lubrizol facility in excess of 20.00 pounds per ton of actual process weight input.

(36) In Lawrence County:

(i) No owner or operator, unless otherwise specified below, of any industrial process equipment or fossil fuel-fired steam generator unit(s) shall cause or permit the combustion of gasses containing a total sulfur content expressed as hydrogen sulfide in excess of 235 grains of hydrogen sulfide per 100 dry standard cubic feet of gas; or the emission of sulfur dioxide from any stack in excess of 1.22 pounds of sulfur dioxide per million BTU actual heat input.

(ii) The Marquette Cement Company or any subsequent owner or operator of the Marquette Cement Company facilities at Lawrence County, Ohio shall not cause or permit the emission of sulfur dioxide in excess of 73.0 pounds of sulfur dioxide per ton of actual process weight input.

(iii) The Dayton Malleable Iron Company or any subsequent owner or operator of the Dayton Malleable Iron Company facilities at Lawrence County, Ohio shall not cause or permit the emission of sulfur dioxide in excess of the rates specified below:

(A) 2.00 pounds of sulfur dioxide per ton of actual process weight input at the holding furnaces.

(B) 5.40 pounds of sulfur dioxide per ton of actual process weight input at the Cupola.

(iv) The Allied Chemical Company or any subsequent owner or operator of the Semet Solvay Division at Lawrence County, Ohio shall not cause or permit the combustion of gases containing a total sulfur content expressed as hydrogen sulfide in excess of 165 grains of hydrogen sulfide per 100 dry standard cubic feet of gas, or 0.86 pounds of sulfur dioxide per million BTU actual heat input, at tar processing boilers 1, 2 and 3.

(37) In Licking County, no owner or operator of any oil-fired steam generating unit(s) shall cause or permit emission of sulfur dioxide from any stack in

V 41 168 AUG 27 76 UMI

excess of 1.50 pounds of sulfur dioxide per million BTU actual heat input.

(38) In Lorain County, no owner or operator, unless otherwise specified in this subparagraph, shall cause or permit sulfur dioxide emissions from any stack in excess of the rates specified below:

(i) For fossil fuel-fired steam generating units between 10.0 and 100 million BTU per hour total rated capacity of heat input, the maximum allowable emission rate from any stack shall be calculated by the following equation:

$$EL = 21.176 Q_m^{-0.5477}$$

where Q_m is the total rated capacity of heat input in million BTU per hour and EL is the allowable emission rate in pounds of sulfur dioxide per million BTU actual heat input.

(ii) For fossil fuel-fired steam generating units equal to or greater than 100 million BTU per hour total rated capacity of heat input, the maximum allowable emission rate from any stack shall be 1.70 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The Cleveland Electric Illuminating Co. or any subsequent owner or operator of the Avon Lake Plant in Lorain County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at Avon Lake Plant in excess 1.15 pounds of sulfur dioxide per million BTU actual heat input.

(iv) In lieu of meeting subparagraph (38)(iii), the Cleveland Electric Illuminating Company may elect, in accordance with the compliance schedule provisions of § 52.1882, to comply with the emission limitations which will satisfy all of the following equations:

(A) $0.0891\ (EL_1+EL_2+EL_3+EL_4)+0.1198\ (EL_5+EL_6)+0.1578\ EL_7+0.1041\ EL_8 \leq 1$

(B) $0.0548\ (EL_1+EL_2+EL_3+EL_4)+0.0676\ (EL_5+EL_6)+0.1067\ EL_7+0.1240\ EL_8 \leq 1$

(C) $0.0909\ (EL_1+EL_2+EL_3+EL_4)+0.1356\ (EL_5+EL_6)+0.1546\ EL_7+0.0799\ EL_8 \leq 1$

(D) $0.0943\ (EL_1+EL_2+EL_3+EL_4)+0.1241\ (EL_5+EL_6)+0.1606\ EL_7+0.0844\ EL_8 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purpose of this regulation each stack is identified as follows:

Stack No.	Boiler identification
1	1 & 2
2	3 & 4
3	5 & 6
4	7 & 8
5	9
6	10
7	11
8	12

(v) The Cleveland Electric Illuminating Co. or any subsequent owner or operator of the Edgewater Plant located in Lorain County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Edgewater facility in excess of 3.40 pounds of sulfur dioxide per million BTU actual heat input.

(vi) The United States Steel Corporation or any subsequent owner or operator of the United States Steel facilities at Lorain County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at those facilities in excess of:

(A) For fossil fuel-fired steam generating units number 001 through 009: 1.20 pounds of sulfur dioxide per million BTU of actual heat input.

(B) For fossil fuel-fired steam generating units number 010 through 013: 0.50 pound of sulfur dioxide per million BTU of actual heat input.

(C) For all other fossil fuel-fired steam generating units, subparagraph (38)(i) or (38)(ii) shall apply, as applicable.

(vii) The United States Steel Corporation or any subsequent owner or operator of the United States Steel facilities at Lorain County, Ohio shall not cause or permit the combustion of by-product coke oven gas from any stack containing a total sulfur content expressed as hydrogen sulfide in excess of 75 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas or the emission of sulfur dioxide from any stack in excess of 0.40 pound of sulfur dioxide per million BTU of actual heat input with the exception that:

(A) For process operations 033 and 039, the United States Steel Corporation or any subsequent owner or operator of the United States Steel facilities at Lorain County, Ohio shall not cause or permit the combustion of by-product coke oven gas from any stack containing a total sulfur content expressed as hydrogen sulfide in excess of 35 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas or the emission of sulfur dioxide from any stack in excess of 0.10 pounds of sulfur dioxide per million BTU of actual heat input.

(viii) The General Motors Corporation or any subsequent owner or operator of the Fisher Body Plant at Lorain County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Fisher Body Plant in excess of the rates specified below:

(A) 0.80 pounds of sulfur dioxide per million BTU of actual heat input for boiler number 001 and 002.

(B) 0.90 pounds of sulfur dioxide per million BTU of actual heat input for boiler number 004.

(C) For all other fossil fuel-fired steam generating units, subparagraph (38)(i) or (38)(ii) shall apply, as applicable.

(39) In Lucas County, no owner or operator of the following types of facilities, unless otherwise specified in this subparagraph, shall cause or permit sulfur dioxide emissions from any stack in excess of the rates specified below:

(i) For fossil fuel-fired steam generating units burning coal the emission rate shall be 1.50 pounds of sulfur dioxide per million BTU actual heat input.

(ii) For fossil fuel-fired steam generating units burning oil the emission rate shall be 1.00 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The Toledo Edison Company or any subsequent owner or operator of the Bayshore Station in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at the Bayshore Station in excess of the rates specified below:

(A) 1.30 pounds of sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units burning coal.

(B) 0.40 pounds of sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units burning oil.

(iv) Standard Oil of Ohio or any subsequent owner or operator of the Standard Oil of Ohio facility located in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at this facility in excess of the rates specified below:

(A) 0.50 pounds of sulfur dioxide per million BTU actual heat input for any fossil fuel-fired steam generating unit or process operation heater.

(B) 0.30 pounds of sulfur dioxide per 1000 pounds of charging stock for catalytic cracking units.

(C) 0.11 pounds of sulfur dioxide per ton of actual process weight input for any process unless otherwise specified in this subparagraph.

(v) Standard Oil of Ohio or any subsequent owner or operator of Standard Oil of Ohio facility in Lucas County, Ohio shall not cause or permit the combustion of gasses at any flare at this facility containing a total sulfur content expressed as hydrogen sulfide (H_2S) in excess of 46 grains of hydrogen sulfide per 100 dry standard cubic feet of gas.

(vi) The Coulton Chemical Company or any subsequent owner or operator of the Coulton Chemical facility in Lucas County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Coulton Chemical facility in excess of the rates specified below:

(A) 0.30 pounds of sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units.

(B) 6.5 pounds of sulfur dioxide per ton of 100% sulfuric acid produced for sulfuric acid production units.

(vii) The Toledo Edison Company or any subsequent owner or operator of the Acme Power Plant in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack in excess of the rates specified below:

(A) 2.00 pounds of sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units burning coal.

(B) 0.80 pounds of sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units burning oil.

(viii) Gulf Oil or any subsequent owner or operator of the Gulf Oil facility in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at the Gulf Oil facility in excess of the rates specified below:

(A) 0.30 pounds of sulfur dioxide per million BTU actual heat input for any fossil fuel-fired steam generating unit or process operation heaters.

(B) 0.30 pounds of sulfur dioxide per 1000 pounds of charging stock for catalytic cracking units.

(C) 32.2 pounds of sulfur dioxide per 1000 pounds of sulfur processed for sulfur recovery plants.

(ix) The Toledo Edison Company or any subsequent owner or operator of the Water Street Steam Plant in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at the Water Street Station in excess of 0.80 pounds of sulfur dioxide per million BTU actual heat input.

(x) Phillips Petroleum Company or any subsequent owner or operator of the Toledo Philblack Plant in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at the Toledo Philblack Plant in excess of the rates specified below:

(A) 0.80 pounds of sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units.

(B) 5.45 pounds of sulfur dioxide per ton of actual process weight input for any process.

(xi) Interlake Steel or any subsequent owner or operator of the Interlake Steel facility in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at this facility in excess of the rates specified below:

(A) 0.80 pounds of sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units.

(B) 4.93 pounds of sulfur dioxide per ton of actual process weight input for any process.

(xii) Nabisco or any subsequent owner or operator of the Nabisco facility in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at this facility in excess of 1.20 pounds of sulfur dioxide per million BTU actual heat input.

(xiii) The Toledo Hospital or any subsequent owner or operator of the Toledo Hospital in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at this facility in excess of 3.50 pounds of sulfur dioxide per million BTU actual heat input.

(xiv) Sun Oil or any subsequent owner or operator of the Sun Oil facility in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at the Sun Oil facility in excess of the rates specified below:

(A) 0.50 pounds of sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units or process operation heaters.

(B) 2.0 pounds of sulfur dioxide per ton of actual process weight input for any process.

(xv) Seneca Petroleum or any subsequent owner or operator of the Seneca Petroleum facility in Lucas County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at the Seneca Petroleum facility in excess of 1.20 pounds of sulfur dioxide per million BTU actual heat input.

(40) In Mahoning County, no owner or operator, unless otherwise specified in this subparagraph, shall cause or permit the emission of sulfur dioxide in excess of the rates specified below:

(i) For fossil fuel-fired steam generating units: 0.50 pounds of sulfur dioxide per million BTU of actual heat input.

(ii) For process operations: 1.00 pounds of sulfur dioxide per ton of actual process weight input.

(iii) No owner or operator shall cause or permit the combustion of by-product coke oven gas from any stack containing a total sulfur content expressed as hydrogen sulfide in excess of 100 grains hydrogen sulfide per 100 dry standard cubic feet of coke oven gas or the emission of sulfur dioxide from any stack in excess of 0.50 pounds of sulfur dioxide per million BTU actual heat input.

(iv) The Ohio Edison Company or any subsequent owner or operator of the North Avenue Steam Plant located in Mahoning County shall not cause or permit the emission of sulfur dioxide from any stack at the North Avenue Steam Plant in excess of 2.00 pounds of sulfur dioxide per million BTU of actual heat input.

(v) Lonardo & Sons Greenhouse or any subsequent owner or operator of the Lonardo & Sons Greenhouse facilities located in Mahoning County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at Lonardo and Sons Greenhouse in excess of 2.00 pounds of sulfur dioxide per million BTU actual heat input.

(vi) Whiteacre-Greer Fireproofing or any subsequent owner or operator of the Whiteacre-Greer facilities located at Mahoning County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at Whiteacre-Greer in excess of 20 pounds of sulfur dioxide per ton of actual process weight input.

(41) In Marion County:

(i) No owner or operator of any process equipment shall cause or permit the emissions of sulfur dioxide from any stack in excess of 4.20 pounds of sulfur dioxide per million BTU actual heat input.

(ii) No owner or operator of any fossil fuel-fired steam generating unit(s) shall cause or permit the emission of sulfur dioxide from any stack in excess of 6.10 pounds of sulfur dioxide per million BTU actual heat input.

(42) In Medina County, no owner or operator of any fossil fuel-fired steam generating unit shall cause or permit the emission of sulfur dioxide from any stack in excess of 8.00 pounds of sulfur dioxide per million BTU actual heat input.

(43) In Meigs County, no owner or operator of any process shall cause or permit the emission of sulfur dioxide from any stack in excess of 11.0 pounds of sulfur dioxide per ton of actual process weight input.

(44) In Mercer County, no owner or operator of any fossil fuel-fired steam generating unit(s) shall cause or permit the emission of sulfur dioxide from any stack in excess of 8.00 pounds of sulfur dioxide per million BTU actual heat input.

(45) In Miami County:

(i) No owner or operator of any fossil fuel-fired steam generating unit, unless otherwise specified in this subparagraph, shall cause or permit the emission of sulfur dioxide from any stack in excess of 3.20 pounds of sulfur dioxide per million BTU actual heat input.

(ii) No owner or operator of any process shall cause or permit the emission of sulfur dioxide from any stack in excess of 65.0 pounds of sulfur dioxide per ton of actual process weight input.

(iii) No present or subsequent owner of the Piqua Municipal Power Plant located in Miami County, Ohio shall cause or permit the emission of sulfur dioxide from any stack in excess of 4.78 pounds of sulfur dioxide per million BTU of actual heat input.

(iv) In lieu of meeting subparagraph (45)(iii), the Piqua Municipal plant may elect, in accordance with the compliance schedule provisions of § 52.1882, to comply with the emission limitations which will satisfy all of the following equations:

(1) $.0730(EL_1+EL_2)+.0628\ EL_3 \leq 1$

(2) $.0700(EL_1+EL_2)+.0663\ EL_3 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1, 2
2	3
3	4

(46) In Montgomery County, no owner or operator of any fossil fuel-fired steam generating unit(s), unless otherwise specified in this subparagraph, shall cause or permit sulfur dioxide emissions in excess of the rates specified below:

(i) 1.60 pounds sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units.

(ii) The Dayton Power and Light Company or any subsequent owner or operator of the Longworth Street Station, the Third Street Station, the Yankee Substation, and the Monument Substation located in Montgomery County, Ohio shall not cause or permit the emission of sulfur dioxide from any diesel oil-fired electric generating unit stack at these stations in excess of 0.65 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The Dayton Power and Light Company or any subsequent owner or operator of the Tait Power Plant in Montgomery County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Tait Plant in excess of 1.25 pounds of sulfur dioxide per million BTU actual heat input for coal-fired units and 0.65 pounds of sulfur dioxide per million BTU actual heat input for diesel oil-fired electric generating units.

(iv) The Dayton Power and Light Company or any subsequent owner or operator of the Hutchings Power Plant in Montgomery County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Hutchings

V 41 168 AUG 27 76 UMI

Plant in excess of 1.20 pounds of sulfur dioxide per million BTU actual heat input for coal-fired units and 0.65 pounds sulfur dioxide per million BTU actual heat input for diesel oil-fired electric generating units.

(v) In lieu of meeting subparagraph (46)(iv), for the coal-fired units, the Dayton Power and Light Company may elect, in accordance with the compliance schedule provision of § 52.1882, to comply with the emission limitations which will satisfy the following equation:

(1) $0.230\ EL_1+0.297\ EL_2+0.306\ EL_3 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purpose of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1, 2
2	3, 4
3	5, 6

(vi) The Delco Corporation or any subsequent owner or operator of the Moraine facility in Montgomery County, Ohio shall not cause or permit the emission of sulfur dioxide from any fossil fuel-fired steam generating unit stack at the Moraine facility in excess of 1.30 pounds of sulfur dioxide per million BTU actual heat input.

(vii) The Defense Electronics Supply facility, or any subsequent owner or operator of this facility in Montgomery County, Ohio shall not cause or permit the emission of sulfur dioxide from any fossil fuel-fired steam generating unit stack at the facility in excess of .95 pounds of sulfur dioxide per million BTU actual heat input.

(viii) No owner or operator of any process equipment shall cause or permit the emission from any stack any process gas stream containing sulfur dioxide in excess of 2.60 pounds of sulfur dioxide per ton of actual process weight input.

(47) In Morgan County:

(i) The Ohio Power Company or any subsequent owner or operator of the Muskingum River Power Plant in Washington and Morgan Counties, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Muskingum River plant in excess of 6.48 pounds of sulfur dioxide per million BTU actual heat input.

(ii) In lieu of meeting subparagraph (47)(i), the Ohio Power Company may elect, in accordance with the compliance schedule provisions of § 52.1882, to comply with the emission limitations which will satisfy the following equation:

(a) $0.0902\ EL_1+0.0641\ EL_2 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1, 2, 3, 4
2	5

(48) In Muskingum County:

(i) The Ohio Power Company or any subsequent owner or operator of the Philo Power Plant in Muskingum County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at the Philo plant in excess of 1.14 pounds of sulfur dioxide per million BTU actual heat input.

(ii) In lieu of meeting subparagraph (48)(i), the Ohio Power Company may elect, in accordance with the compliance schedule provisions of § 52.1882, to comply with the emission limitations which will satisfy all of the following equations:

(A) $0.3288\ EL_1+0.3301\ EL_2+0.1583\ EL_3 \leq 1$
(B) $0.3588\ EL_1+0.3605\ EL_2+0.1557\ EL_3 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
4	41, 42, 34, 38
5	51, 52
6	6

(iii) No owner or operator of any process equipment in Muskingum County, Ohio shall cause or permit the emission of sulfur dioxide from any stack in excess of 58.0 pounds of sulfur dioxide per ton of actual process weight input.

(49) In Ottawa County:

(i) No owner or operator of any fossil fuel steam generating unit shall cause or permit the emission of sulfur dioxide from any stack in excess of 5.90 pounds of surfur dioxide per million BTU actual heat input.

(ii) No owner or operator of any process equipment shall cause or permit the emission of sulfur dioxide from any stack in excess of that permitted by the following equation:

$$EL=47.404P^{-0.639}$$

where EL is the allowable emission rate in pounds of sulfur dioxide per hour and P is the actual process weight input rate in tons per hour.

(50) In Paulding County, no owner or operator of any process equipment shall cause or permit the emission of sulfur dioxide from any stack in excess of 43.0 pounds of sulfur dioxide per ton of actual process weight input.

(51) In Pickaway County:

(i) The Columbus and Southern Ohio Power Company or any subsequent owner or operator of the Picway Power Plant in Pickaway County, Ohio, shall not cause or permit the emission of sulfur dioxide from any stack at the Picway plant in excess of 4.11 pounds sulfur dioxide per million BTU actual heat input.

(ii) In lieu of meeting subparagraph (51)(i), the Columbus and Southern Ohio Power Company may elect, in accordance with the compliance schedule provision of § 52.1882, to comply with the emission limitations which will satisfy all of the following equations:

(A) $0.0846EL_1+0.0844EL_2+0.0745EL_3 \leq 1$
(B) $0.0573EL_1+0.0569EL_2+0.0934EL_3 \leq 1$
(C) $0.0405EL_1+0.0402EL_2+0.1093EL_3 \leq 1$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purpose of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
3	3
4	4
5	5

(iii) No owner or operator of any oil-fired steam generating unit in Pickaway County, Ohio shall cause or permit the emission of sulfur dioxide from any stack in excess of 0.85 pounds of sulfur dioxide per million BTU actual heat input.

(52) In Pike County, no owner or operator of any fossil fuel-fired steam generating unit shall cause or permit the emission of sulfur dioxide from any stack in excess of 7.00 pounds of sulfur dioxide per million BTU of actual heat input.

(53) In Richland County:

(i) No owner or operator of any process equipment shall cause or permit emissions of sulfur dioxide in excess of 7.10 pounds of sulfur dioxide per ton of actual process weight input.

(ii) The Westinghouse Electric Company, or any subsequent owner or operator of the Westinghouse Electric Company facility at Richland County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 4.50 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The General Motors Corporation, or any subsequent owner or operator of the Fisher Body Division Plant at Richland County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 3.10 pounds of sulfur dioxide per million BTU of actual heat input.

(iv) The City of Shelby, or any subsequent owner or operator of the Shelby Municipal Power Plant at Richland County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 9.3 pounds of sulfur dioxide per million BTU actual heat input.

(54) In Ross County, the Mead Corporation or any subsequent owner or operator of the Mead Corporation facilities at Ross County, Ohio shall not cause or permit emission of sulfur dioxide from any stack in excess of the following rates:

(i) 4.90 pounds of sulfur dioxide per ton of actual solids input.

(ii) 0.00 pounds of sulfur dioxide per million BTU actual heat input for stacks 1, 2, 3, and 4. For purposes of this regulation each stack is identified as follows:

Stack No.	Boiler identification
1	1.
2	2.
3	3.
4	Ohilpalco No. 5.

(55) In Sandusky County:

(i) No present or subsequent owner or operator of any fossil fuel-fired steam generator unit(s) shall cause or permit emissions of sulfur dioxide from any stack in excess of 7.00 pounds of sulfur dioxide per million BTU actual heat input.

(ii) The J.E. Baker Company or any subsequent owner or operator of the J.E. Baker Company facilities in Sandusky County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 48.75 tons of sulfur dioxide per ton of actual process weight input.

(iii) The Woodville Lime Company, or any subsequent owners or operator of the Woodville Lime Company facilities in Sandusky County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 8.48 pounds of sulfur dioxide per ton of actual process weight input.

(iv) The Martin Marietta Company or any subsequent owner or operator of the Martin Marietta facilities in Sandusky County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 15.42 pounds of sulfur dioxide per ton of actual process weight input.

(v) The Ohio Lime Company or any subsequent owner or operator of the Ohio Lime Company facilities in Sandusky County, Ohio shall not cause or permit emissions of sulfur dioxide from any stack in excess of 17.04 pounds of sulfur dioxide per ton of actual process weight input.

(56) In Scioto County:

(i) Empire Detroit Steel or any subsequent owner or operator of the Empire Detroit Steel coke oven facility at Scioto County, Ohio shall not cause or permit the combustion of by-product coke oven gas from any stack containing a total sulfur content expressed as hydrogen sulfide in excess of 800 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas or the emission of sulfur dioxide from any stack in excess of 4.10 pounds of sulfur dioxide per million BTU actual heat input.

(ii) No owner or operator of any oil-fired steam generating unit shall cause or permit the emission of sulfur dioxide from any stack in excess of 0.60 pounds of sulfur dioxide per million BTU actual heat input.

(iii) No owner or operator of any coal-fired steam generating unit shall cause or permit the emission of sulfur dioxide from any stack in excess of 6.90 pounds of sulfur dioxide per million BTU actual heat input.

(57) In Seneca County:

(i) No present or any subsequent owner or operator of any fossil fuel-fired steam generating unit(s) at Seneca County, Ohio shall cause or permit the emissions of sulfur dioxide from any stack in excess of the limits specified below:

(A) 1.20 pounds of sulfur dioxide per million BTU actual heat input for oil fired units.

(B) 8.20 pounds of sulfur dioxide per million BTU actual heat input for coal fired units.

(ii) No present or any subsequent owner or operator of process equipment, unless otherwise specified in this subparagraph, shall cause or permit the emissions of sulfur dioxide from any stack in excess of 34.0 pounds of sulfur dioxide per ton of actual process weight input.

(iii) The Union Carbide Corporation, or any subsequent owner or operator of the Union Carbide Corporation facilities at Seneca County, Ohio shall not cause or permit emissions of sulfur dioxide from any stack in excess of the limits specified below:

(A) 552 pounds of sulfur dioxide per ton of actual process weight input at the calcining furnace.

(B) 176 pounds of sulfur dioxide per ton of actual process weight input at the activating furnace.

(58) In Stark County, no owner or operator of the following types of facilities, unless otherwise specified in this subparagraph, shall cause or permit emission of sulfur dioxide from any stack in excess of the rates specified below:

(i) For fossil fuel-fired steam generating units between 10.0 and 60.0 million BTU per hour total rated capacity of heat input, the emission rate in pounds of sulfur dioxide per million BTU actual heat input shall be calculated by the following equation:

$$EL=18.48Q_m^{-0.4000}$$

where Q_m is the total rated capacity of heat input in million BTU per hour and EL is the allowable emission rate in pounds of sulfur dioxide per million BTU actual heat input.

(ii) For fossil fuel-fired steam generating units equal to or greater than 60 million BTU per hour total rated capacity of heat input: 2.50 pounds of sulfur dioxide per million BTU actual heat input.

(iii) Republic Steel Corporation or any subsequent owner or operator of the Massillon facilities in Stark County, Ohio shall not cause or permit the emission of sulfur dioxide from any fossil fuel-fired steam generating unit stack at the Massillon facility in excess of 4.40 pounds of sulfur dioxide per million BTU actual heat input.

(iv) The present or any subsequent owner or operator of the Massillon State Hospital facilities in Stark County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 5.20 pounds of sulfur dioxide per million BTU actual heat input.

(v) The present or any subsequent owner or operator of the Grief Board Company facilities in Stark County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 0.50 pounds of sulfur dioxide per million BTU actual heat input.

(vi) The present or any subsequent owner or operator of the Timken Steel Company facilities in Stark County, Ohio shall not cause or permit the emission of sulfur dioxide from any fossil fuel-fired steam generating unit(s) stack at this facility in excess of the rates specified below:

(A) 1.20 pounds sulfur dioxide per million BTU actual heat input for coal-fired unit(s).

(B) 0.60 pounds of sulfur dioxide per million BTU actual heat input for oil-fired unit(s).

(vii) No owner or operator of any by-product coke oven operating in Stark County, Ohio shall cause or permit the combustion of by-product coke oven gas containing a total sulfur content expressed as hydrogen sulfide in excess of 350 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas or the emission of sulfur dioxide from any stack in excess of 1.70 pounds of sulfur dioxide per million BTU actual heat input.

(viii) No owner or operator of any process equipment in Stark County, Ohio shall cause or permit the emission of sulfur dioxide from any stack in excess of 80.0 pounds of sulfur dioxide per ton of actual process weight input.

(ix) The Ashland Oil Company, or any subsequent owner or operator of the Ashland Oil Company facilities in Stark County, Ohio shall not cause or permit sulfur dioxide emissions from any stack at this facility in excess of the emission limitations listed below for the different sources;

(A) 97.5 percent removal of sulfur dioxide from the fluidized catalytic cracking unit.

(B) 1.20 pounds of sulfur dioxide per million BTU actual heat input to the stacks identified by Ashland Oil Company as 4–16–B–11, and 4–0–B–6.

(C) 0.85 pound of sulfur dioxide per million BTU actual heat input for all remaining stacks.

(59) In Summit County, no owner or operator of the following types of facilities, unless otherwise specified in this subparagraph, shall cause or permit emissions of sulfur dioxide from any stack in excess of the rates specified below:

(i) For fossil fuel-fired steam generating units between 10.0 and 300 million BTU per hour total rated capacity of heat input, the emission rate in pounds of sulfur dioxide per million BTU actual heat input shall be calculated by the following equation:

$$EL=17.55\ Q_m^{-0.2605}$$

where Q_m is the total rated capacity of heat input in million BTU per hour and EL is the allowable emission rate in pounds of sulfur dioxide per million BTU actual heat input.

(ii) For fossil fuel-fired steam generating unit(s) equal to or greater than 300 million BTU per hour total rated capacity of heat input, 1.80 pounds of sulfur dioxide per million BTU actual heat input.

(iii) The present or subsequent owner or operator of the Diamond Crystal fa-

V41168 AUG 27 76 UMI

cility in Summit County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 6.10 pounds of sulfur dioxide per million BTU actual heat input.

(iv) The present or subsequent owner or operator of the Akwell Industries facilities in Summit County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 3.60 pounds of sulfur dioxide per million BTU actual heat input.

(v) The present or subsequent owner or operator of the Ohio Brass Company facilities in Summit County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 4.20 pounds of sulfur dioxide per million BTU actual heat input.

(vi) The present or subsequent owner or operator of the Sieberling Rubber Company facilities in Summit County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 1.00 pounds of sulfur dioxide per million BTU actual heat input.

(vii) The present or subsequent owner or operator of the Firestone Tire and Rubber Company facilities, Summit County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 1.50 pounds of sulfur dioxide per million BTU actual heat input.

(viii) The present or subsequent owner or operator of the B. F. Goodrich Tire and Rubber Company facilities in Summit County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 1.90 pounds of sulfur dioxide per million BTU actual heat input.

(ix) The Goodyear Tire and Rubber Company or any subsequent owner or operator of the Goodyear facilities in Summit County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 1.00 pounds of sulfur dioxide per million BTU actual heat input for fossil fuel-fired steam generating units and 100 pounds of sulfur dioxide per 1000 pounds of sulfur process gas steam.

(x) The present or any subsequent owner or operator of the Tecumseh Company facilities in Summit County, Ohio shall not cause or permit sulfur dioxide emissions from fossil fuel-fired steam generating unit(s) in excess of the rates specified below:

(A) 1.70 pounds sulfur dioxide per million BTU actual heat input for coal-fired units, and

(B) 0.70 pounds sulfur dioxide per million BTU actual heat input for oil-fired unit(s).

(xi) The Ohio Edison Company or any subsequent owner or operator of the Ohio Edison Company's Beech Street Power Station in Summit County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Beech Street Plant in excess of 4.10 pounds of sulfur dioxide per million BTU actual heat input.

(xii) The Ohio Edison Company or any subsequent owner or operator of the Ohio Edison Company's Gorge Plant in Summit County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Gorge Plant in excess of 2.10 pounds of sulfur dioxide per million BTU actual heat input.

(xiii) No owner or operator of any process equipment, unless otherwise specified in this subparagraph, shall cause or permit the emission of sulfur dioxide from any stack containing sulfur dioxide in excess of 17.0 pounds of sulfur dioxide per ton of actual process weight input.

(60) In Trumbull County:

(i) No owner or operator, unless otherwise specified in the subparagraph, shall cause or permit the emission of sulfur dioxide from any stack in excess of 3.00 pounds of sulfur dioxide per million BTU actual heat input for coal-fired steam generating units.

(ii) No owner or operator, unless otherwise specified in this subparagraph, shall cause or permit the emission of sulfur dioxide from any stack in excess of 1.00 pounds of sulfur dioxide per million BTU actual heat input for oil-fired steam generating units.

(iii) The Republic Steel Company or any subsequent owner or operator of the Republic Steel facilities in Trumbull County, Ohio shall not cause or permit the emission of sulfur dioxide from fossil fuel-fired steam generating unit number B001 in excess of 0.20 pounds of sulfur dioxide per million BTU actual heat input and from process operation P001 in excess of 1.00 pounds of sulfur dioxide per million BTU of actual heat input.

(iv) Republic Steel Corporation or any subsequent owner or operator of the Republic Steel facility in Trumbull County, Ohio shall not cause or permit the combustion of by-product coke oven gas containing a total sulfur content expressed as hydrogen sulfide in excess of 300 grains of hydrogen sulfide per 100 dry standard cubic feet of coke oven gas.

(v) No owner or operator of any process, unless otherwise specified in this subparagraph, shall cause or permit the emission of sulfur dioxide from any stack in excess of 2.00 pounds of sulfur dioxide per million BTU of actual heat input to the process operation.

(vi) The Ohio Edison Company or any subsequent owner or operator of the Niles Power Plant located in Trumbull County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack in excess of 5.41 pounds of sulfur dioxide per million BTU of actual heat input.

(vii) In lieu of meeting subparagraph (60)(vi), the Ohio Edison Company may elect, in accordance with the compliance schedule provisions of § 52.1882, to comply with the emission limitations which will satisfy the following equation:

$$(A)\ 0.0923\ (EL_1+EL_n) \leq 1$$

where EL_i is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purpose of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1
2	2

(viii) The United States Steel Corporation or any subsequent owner or operator of the McDonald Mills in Trumbull County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the McDonald Mills in excess of 0.50 pounds of sulfur dioxide per million BTU actual heat input.

(61) In Tuscarawas County:

(i) The present or subsequent owner or operator of the Dover Municipal Power Plant in Tuscarawas County, Ohio shall not cause or permit the emission of sulfur dioxides from any stack at this facility in excess of 4.60 pounds of sulfur dioxide per million BTU actual heat input.

(ii) No owner or operator of any process shall cause or permit the emission of sulfur dioxide from any stack in excess of 37.0 pounds of sulfur dioxide per ton of actual process weight input.

(62) In Vinton County, no owner or operator of any fossil fuel-fired steam generating unit shall cause or permit the emission of sulfur dioxide from any stack in excess of 4.80 pounds of sulfur dioxide per million BTU actual heat input.

(63) In Washington County:

(i) The Ohio Power Company or any subsequent owner or operator of the Muskingum River Power Plant in Morgan and Washington Counties, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at the Muskingum River Plant in excess of 6.48 pounds of sulfur dioxide per million BTU of actual heat input.

(ii) In lieu of meeting subparagraph (63)(i), the Ohio Power Company may elect, in accordance with the compliance schedule provisions of S52.1882, to comply with the emission limitations which will satisfy the following equation:

$$(A)\ 0.0902\ EL_1+0.0641\ EL_2 \leq 1$$

where ELi is the emission limitation (pounds per million BTU) per stack i and i is the stack number. For purposes of this regulation each stack is identified as follows:

Stack No.:	Boiler identification
1	1, 2, 3, 4
2	5

(iii) The Shell Oil Company or any subsequent owner or operator of the Shell Oil facilities at Washington County, Ohio shall not cause or permit the emission of sulfur dioxide from any stack at this facility in excess of 2.50 pounds of sulfur dioxide per million BTU actual heat input.

(64) In Wayne County, no present or subsequent owner or operator of fossil fuel-fired steam generating units at the facilities listed below shall cause or permit emissions of sulfur dioxide in excess of 7.00 pounds of sulfur dioxide per million BTU actual heat input:

(A) Morton Salt Company

(B) Packaging Corporation of America

(C) Orrville Municipal Power Plant

(65) In Wood County, no owner or operator of any fossil fuel-fired steam generating unit or process operation heater shall cause or permit the emission of sulfur dioxide from any stack in excess of 1.10 pounds of sulfur dioxide per million BTU actual heat input.

3. A new Section 52.1882 is added as follows:

§ 52.1882 Compliance Schedules.

(a) Federal compliance schedules.

(1) Except as provided in subparagraph (5) of this paragraph, the owner or operator of any process equipment subject to applicable subparagraphs of § 52.1881(b), shall comply with the compliance schedule in paragraph (a)(2) of this section.

(2) Any owner or operator of any process equipment subject to applicable paragraphs of § 52.1881(b) of this Chapter shall take the following actions to comply with the requirements of said regulation with respect to that source no later than the date specified.

(i) 8 weeks from the date of promulgation—Submit preliminary control plans to the Administrator.

(ii) 25 weeks from the date of promulgation—Submit final control plan to the Administrator.

(iii) 34 weeks from the date of promulgation—Award contracts for emissions control systems or process modification, or issue orders for purchase of component parts to accomplish emission control or process modification and notify the Administrator in writing that such action was taken.

(iv) 52 weeks from the date of promulgation—Initiate on-site construction or installation of emission control equipment or process change and notify the Administrator in writing that such action was taken.

(v) 139 weeks from the date of promulgation—Complete construction or installation of emission control equipment or process change and notify the Administrator in writing that such action was taken.

(vi) 154 weeks from the date of promulgation—Complete shakedown operations and performance test on source, submit performance test results to the Administrator and achieve final compliance with § 52.1881(b) of this chapter, as applicable.

(3) Except as provided in subparagraph (5) of this paragraph, the owner or operator of any stack venting any fossil fuel-fired steam generating unit(s) subject to § 52.1881(b) of this chapter shall comply the applicable compliance schedule in paragraph (a)(4) of this section.

(4) (i) The owner or operator of any stack venting any fossil fuel fired steam generating unit(s) subject to § 52.1881 (b) of this chapter who elects to comply with an applicable optional emission limitation specified in § 52.1881(b) of this chapter, shall notify the Administrator no later than eight weeks after the date of this promulgation of the specific emission limitations selected. Failure to select applicable optional emission limitations shall result in the facility being subject to the single uniform emission limitation for all stacks at that facility specified in § 52.1881(b). Notice received later than eight weeks after the date of promulgation shall be invalid.

(ii) The owner or operator of any fossil fuel-fired steam generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter shall notify the Administrator no later than eight weeks after the date of promulgation of his intent to utilize either low-sulfur fuel including blended or washed coal or flue gas desulfurization to comply with the requirements of said regulation.

(iii) Any owner or operator of any stack venting any fossil fuel-fired steam generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter who elects to utilize low-sulfur fuel including blended or washed coal to comply with the requirements of said regulation shall take the following actions with respect to that source no later than the date specified:

(a) 8 weeks from the date of promulgation—Submit to the Administrator a projection for 10 years of the amount of fuel by types that will be substantially adequate to enable compliance with § 52.1881(b) of this chapter, as applicable.

(b) 32 weeks from the date of promulgation—Submit data demonstrating the availability of the fuel meeting the requirements projected in subparagraph (a) to the Administrator.

(c) 36 weeks from the date of promulgation—Submit a statement to the Administrator as to whether boiler modifications will or will not be required. If modifications will be required, submit plans for such modifications.

(d) 50 weeks from the date of promulgation—Let contracts for necessary boiler modifications, if applicable, and notify the Administrator in writing that such action was taken.

(e) 60 weeks from the date of promulgation—Initiate on-site modifications, if applicable, and notify the Administrator in writing that such action was taken.

(f) 118 weeks from the date of promulgation—Complete on-site modification, if applicable, and notify the Administrator in writing that such action was taken.

(g) 122 weeks from the date of promulgation—Achieve final compliance with the emission limitation of § 52.1881 (b) of this chapter, as applicable, and notify the Administrator in writing that such action was taken.

(iv) Any owner or operator of any stack venting any fossil fuel-fired steam generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter who elects to utilize flue gas desulfurization to comply with the requirements of said regulations shall take the following actions with respect to the source no later than the date specified.

(a) 17 weeks from the date of promulgation—Let necessary contracts for construction and notify the Administrator in writing that such action was taken.

(b) 61 weeks from the date of promulgation—Initiate on-site construction and notify the Administrator in writing that such action was taken.

(c) 145 weeks from the date of promulgation—Complete on-site construction and notify the Administrator in writing that such action was taken.

(d) 156 weeks from the date of promulgation—Complete shakedown operations and performance test on source, submit performance test results to the Administrator and achieve final compliance with § 52.1881(b) of this chapter, as applicable.

(5) (i) None of the preceding subparagraphs of this paragraph shall apply to any owner or operator of a source which is presently in compliance with the applicable subparagraphs of § 52.1881 (b) of this chapter.

(ii) Any owner or operator of a source capable of emitting 100 tons of sulfur dioxide per year from all stacks at any facility who is presently in compliance with the applicable subparagraphs of § 52.1881(b) of this chapter shall so certify to the Administrator by four weeks from the date of promulgation.

(iii) Any owner or operator subject to a compliance schedule in this paragraph who elects to achieve compliance by means not covered by this paragraph may submit to the Administrator no later than six weeks from the date of promulgation a proposed alternative compliance schedule. For process equipment subject to applicable subparagraphs of 52.1881 (b) of this chapter no such compliance schedule may provide for final compliance after the final compliance date in subparagraph (2) of this paragraph. For any stack venting any fossil fuel-fired steam generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter, which will utilize low-sulfur fuel including blended or washed coal to comply with the requirements of said regulations, no such compliance schedule may provide for final compliance after final compliance date in subparagraph (4)(iii) of this paragraph. For any stack venting any fossil fuel-fired steam generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter, which will utilize flue gas desulfurization to comply with the requirements of said regulations, no such compliance schedule may provide for final compliance after the final compliance date in subparagraph (4)(iv) of this paragraph.

(iv) Any owner or operator of any process equipment subject to applicable

V 41 168 AUG 27 76 UM

subparagraphs of § 52.1881(b) of this chapter who submits an alternative compliance schedule pursuant to § 52.1882(a)(5)(iii) of this chapter shall remain subject to the provisions of § 52.1882(a)(2) of this chapter until the alternative schedule is approved by the Administrator.

(v) Any owner or operator of any stack venting any fossil fuel-fired steam generating unit(s) subject to applicable subparagraphs of § 52.1881(b) of this chapter who submits an alternative compliance schedule pursuant to § 52.1882(a)(5)(iii) of this chapter shall remain subject to the provisions of § 52.1882(a)(4) of this chapter until the alternative schedule is approved by the Administrator.

(6) Nothing in this paragraph shall preclude the Administrator from promulgating a separate schedule for any source to which the application of the compliance schedules in paragraphs (d)(2), or (4) of this section fails to satisfy the requirements of § 51.15 (b) and (c) of this Chapter.

PART IV:

DEPARTMENT OF THE TREASURY

Fiscal Service, Bureau of the Public Debt

U.S. SAVINGS BONDS, SERIES E

Dept. Circular No. 653, 9th Rev.
2nd Amendment

V 41 168 AUG 27 76 UMI

Title 31—Money and Finance: Treasury

CHAPTER II—FISCAL SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER B—BUREAU OF THE PUBLIC DEBT

PART 316—OFFERING OF UNITED STATES SAVINGS BONDS, SERIES E

The Department of the Treasury is adopting a new schedule of interest accruals for United States Savings Bonds, Series E, bearing the issue date of September 1, 1976, or thereafter, to provide therefor the minimum investment yield required by section 4 of Public Law 94–232, approved March 15, 1976. Supplemental tables of redemption values and investment yields are also being published for bonds of various earlier issue dates which will be entering their next extended maturity period.

Accordingly, Department of the Treasury Circular No. 653, Ninth Revision, dated April 23, 1974, and the tables incorporated therein, as amended, (31 CFR, Part 316), are hereby further amended to prescribe interest accruals for bonds bearing issue dates of September 1, 1976, or thereafter; to provide the table of redemption values and investment yields therefor; and, to provide tables of redemption values and investment yields for the next extended maturity period for bonds bearing issue dates of December 1, 1946, through May 1, 1948; December 1, 1956, through January 1, 1957; December 1, 1957, through May 1, 1960; and December 1, 1970, through May 1, 1972. Section 316.2 (e) and Table 1 are revised, and Tables 15–A, 16–A, 17–A, 45–A, 49–A, 50–A, 51–A, 52–A, 53–A, 54–A, 55–A, 56–A, 57–A, 58–A, 91–A, 92–A, 93–A and 97 are added, as follows:

Section 316.2 *Description of bonds.*

* * *

(e) *Investment yield (interest).* The investment yield (interest) on a Series E bond will be approximately 6 percent per annum, compounded semiannually, if the bond is held to maturity, but the yield will be less if the bond is redeemed prior thereto. A bond bearing the issue date of September 1, 1976, or thereafter, beginning in the third month from such issue date, will increase in redemption value on the first day of each month up to and including the thirtieth month from issue date so as to provide for such period an investment yield of no less than 4 per centum per annum, compounded semiannually. Thereafter, its redemption value will increase at the beginning of each successive half-year period. The interest will be paid as part of the redemption value. See Table I.

* * * * *

The foregoing revisions and amendments were effected under authority of section 22 of the Second Liberty Bond Act, as amended (49 Stat. 21, as amended; 31 U.S.C. 757c), and 5 U.S.C. 301. Notice and public procedures thereof are unnecessary as the fiscal policy of the United States is involved.

Dated: August 10, 1976.

DAVID MOSSO,
Fiscal Assistant Secretary.

1/ Month, day and year on which issues of December 1, 1973, enter each period. These are representative dates. For subsequent issue dates, substitute the month, day and year of issue on the first line, and the appropriate six-month accrual date on each succeeding line. For example: if the issue date of the bond is October 1, 1974, the entries on succeeding lines in this column would be 10/1/74, 4/1/75, 10/1/75, 4/1/76, 10/1/76, etc., to the maturity date of 10/1/79; if the issue date of the bond is July 1, 1976, the line entries would be 7/1/76, 1/1/77, 7/1/77, 1/1/78, 7/1/78, etc., to the maturity date of 7/1/81.

2/ Maturity value reached at 5 years and 0 months after issue.

U.S. SAVINGS BONDS, SERIES H

Dept. Circular No. 905,
6th Rev.
1st Amendment, 1st Supplement

V 41 168
AUG 27 76
UMI

Title 31—Money and Finance: Treasury

CHAPTER II—FISCAL SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER B—BUREAU OF THE PUBLIC DEBT

PART 332—OFFERING OF UNITED STATES SAVINGS BONDS, SERIES H

The Department of the Treasury is announcing the interest payments and investment yields for United States Savings Bonds, Series H, of various issue dates which are entering their next extended maturity periods.

Accordingly, Department of the Treasury Circular No. 905, Sixth Revision, dated March 18, 1974, and the tables incorporated therein, as amended (31 CFR, Part 332), are hereby supplemented for the purpose of providing tables showing the schedule of interest payments and investment yields for the next extended maturity period for bonds bearing issue dates of February 1, 1957, through May 1, 1958; and December 1, 1966, through May 1, 1968. Accordingly, Tables 12-A, 13-A, 14-A, 32-A, 33-A and 34-A are added as set forth below.

The foregoing supplement was effected under authority of section 22 of the Second Liberty Bond Act, as amended (49 Stat. 21, as amended; 31 U.S.C. 757c), and 5 U.S.C. 301. Notice and public procedures thereon are unnecessary as the fiscal policy of the United States is involved.

Dated: August 10, 1976.

DAVID MOSSO,
Fiscal Assistant Secretary.

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders, 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

NEW GENERAL WAGE DETERMINATION DECISIONS

Illinois	IL76–2108

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

Alabama:	
AL76–1002	Jan. 9, 1976.
California:	
CA76–5063; CA76–5064	July 16, 1976.
Idaho:	
ID76–5066	July 23, 1976.
Kentucky:	
KY76–1028	Feb. 20, 1976.
Mississippi:	
MS76–1084	Aug. 20, 1976.
Montana:	
MT76–5072	Aug. 6, 1976.
Nevada:	
NV76–5065	July 2, 1976.
NV76–5069	July 30, 1976.
NV76–5074	Aug. 6, 1976.
New Mexico:	
NM76–4141	Aug. 6, 1976.
Oklahoma:	
OK76–4017	Feb. 6, 1976.
Tennessee:	
TN76–1071	June 11, 1976.
TN76–1083	Aug. 6, 1976.
Utah:	
UT76–5052	June 25, 1976.
Washington, D.C.:	
DC76–3226	July 30, 1976.

SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being superseded and their dates of publication in the FEDERAL REGISTER are listed with each State.

Supersedeas Decision numbers are in parentheses following the numbers of the decision being superseded.

Georgia:	
GA76–1025 (GA76–1089)	Feb. 13, 1976.
Hawaii:	
HI76–5078 (HI76–5081)	Aug. 13, 1976.
Kentucky:	
KY76–1031 (KY76–1086)	Feb. 27, 1976.
New York:	
NY76–3188 (NY76–3236); NY76–3200 (NY76–3238).	June 25, 1976.
North Carolina:	
NC76–1065 (NC76–1087)	June 4, 1976.
South Carolina:	
SC76–1007 (SC76–1088)	Jan. 9, 1976.

Signed at Washington, D.C., this 20th day of August 1976.

RAY J. DOLAN,
Assistant Administrator,
Wage and Hour Division.

GROUP D	6.83	.45	.50		.07
GROUP E	5.93	.45	.50		.07
GROUP F	6.28	.45	.50		.07
GROUP G	5.26	.45	.50		.07

GROUP A: Backhoe operators, clamshell operator, conc. mix operator, cent, mix plant, conc. pump operator-Ridley or similar type, crane operator (truck, tower, crawler, or locomotive), derrick operator, dragline operator, drill operator-caisson foundation type, elevating grader operator, forklift operator that comes within the juriediction of the Operating Engineers hoisting engine operator, locomotive operator, mechanics-heavy duty, oilers on cranes with earth boring drill attached with a separate power source, concrete paving mixer operator, pile driver operator, rock crusher operator, shovel operator, trenching machine operator over 6 ft. depth capacity, well point system operator (including the operation of all pumps on project operated by the contractor) generator operator-75 K. VA. and over, tugger hoist operator, winch truck operator, hoisting material, air compressor operator, 365 C.F.M. and over furnishing air simultaneously for more than one contractor.

GROUP B: Bulldozer operator, dozer shovel operator, drill operator-Quarry master type, firemen-stationary or portable, motor grader operator, motor scraper operator (pans), pusher dozer operator, self-propelled compactor operator with blade, tract or operator with special equipment, trenching machine operator up to and including 6 ft. depth capacity.

GROUP C: Air compressor operator 600 cu. ft. and over, air compressor operator batt, of two, 300 cu. ft. and over, hydrohammer operator, concrete batch plant operator.

GROUP D: Oiler-truck or locomotive cranes

GROUP E: Oiler-unspecified, pump operator over 4" up to batteries of 4, welding machine operator, batteries of two 300 amps and over.

GROUP F: Conorete mixer operator skip types except paving mixers, concrete finishing machine operator, concrete paving machine operator, roller operator well drill operator

GROUP G: Air compressor operator up to and including 300 cu. ft. or one machine over 300 but less than 600 cu. ft. conveyor operator, belt type, sand blasting machine operator, water pump operator 4" or less. water pump operator over 4" (one only), welding machine operator 300 amps and over.

LABORERS

Group 1: All clean-up work of debris, grounds and buildings; Bridge Laborers; Construction Laborers; Dumpman; General Laborers; Limbers, Brush Loaders and Pilers; Maintenance, repair (track and roadbeds)

Group 1-a: Mason Tenders

Group 1-b: High Scaler

Group 1-c: Gunnite Operator

Group 1-d: Powderman

Group 1-e: Landscape and Irrigation Laborers

Group 2: Asphalt Shovelers; Cement Dumpers; Choker Setter and Rigger (clearing work); Concrete Chipping; Driller's Helper; Chuck Tender; Outside Nipper; Guinea Chaser (Stakeman); High Pressure Nozzleman - hydraulic monitor (over 100# pressure) excluding levee work; Loading and unloading, carrying and handling of all rods and materials for use in reinforcing concrete construction; Sloper; All pneumatic, gas and electric tools not listed in Group 1

Group 3: Asphalt Ironers and Rakers; Barko and similar type tampers; Buggymobile; Chainsaw, Faller, Logloader and Bucker; Concrete Laborers (wet or dry) including Bucket Tender for concrete; Concrete and Magnesite Mixer under 1/2 yard; Concrete Grinder; Concrete Pan Work; Concrete Saw (walking or hand type); Cribbers; Cut Granite Curb Setters; Form Raisers; Header Board; Mortar Mixers (block-brick-masonry); Jackhammer Operator; Jackson and similar type Compactors; Lagging, Sheeting, Whaling, Bracing, Trench-jacking, Hand-guided Lagging Hammer; Magnesite and Mastic workers (wet or dry); Mechanical Drillers not covered elsewhere; Pavement Breakers; Pipelayers, Caulkers, Bander; Pipewrappers, Kettlemen, Potmen and men applying asphalt, Lay-Kold, Creosote and similar type materials; Post Hole Diggers (hand held - gas, air and electric); Riprap, Stonepaver and Rockslinger, including placing of sacked concrete (wet or dry); Rotary Scarifier; Roto-tiller; Sandblasters; Tank Cleaners; Tree Climbers; Vibra-screed (bull float in connection with Laborers' work); Vibrator, Burning, Welding, Signaling and Rigging in connection with Laborers' work; Concrete Pump Machine; Joy Drill Model TWH-2A, Gardner, Denver DH-143 and similar type drills; Track Drillers, Diamond Core, Wagon Drillers and Davis Trencher T-66 or similar types

POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

Group 1: Pertsman (heavy duty shop parts room when needed); Repairman Helper

Group 2: Compressor, electrically, diesel or gas powered etc.; Hydraulic Monitor; Material Loader and/or Conveyor Operator (handling building material); Mixer Box Operator (concrete plant); Pump Operator; Spreader Boxman (with screeds); Tar Pot Fireman (power agitated)

Group 3: Oiler; Fireman; Switchman; Brakeman; Deckhand; Tar Pot Fireman; Box Operator (bunker); Locomotive (up to and including 30 tons); Roller (5 tons and under); Screedman (except asphaltic concrete paving); Self-propelled, automatically applied concrete curing machine (on streets, highways, airports and canals); Tugger Hoist, single drum

Group 4: Boom Truck or Dual Purpose "A" Frame Truck; Fork Lift or Lumber Stacker (construction job site); Material Hoist (1 drum); Straddle Truck; Ross Carrier and similar (jobsite); Dinky Operator

Group 5: Concrete Mixer (up to 2 yards); Concrete Pumps or Pumpcrete Guns; Generators, gasoline or diesel driven (100 K.W.); Lubrication and Service Engineer (mobile and grease rack); Towermobile; Welding Machine (gasoline or diesel); Agri-cat (Mini Cat)

Group 6: Combination Loader and Backhoe including Hopto (up to and including 1/2 yard); Concrete Batch Plants (wet or dry); Concrete Saws and/or Grinder (self-propelled unit on streets, highways, airports and canals); Drilling Machinery (not to apply to waterliners, wagon drills or jackhammers); High-line Cable-way Signalman; Loader (up to and including 2½ cu. yds.); Lull High Lift; Pavement Breaker; Maginnis Internal Full Slab Vibrator (on airports, highways, canals and warehouses); Mechanical Finishers (concrete) (large Clary, Johnson Bidwell Bridge Deck or similar types); Mobile Crane Driver; Portable Crushers; Power Jumbo Operator (setting slip forms, etc., in tunnels); Rollers (over 5 tons); Self-propelled Compactor (single engine); Small Rubber-tired Tractors; Trencher (up to and including 6'); Slip Form Pumps (power driven hydraulic, electric, gas, etc., lifting device for concrete forms)

Group 7: Crusher Plant; Dual Drum Mixer; Gradesetter; Hoist (2 drums); Loader (over 2½ cu. yds. up to and including 5 cu. yds.); Mechanical Finishers or Spreader Machine, Asphalt (Barber Greene and similar)(Screedman required); Mine or Shaft Hoist; Pavement Breaker, Truck mounted, with Compressor combination; Pavement Breaker with Compressor Combination (operates 1 or 2); Pipe Cleaning Machine (tractor propelled and supported); Pipe Wrapping Machine (tractor propelled and supported); Pipe Bending Machine (pipe lines only); Self-propelled Elevating Grader Plane; Slusher Operator; Trencher (over 6'); Water Tanker (pulled by Euclid, T-Pulls, DW-10, 20, 21 or similar); Mixermobile (over 5 tons); Small Tractor (with boom D-6 or similar)

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 8: Boring Machine; Cast-in-place Pipe Laying Machine; Concrete Batch-Plant (multiple units); Combination Loader and Hydraulic Backhoe (over 1/2 yd to and including 3/4 yd.); Conveyor (tunnel); Engineer, Locomotive (over 30 tons up to and including 100 tons); Finishing Machine Operator (airports and highways); Hydraulic Backhoe (over 1/2 yard to and including 3/4 yd.); Kolman Loader; Mechanic Trench Shield; Mucking Machine; No-joint Pipe Laying Machine; Portable Crushing and Screening Plants; Saurman type Dragline (under 5 yards); Self-propelled Boom type Lifting Device; Stationary Pipe Wrapping, Cleaning and Bending Machine; Surface Heater and Planer; Tunnel Badger; Tri-batch Paver

Group 9: Boom type Backfilling Machine; Combination Mixer and Compressor (gunite); Do-more Loader and Adams Elegrader; Lull Hi-lift (40' or over); Rubber-tired Earthmoving Equipment (up to 12 cu, yds.); Wheel Trencher (over 6')

Group 9-A: Dozers; Heavy Duty Repairman or Welder; Push Cats; Scrapers; Self-propelled Compactor with dozer; Sheep Foot; Tractors; Tractors (with boom, larger than D-6 and similar)

Group 10: Chicago Boom; Hoist (3 drums); Koehring Skooper; Loader (over 5 yards up to and including 12 yards); Locomotive (over 100 tons)(single or multiple units); Power Blade Operator; Rubber-tired Earthmoving Equipment (up to and including 35 cu. yds., Euclid, T-Pulls, DW-10, 20, 21 and similar); Saurman type Dragline (5 yards or over); Soil Stabilizer (P & H equal); Sub-grader (Gurries or other automatic type); Track-laying type Earthmoving Machine (single engine with tandem scraper); Tractor, Compressor, Drill Combination; Tractor (tandem scraper); Tractors (D-9 or equivalent)

Group 10-A: Cranes (not over 25 tons); Power Shovels, Clamshells, Draglines, Backhoes, Gradealls (up to and including 1 cu. yd.)

Group 11: Automatic Skip Form Paver (concrete or asphalt) (Gradesetter, Screedman required); Cranes (over 25 tons); DW-10, 20, etc. (Tandem); Earthmoving Machine (multiple propulsion power units and two or more scrapers) (up to and including 35 cu. yds. struck "MRC"); Highline Cableway; Lift Slab Machine; Loader (over 12 yds.); Power Shovels, Clamshells, Draglines, Backhoes, Gradealls (over 1 yd. and up to 7 yds.); Power Blade Operator (16 or over); Pre-stress Wire Wrapping Machine; Self-porpelled Compactor (with multiple propulsion power units); Single Engine Rubber Tired Earth Moving Machine (with tandem scraper); Tandem Cats; Tower Cranes, Mobile; Trencher (pulling attached shield); Universal, Liebher, Linden and similar types of tower cranes; Wheel Excavator (up to and including 750 cu. yds. per hour)

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 12: Band Wagon (in conjunction with wheel excavator); Derricks; Drill Rigs; Multi-propulsion Earth Moving Machines (2 or more scrapers) (over 35 cu. yds. "struck" MRC); Power Shovels and Draglines (7 cu. yds. and over); Rubber-tired Earthmoving Equipment (over 35 cu. yds. Euclids, T-Pulls, DW-10, 20, 21 and similar); Wheel Excavator (over 750 cu. yds.)

GROUP F	7.23	.46	.80		.11

CLASSIFICATION DEFINITIONS

GROUP A - A-frames, air compressor on steel erection, rotary drills used on caisson work for foundations and sub-structure work, boiler or compressor operator mounted on crain (piggyback operation), boom trucks (all types), cableways, cherry pickers, combination concrete mixer and tower, concrete pumps, cranes (all types), derricks (all types), draglines, dredge (dipper, clam or suction) 3 man crew, elevating grader or euclid loader, floating equipment, gradalls, helicopter operator and helicopter winch operator when hoisting builders materials, hoes (all types), hoisting engines (two or more drums), lift slab or panel jack operator, locomotives (all types), maintenance engineer (mechanic or welder), mixer paving (multiple drum), mobile concrete pumps with boom, panelboard (all types on site), pile driver, power shovels, side booms, slip form pavers, straddle carriers (building construction on site), hammerhead tower cranes, trench machines (over 24" wide), tug boat.

GROUP B - Asphalt paver, bulldozer, C.M.I. type equipment, endloaders, Kohlman type loaders (dirt loading), mucking machines, power grader, power scoops, power scrapers, push cat.

GROUP C - Air compressor (pressureizing shafts or tunnels), asphalt rollers, fork lifts, hoist (one drum), house elevators, man lift, power boilers (over 15 lbs. pressure), pump operators installing well points or other type of dewatering system, pumps (4" and over discharge), submersible pumps (4" and over discharge), trenchers 24" and under.

GROUP D - Compressors on building construction, conveyors (building material), generators, gunnite machines, mixers (capacity more than one bag), mixers (one bag capacity, side loader), post driver, post hole digger, pavement breaker (hydraulic or cable), road widening trencher, rollers, welder operator.

GROUP E - Backfillers & tampers, batch plant, bar and joint installing machines, bull floats, burlap and curing machines, clefplanes, concrete spreading mach., crushers, deck hands, drum firemen (asphalt), farm type tractors pulling attachments, finishin machines, form trenchers, high pressure pumps over 1/2" discharge, hydro seeders, self propelled power spreader, self propelled sub-grader, tire repairman, tractors pulling sheeps foot roller or grader, vibratory compactors (with integral power).

GROUP F - Oiler, helper, signalman, inboard & outboard motor boat launch, light plant operator, power driven heaters (oil fired), power boilers (less than 15 lbs. pressure, pumps under 4" discharge, submersible pumps under 4" discharge.

Welders - receive rate prescribed for craft performing operation to which welding is incidental.

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day; G-The Friday After Thanksgiving.

FOOTNOTES:

a. Holidays: A through G.

b. Employer contributes 4% of basic hourly rate for 5 years or more of service or 2% basic hourly rate for 6 months to 5 years of service as Vacation Pay Credit.

c. Holidays: A through F; Washington's Birthday, Good Friday and Christmas Eve, providing employee has worked 30 full days during the 90 calendar days prior to the holiday and the regular scheduled work day immediately preceding and following the holiday.

d. Holidays; A through F; Washington's Birthday; Election Day for President of the United States and election of Governor of New York State, provided employee works the day before.

e. After one year, one week vacation; 2 years, 6 days vacation; 3 years, 7 days vacation; up to 2 weeks maximum vacation after completion of the 5th year, full vacations are earned by a driver who works 1040 hours or more in the calendar year, if an employee works less than 1040 hours in any calendar year, vacation will be prorated for either 1 or 2 weeks of vacation on the basis of using the number of hours worked as the numerator and 1040 as the denominator.

f. Paid Holidays, A through F, Friday after Thanksgiving Day except where the employee is laid off 2 or more weeks prior to the holiday, however employees laid off less than 2 weeks prior to election Day will automatically be eligible for the subsequent Friday after Thanksgiving as a paid holiday even though laid off.

g. Employees shall be given time off with pay on Election Day in accordance with the New York State Elections Laws.

BUILDING --POWER EQUIPMENT OPERATORS:

GROUP I: Master Mechanic

GROUP II: all boom type equipment (100 ft or less), all pan and carry-all operators, Archer hoist, back and pull hoe operator, blast or rotary drill, track or cat mounted, boiler (when used for power), boom trucks, cableway operator, concrete paver machine, crane operator, derrick operator, dragline operator, elevating grader (self-propelled), head tower operator, hot roller (finisher course), hydraulic booms, hydro crane, maintenance engineer, mucking machine operator, multiple drum hoist, (more than 1 drum in use), Paine crane, pile dribing machine operator, power grader machine operator, scoopmobile, shovel operator, skimmer operator, test core drill machine, tractor shovel operator, vertical caisson auger drill, well drilling machine

GROUP III: Back filling machine operator, Kolman loader, roller machine operator, snatch and pusher cats, stone crusher, towed or self-propelled rollers, trenching machine operator

GROUP IV: Air hoist operator, cage hoist operator, conveyor operator, conveyor system, (belt-crete or similar), hoisting engine op., house elevator, (when used for hoisting), industrial tractor, locomotive op., (irrespective of power), push button hoist op., Strato tower, tractors (when using winch power)

GROUP V: Concrete mixer op., (½ c.y. or over), gasoline driven boring machine, hydraulic system pumps, hydro hammer, finishing machine op., (asphalt spreader), finishing machine op.

GROUP VI: Air compressor operator, (under 160 CFM), air compressor op., (over 160 CFM), generator mechanical heater, (when 3 are in a battery), power plant (in excess of 10KW), welding machine operator, (to and including 3 machines)

GROUP VII: Bulldozer & tractor, (50 h.p., drawbar or under), monorail

GROUP VIII: Firemen

GROUP IX: Truck crane driver

GROUP X: Aggregate bin op., cement bin op., concrete mixer op., (under ½ c.y.), tractor machines

GROUP XI: Grout Machine Operator, Heating Boiler Operator (used for temporary heat), lubrucatuib unit on truck, pneumatic mixer operator

GROUP XII: Pump Operator (4" or over); Pump Operator 2-3 in a battery)

BUILDING--POWER EQUIPMENT OPERATORS: (CONT'D)

GROUP XIII: Bulldozer & tractor (50 H.P. drawbar and under), jeep trench, mulchers, power brooms 7 rakes, seeders

GROUP XIV: Apprentice Engineer or Oiler, Mechanical Heaters (when 1 or 2 are used), Pump Operators (one inch), Pump Operators (2 inches), Pump Operators (3 inches)

GROUP XV: Crane with boom over 100 feet

GROUP XVI: Crane with boom over 200 feet

GROUP XVII: Crane with boom over 300 feet

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

FOOTNOTE:

a. Holidays: A through F, provided employee works the working day before and the working dat after the holiday.

FOOTNOTE:
a. Paid Holidays A through F, provided the employee has worked the day before and after the holiday.

LABORERS: HEAVY AND HIGHWAY CONSTRUCTION:

CLASS A
Laborers, drill helper, flagmen, outboard and hand boats.

CLASS B
Bull float, chain saw, concrete aggregate, bin, concrete bootman, gin buggy, hand or machine vibrator, jackhammer, mason tender, mortar mixer, pavement breaker, handlers of all steel mesh, small generators for laborers' tools, installation of bridge drainage pipe, pipelayers, vibrator type rollers, tamper, drill doctor, tail or screw op. on asphalt paver, water pump op. (1½" and single diaphragm), nozzle (asphalt, gunnite, seeding and sand blasting), laborers on chain link fence erection, rock splitter and power unit, pusher type concrete saw and all other gas, electric, oil and air tool operators, wrecking laborer.

CLASS C
All rock or drilling machine operators (except quarry master and similar type), acetylene torch op., asphalt raker, powderman.

CLASS D
Blasters, form setters, stone or granite curb setters.

DECISION NO. NY76-3238

12-PEO-1 - A
(1 of 2)

BUILDING CONSTRUCTION - POWER EQUIPMENT OPERATORS:

GROUP I - Cranes (cable and hydraulic, climbing and tower)
I - A 121 ft. and under
I - B 121 ft. and 151 ft.
I - C 151 ft. and 201 ft.
I - D 201 ft. and 251 ft.
I - E 251 ft. and 301 ft.
I - F 301 ft. and 351 ft.
I - G 351 ft. and 401 ft.
I - H 401 ft. and 451 ft.

GROUP II - Air tugger, derrick, dredge, big generator plant, cableway, backhoe, clamshell, dragline, shovel and similar machines over 3/8 cubic yards capacity (factory rating), bridge crane (all types), caisson auger and similar type machine, forklift (with factory rating of 15 ft. or more of lift), hoist (on steel erection), mucking machines, ross carrier (and similar types), three drum hoist (when all three drums are in use)

GROUP III - A frame truck, backfilling machine, hoist (1 or 2 drums), barber green and similar typer machine, maintenance engineer (mechanic), mechanical slurry machines (all kinds), belt crete and similar type machines, bituminous spreading machine, post hole digger, bulldozer, carry all type scraper, core drill, pumps, (regardless of motive power) no more than (4) in number not to exceed 20 inches in total capacity), fine grade and finish rollers, side boom tractor, stone crusher, compressors: 4 not to exceed 2000 cfm combined capacity 3 or less with more than 1200 CFM, but not to exceed 2000 CFM, concrete mixer, concrete placer, concrete pumps, tournadozer and similar types, crane-hoe-shovel 3/8 yd. capacity or less (factory rating), tournapull and similar types, dinky locomotives (all types), tower-mobile and similar types, elevating grader, elevator trenching machines, fine grade machines (all kinds), welder, front end loader, forklift, with factory rating of less than 15 feet of lift, well drill, well point system, high pressure boiler, Exception: single electric pumps up to and including 4 inches not be manned.

GROUP IV - Any combination (not to exceed 3 pieces of equipment), welding, machine or mechanical conveyor (over 12 ft in length), fireman, belt crete generator, mechanical heater, roller (fill & grade), pumps (regardless of motive power) no more than (3) in number, not to exceed twelve inches total capacity, rubber tired tractor, compressor 3 or less, not to exceed 1200 CFM combined capacity, longitudinal float, Exception: single gasoline driven welding machines up to 300 amps need not be manned.

GROUP V - Truck crane oilers

FEDERAL POWER COMMISSION

CORPORATE AND FINANCIAL REPORT FOR CLASS C AND CLASS D ELECTRIC UTILITIES AND LICENSEES

Proposed New Form No. 163

V41I168
AUG 27 76
UMI

FEDERAL POWER COMMISSION

[18 CFR Part 141]

[Docket No. RM76-30]

CORPORATE AND FINANCIAL REPORT FOR CLASS C AND CLASS D ELECTRIC UTILITIES AND LICENSEES

Proposed New Form No. 163

AUGUST 13, 1976.

Notice is hereby given pursuant to the Administrative Procedure Act, 5 U.S.C. 553 and sections 3(13), 4(a), 4(b), 4(c), 301(a), 302(a), 304, 309, 311 and 312 of the Federal Power Act, as amended, (41 Stat. 1064, 1065; 49 Stat. 839, 840, 854, 855, 856, 858, 859, 860, 16 U.S.C. 796(13), 797(a), 797(b), 797(c), 825(a), 825a(a), 825c(b), 825c(c), 825h, 825j, 825k), that the Commission proposes to add § 141.65 to Part 141 of the Approved Forms under the Federal Power Act to provide that new FPC Form No. 163 be required for reporting. Proposed new Form No. 163 would be entitled, "Corporate and Financial Report for Class C and Class D Electric Utilities and Licensees."

During the period of critical energy needs, such as the nation is currently experiencing, the public interest requires that the Commission have available to it current and continuing information on the operations of industrial companies generating electric energy. The interests of those industrial companies regulated by the Commission also require efficient and progressive means of regulation.

On September 26, 1973, in Docket No. R-438, the Commission issued Order No. 494, amending Part 2, Chapter I, Title 18 of the Code of Federal Regulations and setting forth Commission policy for the development of a fully automated computer regulatory system to provide such information. When developed and fully operative, the system will provide prompt and ready access to data contained in a central electronic data bank, eliminating the duplication of information now collected and reducing the quantity of existing manual files. This system will not only facilitate the evaluation and analysis of all data, but it will also accommodate the development of new regulatory techniques.

In Order No. 494, the Commission stated that all existing "hard copy" public use forms would be redesigned and consolidated to eliminate redundancies and that instructions for reporting would be clarified by use of Electronic Data Processing (EDP) Technology. Public use form information, as it is presently submitted, will be replaced by the submission of individual data elements within a general data element and code scheme. It is anticipated that this major system revision will result in the reduction of the total number of data items currently transmitted to the Commission by the respondents.

In Order No. 494, the Commission further stated that the development of the automated computer information system would be effected through the use of phased rulemaking proceedings in which various Commission reporting procedures and report forms would be restructured. To this end, Form No. 163 is designed to incorporate into a readily retrievable data processing system the corporate information and financial data currently submitted on FPC Form No. 1F.[1]

It is proposed herein that the Annual Report Form No. 1F would be subdivided into two separate and distinct reporting portions. The corporate information and financial data portion would be embodied in a new report Form No. 163 under a new reporting system, which is discussed further in this rulemaking. The operation data portion would be incorporated under a separate report system and will be the subject of a separate rulemaking.

The general changes which are being proposed to the Commission's reporting requirements for the new report Form No. 163 are as follows:

1. For the most part, the requirements for all beginning of year figures (or end of previous year figures) and all comparison figures (increases/decreases and previous year/month figures) have been eliminated.

2. Duplicative data elements (data elements appearing on more than one schedule) have been eliminated to the extent feasible.

3. The filing requirement for certain information that experiences little change from year to year (often referred to as fixed data) is proposed to be reported completely in the initial submission, with only changed values being reported in subsequent submissions.

In addition to the changes described above, the Commission's filing requirements contained in the proposed Form No. 163 have been arranged, for the purpose of achieving more efficiency in the collection process. Respondents would be asked to utilize newly established account numbers as a supplement to the accounts contained in the Uniform Systems of Accounts for reporting purposes. Respondents would not be required to maintain these new accounts in their books of accounts or in their recordkeeping system.

Specific details of the proposed reporting scheme and related procedures are included as separate attachments to this rulemaking as follows:

Attachment A contains general information about the preparation and submission of public use schedules. Specifically, the attachment covers the administrative background, standard definitions, general procedures for schedule preparation, rules for data preparation, data maintenance activities, and data keying and verification instructions, all known as Level I instructions.

Attachment B contains general subject instructions for corporate and financial schedules. Specifically, the attachment covers general information surrounding corporate and financial schedules, respondent coverage, standard definitions and codes, and general instructions, all known as Level II instructions.

Attachment C contains detailed instructions for each specific schedule to be submitted by the respondent, all known as Level III instructions.

Attachment D is a comparison and cross reference list. This list cross references current reporting requirements with that proposed, at the same time describing additions, deletions, and other pecularities related to the changeover.

Attachments E are data standards.

Attachment F contains a sample of schedules to be submitted by the respondent.

It is anticipated that a one-year period of parallel reporting will be required for system evaluation. Assuming successful operation of the new system within such time period, the present Form No. 1F for these respondents would then be eliminated.

All data and information submitted pursuant to this new form would be required to be subscribed and verified by a duly authorized executive officer of the respondent as being factually accurate and complete to the best of his or her knowledge according to the Commission's rules of practice and procedures (18 CFR, Part 1). An original and four copies of each completed Form No. 163 would be required to be sent to the Federal Power Commission.

The Commission is considering the possibility of making available, through the Office of Public Information, copies of the input schedules as received, copies of verified hard copy printouts of the input schedules, and hard copy printouts of certain financial statements in a format similar to pages of the current public use forms.

Any interested person may submit to the Federal Power Commission, 825 North Capitol Street, NE, Washington, D.C. 20426, to be received no later than October 8, 1976, data, views, coments or suggestions in writing concerning all or part of the proposed forms. Written submittals will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE, Washington, D.C. 20426, during regular business hours. The Commission will consider all such written submittals before acting on the matters herein proposed. An original and 14 conformed copies should be filed with the Secretary of the Commission. Submittals to the Commission should indicate the name, title, mailing address and telephone number of the person to whom communications concerning the proposal should be addressed, and whether the person filing them requests a conference with the staff of the Federal Power Commission to discuss the proposed form. The staff, in its discretion, may grant or deny written requests for conference prior or subsequent to the filing of formal submittals.

In order to expedite and assist the Commission in its review and analysis of the comments it receives, all such submittals are to be presented according

[1] 18 CFR 141.2 (1975).

to response codes. Each segment of a respondent's comments is to be headed by one of the following code numbers.

Response code:		
	A.	Compliance burden:
01		1. Costs of implementing proposed program.
02		2. Time frame expected.
03		3. Cost—manhours aspect.
	B.	Comments with respect to the following considerations:
04		1. Hardware
05		2. Software
06		3. Schedule design or layouts
07		4. Media
08		5. Preparation difficulties
09		6. Certification
10		7. Others.
	C.	Specific schedule comments:
11		1. Field size
12		2. Field title
13		3. Addition of a field
14		4. Deletion of a field
15		5. Addition of data elements
16		6. Data standards
17		7. Deletion of data elements
18		8. Clarity of presentation
19		9. Instruction narrative
20		10. Combine schedules with other(s)
21		11. Add or delete schedule
22	D.	Duplicate reporting plan.
23	E.	Acceptability for Federal and State use.
24	F.	Acceptability for general public use.
	G.	General reaction:
25		1. Support the principles and purposes of the proposal
26		2. No objections to the principles and purposes of the proposals but offering suggestions regarding implementation.
27		3. Oppose and disagree with the principles and purposes.
28	H.	Other

The proposed amendments to Part 141 of the Commission's Approved Forms under the Federal Power Act would be issued pursuant to the authority granted the Federal Power Commission by the Federal Power Act, as amended, particularly sections 3(13), 4(a), 4(b), 4(c), 301(a), 302(a), 304, 309, 311 and 312 (41 Stat. 1064–1065; 49 Stat. 839, 840, 854, 855, 856, 858, 859, 860; 16 U.S.C. 796(13), 797(a), 797(b), 797(c), 825(a), 825a(a), 825c(b), 825c(c), 825h, 825j, 825k).

Effective for the reporting year 1976, the Commission proposes to amend Part 141, Statements and Reports (Schedules), in Subchapter D—Approved Forms, Federal Power Act, Chapter I, Title 18 of the Code of Federal Regulations by adding a new section 141.65 prescribing new FPC Form No. 163—Corporate and financial report for Class C and Class D electric utilities and licensees, in the form set out in Attachment F hereto. New section 141.65 will read as follows:

§ 141.65 Form No. 163—Corporate and financial report for Class C and Class D electric utilities and licensees.

(a) The form of the report for Class C and D electric utilities and licensees, designated herein as FPC Form No. 163, is prescribed for the reporting year 1976 and thereafter.

(b) Each public utility or licensee as defined in Section 3 of the Federal Power Act which is included in Class C or Class D as defined in the Commission's Uniform System of Accounts prescribed for public utilities and licensees (other than Federal projects filing under § 141.66) shall prepare and file with the Commission for the year beginning January 1, 1976, or subsequently during the calendar year 1976 if its established fiscal year is other than the calendar year, and for each year thereafter, on or before the last day of the third month following the close of the calendar year or other established fiscal year, an original and four conformed copies of the above-designated FPC Form No. 163, all properly filled out and verified. One copy of said report should be retained by the correspondent in its files.

(c) The report contains the following schedules:

General Corporate Information.
Control over Respondents.
Corporations Controlled by Respondent.
Corporate Officers/Directors.
Security Holders and Voting Powers—Total.
Security Holders and Voting Power.
Notes to Security Holders and Voting Power.
Annual Notes to Financial Data.
List of Accounts—Part III.
Capital Stock.
Long Terms Debt.
Investment Tax Credits.
Plant in Service or All Utility Plants.
Operating Revenues.
Detailed Accounts Data—Part I through III.
Accumulated Provisions for Depreciation—Deletion and Amortization of Utility.

The Secretary shall cause prompt publication of this notice to be made in the FEDERAL REGISTER.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		1 of 22

I. ADMINISTRATIVE BACKGROUND

The Federal Power Commission (FPC) has established an information system designed to improve the decision-making capabilities of the Commission. This program, the Regulatory Information System (RIS), was authorized by Commission Order 494, September 26, 1973, and features the following characteristics and capabilities:

- A consolidated data collection system designed to eliminate unnecessary or redundant reporting and to provide standardized data collection schedules.
- A comprehensive system for transmitting, processing, and accessing data requested of respondents by the Commission.
- Establishment of a modern computer facility at Commission headquarters featuring consolidated regulatory data bases and the associated automatic data processing (ADP) equipment and programming software necessary to store, validate, and access that data.

These instructions are intended to aid each respondent to understand the scope and objectives of the RIS system regarding source data collection and to provide clear and concise guidance for the completion of the revised public use schedules.

A. DATA COLLECTION CONCEPTS

The FPC public use schedules are designed to be vehicles for data collection, rather than for data display, by the Commission. This objective has guided the design of the layouts and instructions so as to achieve maximum efficiency in both data collection and subsequent processing. Within this basic design philosophy, the public use schedule data collection concept embodies the following design characteristics, some of which are described in greater detail in the subsequent chapters.

FPC Form 151 (3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		2 of 22

1. Optical Character Recognition (OCR) - All schedules have been designed with OCR requirements as one of the design constraints. This will allow for transition to optical scanning as a future alternative for data entry.

2. Separation of Instructions - All instructions are separated from the schedules to which they apply, in order to make efficient use of form space. Instructions consist of three separate levels, as follows:

- Level I - General (applicable to all schedules).
- Level II - General subject (applicable to natural gas operations, electric operations, or financial data).
- Level III - Detailed (applicable to individual schedules).

3. Separation of Footnotes - Footnotes or other extraneous marks or comments intended to qualify or modify data must not be entered directly on any schedule. The public use schedules have been designed to minimize the need for footnotes through the establishment of distinct data elements which represent some data previously reported as footnotes. However where necessary to make the related data more meaningful, footnotes may be entered on a special footnote schedule designed for this purpose. On the primary data schedules, the respondent must enter only a unique footnote reference number to provide a link to the footnote schedule.

4. Reporting Requirements - Reporting frequencies of the new schedules vary from semi-monthly to biennially. For certain schedules, all data must be supplied with each submission. For the other schedules, all data must be supplied with an initial submission, and on subsequent submission of these schedules respondents need report only changes, additions and deletions. These requirements are specifically stated in the Detailed Instructions for each schedule in paragraph B under the heading "II. General Information".

FPC Form 151 (3-76)

UMI

5. Consolidated Schedules - Many of the public use schedules have been designed to consolidate data previously collected on more than one schedule. The consequence of such consolidation is a reduction in the total number of schedules. Furthermore, portions of some schedules may be inapplicable to certain respondents, as specified in the detailed instructions.

B. APPLICABILITY OF INSTRUCTIONS

The Commission will provide to each respondent all three levels of instructions, appropriate to the type of operation. For example, an electric utility will receive:

- Level I - General Instructions
- Level II - General Subject Instructions (Electric Operating Data)
  - General Subject Instructions (Corporate and Financial Data)
- Level III - Detailed Instructions (Electric Operating Schedules)
  - Detailed Instructions (Corporate and Financial Schedules)

Each respondent will also receive footnote schedules (with instructions) and free form (blank) schedules for the submission of narrative or graphic support data that will not be loaded into the Commission's data bases.

As the public use schedules undergo change in future reporting periods through the rulemaking process, modified layouts and instructions will be prepared by the Commission and mailed to the respondents, together with appropriate documentation that describes the authorization and the details of all such changes, additions, or deletions. The Commission will prepare the instructions in a manner suitable for looseleaf binders, so that they can be easily maintained by the respondents.

II. STANDARD DEFINITIONS

The following standard definitions are provided to aid the respondent in understanding the data collection concepts contained in these instructions.

A. RESPONDENT - Each corporation, person, agency, authority, or other legal entity or instrumentality, whether public or private, which is required, under the provisions of the Federal Power Act, the Natural Gas Act, or Commission Order, to submit information to the Federal Power Commission via public use forms. Respondents also include those organizations that voluntarily or upon request, provide data to the Commission.

B. PUBLIC USE SCHEDULE - A collection of functionally related data elements organized and formatted into an arrangement suitable for the collection of data; the instructions for preparation of a schedule are included in this definition.

C. DATA FIELD - Within a record or schedule, a specific area used for representing a particular data value, i.e., the spaces provided for data entry on a schedule.

D. DATA ELEMENT - A basic unit of identifiable and definable information. Data elements identify the data fields within a schedule.

E. DATA ITEM - The expression of a particular value of a data element. In cases where a data element identifies a column or row on a schedule, a data item is a specific entry within the column or row.

F. LOGICAL ENTRY - A collection of related characteristics, defined by data elements, associated with a specific "key" item of information. For example, "name", "address", "date of incorporation", and "total assets" are all attributes of the key item "company", which is identified by a company code. This entire collection of data elements is called a logical entry. Within the public use schedules, logical entries are blocks of data that may be repeated several times on a page.

G. KEY ITEM IDENTIFICATION - A data element that provides a unique reference point for purposes of accessing or retrieving data. Within the public use schedules, the key item(s) uniquely identify groups of related data elements which by definition are logical entries. Normally, key items appear first within a logical entry and must always be completed by the respondent. The Detailed Instructions for each schedule explicitly identify those data elements that are "key".

Other, more specific, definitions of technical and financial data elements are contained in the Level II - General Subject Instructions.

III. GENERAL PROCEDURES FOR SCHEDULE PREPARATION

Many of the public use schedules have been designed so that different types of respondents can use the same basic schedules and instructions for the collection of identical data. For such schedules, the Detailed Instructions explain the unique data preparation requirements applicable to each type of respondent.

A. SCHEDULE SUBMISSION

The Commission will forward annually an appropriate number of copies of each schedule required of the respondent for the given reporting period.

All respondents shall forward the number of copies ordered by the Commission of each public use schedule to the Commission. Respondents submitting schedules on magnetic tape must also submit an attested working copy, appropriately completed, of the supplied schedules from which the tapes were prepared.

The specific report period for each schedule is listed in the General Subject Instructions (Level II) for the natural gas operations, electric operations, or financial data. The reporting period must be entered by the respondent on each schedule. Care must be exercised to ensure that the report period on each schedule (month, day, year) represents the ending date of the period to which the data applies, not the date the schedule was completed.

Prior to forwarding the schedules to the Commission, the respondent must complete Schedule 0100, Index of Public Use Schedules Submitted. A date field-by-data field instruction for Schedule 0100 shall be found in the Level III, Detailed Instructions for this schedule. All schedules should be carefully assembled, packaged, and forwarded to the following address:

Federal Power Commission

Washington, D. C. 20426
Attn: Office of the Secretary

UMI

FEDERAL POWER COMMISSION
825 North Capitol Street, N.E.
Washington, D.C. 20426

ATTESTATION UNDER OATH

This report must be attested to under oath by an officer of the company. _____ (Insert here the name of the attester)

being first duly sworn according to law, certifies that he is _____ (Insert here the official legal title of attester)

of _____ (Insert here the exact legal title or name of respondent); that he has full power and authority to make the attestation; that he has read this report and is familiar with the contents therein; that to the best of his knowledge, information and belief, all estimates and matters therein set forth are true and correct and the said report is a correct statement of the business and affairs of the above-named respondent in respect to each and every matter set forth therein during the period from and including _____, 19__, to and including _____, 19__.

_____ (Signature of attester)

Subscribed and sworn to before me this _____ day of _____, 19__.

_____ NOTARY PUBLIC

(SEAL)

FIGURE III-1. NOTIFICATION OF ATTESTATION

B. REPORTING MEDIA

The acceptable media for reporting public use data are magnetic tape with a working copy of the schedules or typed schedules.

Many respondents are capable of preparing the data via magnetic tape and have been directed by the Commission to do so. In addition, the respondent must attach associated attested working copy of the FPC supplied schedules from which the tapes were prepared.

C. SUPPORTING DOCUMENTATION

Additional statements, maps, diagrams, charts or other documentation supportive to the data schedules not otherwise specifically required or provided for should be inserted directly behind the schedules to which they apply. Respondents shall utilize FPC Schedule Number 1000 in all cases except those requiring oversize documents such as large maps. In all cases, the schedule number and page number of the schedule to which the supporting documentation applies must be entered, as well as the reporting period. Supporting documentation must not be stapled to the corresponding schedules.

D. ATTESTATION

The complete set of schedules filed for a given reporting period must be subscribed and verified by the duly authorized executive officer of the respondent, or of one of the respondents where a consolidated schedule is filed, who is qualified and authorized to prepare or supervise the preparation of the schedules and to certify their accuracy, completeness, and truthfulness. Such attestation will be submitted in the format specified in the Attestation Under Oath, displayed in Figure III-1.

Information submitted on magnetic tape must be accompanied by a working copy of each schedule used to create the magnetic tape. A single Attestation Under Oath will apply to all information, regardless of filing medium, submitted in the reporting period.

FPC Form 131 (5-76)

E. RESPONDENT COMMENTS AND SUGGESTIONS

The Regulatory Information System represents a significant departure from the previous methods of gathering and using information by the Commission. Like all new systems, areas for improvement will undoubtedly be discovered during actual operation. All respondents are encouraged to supply comments and suggestions to the Commission of specific data collection or schedule design problems.

All questions concerning schedule design, data entry rules, filing requirements, or administrative matters, should be directed to the Office of Regulatory Information Systems at Commission headquarters. The telephone number for inquiries at the Commission is (202) 275-4138.

This telephone number and the schedule mailing address will be the main contact points between the Commission and the respondents for matters relating to the data collection. Questions that cannot be handled directly will be routed to the appropriate bureau or office personnel for resolution.

FPC Form 131 (5-76)

IV. RULES FOR DATA PREPARATION

The respondent is instructed to rigorously conform to the following general rules for data entry when preparing the schedules prior to the time that the schedules are forwarded for typing.

A. DATA FIELD LENGTH

Do not exceed the data field lengths allocated for each data element. When the data field size is inadequate, leave the data field blank and enter the true value in a footnote.

B. JUSTIFICATION (DATA POSITIONING)

Right justify every numeric data field; that is, place the data in the right portion of the data field so that no blank spaces follow the last character. Unfilled leading characters should be left blank. All alphabetic data fields must be left justified; that is, they begin at the left boundary of the data field.

C. ALPHABETIC AND NUMERIC

The Detailed Instructions for each schedule define each data field as either alphabetic (A) or numeric (N). The instructions also specify the data field length, including implied decimal positions for fractional numbers. For example, (N7.3) means a numeric field with seven characters to the left and three characters to the right of the implied decimal position. (N6) implies a six digit integer number and (A22) defines a twenty-two character alphabetic data field.

Do not enter alphabetic or special characters in a data field defined to be numeric by the instructions. The only exceptions to this rule are a minus sign or an asterisk, as described later. Numeric data fields must be right-justified and can be preceded by blank spaces. A data field defined as alphabetic may include any

FPC Form 131 (5-76)

UMI 69 12 GCA 8811 V41

combination of numeric and alphabetic characters. If necessary, words should be abbreviated to fit an alphabetic data field within the allocated space.

D. NEGATIVE ENTRIES

To indicate a negative numeric value, type over the preprinted minus sign in the right-most character of the data field immediately after the last significant digit; for example, 4917- . Positive numbers require no sign within the data fields; simply right-justify the number. Only certain data fields may legitimately contain negative numbers. Those data elements that may be expected to generate negative numbers are identified in the Detailed Instructions and in the schedules, where a character position is reserved for the minus sign, which is printed.

E. NULL ENTRIES

Data fields that are not applicable to a given respondent's situation must be left blank. Do not write in "N/A", or "NONE", or "NO DATA", or any other null response. Numeric data fields that do apply to the respondent but for which the respondent has a legitimate value of zero must be so entered with zero, including all decimal positions. Numeric, alphabetic, or alpha-numeric data fields that do not apply must be left blank.

F. PERCENTAGES AND FRACTIONS

Numeric data fields expressed in percentages may contain a variable number of decimal positions. In the schedules, all decimal points are implied by a preprinted character (▲) that does not occupy a character position within the data field. For example: NN▲NNN

The factional portion to the right of the decimal point should always be rounded to the last significant digit. For example, 11 2/3 should be entered as 11▲667 . Under no circumstances must a portion of a whole number be expressed in fractional notation for any numeric data field. Rather, use the decimal representation, as

illustrated by the preceding example of a percentage. For example, never enter 12 1/3 in a schedule; instead enter 12▲333 , assuming three decimal positions are requested.

G. SPECIAL CHARACTERS

As illustrated in the preceding section, all of the public use schedules have been designed with preprinted decimal point locators, where applicable. The respondent is specifically requested not to enter dollar signs, decimal points (.), commas (,), parentheses, technical symbols, or any other special characters on the schedules unless called for by the Detailed Instructions. For example, the number $53,429.48 would be entered as 53429▲48 and the number $45,237 would be entered as 45237▲00 .

H. MULTIPLE PAGES

Multiple pages may often be necessary for the respondent to provide all of the data for a particular schedule. Additional pages may be requested of the Commission at any time. To minimize such requests, the Commission will analyze historical submission patterns and volumes for each schedule and attempt to tailor the number of pages mailed out with the number of pages submitted in the past. Each page of a schedule must be numbered in the upper right hand corner.

I. LISTS OF LEGITIMATE VALUES

A copy of the Register of Data Standards will be made available to each respondent. The Register must be a standard reference tool for personnel completing the schedules to assure valid data entries. Respondent-entered data that is inconsistent with values contained in the Register will be rejected, since validation procedures are also based on the Register.

Normally, the Detailed Instructions will not contain the lists of legitimate values, but will refer to the Register of Data Standards. However, certain data item lists were incorporated directly in the Detailed Instructions for the convenience of the respondent. In these cases the data item list mnemonic appears in parenthesis.

The respondent must use the approved values and is also cautioned not to alter the units of measure (i.e., MMcf or KW) defined in the Detailed Instructions.

V. DATA MAINTENANCE ACTIVITIES

When preparing the public use schedules, the respondent must be familiar with the procedures necessary to modify data on the Commission's data bases and to prepare footnotes, where necessary. These topics are covered in this chapter.

A. MODIFICATION OF DATA

New data may be entered directly on any of the public use schedules by the respondent. The respondent must be certain that all data fields identified as key by the instructions are properly completed. For each new entry all data must be completed for the initial submission. For subsequent submissions of this data, the following general rules apply.

Changes to existing data residing in Commission's data bases can be entered directly on any public use schedule. To determine whether a data element has changed, the respondent is to refer to the data reported for the last submission.

For data identified by the Detailed Instructions as periodically required to be submitted, the respondent must completely resubmit all requested data regardless of whether or not the data have actually changed. In other Detailed Instructions subsequent submissions require the respondent to submit only appropriate identification (key data fields) and changed data fields. For this type of data, the Commission maintains only the latest current values in the data base, and the last reported data will continue to be propagated as the current data. To delete the current value of a data element, the respondent must enter an asterisk (*) in the left-most position of the data field, regardless of the numeric or alphabetic nature of the data. The following example illustrates how to delete any single occurrence of a data element:

Data Field Title
*

UMI

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		15 of 22

To delete a data element in more than one logical entry, an asterisk must be entered by the respondent for each occurrence of the data element.

To delete an entire logical entry, a retired generator for instance, the respondent must type a "D" over the preprinted "D" contained to the right of each logical entry and must specify all key items necessary to uniquely identify the logical entry. The Detailed Instructions indicate which data elements are key items. When processed, all of the data for the entire logical entry will be deleted from the data base. No facility is provided for deleting, in a single action, all of the data for an entire respondent or for any major grouping of data above the logical entry level, such as the data for an entire plant. To accomplish major delete actions, the respondent must delete each logical entry separately. If such step-by-step action proves cumbersome for the respondent in view of a major delete action (a plant closure, for example), the respondent should notify the Commission in writing of the delete action and request appropriate steps to update the data bases.

B. FOOTNOTES

Footnotes cannot be placed directly on any public use data schedule. Instead, a single, separate schedule (FPC Schedule Number 0000) is used for footnote entry. The preparation of a respondent supplied footnote requires entry on both the source schedule and the footnote schedule.

All data schedules contain two blocks to signify the presence of a footnote. These footnote indicator data fields are called the General Footnote and the Specific Footnote. The General Footnote data field enables the respondent to supply additional information that pertains to either the entire schedule and/or to a particular column (all occurrences of a data element) within the schedule. The Specific Footnote may be for either a complete logical entry and/or a specific data element within any logical entry.

FPC Form 151
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		16 of 22

The footnote number must be assigned uniquely and cannot be repeated across schedules. For example, if Schedule 0102 has footnote numbers 014 and 015 assigned, the footnotes for schedule 0103 should begin at 016. The respondent must not number the footnotes starting from 001 for each schedule. All footnote reference numbers throughout all schedules submitted in a single reporting period must have unique numbers.

FPC Form 151
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		17 of 22

VI. DATA KEYING AND VERIFICATION INSTRUCTIONS

Data keying may be utilized by respondents who submit data via magnetic tape. The following keying (and, therefore, verification) instructions apply to all redesigned public use schedules, regardless of actual data content. Keying will produce 80-character records (refer to magnetic tape submission requirements).

Each record must always contain the same control data fields in columns 1-11. These data fields are:

- Data Field A - Schedule Number (Record Position 1-4)
- Data Field B - Page Number (Record Position 5-8)
- Data Field C - Line Number (Record Position 9-10)
- Data Field D - Record Type (Record Position 11)

Data Keying and Verification Instructions are described in Figure VI-1.

When keying from the Public Use Schedules, follow the general rules given below.

- Data Field A, Schedule Number, (Record Position 1-4) and Data Field B, Page Number, (Record Position 5-8) are obtained from the header area of the schedule. The schedule number is obtained from the upper left corner of the schedule and the page number from the upper right corner of the schedule.
- Data Field C, Line Number (Record Position 9-10) is preprinted to the left of each line in the margin of the schedule (even numbers such as 2, 4, 6, etc. are the only valid entries).
- In Data Field D, (Record Type) an "A" should be keyed in Position 11 of the first record keyed for a line.
- In record positions 12-80 of the record, key all data field separators (|) and all data that has been filled in by the respondent.

FPC Form 151
(3-76)

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		18 of 22

DATA KEYING AND VERIFICATION INSTRUCTIONS

DATA FIELD	DATA FIELD NAME	COLUMNS FROM	COLUMNS TO	NUMBER OF COLUMNS	*	SPECIAL INSTRUCTIONS
	Common Data					
A	Schedule Number	1	4	4	N	Preprinted at the top left of all schedules
B	Page Number	5	8	4	N	Printed at top right of all schedules
C	Line Number	9	10	2	N	Preprinted on left margin of all schedules (even numbers)
D	Record Type (A = first record, B = second record)	11	11	1	A	A = First record for line B = Second record for line
E	Lina Data	12	80	69		Key all data fields and their data field separators. Compress data as described in keying instructions.

* A - Alpha
N - Numeric

FIGURE VI-1. DATA KEYING AND VERIFICATION INSTRUCTIONS

FPC Form 151
(3-76)

UMI

- At the end of each line on the schedule, key a line terminator symbol (@).
  Note: In some instances, a second record (Record Type B) will be required solely for the line terminator symbol (@).
- Normally, only one record will be required for a line. Should a second record be required for a line, duplicate Positions 1-10 from the "A" record, and key a "B" Position 11 of the second record.
- Do not key data fields which are preprinted including data field separators.
- Do not key odd numbered lines (i.e., 3, 5, 7, 9, etc.).
- Do not key lines in which the resondent has entered no data.

In the examples shown, a lower case b represents a blank.

A. DATA FIELD CONTENTS

The data keyed into Positions 1-11 of the keyed records is keyed according to the fixed format specified above. But the data keyed in the remainder of the positions of the records (12-80) are keyed in a variable format. That is, leading and trailing blanks in data fields are not keyed. For example, if a ten-position alpha-numeric data field on the schedule contains a single letter, only that letter is keyed:

"Abbb" is keyed "A|"

B. DATA FIELD SEPARATOR (|)

The variable format explained in A above, requires that the sum of each data field (in Positions 12-80) be indicated by following the data field contents with a data field separator symbol (|).

The data field separator is the vertical bar symbol, which is to be represented by a 12-7-8 punch, and a hexadecimal 4F in EBCDIC.

See the example in A above, or those that follow, for illustrations of the use of the data field separator.

FPC Form 151 (5-76)

C. LINE TERMINATOR (@)

The end of a schedule line must be represented in the keyed record. The vertical bar (data field separator) following the last data field is to be followed with a line terminator symbol. This can require that a "B" record be keyed to provide the line terminator symbol (@).

The line terminator is the "@" symbol, which is to be represented by a 4-8 punch, and a hexadecimal 7C in EBCDIC.

D. CONTINUATION RECORD

In most cases, one line on a schedule will be represented by one 80-character record, but in some cases two records will be necessary to represent a single schedule line. In the first (or only) record, an "A" is keyed into Position 11. In the continuation record (there will not be more than one per line), after duplicating Positions 1-10 from the "A" record, key a "B" in Position 11 then continue keying from the schedule line. (Note that for two-record lines, Position 80 of the "A" record may occur in the middle of a data field on the schedule.)

E. BLANK LINES

Every data field in a schedule line, including blank data fields, must be represented in the keyed records. For a blank data field, key only a data field separator symbol (|). For example, if the first three data fields on a schedule line were blank they would be represented in the keyed record by three consecutive data field separators (in Positions 12-14).

F. DECIMAL POINTS IN NUMERIC DATA FIELDS

Many numeric data fields contain decimal points, indicated on the schedules by a preprinted ▲. (The only valid indication of a decimal point is the preprinted ▲. Use of a period is an error on the part of the individual filling in the data.) Because it is preprinted, it is not keyed. In order that the data field contents be

FPC Form 151 (5-76)

properly entered in the RIS data base, all positions to the right of a preprinted decimal in a data field on a schedule must be keyed.

G. CONSOLIDATED EXAMPLE

This example illustrates the rules given above, as applied to an entry on line 16 of page 2 of a hypothetical Schedule 99.

Data Field Type:
a n n n n n n n n n n

Data Field Length:
35 10 10 8.2 3.3 10 10 10 10 10 10

Data Field Contents:
MIDWESTERN INTERNATIONAL 350 @ 673▲21 24▲2bb 750000 b b 550000 622490 3575829400

Keyed Records: A Record -
0099000216AMIDWESTERNbINTERNATIONAL|350|@|67321|24200|750000||550000|622490|

B Record -
0099000216B3575829400|@

H. CHARACTER SET

Keying should be accomplished using the standard EBCDIC alphabetic and numeric character set. The following are the only valid special characters which can be used:

EBCDIC SPECIAL CHARACTER

CHARACTER	EBCDIC HEX REP	CARD PUNCH	CHARACTER	EBCDIC HEX REP	CARD PUNCH
.	4B	12-3-8	-	6Ø	11
(	4D	12-5-8	/	61	Ø-1
+	4E	12-6-8	,	6B	Ø-3-8
&	5Ø	12	%	6C	Ø-4-8
$	5B	11-3-8	?	6F	Ø-7-8
*	5C	11-4-8	:	7A	2-8
)	5D	11-5-8	'	7D	5-8
;	5E	11-6-8	=	7E	6-8
			"	7F	7-8

Data Field Separator:
| 4F 12-7-8

Data Line Terminator:
@ 7C 4-8

FPC Form 151 (5-76)

I. MAGNETIC TAPE SUBMISSION

The magnetic tape to be submitted shall be compatible with IBM 370/OS using 9-track standard IBM OS labels or using 9-track non-labelled tapes in EBCDIC code format at 800 or 1600 bpi. The logical record length shall be 80 characters. The blocking factor should be compatible with IBM OS tape blocking conventions.

All respondents submitting magnetic tape(s) must enclose with the tape the following information: name of company, name of contact about the magnetic tape and telephone number. Additionally the following information must be specified for labelled and non-labelled tapes:

LABELLED AND NON-LABELLED TAPES
- whether 800 or 1600 bpi
- whether labelled or non-labelled

LABELLED TAPES
- internal volume/serial number of tape
- data set name

NON-LABELLED TAPES
- block size in characters (length of physical record)
- external volume/serial number of tape

		1 of 11

I. GENERAL INFORMATION

These instructions apply to those schedules:

- Containing basic information on the respondent's corporate profile
- Providing detailed financial data about the Corporation's business activities.

The group of corporate and financial schedules represent a comprehensive selection of data covering the respondent's entire financial accounting operation.

The classification of respondents are:

a. Class A: Natural gas companies, public utilities, and licensees having operating revenues of $2,500,000 or more.

b. Class B: Natural gas companies, public utilities, and licensees having operating revenues of $1,000,000 or more but less than $2,500,000.

c. Class C: Natural gas companies, public utilities, and licensees having operating revenues of $150,000 or more but less than $1,000,000.

d. Class D: Natural gas companies, public utilities, and licensees having operating revenues of $25,000 or more but less than $150,000.

The schedules are organized into two subgroups based upon respondent reporting requirements: (1) annual or (2) monthly submissions. The grouping of schedules into their respective submission subgroups together with a reference to the old FPC form relationships is shown below:

FPC Form 151
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
		2 of 11

Subgroup	Respondent Category	Schedule Number(s)	Old FPC Form	Submission Date
Annual Submissions				
1	Class A & Class B (Electric Utilities and Licensees)	0101-0187,0213-0214,0695-0698,0704(less 0103,0109,0115,0117,0119,0126,0127,0130,0131,0142,0153,0157,0158,0165,0166,0172,0175,0176,0178,0180-0186)	1	Annually (on or before March 31st
2	Class A & Class B (Natural Gas Companies)	0101-0181,0187,0189(less 0103,0109,0118,0119,0131,0165,0166)	2	Annually (on or before March 31st)

		4 of 11

II. STANDARD DEFINITIONS AND CODES

A. UNIFORM SYSTEMS OF ACCOUNTS

The required submission for Class A, Class B, Class C and Class D natural gas pipeline and electric utilities and licensees will be prepared in conformity with the "Uniform Systems of Accounts for Natural Gas Companies" or "Uniform Systems of Accounts for Public Utilities and Licensees" prescribed by Part 101, 104, 201 and 204 of Title 18 CFR. All mention of accounts, accounting requirements and terminology are to be interpreted in accordance with the said classifications.

For Municipal Electric Utilities and Federal Projects, the required submissions should be filled out in accordance with the individual schedule instructions which provide titles of data requirements to fit special respondent cases. Account numbers are related to each of the data titles to assist internal processing of data.

B. ACCOUNT NUMBERING SYSTEM

The new reporting system requires five digit numbers. In reporting the account numbers for the Uniform Systems of Accounts, the respondent must add zeros, either one or two as appropriate, after the number to complete the five digit system. For example, Account 101, Plant in Service, must be reported as Number 101.00; Account 419.1., Allowance for Funds Used During Construction, must be reported as 419.10.

C. SUPPLEMENTAL ACCOUNT NUMBERS

A system of Supplemental Account Numbers have been developed to accommodate the processing of the following types of information:

- Required data items that do not have assigned Uniform Systems of Account numbers (e.g., total assets, net income, etc.)
- Respondents with several reporting departments (e.g., electric, gas, steam, common, other)

FPC Form 151
(3-76)

UMI

- Required additional breakdown of data from existing account numbers (e.g., depreciation expense, deferred taxes, etc.)

These categories of information add to and/or expand the data identified by the Uniform Systems of Accounts. The Supplemental Account Numbers are a necessary control to insure uniform reporting of certain data elements and will assist in the efficient processing of the various categories of information.

From the above considerations, many Supplemental Account Numbers are expressed using previously undefined numbers from the Uniform Systems of Accounts:

- A three digit code (e.g., 010.00 - Sources of Funds - Operation - Net Income) or
- A three digit code with decimal (e.g., 046.10 - Total Salaries and Wages)

Further, some existing accounts in the Uniform Systems of Accounts were expanded by addition of a decimal, as:

- Accumulated Deferred Income Taxes - Accelerated Amortization (281) expanded to
- Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities (281.20)

Finally, to indicate reporting by different departments internal to the respondent's operations, a second decimal place was added to any existing Uniform System of Account number or any new Supplemental Account number as shown in the following examples:

FPC Form 131 (3-76)

Example 1:

Uniform System of Account Number	Description
101	Plant in Service
expanded to -	
Supplemental Account	**Description**
Electric Respondents	
101.01	Plant in Service - Electric
101.02	Plant in Service - Gas
101.03	Plant in Service - Common
101.04	Plant in Service - Steam
101.05	Plant in Service - Other
Gas Respondents	
101.01	Plant in Service - Gas
101.02	Plant in Service - Electric
101.03	Plant in Service - Common
101.05	Plant in Service - Other

Example 2:

Supplemental Account	Description
281.20	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities
expanded to -	
Electric Respondents	
281.21	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities - Electric
281.22	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities - Gas
Gas Respondents	
281.21	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities - Gas
281.22	Accumulated Deferred Income Taxes - Accelerated Amortization - Pollution Control Facilities - Electric

FPC Form 131 (3-76)

The instructions for each schedule list the specific account numbers or indicate where the respondent is required to report departmental information on the basis of supplemental account numbers.

D. SELECTED DEFINITIONS

The following definitions pertain to the indicated subgroups of Corporate and Financial schedules:

1. Annual Submission (Natural Gas Pipeline Respondents)

a. Gas Volumes: All gas volumes will be reported in MMCF rounded to three decimal places. Pressure base of gas volumes reported will be 14.73 PSIA at 60° Fahrenheit, pursuant to Exhibit H of Circular No. A-46, of the Bureau of the Budget issued February 1966.

b. Natural Gas means either natural gas unmixed or any mixture of natural and manufactured gas.

c. BTU per Cubic Foot: The total heating value expressed in BTU, produced by the combustion, at a constant pressure, of the amount of the gas which would occupy a volume of one cubic foot at a temparature of 60° Fahrenheit if saturated with water vapor and under a pressure equivalent to that of 30 inches of mercury at 32° Fahrenheit and under standard gravitational force (980.665 cm. per second^2) with air of the same temperature and pressure as the gas, when the products of combustion are cooled to the initial temperature of gas and air when the water formed by combustion is condensed to the liquid state. (Sometimes called gross heating value or total heating value).

2. Annual Submission (Electric Operating Respondents)

a. Electric Plant: A unit or group of units of the same or different generating type as long as they can be considered at the same physical site.

b. Electric System: The physically connected generation, transmission, distribution, and other facilities operated as an integral unit under one control, management, or operating supervision.

FPC Form 131 (3-76)

c. Electric Utility: All enterprises engaged in the production and/or transmission and/or distribution of electricity for use by the public, including investor-owned, cooperatively-owned, government-owned (municipal systems, Federal agencies, state projects, and public power districts); and where the data are not separable, those industrial plants contributing to the public supply.

3. Annual Submission (Licensees)

a. The term "project" means all the property covered by a single license number.

b. The term "Federal Project" means those electric projects operating under the supervision of the Alaska Power Administration, Bonneville Power Authority, Bureau of Indian Affairs, Colorado River Storage Project, Southeastern Power Administration, Southwestern Power Administration, Tennessee Valley Authority, U.S. Bureau of Reclamation, and U.S. Corps of Engineers.

4. Monthly Submission (Natural Gas Pipeline Respondents)

a. Imports are gas receipts into the United States of America from a foreign country.

b. Exports are gas deliveries out of the United States of America to a foreign country.

c. Firm Gas Sales to industrial customers are those made under schedules or contracts which anticipate no interruption.

d. Off-Peak Gas Sales to industrial customers are those made under schedules or contracts on a firm basis for periods specified for other than times of seller's peak requirements.

e. Interruptible Gas Sales to industrial customers are those made under schedules or contracts which provide for curtailment by the seller in order to protect service to firm customers.

FPC Form 131 (3-76)

UMI

III. GENERAL INSTRUCTIONS

A. ALL SCHEDULES

1. Information on Utility Departments

For companies having more than one utility department, report information on the basis of total company operations except where otherwise requested on the particular schedule.

2. Changes in Previous Year Reported Figures

Beginning of the year balances are not required on most of the financial schedules. Where amounts reported in the previous year (balance end of year) do not agree with beginning of year amounts for any reason, the respondent shall furnish an explanation of the reason in a footnote.

B. ANNUAL SUBMISSION SCHEDULES

1. Additional Submission

In addition to filing the Annual Submission of Schedules, each respondent shall also file with the Commission, immediately upon publication, five copies of its latest annual report to stockholders and of any annual financial or statistical report regularly prepared and distributed to bond-holders, security analysts, or industry associations. If reports to stockholders are not prepared, so state on Schedule 0112, "Annual Notes to Financial Data".

2. Letter by Certified Public Accountant

Class A and Class B respondents shall file with the original and each copy of the "Annual Submission of Schedules" a letter or report (required by Sections 41.10 - 41.12 of the Commission's Regulations under the Federal Power Act or Sections 158.10 - 158.12 of the Commission's Regulations under the Natural Gas Act) signed by independent certified accountants or independent licensed public accountant, certified or licensed

FPC Form 131 (3-76)

by a regulatory authority of a State or other political subdivision of the United States until December 31, 1975 and beginning January 1, 1976, and each year thereafter, only independent certified public accountants and independent licensed public accountants (licensed on or before December 31, 1970) will be authorized in attesting to the conformity, in all material respects, of the following schedules in this report with the Commission's applicable Uniform Systems of Accounts (statement certification includes applicable notes relating thereto) and published Commission accounting releases:

Schedule Number	Description
0124	List of Accounts (Part I or Part II)
0133	Long Term Debt
0136	Computation of Federal Income Tax Accruals for the Year
0137	Consolidated Federal Income Tax Return Information
0138	Accumulated Deferred Income Taxes
0139	Accelerated Amortization of Facilities
0140	Tax Deferrals Related to Other Property
0143	Particulars for Estimating Depreciation, Depletion and Amortization of Utility Plant
0144	Plant in Service or All Utility Plants
0145	Completed Construction Not Classified
0149	Plant and Production Properties Held for Future Use
0150	Construction Work in Progress
0151	Accumulated Provision for Depreciation of Utility Plant - Part I
0152	Accumulated Provision for Depreciation of Utility Plant - Part II
0154	Common Plant and Expense Data - Part II

FPC Form 131 (3-76)

Schedule Number	Description
0155	Common Plant and Expense Data - Part I
0159	Operating Revenues
0162	Detailed Account Data - Part II
0163	Detailed Account Data - Part III (Only Information Pertaining to Retained Earnings Accounts)
0164	Detailed Account Data - Part IV (Only Information Pertaining to Plant Materials and Operating Supplies and Prepayments (Gas Respondents))
0187	Reconciliation of Reported Net Income with Taxable Income

The letter or report shall be in the following form unless unusual circumstances or conditions, explained in the letter or report, demand that it be varied:

> In connection with our regular examination of the financial statements of for the year ended , on which we have reported separately under date of , we have also reviewed schedules of the annual submission for the year filed with the Federal Power Commission, for conformity in all material respects with the requirements of the Federal Power Commission as set forth in its applicable Uniform Systems of Accounts and published Commission accounting releases. Our review for this purpose include such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. Based on our review, in our opinion the accompanying schedules identified in the preceding paragraph (except as noted below)* conform in all material respects with the accounting requirements of the Federal Power Commission as set forth in its applicable Uniform Systems of Accounts and published accounting releases.
>
> * Parenthetical phrase inserted only when exceptions are to be reported.

The letter or report shall state, additionally, which, if any, of the schedules set forth above do not conform to the Commission's requirements, and shall describe the descrepancies that exist.

FEDERAL POWER COMMISSION

Corporate and Financial Reports for Class C and Class D
Electric Utilities and Licensees

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0100 INDEX OF FPC PUBLIC USE SCHEDULES SUBMITTED		1 of 2

I. DESCRIPTION

This schedule shall be used to identify the schedules which were submitted by each respondent.

II. GENERAL INFORMATION

A. This schedule shall be submitted by all Federal Power Commission respondents.

B. This schedule shall be completed for each submission of schedules to the Federal Power Commission.

C. The report period date required on line two of this schedule shall he the final date of the period covered by the submission i.e., if data is reported on a calendar year basis, the date to be reported is December 31, 1976, in the format MMDDYY
123176.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1	Date Received in Mail Room (N6): This data field is for Federal Power Commission internal processing only. (TMDATE)
2	Date Received in DBCG (N6): This data field is for Federal Power Commission internal processing only. (TMDATE)
3 (Key)	Schedule Number (N4): Enter the schedule number of each schedule being submitted in this submission.
4	Schedule Contact Name (A35): Enter the name of the individual to contact about the schedule number reported in data field 3 above. The format for the name is: Last Name, First Name or Initial, Middle Initial. (IDNAME)
5	Schedule Contact Telephone Number (A12): Enter the area code and telephone number, in the format NNN-NNN-NNNN. Be certain to over strike the preprinted hyphens (-).
6	Number of Pages (N4) NO: Enter the number of pages submitted for the schedule reported in data field 3 above.
7	Indicate Primary Reporting Media, Hardcopy or Tape (N1): Enter "1" if hardcopy is being submitted; or enter "2" if tape is being submitted. (INETOR)

UMI

RAS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0101	GENERAL CORPORATE INFORMATION	1 of 2

I. DESCRIPTION

This schedule is used to collect general corporate information for a basic profile on the respondent.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Class A and B respondents shall complete all data fields on this schedule in their first submission. Class C and Class D respondents complete data fields 1 thru 6 only. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions, however, if data fields 10 and 11 are not being submitted, do not complete them as key data fields.

C. Report in data fields 1-9 general information on location of books, incorporation data and public accountants. Report in both data fields 10 and 11 information on the type of service provided (10) and the state(s) where the service is provided (11).

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Name of Officer with Custody of Corporate Books (A22): (IDNAME)
2	Location of Main Books (A22): Enter the state and city where general corporate books are kept. Enter the state appreviation, from the Register of Data Standards, IDSTAT, in the first two postions of this data field, followed by the city name (IDCITY).
3	Location of Other Books (A22): Enter the state and city where any other corporate books of accounts are kept, if different from that at which the general corporate books are kept. Enter the state abbreviation, from the Register of Data Standards, IDSTAT, in the first two positions of this data field, followed by the city name (IDCITY).
4	Incorporation State (A2): Enter the state abbreviation, from the Register of Data Standards, IDSTAT.
5	Incorporation Date (N6) Enter the date the respondent was incorporated, in the format MMDDYY. (TMDATE)
6	Special Law Reference (A20): If incorporated under a special law, give reference to such law. If not incorporated, state type of organization. (IDDESC)

FPC Form 151 (5-76)

RAS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0101	GENERAL CORPORATE INFORMATION	2 of 2

Data Field Number	Instructions
7	Public Accountant (A22): Enter the name of the respondent's independent certified public accountant or independent licensed public accountants (licensed on or before December 31, 1970). (IDNAME)
8	Address of Public Accountant (A22): Enter the state and city. Enter the state abbreviation, from the Register of Data Standards, IDSTAT, in the first two positions of this data field followed by the city name (IDCITY). Date Public Accountant Initially Engaged (N6): Enter the date the public accountant was initially engaged, in the format MMDDYY. The latest year should only be shown if a change in accountants was made during the year. (TMDATE)
10 (Key)	Type of Service (A3): Enter separately each type of utility service furnished, from the following alphabetic abbreviations: (TYUTIL) GAS = Gas ELC = Electric WTR = Water OTH = Other
11 (Key)	State of Service (A2): Enter the abbreviation for each state where respondent supplies the service listed in data field 10 above, from the Register of Data Standards, IDSTAT.

FPC Form 151 (5-76)

RAS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0102	CONTROL OVER RESPONDENT	1 of 2

I. DESCRIPTION

This schedule is used to collect information on any corporations, business trusts or similar organizations or combinations of such organizations which held control over the respondent any time during the year.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents. Class C and Class D respondents complete data fields 1 thru 4 only.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields) and changed values, additions, and deletions.

C. In completing this schedule refer to the Uniform System of Accounts for a definition of control.

To summarize:

Direct control is that which is exercised without interposition of an intermediary.

Indirect control is that which is exercised by the interposition of an intermediary which exercises direct control.

Joint control is that in which neither interest can effectively control or direct action without the consent of the other, as where the voting control is equally divided between two holders, or each party holds a veto power over the other. Joint control may exist by mutual agreement or understanding between two or more parties who together have control within the meaning of the definition of control in the Uniform System of Accounts, regardless of the relative voting rights of each party.

D. Report in data fields 1-3 information on companies who directly control the respondent. Report in data field 4 if control over respondent was held under a trust arrangement. For natural gas respondents, if other companies are controlled by the organization listed in data field 1, list in data field 5 the name of each such company and complete data fields 6 and 7. For electric respondents, if control over respondents was in a holding company, list in data field 5 the name of each company in the chain of ownership from respondent to parent organization and complete data field 7.

III. DETAILED INSTRUCTIONS

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0111	NOTES TO SECURITY HOLDERS AND VOTING POWERS	1 of 2

I. DESCRIPTION

This schedule is used to collect additional information related to (a) stock options, warrants or rights outstanding at end of the year, and (b) the voting rights and privileges carried by any security other than the repondents common and preferred stock.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule annually as necessary to support schedule Nos. 0107 and 0108.

C. This schedule supports information included on two schedules:

Schedule 0107 - "Security Holders and Voting Powers - Total"

Schedule 0108 - "Security Holders and Voting Powers."

D. Furnish particulars concerning any options, warrants, or rights outstanding at the end of the year for others to purchase securities of the respondent or any securities or other assets owned by the respondent. Particulars should include names of the parties granted the options, warrants or rights, the prices to be paid, expiration dates, and other material information relating to the exercise of the securities or assets. Specify the name of any officer, director, associated company, or any of the ten largest security holders who hold stock options warranty or rights at the end of the year.

E. Give complete description of any other security carrying voting rights and explain the circumstances whereby the security became vested with voting rights. If any class or issue of security (other than common or preferred stock) has any special privileges in the election of directors, trustees or managers, or in the determination of corporate action by any method, explain the extent and circumstances.

F. This schedule is not applicable to convertible securities or to any securities substantially all of which are outstanding in the hands of the general public where the options, warrants, or rights were issued on a prorata basis.

G. If the respondent needs additional space to complete the text information (data field 4) for any particular note, use a separate entry, repeating the same information in data fields 1 and 2 and using successive numbers (1, 2, 3, etc.) in data field 3.

DETAILED INSTRUCTIONS: SCHEDULE 0112	ANNUAL NOTES TO FINANCIAL DATA	1 of 4

I. DESCRIPTION

This schedule is used to collect information deemed necessary for adequate disclosure to support the financial data, including the financial statements, presented to the Commission in the annual filing, to include the following aspects:

A. Disclosures of all important accounting policies.

B. Disclosure of accounting changes made during the year which had significant effect on the reported net income.

C. Disclosure of all contingent assets or liabilities or significant commitments existing at the end of the year which have not been reflected in the financial data.

D. Disclosure of any other important changes occurring during the year which have not been provided elsewhere in the filing.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule annually.

C. Respondents will use the following guidelines to report disclosure information, using titles underlined below as the Type of Note in data field 1:

1. Accounting Policies: In disclosing its accounting policies, the respondent should identify and describe the accounting principles it has utilized, the methods of applying those principles and the impact of such policies on the financial data submitted. Examples of accounting policies that may be considered significant together with suggested minimum disclosure requirements include:

(a) Plant and Depreciation

(b) Federal Income Tax Expense

(1) Details on the accounting treatment for Federal income taxes (flow through, full normalization, partial normalization).

(2) Details on the ratemaking treatment for Federal income taxes (flow through, full normalization, partial normalization).

(3) Details on accounting for the allocation of income taxes between utility and non-utility segments of company operations.

(4) Details on the accounting for IRS settlements as claim for refunds.

(5) Details on the accounting for recognition of operating loss carrybacks and carryforwards.

FPC Form 131
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0112	ANNUAL NOTES TO FINANCIAL DATA	2 of 4

(6) If the provisions of the tax laws are being utilized with respect to plant property (ADR class life and liberalized depreciation, repair allowance, etc.) for Federal income tax purposes and the resultant benefits are being flowed through the income statement, disclose the effect of such on the income statement.

(c) Investment Tax Credits

(1) Details on the method of accounting adopted for investment tax credits utilized in the current year.

(2) Details on whether the respondent has consented or is required by a regulatory commission to pass the benefits of investment tax credits along to consumers.

(3) For each year beginning with 1971, details on the ratemaking treatment of these credits to include option for (1) rate base treatment, (2) ratable flow through, (3) flow through in accordance with Section 46 (f) of the Internal Revenue Code, or (4) other method.

(d) Equity Accounting

(e) Unbilled Revenues

(f) Deferred Fuel Cost

Details on the accounting and ratemaking treatment for deferred fuel cost, to include whether specific approvals have been received from regulatory commissions to defer and recover these costs for ratemaking purposes.

(g) Deferrals of Expense or Other Items

(h) Reacquisition of Long Term Debt

(1) Details on the amount of gains and/or losses for the year from reacquistion of long term debt.

(2) Details on the accounting for such gains or losses (included in income/amortized).

(3) Details on the accounting treatment of unamortized debt discount and expense if different from the requirements of the Uniform System of Accounts.

(i) Pension Plan

(1) Details on the method of funding.

(2) Details on the pension cost for the current year charged to expense and capital accounts.

FPC Form 131
(3-76)

UMI

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0112	ANNUAL NOTES TO FINANCIAL DATA	3 of 4

(3) Details on the amount of unfunded vested benefits.

(4) Details on the effect of the Security Act of 1974 on annual pension cost.

(5) Details on any changes in method of funding for the year.

(j) Research and Development

(k) Other

2. Accounting Changes: Information on important accounting changes should include the nature of and justification for the change, and should include the dollar effect of the change on the reported financial data. The respondent should utilize the following definition of an accounting change taken from Opinion No. 20 of the Accounting Principles Board for purposes of this requirement.

The term accounting change means a change in (a) an accounting principle, (b) an accounting estimate, or (c) the reporting entity.

In considering the importance of an accounting change, the respondent should consider the impact (or estimated impact), on not only the financial data for the current reporting period, but should also consider the financial impact of the changes on subsequent years results of operations.

3. Contingencies or Commitments: Information on all contingent assets or liabilities or significant commitments shall include all pertinent facts surrounding such matters. Examples of matters that should be reported in this section include:

(a) Particulars of all important legal proceedings pending at the end of the year and the results of proceedings culminated during the year; including the related accounting for any settlements.

(b) Commitments related to the respondent's construction program.

(c) Long term commitments on the purchase of fuel supply.

(d) Short term bank borrowing arrangements including open lines of credit, compensating balance arrangements, commitment fees, and average annual effective interest rates.

(e) Details on obligations incurred or assumed by respondent as guarantor for performance by another of any agreement or obligation. Such information shall include the amount of the obligation and the name of the commission authorizing assumption, if any, and date of authorization.

4. Other Important Changes: Information on other important changes during the year shall disclose all significant changes occuring during the year not provided for elsewhere in the Schedules in this filing.

FPC Form 131
(3-76)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0112	ANNUAL NOTES TO FINANCIAL DATA	4 of 4

Examples of changes include changes in articles of incorporation or amendments to the corporate charter; acquisition of ownership in other companies; recognition, merger or consolidation with other companies, particulars if control over respondent was held by a receiver or trustee.

For securities assumed during the year, the name of the company from which the liability was assumed and other particulars of the transaction should be included in data field 4. For Class A and B respondents, if any unamortized discount, premium, expenses and/or gains or losses were taken over into the respondent's books, details of these amounts should be included in schedule 0123, "Securities Assumed, Refunded or Retired during the Year," data fields 5-9. Additional disclosure on the respondent's accounting policy with respect to gains and losses on security transactions should be included under item (h), above, of this schedule.

D. If the respondent needs additional space to complete the text information (data field 4) for any particular note, use a separate entry, repeating the same information in data fields 1 and 2 and using successive numbers (1, 2, 3, etc.) in data field 3.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Type of Note (A60): Examples: (IDDESC) Policies - Income Tax Expense Policies - Equity Accounting Changes - Unbilled Revenues Contingencies/Commitments - Construction Program
2	Note Number (N1): Use successive numbers to designate more than one occurrence of the type of note listed in data field 1 above. If only one occurrence is needed for a particular type note, enter "1". (NRCADL)
3	Entry Continuation Number (N1): Use successive numbers to designate continuation entries of textual information for a particular note. If only one textual entry is needed to report the required disclosure, enter "1" in this data field. (NRCADL)
4	Text of Note (A249): (IDDESC)

RIS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0124	LIST OF ACCOUNTS - PART III (ELECTRIC CLASS C AND CLASS D)	1 of 9

I. DESCRIPTION

This schedule is used to collect the end of year balance or the amount for the year for certain accounts of the Uniform System of Accounts and certain other financial data that has been categorized as Supplemental Accounts. (For a discussion of the relationship between the two systems of accounts see General Instruction for Corporate, Economic and Other Financial Schedules.) This schedule replaces several former schedules which reported details of:

- Comparative Balance Sheet
- Statement of Income for the Year
- Statement of Retained Earnings for the Year
- Other supporting schedules including account balances from numerous schedules

The account numbers to be used from the two systems of accounts are listed in General Information, II-C.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class C and Class D Electric respondents.

B. Reapondents shall complete all data fields on this schedule annually.

C. The data to be reported is structured upon the account groupings from the Uniform System of Accounts augmented by a system of Supplemental Accounts to integrate related data. Included on this schedule are five account groupings, each identified by title and source:

Account Group	Title	Source
1	Balance Sheet Accounts	Uniform System of Accounts/ Supplemental Accounts
2	Income Statement Accounts	Uniform System of Accounts/ Supplemental Accounts
3	Retained Earnings Accounts	Uniform System of Accounts
4	Other Accounts	Uniform System of Accounts/ Supplemental Accounts
5	Departmental Accounts	Supplemental Accounts

Those respondents with only one utility department in their internal organizations shall report groups 1 through 4, while those with more than one department will report groups 1 through 5.

Respondents should start each account group on a new schedule collection sheet. Within each group, account numbers should be listed according to numerical sequence.

DETAILED INSTRUCTIONS: SCHEDULE 0124	LIST OF ACCOUNTS - PART III (ELECTRIC CLASS C AND CLASS D)	8 of 9

5. Departmental Accounts: Respondents with more than one utility department in their internal organization are required to report the following plant and income accounts on the basis of operating utility departments. Supplemental Account numbers have been established to collect this data. The Supplemental Account numbers will consist of a second decimal place after the appropriate Uniform System of Account numbers as follows: Electric department - XXX.X1; gas department - XXX.X2; common - XXX.X3; other departments - XXX.X5. When the basic number from the Uniform System of Accounts is a whole integer (e.g., 101), the supplemental account number will add a zero in the first decimal place (e.g., 101.0) and then the department code (e.g., 101.01). This has been adopted to insure uniformity with those few accounts from the Uniform System of Accounts with a decimal place (e.g., 409.1).

Uniform System of Accounts	Supplemental Accounts	Description	Details on Related Schedules
		UTILITY OPERATING INCOME	
400.00	XXX.X1 to	Operating revenues

DETAILED INSTRUCTIONS: SCHEDULE 0132	CAPITAL STOCK	1 of 2

I. DESCRIPTION

This schedule is used to collect selected details on capital stock included in Account 201.00, Common Stock Issued, Account 204.00, Preferred Stock Issued, and Account 217.00, Required Capital Stock.

II. GENERAL INFORMATION

This schedule shall be submitted by the following categories of respondents:

Respondent Category	Data Fields
(1) Class A & Class B Natural Gas and Electric	All
(2) Class C & Class D Natural Gas and Electric	1-4, 6, & 7

B. Respondents shall complete all specified data fields on this schedule annually.

C. Report the particulars called for concerning common and preferred stock at end of year. Report separately each series of and class of preferred stock.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2 (Key)	Class and Series of Stock (A40): The designation of each class of preferred stock shall show the dividend rate and whether the dividends are cumulative or noncumulative. Example: Preferred Series A 6% Cumulative. Shares authorized for each class of preferred stock should be shown once under the first series of each class as listed in data field 2. (IDDESC)
3	Number of Shares Authorized by Charter (N8) NO: Show the number of shares authorized by the articles of incorporation (as amended) at end of year.
4	Par or Stated Value Per Share (N5) DOL.
5	Call Price End of Year (N5) DOL.
6	Shares of Capital Stock Outstanding (N8) NO: State the total number of shares outstanding per balance sheet without reduction for amounts held by respondent.
7	Amount of Capital Stock Outstanding (N9) DOL. State the total amount outstanding per balance sheet without reduction for amounts held by respondent.

FPC Form 131

R&S	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0141	INVESTMENT TAX CREDITS	1 of 2

I. DESCRIPTION

This schedule is used to collect information related to investment tax credits for the years 1962 to date.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule in their first submission. On subsequent submissions, respondents shall submit only appropriate identification (key data fields and data fields 2 and 4) and changed values, additions, and deletions.

C. This schedule shall be prepared by the respondent regardless of the method of accounting adopted for the investment tax credits. The schedule collects details by years for all investment tax credits generated and utilized by the respondent beginning with 1962 through the current year. The required information for each year should be presented as adjusted at year end to reflect corrections of estimated amounts, carryback or carryforward of unused credits.

D. In the initial submission of this schedule, respondents will indicate Code "1" in data field 3 for each year's data. For subsequent submissions, respondents will use "1" (original) or "2" (corrected) as appropriate.

E. For electric respondents with more than one department, report tax credit for the electric department and the total of tax credits for all other departments. For natural gas respondents with more than one department, report tax credits for the gas department and the total of tax credits of all other departments.

II. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Year (N4): Beginning with 1962 enter the year. (TMYEAR)
2	Rate (N2) PCT: Indicate 03 percent, 04 percent, 07 percent, 10 percent, 11 percent credits or other appropriate percent credits.
3	Indicator Original/Corrected (N1): Enter "1" at time of original submission. On subsequent submissions, enter "1" (original) or "2" (corrected) as appropriate. (INETOR)
4	Department (A3): Enter one of the following abbreviations to indicate department or operation: (TYUTIL) ELC = electric GAS = gas OTH = other

DETAILED INSTRUCTIONS: SCHEDULE 0144	PLANT IN SERVICE OR ALL UTILITY PLANT CLASS C AND CLASS D - PART II	1 of 2

I. DESCRIPTION

This schedule is used to collect detailed information on the additions, retirements, adjustments, transfers and end of year balances for utility plants.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class C and Class D Natural Gas and Electric respondents.

B. Respondents shall complete all data fields on this schedule annually.

C. The following Uniform System of Accounts and Supplemental Accounts are to be reported by the appropriate respondents on this schedule.

Uniform System of Accounts	Supplemental Accounts	Description
Electric Respondents		
		ELECTRIC PLANT IN SERVICE
	303.90	Intangible plant
	319.90	Steam production
	339.90	Hydraulic production
	347.90	Other production
	359.90	Transmission plant
	379.90	Distribution plant
	399.90	General plant
101.00		Electric plant in service (total)
102.00		Electric plant purchased or sold
103.00		Electric plant in process of reclassification
104.00		Electric plant leased to others
105.00		Electric plant held for future use
107.00		Construction work in progress - electric
114.00		Electric plant acquisition adjustments
116.00		Other electric plant adjustments
118.00		Other utility plant
	119.90	Total Utility Plant
Natural Gas Respondents		
		GAS PLANT IN SERVICE
	303.90	Intangible plant
	320.90	Manufactured gas production plant
	339.90	Natural gas production and gathering plant
	347.90	Products extraction plant
	349.90	Total production plant
	359.90	Underground storage plant
	363.90	Local storage plant
	372.90	Transmission plant

Uniform System of Accounts	Supplemental Accounts	Description
	389.90	Distribution plant
	399.90	General plant
101.00		Total gas plant in service
102.00		Gas plant purchased or sold
103.00		Gas plant in process of reclassification
104.00		Gas plant leased to others
105.00		Gas plant held for future use
107.00		Construction work in progress - gas
114.00		Gas plant acquisition adjustments
116.00		Other gas plant adjustments
118.00		Other utility plant
	119.90	Total Utility Plant

D. Credit balances in data fields 2, 4, 5 and 6 should be indicated by a minus sign (-). Debit balances for plant retired (data field 3) should also be indicated by a minus sign.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): Enter the appropriate plant account number.
2 (Key)	Additions to Plant (N9) DOL: Enter additions for current year.
3	Retirements to Plant (N9) DOL: Enter retirements for current year.
4	Adjustments to Plant (N9) DOL: Enter the dollar amount of adjustments to plant account listed in data field 1 above.
5	Transfers of Plant in Service (N9) DOL: Enter reclassifications or transfers to plant within utility plant accounts or transfer from the detail plant in service function to another function.
6	Plant Balance End of Year (N10) DOL.

FPC Form 151
(5-76)

RAS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0159	OPERATING REVENUES	1 of 2

I. DESCRIPTION

This schedule is used to collect information pertaining to sales of electricity or natural gas and the number of utility customers for the year.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. Natural gas respondents shall complete data fields 1-3 annually. Electric respondents shall complete data fields 1, 4 and 5 annually. Jurisdictional respondents for both natural gas and electric shall complete all data fields annually.

C. Report the requested information for the year for each of the following prescribed accounts:

1. Class A, Class B, Class C and Class D Electric respondents:

Uniform System of Accounts	Supplemental Accounts	Description
440.00		Residential sales
442.00		Commercial and industrial sales
	442.10	Small or commercial customers
	442.20	Large or industrial customers
444.00		Public street and highway lighting
445.00		Other sales to Public Authorities
447.00		Sales for resale
448.00		Interdepartmental sales
449.00		Other sales
	449.90	Total Sales of Electricity

2. Class A, Class B, Class C and Class D Natural Gas respondents:

Uniform System of Accounts	Supplemental Accounts	Description
480.00		Residential sales
481.00		Commercial and industrial sales
	481.10	Small or commercial customers
	481.20	Large or industrial customers
482.00		Other sales to Public Authorities
483.00		Sales for resale
484.00		Interdepartmental sales
	485.90	Total Sales of Gas

D. Number of customers shall be reported on the basis of number of meters, plus number of flat rate accounts, except that where separate meter readings are added for billing purposes, one customer should be counted for each group of meters so added. The average number of customers means the average of the 12 figures at the close of each month.

FPC Form 131
(5-76)

RAS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0159	OPERATING REVENUES	2 of 2

E. Natural gas means either natural gas unmixed or any mixture of natural and manufactured gas.

F. The classification of commercial and industrial sales according to small customer or commercial and large customer or industrial, may be according to the basis of classification regularly used by the respondent, provided such basis of classification is not greater generally than 1000 KW of demand for electricity or 200,000 MCF per year for natural gas companies.

III. DETAILED INSTRUCTIONS

The following data field-by-data field instructions are cross-referenced to the corresponding schedule layout by data field number:

Data Field Number	Instructions
1 (Key)	Account Number (N3.2): (ACCTML)
2	Average Number of Monthly Natural Gas Customers (N7) NO.
3	Annual MMCF of Natural Gas Sold (N9.3) MMCF: Enter the annual MMCF, rounded to three decimal places.
4	Average Number of Monthly Electric Customers (N7) NO.
5	Annual MWH of Electricity Sold (N10) MWH.

FPC Form 131
(5-76)

RAS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0161	DETAILED ACCOUNT DATA - PART I	1 of 8

I. DESCRIPTION

This schedule is used to collect detailed information supporting the accounting entries of certain of the balance sheet accounts of the Uniform System of Accounts.

II. GENERAL INFORMATION

A. This schedule shall be submitted by Class A, Class B, Class C and Class D Natural Gas and Electric respondents.

B. The following accounts are included in this schedule:

Uniform System of Accounts	Supplemental Accounts	Description
123.00		Investment in associated companies
123.10		Investment in subsidiary companies
124.00		Other investments
136.00		Temporary cash investments
145.00		Notes receivable from associated companies
146.00		Accounts receivable from associated companies
181.00		Unamortized debt expense
187.00		Deferred losses from disposition of utility plant
189.00		Unamortized loss on reacquired debt
215.00		Appropriated retained earnings
223.00		Advances from associated companies
224.00		Other long-term debt
225.00		Unamortized premium on long-term debt
226.00		Unamortized discount on long-term debt
233.00		Notes payable to associated companies
234.00		Accounts payable to associated companies
256.00		Deferred gains from disposition of utility plant
257.00		Unamortized gain on reacquired debt

Class A and Class B respondents report the details for all accounts listed on this schedule. Class C and Class D respondents report the details for Account 215.00 only.

C. Respondents shall report the information for each account listed above as specified in Part III, Detailed Instructions. Not every data field is required for every account. The data fields for each account shall be reported annually.

D. Total debits and credits for each account listed on this schedule should be provided for as the last entry for each account in data fields 3 and 4. Report the word "Total" in data field 2. Then report in data field 3 the total debits to the account, and in data field 4 the total credits to the account.

III. DETAILED INSTRUCTIONS

Instructions, cross-referenced to the schedule layout by data field number, are given below for each account to be reported.

FPC Form 131
(5-76)

RAS	FEDERAL POWER COMMISSION REGULATORY INFORMATION SYSTEM	
DETAILED INSTRUCTIONS: SCHEDULE 0161	DETAILED ACCOUNT DATA - PART I	2 of 8

Accounts 123.00, 123.10, & 124.00

Report particulars for investments in associated and subsidiary companies and in other investments.

Investments in amounts of less than $10,000 may be grouped. For grouped items, enter the word "Other" in data field 2 together with the number of items grouped, i.e., Other (12). Report data for the grouped items in data fields 3, 4 and 5.

In reporting Account 123.10, include information pertaining to all investments other than common stock accounted for on the equity basis of accounting. Common stock investments under equity accounting should be included on Schedule 0125.

In reporting Account 124.00, do not include information pertaining to advances which are reported on Schedule 0142.

Data Field Number	Instructions
1 (Key)	Account Number (N3.2)
2 (Key)	Description (A50): List separately each investment included in these accounts at any time during the year by the following groupings: Stock Bonds Advances Notes Other Provide a brief description of each investment to include name of issuer and where appropriate, the date acquired, the date issued and interest rate, i.e., Stock - ABC Corporation - 8/25/75 Note - XYZ Co. - 5/10/75 - 8% Stock - BCD Inc. - 3/1/75 Advances - Jones Corp. Bonds - Industrial Development - 8% State "Total" as last entry for each account. (IDDFSC)
3	Debits - Amount (N9) DOL: Enter the amount of all purchases or other additions made during the year of the investment listed in data field 2 above.
4	Credits - Amount (N9) DOL: Enter the amount of all sales or other disposition made during the year of the investment listed in data field 2 above.
5	Balance End of Year (N9) DOL: Enter amount of investment at end of year.
